The former statute empowered the Minister to ascertain whether employers were observing the Act and orders, and to require employers to make certified statements as to names, addresses, wages and hours of employees, and any other information he might desire. The new Act provides that any person authorized in writing by the Minister may inspect premises, examine and take extracts from books, payrolls and other records of an employer relating to the wages, hours or conditions of labour of employees, and require employers or employees to produce records or documents in their possession and to give information on oath. Any person who obstructs an authorized representative of the Minister or fails to comply with his lawful requests is liable, on summary conviction, to a fine of from \$25 to \$100 and, in default of payment, to imprisonment for from ten days to one month.

A section of the old Act which invalidated an agreement by an employee to work for less than the minimum wage is amended to provide that such agreement is to have effect as if it stipulated for the minimum wage. Other provisions of the Act are similar to those of the original statute as enacted in 1919 and amended from time to time.

### Coal Mines

The Coal Mines Safety and Welfare Act was amended to transfer its administration from the Minister of Municipal Affairs to the Minister of Natural Resources. A provisional certificate to act as pit-boss for a period not exceeding sixty days, which might formerly be granted by an inspector, may now be granted only by the Minister on the recommendation of an inspector. An inspector receiving a report of an accident causing loss of life or serious personal injury must forward within forty-eight hours a written statement to the Minister setting forth the nature of the accident. The section enumerating the powers of an inspector was amended to enable him to perform such duties, other than those set forth in the section as may be prescribed from time to time by the Minister.

A Bill which was introduced but was withdrawn on motion for second reading would have amended the Coal Mining Industry Act, 1935, by giving the Lieutenant-Governor in Council power to license retail coal dealers. The principal Act, which provided for licensing of coal mine operators, was outlined in the LABOUR GAZETTE for May, 1935, at p. 146.

### Factories

An amendment to the Factories Act, which came into effect on May 1, 1936, brings within its scope factories in which three persons or less are employed.

### Weekly Holiday

The One Day's Rest in Seven Act which applies only to cities was amended to reduce the classes of employees who were exempt from the Act.

The following classes were formerly exempt:— watchmen, janitors or stationary boiler engineers; workers not usually employed for more than five hours per day; persons in managerial, supervisory or confidential positions; employees engaged in repairing or replacing equipment or machinery by reason of breakage or work of a similar emergency nature; and those employed during their period of rest, for the sole purpose of maintaining fires, setting sponges in bakeries or feeding and attending animals where such work is part of their usual duties. Statutory exemption is now given only to persons employed solely as watchmen, janitors, or in managerial positions and to those not usually employed for more than five hours per day. The section enabling the Minister to grant a permit exempting an employer and his employees for not more than a year in cases where compliance with the Act would work hardship, was amended to provide for exemption for any of such employees. The provision which enabled a penalty to be imposed on an employee contravening the Act was struck out. The amending Act came into effect on May 1, 1936.

A clause added to the weekly Half-holiday Act forbids an employer to suffer or permit any of his employees to be in his shop after 12.30 p.m. on a weekly half-holiday. A fine not exceeding \$25 may be imposed for infraction of this provision.

### Vocational Education

The Vocational Education Act was amended to provide that members of a Vocational Education Committee, who are appointed annually, shall hold office until the next annual meeting of the Committee, subject to the provision dealing with resignation or removal for cause.

### Employment of Children

Amendments to the City Act and the Town Act which came into force on May 1, 1936, include one enabling councils of cities and towns to pass by-laws for regulating, controlling and licensing children engaged as vendors of magazines. Licences were already required for children employed as messengers or as vendors of newspapers and smallwares and for bootblacks.

### Chauffeurs

An amendment to the Vehicles Act provides that the Minister may suspend or revoke a chauffeur's licence on the recommendation of the chief of police or acting chief of police of the city or of the clerk, secretary-treasurer, chief constable or police magistrate of the municipality in which such chauffeur resides.

### British Columbia

The Legislature of British Columbia, which was in session from February 25 to April 1, 1936, enacted a law providing for a provincial system of health insurance and amended the acts dealing with mothers' pensions and the weekly half-holiday in shops.

### Health Insurance

The Health Insurance Act is reviewed elsewhere in this issue of *THE LABOUR GAZETTE* on page 422.

### Weekly Half-Holiday

The Weekly Half-Holiday Act requires shops to be closed at 1 p.m. on one weekday in each week, the day to be determined by a by-law of the municipality. Certain classes of shops named in the Schedule to the Act are exempt but may be brought within its provisions by by-law. Additions may also be made to the Schedule by Order in Council. The amendment provides that in such exempted shops the only goods which may be sold on a half-holiday are those included in Schedule 2, which is added to the Act, viz:—bakery products, tobacconists' supplies, drugs, medicines, medical appliances, toilet requisites, photographic supplies, druggists' rubber goods, newspapers, magazines, stationers' supplies, meals, fresh fruits, vegetables, soft drinks, florists' products, dairy products, confectionery and such other articles as may be added by Order in Council. For breach of this provision an offender is liable to the same penalty as for other infrac-

### Resolutions

On March 19, 1936, the following motion was unanimously agreed to:—

That, in the opinion of this Assembly, the Government of Saskatchewan should take such action as may, in its opinion, be most effective in promoting within Saskatchewan railway repair work in proportion to the revenue obtained by the railways in Saskatchewan, and that such action include necessary representations to the Government of Canada, the management of the railways and to any Relief Commission on Unemployment which may be established, as well as such other means as may further and hasten the desired end.

On March 26, 1936, the House unanimously adopted the following resolution:—

That, in the opinion of this Assembly, the Government of Saskatchewan should urge the Federal Government to announce immediately the proposed public works program designed to provide employment for the unemployed of this Province.

tions of the Act. A municipal council may by by-law declare any of the goods enumerated above to be deleted from Schedule 2.

### Mothers' Pensions

The Mothers' Pensions Act was the subject of a number of amendments. Where a pension was payable to a widow whose husband was domiciled in the Province at the time of the appearance of the disability which caused his death, the amendment stipulates that such disability must have been in a serious form. The assessed value of real property used as a home which a mother may own without being disqualified for an allowance, is raised from \$2,000 to \$2,500. The nationality qualification is altered to permit an allowance to be granted to a mother who was formerly a British subject by birth or naturalization. Provision is made for an additional payment of \$7.50 per month in cases where the husband of the mother is totally disabled and is living with her. The section providing for the appointment of local advisory boards to report on applications and perform various other duties, was replaced by a section authorizing the appointment of an Advisory Board to advise the Provincial Secretary on the operation of the Act. The Board is to consist of five members, a majority of whom must be women, who are to serve for three years and be eligible for re-appointment. They will receive no remuneration but may be reimbursed for travelling and living expenses incurred while on duty.

### Bills and Resolutions

A Bill to amend the Workmen's Compensation Act was introduced but was ruled out of order in the hands of a private member. The Bill would have added hernia, silicosis and tuberculosis to the list of terms defined in the Act, and included chiropractors in the definition of "physician". Domestic servants and workers in hospitals and restaurants would have been brought within the scope of the Act. Compensation would have been payable in respect of children up to the age of 18 years, instead of 16 years as at present. Where a workman had so far recovered as to be fit for a certain kind of employment and proved that, as a consequence of the injury, he was unable to obtain such employment, he would have continued to be treated as wholly disabled for purposes of the Act. The Bill further proposed to add the following diseases to those to be compensated when they were due to the nature of the occupation: hernia, pneumoconiosis, tuberculosis, and other diseases of the respiratory system, ophthalmic conditions, dermatitis and ulcerations, impairment of hearing, effects of acid or injurious fumes or

gases, diseases peculiar to fishermen, enteropneumosis, nephropneumosis, postural (spinal) defects, neuritis, rheumatism, trench feet, and telegraphists' and writers' cramp.

On March 23, 1936, the following motion was adopted:—

Whereas the present Government of British Columbia has repeatedly declared itself in favour of a policy of setting the unemployed to work at necessary public works and substituting a "work and wages" policy for the present system of work for relief; and

Whereas the Canadian House of Commons has recognized the necessity for housing and slum-clearance schemes by making loans available to individuals and corporations for the purpose of financing housing schemes;

Therefore be it resolved, That the Economic Council be instructed to make a survey of the housing problem in British Columbia from all angles and report its findings.

The following resolution was agreed to on March 28, 1936:—

Whereas it has been brought to the attention of this Legislative Assembly that hospital employees are alleged to be working excessive hours and receiving exceedingly low rates of pay;

Therefore be it resolved, That this House draw the attention of the Board of Industrial Relations to the allegations and ask that they be investigated.

### Ontario

A number of laws of labour interest were enacted by the Ontario Legislature during the session which opened on February 11 and closed on April 9, 1936, including a new statute providing for fair wages and hours of labour on provincial public works, and amendments to the laws relating to minimum wages, industrial standards, regulation of factories and home-work, unemployment relief, apprenticeship, housing, and old age pensions.

#### Fair Wages

The Government Contracts Hours and Wages Act, which will come into force on January 1, 1937, is generally similar to the Fair Wages and Hours of Labour Act passed by the Parliament of Canada in 1935. The Ontario Act provides for "fair wages" and an eight-hour day or forty-four hour week on construction works undertaken by the Provincial Government, by contract, and on works towards which provincial aid is granted by way of contribution, subsidy, loan, advance, or guarantee. Every contract for these purposes is subject to such conditions as to wages and hours, but the conditions do not apply to the purchase of materials or equipment for use in the work contemplated under a contract of sale and purchase. Fair wages are defined as such wages as are generally accepted

as current for competent workmen in the district in which the work is being performed for the character or class of work in which such workmen are respectively engaged, but shall in all cases be such wages as are fair and reasonable. The Lieutenant-Governor in Council may make regulations providing for the method of determining what are fair wages, for overtime rates, classification of employment, classes of persons to be employed, publication and posting of wage schedules, payment of wages to employees in case of default by the contractor or other party, and for the recovery of sums paid from such contractor or party, the keeping and inspection of records and the furnishing of information to the Minister, and, generally, for the carrying out of the Act and regulations. A penalty ranging from \$50 to \$500 may be imposed for non-compliance with the Act or with the regulations. The Act and regulations are to be construed subject to the provisions of the Industrial Standards Act, the Minimum Wage Act, and the Public and Other Works Wages Act.

#### Minimum Wages

The Minimum Wage Act was the subject of a number of amendments. All members of the Minimum Wage Board are to hold

office during pleasure of the Lieutenant-Governor in Council. Formerly, the Chairman held office during pleasure, but other members were appointed for a term of five years. Members are to receive such payment for their services as the Lieutenant-Governor in Council may determine, whereas they formerly served without remuneration but were granted a *per diem* allowance when on duty. As before, they are to be allowed travelling and living expenses.

A new clause requires that, except as otherwise provided by an Order of the Board or with its written permission, wages must be paid in full in cash or by cheque payable at par at the place where the work is performed by the employee. Any agreement between employer and employee to waive or forego any provisions of the Act or any agreement to refund any part of the wages paid is rendered invalid and the making of such agreement or arrangement is to be deemed to be an offence by the employer. Formerly, a minimum term of two months' imprisonment might be imposed upon an employer for a second or subsequent offence in regard to wages and hours, discrimination against employees, falsification of records, or supplying false information. This minimum is deleted but the maximum term of imprisonment in such cases remains unchanged at six months.

A new section expressly empowers the Board to negotiate a settlement of a wage claim. Where such a settlement has been reached and a memorandum of its terms has been signed by an employer and the employer fails to carry out the agreement, a magistrate may, on application of the Board, make an order for the payment of such amount as may remain unpaid. An employer failing to carry out such an order is liable to a penalty not exceeding the amount remaining unpaid under the order plus an amount not less than \$10 and not exceeding \$100.

### Industrial Standards

Several amendments were made to the Industrial Standards Act, some of which merely clarify the meaning of the Act. The definition of "employee" was struck out and the definition of "employer" re-written. The latter term means every person who, by himself or his agent or representative, is directly or indirectly responsible for the payment of wages to any person who comes within the provisions of a schedule of wages and hours promulgated by Order in Council under the Act. "Wages" is defined to include any form of remuneration for labour in general and more particularly payment at an hourly, daily, weekly or monthly rate or on a production basis at a piece work or unit price rate.

The section of the Act which enabled the Minister to define zones in the various industries is replaced by a section authorizing the Minister to designate the whole or any part or parts of Ontario as a zone or zones for any industry and providing that any area so designated may be enlarged or reduced or divided into separate zones by representatives of employers and employees in conference and, with the approval of the Minister, the area so changed may be deemed the designated zone for the industry affected.

Under an amended section, the Minister may authorize an officer to convene a conference of employers and employees in any industry. Formerly, the Minister himself was to convene the conference. The purpose of the conference and the powers of the Minister and Lieutenant-Governor in Council are set out in amended form in the new Act, partly with a view to enabling the Government to give legal effect to an agreement between employers and employees prohibiting work on Saturday. It will be recalled that in an action against certain employers for working their employees on Saturday contrary to the schedule, the court held that no power to make such prohibition was given in the Act. The new section authorizes the conference to submit to the Minister a written schedule of wages and hours and days of labour for the industry. The schedule may establish maximum working hours per day and per week, and the particular days of the week for the performance of labour in the industry, may establish minimum wages for regular working periods and for overtime, and lay down the conditions governing overtime work. It may classify the employees and provide separately for each classification with respect to any matter dealt with in the schedule, and may define any term used in the schedule.

Formerly, if the Minister considered the schedule to be agreed upon by a proper and sufficient representation of employers and employees, the Lieutenant-Governor in Council, on the recommendation of the Minister, might declare a schedule to be in force throughout the industry in the designated zone and be binding on all the employers and employees for a period not exceeding twelve months. Under the Act as amended, he may declare such schedule to be in force during pleasure or for the period, not exceeding twelve months, stipulated in the schedule. After a schedule has been in effect for not less than twelve months, a new conference may be convened for the purpose of arriving at a new schedule.

The Act originally authorized employers and employees engaged in an industry covered by a schedule to set up an advisory board of not

more than five members. The power to set up such a board is now vested in the Minister. In addition to their former duties of hearing complaints and assisting in the enforcement of the schedules, advisory boards may now fix special minimum wages for handicapped workers. An appeal may be taken to the Minimum Wage Board from any decision of an advisory board.

¶ The section dealing with penalties is replaced by new provisions. Formerly, an employer violating a schedule was liable to a penalty ranging from \$25 to \$100 or to imprisonment for not more than three months. Except that the maximum term of imprisonment is reduced to two months, this penalty remains unchanged for a first offence, but in the case of a second offence the fine is now from \$50 to \$500 and the maximum term of imprisonment is six months. In addition, a convicted employer must pay to the employee the full amount of wages remaining unpaid under the schedule unless the magistrate finds that any employee has induced or participated in the offence when he may order the unpaid wages to be paid to the Minimum Wage Board for the purposes of the Province. Under the Act of 1935, the amount due was payable to the Minimum Wage Board or to the employee, at the discretion of the magistrate, and in default of payment the sum was recoverable by distress proceedings at the instance of the Board. The fine for violation of a schedule by an employee which formerly ranged from \$1 to \$10 is now from \$5 to \$25. The prison term in default of payment remains at ten days. No prosecution may now be commenced except with the consent of the Minimum Wage Board.

### Attachment of Wages

The Wages Act was amended to prohibit the taking of proceedings to attach wages before the creditor obtains judgment.

### Factories

A number of changes were made in the Factory, Shop and Office Building Act, chiefly to strengthen the provisions concerning home-work and industrial poisons and other harmful substances. Employers in restaurants must now keep registers of the women and young persons employed in the same way as employers in factories and shops.

The sections of the Act relating to home-work were enacted first in 1913 and amended in 1919 as a public health measure. The amended Act is designed to protect the home-workers' wages as well as the public health. Under the Act, as revised in 1932, any person contracting for the manufacture or alteration,

in whole or in part, of any clothing or household article was required to keep a register of the names and addresses of the persons contracted with. In cities of 50,000 or over, all persons receiving clothing or articles, or the material from which they were to be made, had to obtain a permit from a factory inspector, which was to be granted only after inspection of the premises and was to certify to the sanitary conditions of the premises and state the maximum number of persons to be employed. Employers had to satisfy themselves that the workers had permits. Permits could be revoked and articles seized by the inspector if the premises were found to be unclean or unhealthy. The new section defines the terms "employer," "employment," "home-worker," "personal or household article" and "wages." Home-workers and their employers are required to obtain permits for which written application in prescribed form must be made to a factory inspector. The permit must state the purposes and scope of the authority granted by it which may be enlarged at any time provided the change is endorsed upon the permit by the inspector. No employer's permit is to be issued unless the inspector is satisfied that such employer is likely to comply with the Minimum Wage Act, and no home-worker's permit may be issued unless the health of the person and the sanitary conditions of the premises are satisfactory. Provision is made for the keeping of registers of home-workers, by their employers, the articles given out to each, the dates of employment and the wages paid. Employers' premises may be entered at any time by an inspector and the home of a worker may be inspected at reasonable times. An employer's or home-worker's permit may be cancelled at any time for contravention of these provisions or of the Minimum Wage Act or minimum wage regulations or orders. A home-worker's permit may be cancelled on the ground of ill-health or insanitary conditions.

The section authorizing the Lieutenant-Governor in Council to make regulations for the protection of persons employed in processes involving the use of benzol or other industrial poisons, which was enacted in 1932, was extended to include processes in which other dangerous or harmful substances are used. Regulations under the section were published in August, 1932.

### Unemployment Relief

The Unemployment Relief Act, 1935, was amended to authorize the Lieutenant-Governor in Council to make regulations for the establishment of a system of registration and certification with respect to employment in rela-

tion to unemployment and unemployment relief, and for compliance with such system by employers, employees and unemployed persons. Another amendment requires a municipality, which does not include in its estimates appropriations to meet its share of the cost of relief out of current revenue, to ascertain from the Ontario Municipal Board, before passing such estimates, whether its approval will be given to debentures to cover any part of such cost. Councils must include in their yearly estimates an amount to be paid from current revenue sufficient to meet the cost of direct relief which is not to be covered by debentures.

### Apprenticeship

The Apprenticeship Act was amended so that members of the Provincial Apprenticeship Board shall hold office during pleasure and shall serve without remuneration but receive travelling and living expenses when on duty. The annual report to the Minister is to be made by the Board instead of by the Chief Inspector as formerly. Contracts of apprenticeship must be registered with the Board. The word "minor" is replaced by the word "person" throughout the Act owing to the custom in some trades of accepting apprentices over 21 years of age. The section authorizing the Board, with the approval of the Lieutenant-Governor in Council, to make regulations was amended to provide for regulations on additional subjects including the registration of contracts and their assignment, examination of and issuance of certificates to persons employed in a trade at the time it becomes a designated trade for the purposes of the Act, the registration of employers in a designated trade, the rate and method of assessment of employers and employees in such trades, and the constitution, powers and duties of provincial apprenticeship committees and local advisory committees and qualifications of members.

The Board is empowered to appoint a provincial advisory committee for each designated trade or group of trades. Such committees are to consist of five members representing equally employers and employees with an official or employee of the Department of Labour. Subject to the approval of the Board and the Lieutenant-Governor in Council, a provincial committee may make regulations in respect to its trade on all matters on which the Board may make regulations provided its regulations are not inconsistent with those of the Board. More particularly, it may make regulations in regard to the age of apprentices, the period of apprenticeship and the number of apprentices who may be apprenticed to each employer. No change may be made in

regulations without written notice to representative organizations in the trade concerned, or, where no such organizations exist, to at least ten representatives of employers or employees in such trade. Opportunity must be given for a discussion of such changes. Subject to the approval of the Board, each provincial advisory committee may appoint local apprenticeship committees for defined areas of the Province to assist in matters relating to the trade in the defined area.

Provision is made for the assessment of employees as well as of employers in a designated trade.

### Old Age Pensions

The Old Age Pensions Act, 1929, was amended to provide for a monthly audit of the accounts of the Pension Commission by the Provincial Auditor or other person appointed by the Government.

An amendment to the Parents' Maintenance Act adds destitution to the grounds on which a parent shall be deemed to be dependent. Formerly, only old age, disease and infirmity were causes of dependency for the purposes of the statute.

### School Employees' Pensions

The High Schools Act, the Public Schools Act and the Separate Schools Act were amended to enable school boards to establish pension funds for officers and employees. Pension schemes must be approved by the Superintendent of Insurance for Ontario.

### Housing

The Ontario Housing Act, 1919, was amended to enable the council of any municipality, with the approval of the Provincial Housing Director, to pass a by-law abolishing its housing commission and to take charge of its housing scheme. Further changes permit sale of re-possessed properties at prices and on terms approved by the Director, stipulate the manner in which revenues from a scheme are to be applied, and permit housing companies formed under the Housing Accommodation Act (which has been repealed) to transfer their assets with the approval of the Director. Amendments similar to the above were made in the Municipal Housing Act, 1920.

### Chauffeurs

The Commercial Vehicle Act which replaces the Public Commercial Vehicle Act, 1934, re-enacts the provisions of the former statute enabling the Lieutenant-Governor in Council, on recommendation of the Minister of Highways, to make regulations regarding the hours

of labour of drivers, and prescribing the minimum age and minimum wages for drivers.

### Bills and Resolutions

Two Bills to amend the Workmen's Compensation Act were introduced but later withdrawn. The first of these would have enabled an employer to make an agreement with a partially disabled workman entitled to compensation under the Act on terms approved by the Board. If such a workman agreed to pay to the employer all or part of his compensation to be repaid to him as wages, thus bringing his wages up to the standard that might be required by law, the employer would be freed from the necessity of paying a dis-

abled man full wages. The Bill would also have eliminated the \$2,000 limitation in the computation of average earnings. The second Bill would have entitled disabled workmen to be treated by drugless practitioners.

On March 16 a Resolution was agreed to in the following terms:—

That in the opinion of this House the present unemployment conditions in Ontario, particularly in the building and construction industries, should be given early and serious consideration, and to that end the matter is referred to the Standing Committee on Labour with instructions to give the subject careful study and to report back to this House the result of their deliberations.

## LABOUR AND INDUSTRY IN NOVA SCOTIA IN 1934-35

### Second Annual Report of the Provincial Department of Labour

THE industrial situation in Nova Scotia during the fiscal year ending November 30, 1935, is reviewed in the second annual report of the provincial Department of Labour—established under the Department of Labour Act (LABOUR GAZETTE, August, 1934, page 748). Included in the Department's publication are reports of the Deputy Minister, the Minimum Wage Board, the Employment Service Offices, the Inspector of Factories, and the Supervisor of Unemployed Relief.

The Deputy Minister, in his review, considered that the gains in employment of the previous year were maintained, and referred to marked reduction in relief payments as indicative of general improvement.

*Unemployment and Relief.*—The report of the supervisor of relief, presenting a tabular statement of direct relief by districts, shows total relief disbursements for 1934-35 of \$1,244,125.23 as compared with \$1,627,746.29 for the year previous—a reduction of \$383,621.06, or 23.67 per cent.

From the financial statements respecting direct relief and the relief supervisor's analysis of the situation, it is indicated that the cost of direct relief in the industrial centres decreased considerably and that relief payments have been discontinued in New Glasgow, Trenton, Windsor, Dartmouth, Truro and Bridgewater, with reduced costs in Amherst, Halifax and Sydney.

In the coal mining areas, a decided reduction in relief costs was also reported, and relief organizations of the municipality of Cape Breton and Glace Bay were commended "for the efficient manner in which they handled the relief situation" in their respective terri-

tories. The only mining centre where it was possible to discontinue relief payments entirely was the town of Stellarton.

With regard to the fishing districts the supervisor reported: "Canso alone has paid small amounts during the summer months, but from all indications several others may require assistance during the winter. From Yarmouth to Cape North with few exceptions, it has been the same story—very few fish being caught and for which the fishermen received extremely low prices. In many cases the price was as low as fifty cents per hundred pounds for codfish and haddock. All the fishermen with whom we came in contact claimed that they could not provide for themselves and their families unless a better price could be secured for their fish."

In concluding, this official observed:—

"The Province generally is in better shape, as far as unemployment is concerned, than it has been for the past few years, but we still have a large number of unemployed who, for some reason or another, are unable to secure employment in any of the industries. Also, a large number of young men between the ages of eighteen and twenty-five are unable to secure employment, most of whom are willing and anxious to work. This class of citizen is our most serious problem.

"In practically every place in which direct relief is being paid, those receiving same agree to work for their relief orders when and where work is available."

*Employment Service.*—The annual report of the Superintendent of the Nova Scotia Employment Offices summarizes the administrative activities of the fiscal year 1935. The

number of placements in 1935 totalled 14,150 as compared with 13,993 in 1934. Of these 14,150 placements, 4,885 were in regular employment (over seven days), while 9,265 were in casual employment.

The superintendent also reviews activities at the two federal relief camps in the province.

*Inspection of Factories.*—The inspector of factories reported that "there has been a noticeable increase in industrial activity during the latter part of the year, with the large establishments almost all working under normal conditions." Renewed activity in the lumbering industry was also noted.

During the year 423 factories were inspected, some establishments being visited two or three times to ensure that orders given on a previous visit were complied with, or in connection with accident investigations. The number of accidents reported by employers or ascertained from other sources during the year was 551, of which seven were fatal.

Analysing the causes of accidents the inspector found that approximately twenty-two per cent of them happened in connection with machinery and considered that most of these could have been prevented by the exercise of care and prudence, on the part of the persons injured. He urged, as the most important consideration, the promotion of a "safety spirit" in factories. In regard to working hours the inspector drew attention to the fact that all manufacturing establishments in the towns of Trenton and New Glasgow reduced hours, while in Sydney the Dominion Steel and Coal Corporation have gradually been introducing the eight hour day with the production departments now operating on a three-shift system. In his opinion, however, the reduction of hours as it affects unemployment might occasion disappointment. From his observations of its operation he stated:

"In many of these factories, where the employment was intermittent the shorter work day will have some effect on unemployment as it will make what work is available last longer. On the other hand, because of rearrangement of working conditions and the adoption of more efficient methods, the number of employees was not increased very much as the result of the shorter work day. Some increase was made in the hourly rate of wages but not sufficient to make up for the two hours lost daily. This condition was very disappointing to the workers, who had received a number of pay-cuts during the past few years. Although the day's work was reduced by two hours, the further reduction in wages created considerable dissatisfaction.

One firm in New Glasgow gave their twenty employees the eight-hour day without any reduction in wages, and the change made very little difference in the output of their factory."

The factory inspector also pointed out that some employers were violating the Act in not giving their women employees a complete hour for the noon-day meal. He also warned that requests for permits for overtime work would be carefully scrutinized and would only be issued for break-downs or exigencies of trade.

### Report of Minimum Wage Board

Included in the report of the Department of Labour is the fifth annual report of the minimum wage board, dealing with the administration of the Act during the year ended November 30, 1935.

According to the report the inspections for the past year, have indicated a greater volume of business. Consequently the Board had cancelled all permits granted during the depression and is now bringing back standard wages and weekly hours, and endeavouring to enforce the Orders.

The changes in average weekly wage from 1934 to 1935, in the various industries under the Act were as follows: Laundries and dyeing—increased from \$10.00 to \$10.10; confectionery and food trades—increased from \$8.48 to \$8.54; hotels and restaurants—increased from \$8.25 to \$8.28; textiles, needle and leather trades—decreased from \$10.23 to \$10.04; telephone operators—increased from \$11.03 to \$11.34; small factories, paper trades and printing—decreased from \$12.46 to \$12.25. In the case of retail stores, millinery, dressmaking, tailoring and fur sewing the average was established in 1935 at \$10.56.

A comparison of the average weekly hours in the various industries under the Act in 1934 and 1935 indicated the following: Laundries and dyeing—increased from 45 to 46; confectionery and food trades increased from 42 to 45; hotels and restaurants—decreased from 54 to 53; textiles, needle and leather trades—increased from 48 to 51; telephone operators—48 hours (no change); small factories, paper trades and printing—47 in 1934 (no figures given for 1935). In the case of retail stores, millinery, dressmaking, tailoring and fur sewing, the average was established in 1935 at 48 hours.

The chief details with respect to each industry under the Act during the year are summarized in the following paragraphs—

*Laundries, dyeworks and dry cleaning.*—Number of firms, 18; number of women work-

ers, 220; total wages paid, per week, \$2,208.45; average weekly wage, \$10.10; average weekly hours, 46.

*Confectioners, bakers and allied food trades.*—Number of firms, 12; number of women workers, 417; total wages paid, per week, \$3,562.45; average weekly wage, \$8.54; average weekly hours, 45.

*Hotels, restaurants and tea rooms.*—Number of firms, 91; number of women workers, 527; total wages paid per week, \$4,364.43; average weekly wage, \$8.28; average weekly hours, 53.

*Textiles, needle trades and leather trades.*—Number of firms, 12; number of women workers, 773; total wages paid per week, \$7,766.19; average weekly wage, \$10.04; average weekly hours, 51.

### Home Work Prohibition Order in New York State

Homework in the Men's and Boys' Outer Clothing Industry is to be prohibited on and after April 25, 1936, with the exception of that branch of the industry known as Merchant and Custom Tailoring in which branch homework is to be prohibited after July 1, 1936, Industrial Commissioner Elmer F. Andrews announced recently in publishing Order No. 1 issued under the authority of the State Industrial Homework Law. In Merchant and Custom Tailoring, homeworkers who are more than sixty years of age and have physical disabilities which prevent performance of the same work in a shop may continue to work at home.

A request that Boys' Cotton Wash Suits be excluded from the Order was denied.

Conditions under which special homework certificates for aged and disabled homeworkers may be granted in the Merchant and Custom Tailoring branch are set forth in Section 2 of the Order. The homeworkers for whom special certificates are sought must be covered by Workmen's Compensation; must have worked for the same employer prior to April 25, 1936 and he must be employed by one employer only, doing less work than tailors in the shop; his work shall be delivered to him and called for free of charge; he will be paid the same piece work rate as in the shop; he and his employer shall keep a record of production and wages. The exception was made for a few aged and disabled but skilled workers who might suffer hardship if they had to work in a shop.

*Telephone operators.*—Number of firms, 1; number of employees, 416; total wages paid per week, \$4,718.60; average weekly wage, \$11.34; average weekly hours, 48.

*Small factories, paper trades and printing.*—Number of firms, 27; number of employees, 133; total wages paid per week, \$1,598.71; average weekly wage, \$12.25; average weekly hours (not given).

*Retail stores, millinery, dressmaking, tailoring and fur sewing.*—Number of firms, 149; number of employees, 1,492; total wages paid per week, \$15,762.53; average weekly wages, \$10.56; average weekly hours, 48.

The report gives the details with respect to its latest Order (No. 8) governing female employees in beauty parlours. This Order was published in the LABOUR GAZETTE for January, 1936, page 38.

Homework in the Men's and Boys' Outer Clothing Industry formerly engaged approximately 4,000 workers. Under NRA, this work was taken into shops and employment in the home was prohibited. Since NRA was nullified by the United States Supreme Court, this prohibition has been enforced effectively in the New York City area by strong union organization and employer co-operation. However, investigation has shown a tendency to return to homework.

A University of Toronto proposed course in public administration, designed especially for members of the Dominion Civil Service, and to be conducted only in Ottawa, was outlined at a meeting of the Canadian Seminar of Public Administration, held in the Hunter Building, Ottawa, recently.

Imports during the first quarter of 1936 amounted to \$134,592,000, compared with \$122,464,000 in 1935 and \$113,502,000 in 1934. This was an increase of \$12,128,000, or almost 10 per cent over 1935.

Domestic exports during the first quarter of 1936 amounted to \$185,042,000 compared with \$148,720,000 in 1935 and \$142,132,000 in 1934. This was an increase of \$36,322,000 or 24 per cent over 1935. Foreign exports amounted to \$2,740,000 compared with \$2,358,000 in 1935 and \$1,714,000 in 1934. This was an increase of \$382,000 or 16 per cent over 1935.

The total trade of Canada in the first quarter of 1936 was \$322,734,000 compared with \$273,542,000 in 1935 and \$257,348,000 in 1934. The increase over 1935 was \$49,192,000 or 18 per cent, and over 1934 it was \$65,386,000 or 25 per cent.

## WORKMEN'S COMPENSATION IN NEW BRUNSWICK, NOVA SCOTIA AND SASKATCHEWAN

### Annual Reports of Provincial Boards for 1935

#### New Brunswick

THE seventeenth annual report of the Workmen's Compensation Board of New Brunswick reviews the administration of the Act during the calendar year 1935. There is also presented an analysis of accidents in 1934 based on completed statistics. During the year the Board found it necessary to write off as bad debts the sum of \$827.45, chiefly on account of debtors having left the province or made assignments and received their discharge in bankruptcy. At the end of the year 1934, after adjustments between the actual and estimated income and expenditures, the Board concluded with an actual credit balance of \$48,460.72. The total income for the year 1935 is estimated at \$560,271.38 and the expenditure at \$678,293.79, leaving an estimated deficit of \$118,022.41. Deducting from this the surplus of \$48,460.72 carried forward from 1934 there is left an estimated deficit of \$69,561.69. As explained in the report, these balances do not purport to be the actual amount of moneys to the debit or credit of classes, but show what has been collected from the provisional statements filed and what the board thinks, after going over the data in their possession, is a fair income to be expected from the amount to be collected owing to the expected increase of the actual payrolls over the provisional. The expenditure shows the same condition. To the amount paid out is added a sufficient sum which the Board estimates will cover the cost of claims in assembly and claims which may be existing as of December 31, 1935, but not reported to the Board, and also the estimated amount of claims reported, partly paid, but not completed.

Complete accident statistics for 1935 were not available when the report was published but a tabular analysis is given of accidents in 1934 with a comparison of accident frequency and accident compensation cost of previous years.

*Statistics for 1934.*—The compensation cost of accidents declined steadily from the peak year of 1928 when it was \$641,132.93 to \$357,593.66 in 1932. However, in 1933, it increased to \$527,923.72 and registered a further increase to \$559,777.52 in 1934. Accident totals reached a peak of 9,281 in 1929. In 1934 there were 7,858 accidents. Of this total, 24 were fatal; 358 involved permanent partial disability; 5,711 temporary total disability; while 1,765 were minor accidents requiring medical aid

only. In 1933 the total number of accidents was 6,683 classified as follows: fatal, 26; permanent total, 3; permanent partial, 348; temporary total, 3,606; medical aid only, 2,700.

During 1934 the average age of workmen involved in accidents was 31.62 years and their average weekly wage was \$8.78. In temporary total disability cases the time loss averaged 52.96 days, while in permanent partial disability cases the time loss averaged 81.71 days.

The causes of accidents in 1934 were classified as follows: prime movers, 143; working machines, 346; hoisting apparatus, 193; dangerous substances, 195; stepping on or striking against objects, 701; falling objects, 1,140; handling objects, 968; tools, 1,618; runaways and animals, 91; moving trains and vehicles, etc., 287; fall of persons, 1,440; all other causes, 861.

*Factory Inspection.*—Included in the report of the Board is the fourth annual statement of the factory inspector. During the year 1935, 1,353 mills, factories, hotels and industrial plants were visited. The working force of these factories, plants, etc., totalled 14,777 male and 3,939 female employees. Stationary engineers' licences issued numbered 827, an increase of 95. In this respect the inspector emphasized the inadequacy of such licences, and recommended that they be graded as in other provinces. The inspector also drew attention to the number of industrial fatal accidents and made a number of recommendations for the guidance of both employers and employees.

#### Nova Scotia

The annual report of the Workmen's Compensation Board of Nova Scotia covering the year ending December 31, 1935, records an increase in accidents as compared with the previous year, the total number being 9,225, as compared with 8,590 in 1934. The total cost of all accidents for 1935 under Part I of the Act is estimated at \$1,164,035, which amount is exclusive of administration expenses and cost of safety associations.

According to the provisional statement of income and expenditure for 1935 the amount paid for medical aid in all classes was \$81,112.64 with \$8,412.32 expended on safety associations. The administration cost was \$91,771.43, the ratio of administration expenses to the compensation cost of accidents for the past nineteen years being 7.85 per cent.

For industries under Part I, the total income for the year 1935, actual and estimated, amounted to \$1,235,332.31 and the estimated expenditure for the same period was \$1,264,219.20 showing a deficit for the year's operations of \$28,886.89.

The surplus forwarded from previous years was \$450,152.28, leaving a balance at December 31, 1935, of \$421,265.39; less \$20,000 for doubtful accounts, making a net surplus of \$401,265.39.

The 9,225 accidents reported to the Board in 1935 are classified as follows: fatal accidents (dependency established), 46; fatal accidents (no dependents), 6; fatal accidents (adjustment pending), 5; fatal accidents (claim non-compensable or disallowed), 6; permanent partial disability, 188; total disability (seven days or over), 6,161; accidents involving medical aid only, 1,957; accidents pending adjustment, 106; non-compensable accidents (other than fatal), 750.

At the end of the year, persons receiving compensation for 1935 and prior years in the form of a monthly pension were as follows: widows, 582; children under sixteen, 787; dependent mothers, 68; dependent fathers, 17; other dependents, 12; workmen disabled for life (partially or totally), 990.

Of the industries under the Act—mining, lumbering and wood-working, iron and steel, manufacturing, building and construction, public utilities and transportation—the provisional statistics of income and expenditure show that the first named was leading in revenue accrued from assessments and also in disbursements. The revenue derived from assessments on the mining industry in 1935 was estimated at \$661,539.04 while the expenditure was placed at \$598,945.61. Of this amount, \$103,869 was for compensation paid other than pensions, \$90,899.68 was transferred to reserve for pensions, \$330,546.28 was for compensation estimated outstanding, the balance being for this industry's proportion for medical aid, safety associations and administration.

As indicated in the report for the previous year (1934) it was decided that on and after January 1, 1935, all pension reserves were to be set aside on an assumed rate of interest of 3½ per cent instead of 4½ per cent as heretofore. This new rate applies also to the recalculation of outstanding liabilities. The changes resulting from the revaluation are indicated in the report.

*Summary of Nineteen Years' Administration.*—During the nineteen years from the beginning of 1917 to the end of 1935, accidents in the industries within the jurisdiction of the Board, to the number of 137,650 were reported. The number of workmen fatally injured during

that time was 1,598. The amount actually paid to workmen or to their dependents and for medical aid during the nineteen years was \$14,074,435.30, and the amount required at the end of 1935 for the purpose of paying life and other pensions and compensation to disabled workmen, and for medical aid, was \$7,528,258.80.

The total compensation paid or payable to workmen and their dependents and for medical aid for the nineteen years amounts to \$21,602,694.10. This amount does not, however, represent the entire cost of the accidents for the nineteen year period, as the administration expense and cost of safety associations are not included.

There were 868 widows to whom pensions for life or until re-marriage were awarded; 1,996 children under sixteen years of age were awarded monthly pensions while under that age; dependent mothers and fathers to the number of 445 were awarded compensation; 35 members of the family other than widows, children and parents, but who were wholly or partly dependent upon the earnings of deceased workmen at the time of their respective deaths, received benefits, and life pensions were awarded to 4,872 workmen who were disabled, either wholly or partially.

Prior to January 1, 1920, medical aid was not furnished to injured workmen except in special cases. Since that date injured workmen have been entitled to free medical aid for thirty days from date of disability and during the sixteen years that have elapsed the cost of medical aid was \$1,368,850.56. In the mining and iron and steel classes the greater portion of medical aid in connection with those classes is furnished under medical aid schemes and consequently is not paid by the Board.

The report also gives completed statistics for 1934 dealing with accidents, completed by classes, months of occurrence of compensated accidents, time loss, average wage and age, nature of industries, causes of accidents, etc.

### Saskatchewan

The sixth annual report of the Workmen's Compensation Board of Saskatchewan recently published, contains a provisional financial statement for the calendar year 1935 with a detailed analysis of statistics for 1934.

*Surplus Reduction.*—In regard to its administration, the Board announced that while in past years it was sound policy to accumulate substantial reserves, the time has arrived when such reserves need not be further augmented but may be somewhat reduced. Continuing, the report stated:

"Had money interest rates been maintained as heretofore it would be possible to make substantial rebates to employers in the form of reductions in the assessment rates charged but the recent general trend of interest rates in Canada as elsewhere has been toward lower levels and the Board has accordingly decided to set up its 1936 pensions on a basis of a 4 per cent annual interest rate, compounded half-yearly, instead of on the 5 per cent basis heretofore applied. Certain of the other Canadian Compensation Boards have adopted a  $3\frac{1}{2}$  per cent interest basis. It is anticipated that this change of interest basis will make an added annual demand for pension funds in the sum of \$30,000 or more and to this extent rate reductions must be curtailed. As it is, however, the Board has completed its revision of rate schedules for 1936, and, on the basis of payrolls for 1935, the new rates when applied will reduce total assessments by \$20,845. The larger reductions have been made in groups which have accumulated the highest surpluses. On the other hand certain important groups which have heretofore showed substantial deficits have further increased these deficits during the year and as to these, higher assessment rates have had to be applied. The total decreases in the groups showing surpluses amount to \$32,440, the total increases in groups showing deficits \$11,595, leaving as above indicated a net reduction for all groups of \$20,845. Out of a total of 68 active groups, rate reductions have been conceded to 30 groups, rate increases applied to 6 groups, rates unchanged in 31 groups, while the sub-groups of the single remaining group show both increases and decreases."

It further declared that a 1936 deficit was anticipated instead of a 1936 surplus and a consequent reduction in the present Board surplus. The Board also made it clear that it was not the intention "to carry this surplus reduction to unreasonable lengths," and that these rate reductions are more or less temporary "unless uncontrollable and unpredictable factors such as changing interest rates, accident experience, etc., may permit otherwise."

The average assessment rate of the Board (since the Act came into effect) based on per \$100 of payroll is as follows: \$1.83 in 1930; \$1.68 in 1931; \$1.62 in 1932; \$1.31 in 1933; \$1.48 in 1934; and \$1.47 in 1935.

*Payrolls.*—The number of employers reporting to the Board under the Act in 1935 was 4,492 as compared with 4,248 in 1934. The payrolls reported during 1935 exclusive of the

Dominion and Saskatchewan Governments (which are not asked to estimate their payroll but which make a deposit with the Board to cover the cost of accidents) totalled \$24,551,061 as compared with \$23,029,745 in 1934.

There was collected from all employers in 1934 the sum of \$400,079.47, while the expenditures in compensation, medical aid, etc., amounted to \$331,111.12, leaving a balance of \$68,963.35. For the year 1935, the total receipts are estimated to be \$351,226.50 with estimated disbursements of \$342,448.17, leaving an estimated surplus of \$8,778.33.

Claims reported to the Board in 1935 totalled 4,012 an increase of 341 over 1934. The number of fatal accidents in 1935 was 14 as compared with 8 in 1934, 13 in 1933, 13 in 1932, 14 in 1931 and 17 in 1930, making a total of 79 compensable death claims reported to the Board since commencement of operations. The sum of \$106,592.98 was appropriated during the year 1935 to cover future payments for permanent disability and death pensions. At the conclusion of 1935 there were 157 monthly pensions being paid as compared with 126 at the end of the previous year. No appropriation has been made during the past three years for increase of the disaster reserve. This fund, however, increases by its own yearly interest amounting to \$5,404.88 in 1935.

*Accident Prevention.*—The Board continued its activities in connection with accident prevention as outlined in previous reports. Correspondence was conducted with the individual employer concerning every accident which appeared to be due to carelessness in general methods or in particular procedure. Safety literature was distributed to a limited extent. In addition, daily reports of accidents were sent to the Department of Labour for the attention of their inspection branch, and a thorough investigation was made by the Department into all accidents where there seemed to be unusual circumstances. At the request of the Board, the Department of Labour inaugurated a thorough inspection of all saw-mills with a view to the elimination of accidents.

The total number of accidents reported in 1935 was 3,424, of which 14 were fatal; 34 involved permanent disability, 1,725 temporary disability and 1,651 medical aid only.

A complete analysis of reported accidents in 1934 indicated a total of 3,223, of which 8 were fatal, 58 were permanent disability cases,

1,598 temporary disability, and 1,559 required medical aid only. The average age of all classes injured in 1934, was 35.42 and their weekly average wage was \$15.46. In temporary disability cases the average number of days lost was 31.01 and in permanent disability cases the average was 97.47 days. Causes of accidents in 1934 were grouped as follows: Prime movers, 78; working machine, 204; hoisting apparatus, 13; dangerous substances, 163; stepping or striking against objects, 449; falling objects, 567; handling objects, 250; tools, 281; runaways and animals, 65; moving trains and vehicles, 187; falls of persons, 505; all other causes, 452.

Employers of the province are divided into 68 groups, each group bearing its own rate of assessment. These groups comprise the 21 classes under the Act. The following table gives the estimate of wage expenditure by classes for 1935:—

Class	Wage Expenditure
	\$
Canadian Pacific Railway.....	1,940,000 00
Canadian National Railway.....	1,950,000 00
Province of Saskatchewan.....	No estimate required
Dominion of Canada.....	
Cities of Regina, Saskatoon and Moose Jaw.	1,320,000 00
Municipalities, with the exception of Regina, Saskatoon and Moose Jaw.....	1,598,125 00

## MINIMUM WAGES IN QUEBEC

### New Orders Governing Employment in Food Industry, Manufacture of Paper Boxes, Paper Products, etc., Paper Mills, and Drug and Chemical Industry

**T**HE Minimum Wage Board of Quebec has recently issued four new Orders which supersede or amend previous orders respecting employment in the food industry, in the paper box manufacturing, etc., in paper mills, and in the drug and chemical industry.

**ORDER No. 14c (PROVISORY).—Governing female employees and males when replacing females in any class of employment in the food industry, including the making of confectionery, chocolate; pastry, biscuits, bread, macaroni and cereals of all kind; jam, gum, spices and grocery specialties, crushed and evaporated fruits, syrup, pickles; breweries, distilleries, manufacturing and bottling of mineral and aerated water, ginger ale and soft drinks; creameries, butter and cheese factories; packing houses and all allied industries (excepting seasonal canneries of fruits and vegetables).**

This order, effective from May 15, 1936, for a period of one year, replaces Orders No. 14, 14a and 14b, previously enacted on May 15, 1933, May 15, 1934, and May 15, 1935 (LABOUR GAZETTE, June, 1933, page 610; April, 1934, page 330; July, 1934, page 639).

On May 15, 1935, by provisory Order 14b, the minimum rates in the food industry were fixed on a percentage basis of numbers employed instead of (as formerly) on a time basis that varied with the length of the ap-

prenticeship or experience period. Order 14b established a quota (for Montreal city and district) of 50 per cent of employees in the food industry at a rate of not less than 15 cents per hour, and 50 per cent at not less than 21 cents per hour. For the rest of the province, 50 per cent of employees were to receive not less than 13 cents per hour and 50 per cent not less than 19 cents per hour.

The new Order (14c) leaves the minimum scales as formerly but reduces the percentage of employees to thirty-five at the lower wage rate of 15 cents (Montreal) and 13 cents (rest of Province).

**Minimum Rates.**—The minimum rates as set by this new Order are as follows:

City and District of Montreal and a radius of twenty miles around and beyond the Island of Montreal.

35 per cent of the employees, at not less than 15 cents per hour.

65 per cent of the employees, at not less than 21 cents per hour.

Province of Quebec excepting the City and Island of Montreal and a radius of twenty miles around and beyond the Island of Montreal.

35 per cent of the employees, at not less than 13 cents per hour.

65 per cent of the employees, at not less than 19 cents per hour.

(a) The employee's wages shall be paid to her wholly in cash; no deduction being permitted for any cause or purpose whatsoever; said wages shall be given to her in a sealed envelope on which shall be written: her name, her register number, the date of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour, the amount of money enclosed in the envelope; same must be initialled by the person who paid the employee.

(b) All employees, whether working on time or piece, or on any other system of pay, are subject to the above specified minimum wages. The system of periodical changes from piece rates to hourly rates, or vice versa, for same operation, is prohibited as such changes permit an illegal reduction of wages; the piece rates shall be uniform for all employees performing same operation.

(c) To establish percentages, the wages of each employee shall be computed on four (4) consecutive weeks.

All employees without any exception are governed by the above specified minimum wages.

*Hours of Work.*—The total of working hours cannot in any case exceed 55 hours per week unless a special permit has been obtained from the Industrial and Commercial Establishments Inspection Department. Work, in excess of the above period of 55 hours, should be considered as overtime and should be paid for at not less than time and a half; this to apply to both piece and time work.

*Waiting Time.*—Any employee required to wait on the premises shall be paid for the time thus spent.

*Discharge of Employees.*—No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint with the Board or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of this Act.

The same provisions as in the former Order govern penalties, posting, etc.

*ORDER No. 17B.—Governing female employees and males when replacing females in any class of employment in the manufacturing of paper boxes, paper bags, wooden boxes partially made or finished with paper or cardboard; wall paper and all kinds of fibre, pulp and paper products.*

This Order, which comes into force June 1, 1936, replaces Orders 17 and 17a, effective since June 1, 1934 and June 1, 1935, respectively (LABOUR GAZETTE, April, 1934, page 330 and April, 1935, page 332).

Order 17a provided that 50 per cent of the employees in this group should be paid at a rate of not less than 15 cents per hour and 50 per cent at not less than 21 cents per hour in the Montreal district, while for the rest of the province the minima were: 13 cents and 19 cents respectively with the same percentages prevailing.

By Order No. 17b the percentage of employees at the lower rate is reduced to thirty-five with the remaining employees on a graded basis. The other major difference is that the system of periodical changes from piece rates to hourly rates, or vice versa for the same operation, is now prohibited.

*Minimum Rates.*—The new schedule of minimum rates is set forth as follows:

City and Island of Montreal and a radius of 10 miles around and beyond the island: 35 per cent of the employees, at not less than 15 cents per hour; 15 per cent of the employees, at not less than 18 cents per hour; 50 per cent of the employees, at not less than 22 cents per hour.

Province of Quebec, with the exception of the City and Island of Montreal, and a radius of 10 miles around and beyond the Island: 35 per cent of the employees, at not less than 13 cents per hour; 15 per cent of the employees, at not less than 16 cents per hour; 50 per cent of the employees, at not less than 20 cents per hour.

(a) The worker's salary shall be paid to her wholly in cash; no deduction being permitted for any cause or purpose whatsoever. This salary shall be given to her in a sealed envelope on which shall be written: her name, her register number, the date of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour, the amount of money included in the envelope; same must be initialled by the person who paid the employee.

(b) All employees, whether working on time or piece, or on any other system of pay, are subject to the above specified minimum wages. The system of periodical changes from piece rates to hourly rates, or vice versa, for same operation, is prohibited as such changes permit an illegal reduction of wages; the piece rates shall be uniform for all employees performing same operation.

(c) To establish percentages, the wages of each worker shall be computed on four (4) consecutive weeks.

Working hours, as formerly, are not to exceed 55 per week unless a special permit is obtained and work in excess of 55 hours is to be considered as overtime and paid for at not less than time and one half (applicable to

both piece and time work). There are the usual general provisions governing deduction for absence, waiting time, exemption, discharge of employees, reference, penalties and posting.

**ORDER No. 21.—***Governing female employees and males when replacing females in any class of employment in paper mills.*

This Order, effective from June 1, 1936, partially replaces Orders 17 and 17a. It governs employment in paper mills as distinct from the manufacture of paper boxes and paper products as covered in 17b given above.

**Minimum Rates.**—The following are the minimum rates:

City and Island of Montreal and a radius of 10 miles around and beyond the Island: 10 per cent of the employees, at not less than 15½ cents per hour; 25 per cent of the employees, at not less than 19 cents per hour; 65 per cent of the employees, at not less than 25 cents per hour.

Province of Quebec, with the exception of the City and Island of Montreal and a radius of 10 miles around and beyond the Island: 10 per cent of the employees, at not less than 13½ cents per hour; 25 per cent of the employees, at not less than 17 cents per hour; 65 per cent of the employees, at not less than 21 cents per hour.

(a) The worker's salary shall be paid to her wholly in cash; no deduction being permitted for any cause or purpose whatsoever. This salary shall be given to her in a sealed envelope on which shall be written: her name, her register number, the date of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour, the amount of money included in the envelope; same must be initialled by the person who paid the employee.

(b) All employees, whether working on time or piece, or on any other system of pay, are subject to the above specified minimum wages. The system of periodical changes from piece rates to hourly rates, or vice versa, for same operation, is prohibited as such changes permit an illegal reduction of wages; the piece rates shall be uniform for all employees performing same operation.

(c) To establish percentages, the wages of each worker shall be computed on four (4) consecutive weeks.

The remaining provisions concerning hours, deduction for absence, waiting time, discharge of employees, penalties, etc., are identical with those of the previous order.

**ORDER No. 20.—***Governing female employees and males when replacing females in any class of employment in the drug and chemical industry including the manufacture of medicines, drugs and pharmaceutical or toilet preparations, perfumes, extracts, soaps and javel water; the manufacture of chemical or chemical preparations, acids or salts; paints, colours, varnishes, oils, dyes, inks, shoe blacking or polish, mucilage, wax and candles; celluloid, ammunitions, cartridges, explosives, etc., and all other by-products or allied processes to the industry.*

This is a new order and comes into effect on July 6.

**Minimum rates.**—The minimum rates are as established in the following schedule:

City and Island of Montreal and a radius of 20 miles around and beyond the Island:

20 per cent of the employees, at not less than 15 cents per hour.

15 per cent of the employees, at not less than 19 cents per hour.

65 per cent of the employees, at not less than 23 cents per hour.

Province of Quebec with the exception of the City and Island of Montreal and a radius of 20 mile around and beyond the Island:

20 per cent of the employees, at not less than 13 cents per hour.

15 per cent of the employees, at not less than 17 cents per hour.

65 per cent of the employees, at not less than 21 cents per hour.

It is emphasized that "all employees are covered by this Order no matter what occupation they fill on the work they perform."

To establish percentages, the wages of each employee are to be computed on four consecutive weeks. It is also stipulated that "the time of experience of an employee shall be taken into consideration in her classification."

The total of working hours is not in any case to exceed 55 hours per week unless a special permit has been obtained from the Industrial and Commercial Establishments Inspection Branch.

There were 4,250 accidents reported to The Ontario Workmen's Compensation Board during the month of April, a decrease of 593 from the month of March and 236 less than the number during April a year ago. The benefits awarded amounted to \$430,511.62, of which \$340,017.25 was for compensation and \$90,494.37 for medical aid.

## HEALTH INSURANCE IN BRITISH COLUMBIA

### Summary of Provisions of Contributory System

**A**N Act to establish a contributory system of health insurance, which will provide protection for the great majority of the wage-earners of the province and their families, was passed by the Legislature of British Columbia on March 31. A summary of the main provisions of the Act follows.

The plan provides that the most essential medical services will be available for employees and their families, at an average cost of about 40 cents per week to the wage-earner. It is estimated that the number of employees to be covered will be about 110,000 and the number of dependents 165,000—making a group of 275,000 insured persons in all.

Medical care by the physician or surgeon chosen by the insured person, free hospital care, the services of diagnostic laboratories and necessary drugs and medicines are the "mandatory benefits" specified in the Act. Various other medical services may be granted as "permissive benefits" if sufficient funds are available after payment for the mandatory benefits.

A striking feature of the Act is that it deals with the family as a unit. Dependent wives and children are to be included, with their wage-earner husbands, as insured persons.

The plan is to cover all employees earning less than \$1,800 per year, except farm workers and Christian Scientists, who are specifically excluded. Certain other employees, such as domestic servants, casual workers and part time workers, may be excluded, if the Health Insurance Commission decides and the Government approves.

An additional exemption provision of great importance is that employees who are members of any industrial medical service scheme in existence on January 1, 1936, shall be excluded if, by the time contributions from wage-earners and employers to the Health Insurance Fund begin to be levied, their scheme provides a standard of service to its members and their dependents equal to or better than the services of physician and hospital for all cases of ordinary illness. However, if a majority of the employees who are members of such a scheme vote, by secret ballot in a plebiscite to be supervised by the Government, to come within the scope of the provincial scheme the exemption of any such group of employees is to be rescinded. This provision means, in effect, that employees belonging to an industrial medical service scheme that maintains good standards are to have an opportunity of choosing between their company scheme and the provincial plan.

In view of the fact that some industrial medical service schemes may cease operations after introduction of the provincial plan, the Act provides that members of these schemes earning from \$1,800 to \$3,000 per year may be included in the provincial plan as well as the members earning less than \$1,800.

Provision is also made for the inclusion of other persons, such as merchants, farmers and others not working for wages, irrespective of their incomes, who may join the scheme as voluntary contributors to obtain benefits for themselves and their dependents.

*Contributions.*—The plan is to be financed by contributions from employees and employers, without any contribution from the Government. The Government, however, has appropriated funds to cover the organization expenses of the Health Insurance Commission. The employee is to pay two per cent of his wages and the employer one per cent of his payroll for insured persons, with minimum and maximum contributions fixed for each. The minimum contribution for the employee is to be 35 cents per week (or some smaller amount to be fixed by the Commission), and his maximum contribution 70 cents; while the employer's minimum payment for each employee is set at 20 cents per week and his maximum payment at 35 cents.

The employer is required to deduct the amount of the employee's contribution from his wages and to remit this amount to the Health Insurance Commission.

An important provision for employers is that they will only have to make contributions in behalf of employees who are insured persons. This means that farmers, housewives and employers whose employees belong to an exempted medical service scheme and other employers whose employees are not included in the plan will not have to make contributions.

An important clause authorizes the Health Insurance Commission to work out special methods of payment for seasonal workers such as loggers and fishermen. This clause will permit the Commission to authorize a lump sum payment, based on the season's earnings, which will entitle the workers concerned to a full year of medical service for themselves and their families.

Voluntary contributors are to bear the full costs of the services rendered to them and their families, and rates are to be fixed by the Health Insurance Commission, with the approval of the Government, for this group.

The plan is designed to interfere as little

as possible with existing methods of providing medical care. Thus it is provided that, except under unusual circumstances, insured persons shall have the right to obtain service from the physician or surgeon of their own choice. They are also to be entitled to have prescriptions filled by any qualified pharmacist.

*Hospitalization and Medical Services.*—Hospital service in a public ward is to be given for a period not to exceed ten consecutive weeks for any one illness, unless a longer period is authorized by the Commission. Those who desire semi-private or private ward care may obtain this by paying the difference between public ward rates and other rates.

Full laboratory service and diagnostic aids, including X-ray, biochemical and other services, are to be provided without special charge. However, in the case of drugs, medicines and dressings it is specified that the Health Insurance Commission may require the insured person to pay not more than one-half of the cost of these items.

Power is given to the Commission to expand the list of medical services to the extent that finances permit. The scheme is essentially one in which all money paid in by contributors must be returned to them in services so that if contributions prove more than sufficient to cover the costs of the mandatory benefits and administration, additional medical services such as visiting nursing care, dental care to relieve pain or clear up dangerous sources of infection, the provision of surgical appliances, etc., may be expected.

Benefits are to be granted to insured persons four weeks after contributions in their behalf become payable. They are to continue eligible to receive benefits for so long as their contributions continue, for four additional weeks, and for any further additional period that may be specified by the Commission. If an employee falls ill and is unable to work he will be entitled to receive medical care for a still further additional period of twelve weeks.

These provisions mean that beneficiaries of the scheme will receive benefits not only while they are contributing, but also during short periods of unemployment and during a considerable period of absence from work on account of sickness.

The Commission is to make its own financial arrangements with doctors, druggists, hospitals, laboratories and other persons or agencies providing services. In the case of doctors, any one of three methods of payment may be used, a salary system, a per capita system or a fee system with an allotted pool of money. If the per capita or the fee and pool system is

used it is provided that there shall be set aside for the payment of doctors not less than \$4.50 per insured person per year.

*Administration.*—The Act is to be administered by a Commission to consist of a Chairman and not more than four other members. The Chairman, who is to devote his full time to the work, is to be the chief executive officers. The other members of the Commission (apart from the Vice-chairman) are to give only part-time service. The Commission is designed as a policy-forming body, a board of directors with one executive officer. A full-time Vice-chairman may be appointed to assist the Chairman in executive duties if this appears necessary.

The Act also provides that the Government may appoint a "Technical Advisory Council" of not more than six members to serve without remuneration and to advise and assist the Commission. On this council there is to be the Provincial Health Officer, the Chairman or some other representative of the Workmen's Compensation Board, a physician with experience in private practice, and at least one woman.

While the Commission is given broad powers to work out the details of administration, regulations are to be made only with the approval of the Lieutenant-Governor in Council.

Many of the provisions of the Act are drawn from, or are similar to, those in the Workmen's Compensation Act. The existing system of workmen's compensation will not be disturbed in any way by the health insurance plan.

The provisions of the Act are very largely based upon the recommendations of the Hearings Committee on Health Insurance appointed by the Government, which held public hearings throughout the province in the summer of 1935. (LABOUR GAZETTE, February, 1936, page 151).

The Act comes into effect upon proclamation.

The growth of Federal Credit unions in the United States is shown by figures recently published by the Credit Union Section of the Farm Credit Administration, Washington, D.C. According to these figures, which are compiled quarterly, the number of federal credit unions increased from 155 at March 31, 1935, to 732 at December 31, 1935. During the same period the number of members of these unions rose from 18,137 to 113,556; while the share balance increased from \$202,729.21 at the end of the first quarter to \$2,080,443.45 at the end of 1935. The report states that 82 per cent of the savings in shares were outstanding in useful loans to their members at the end of last year.

## CODES IN ALBERTA.

### Regulations governing Fair Competition and Business Practice in Retail Trade, and Cleaning and Dyeing Industry.

UNDER the provisions of the Trade and Industry Act, 1934, of Alberta, there has been established a "code of fair competition and business practice for retail trade" in the province. Declared in effect from April 6, this general code, the first of its kind in Canada, is "binding upon all classes of the retail trade" within the province.

While the Minister is authorized to promote an organization of retail merchants under the provisions of the Trade and Industry Act, yet the code regulations are to be administered by the Department of Trade and Industry.

In its definitions of terms Article 11 of the code declares that "retail trade" means "all selling of any goods, wares or merchandise to the consumer."

#### Minimum and Maximum Prices.

Article III of the code provides for the establishment of minimum and maximum prices. These clauses are as follows:

1. When there is cause to believe that a commodity is being sold at a price so low as to make it impossible for the trade in general to carry on business in respect of that commodity with sufficient margin to provide for the cost of carrying on business fairly attributable to that commodity (the cost price of such commodity having been computed upon the laid down cost or replacement cost to the general retail trade, or in such other manner as may be authorized by the Minister pursuant to the authority of The Trade and Industry Act), and when upon investigation pursuant to authority in the said Act such practice or method of doing business at such said low price is found to be detrimental to any trade or industry to which this code is applicable, then such said practice or method of doing business shall be deemed an unfair trade practice as defined by this code and prohibited. A minimum price for the above mentioned commodity may be set by the Lieutenant-Governor in Council pursuant to the authority of the said Act.

2. When any farm product is sold at a price less than the cost of production, or laid down cost, thus unduly depressing the value to the primary producer, a minimum price may be set for the sale of such product below which the said product cannot be sold and such minimum price, when set pursuant to the authority given under The Trade and Industry Act, shall become part of the provisions of this Code.

3. When there is cause to believe that a commodity is being sold at an unfair or enhanced price detrimental to the public interest, and upon investigation pursuant to authority in this Act such practice or method of doing business is found to exist in any trade or industry to which this Code is applicable, then such said practice or method of doing busi-

ness shall be deemed an unfair trade practice as defined by this Code and prohibited. A maximum price for such commodity may be set by the Lieutenant Governor in Council pursuant to the authority of the said Act.

#### Unfair Competition and Trade Practices.

Article IV sets forth a list of prohibitions constituting unfair trade practices as follows:

1. No retailer shall use advertising or publicity material either printed, pictured, radio broadcast or in any form which is inaccurate, misleading or which misrepresents facts relative to goods or merchandise for sale, including use, trade-mark, grade, quality, quantity, size, origin, material, content, preparation, curative or therapeutic effects, credit terms of sale, values, policies or services.

2. No retailer shall use or permit any employee or agent to use selling methods which deceive or tend to deceive or mislead consumers.

3. No retailer shall use or permit any employee or agent to use advertising in any form, verbal or otherwise, which refers inaccurately in any material particular to any other retailer, his merchandise, price, values, credit terms of selling, policies or services, or which indicates a claim, policy or practice of underselling competitors.

4. The use of "Loss Leaders"\* is hereby declared to be an unfair trade practice and is prohibited.

5. No retailer shall give anything of value to the employee or agent of the customer for the purpose of influencing or furthering the sale of any commodity or render any bill or statement of account to a customer, employee or agent of such customer which is inaccurate or incomplete in any particular, with the intent of giving a secret rebate to any such person.

6. No retailer shall give to any customer any premium, free goods below his regular price in any type of combination offer, secret discounts, rebates, free samples of commercial size or special services, for which the customer would be in the ordinary course of business charged for such by the retailer, nor shall he issue any false or inaccurate invoice or quotation, imperfectly recording or concealing the true facts of any transaction.

7. No retailer shall purchase goods or merchandise from a wholesaler at wholesale prices other than for the purpose of *bona fide* resale to consumers, paying the retail price to him therefor. This does not refer to the purchase of any goods or merchandise at wholesale prices by the retailer when such said goods are included in the classifications for which he is licensed and are for the use of himself or his family. This does not prevent employers from selling to their employees at their regular discount.

\*The term "Loss Leader" as defined in the code means "merchandise featured or sold at prices easily distinguished as less than customary prices; such price reduction being made for the purpose of attracting customers and promoting sales not so much of the featured article as all other articles on which higher profit is secured."

8. Any goods, wares or merchandise purchased or acquired as a bankrupt stock and offered to the general public as a bankrupt stock sale, shall be advertised, marked and offered for sale as such. Nor shall any bankrupt stock so offered for sale be supplemented or replaced with any goods, wares or merchandise from any other source.

9. The terms "Closing Out Sale" in any advertisement shall only be used by a merchant who is discontinuing business or closing out a particular Department in his business. This shall not interfere with "Clearance Sales" of seasonable or perishable goods, wares or merchandise.

10. "Fire Sale Stock" advertised and offered for sale as such shall not be supplemented or replaced by any goods, wares or merchandise from any other source.

### Labour Provisions.

The labour provisions contained in the Code are as follows:

1. Employees of retailers in all branches or sections of retail trade, shall have the right to organize and/or become affiliated with any retail employees' association and shall be free from interference, restraint, coercion, on the part of their employers or agents of their employers.

2. No employee of any retailer and no one seeking employment in the retail trade shall

be required, as a condition of employment to join any company, union or association or to refrain from joining, organizing or assisting any labour organization of his own choosing.

3. All retailers shall comply with provincial laws regarding hours of labour and minimum wages.

### Registration and License Fees.

Pursuant to the provisions of the Licensing of Trades and Businesses Act the following scale of fees (registration and licence) is established:

Owner or manager and up to two clerks, \$2.00.

Owner or manager and up to five clerks, \$4.00.

Owner or manager and over five clerks, \$6.00.

A general store will not require any additional licence where there is no other store in the same municipality, village, town or city handling one of the general store's classifications exclusively.

Additional licences of \$1 each are required where a store handling more than one classification is in competition with a store handling one of those same lines exclusively in the same municipality, village, town or city.

In all cases, delivery boys are exempt in arriving at the number of clerks.

A list of the retail trade classifications is given.

### Cleaning and Dyeing Industry.

Effective April 6, 1936, the cleaning and dyeing industry of the province was established on a code basis under the Trade and Industry Act. The code of fair competition and business practice for this industry also contained a schedule of approved prices below which no firm or operator is permitted to sell its services. It is pointed out in Article 4 of the Code that the cleaning and dyeing industry being a service industry is not confronted with inventory problems. Further, it is declared that "predatory price competition in this province has resulted in the exploitation of labour and the practical elimination of competition on a quality and service basis. This Code is intended to provide against predatory 'cut-price' operations in such a manner as to restore competition on the basis of quality and service."

As a further check against what was termed "predatory prices," the code prohibits special inducements in the form of discounts, special cash and carry prices, premiums, etc.

In a "declaration of policy" the Code declares that every regulation and rule is to be construed so as to promote the purpose and policies of the Act and more particularly to:—

(1) induce co-operation between employees and employers.

(2) promote organization as a basis of co-operative action among trade groups.

(3) eliminate unfair competitive practices.

- (4) improve the standard of labour.
- (5) remove obstacles to business recovery.
- (6) rehabilitate and conserve the natural and human resources of the province.

No provision in this code shall be interpreted or applied in such a manner as to:—

- (a) promote monopolies.
- (b) permit or encourage unfair competition
- (c) eliminate or oppress small industries.
- (d) discriminate against small industries.
- (e) adversely affect the interests of the consumers and the general public.

Minimum service standards in dry cleaning and dyeing are specifically detailed in Article 5 of the Code, while in Article 8 are listed the unfair methods of competition which are now prohibited. These included: misleading advertising, underselling claims, misleading guarantees, misrepresentation of prices, "wholesale to consumers," free storage, discounts or commissions, coupons, false or misleading statements concerning insurance, and disclaimers of lawful responsibility for articles, etc.

Protection of the consumer and public interest is provided by Article 3 which stipulates that every establishment must display conspicuously by placard to what extent and against what hazards articles left for cleaning are insured.

Fire and health precautions are safeguarded in the prohibition of the use of solvents other than those of an approved type.

### General Labour Provisions.

The general labour provisions of the code are as follows:—

1. No employee and no one seeking employment shall be required as a condition of employment, to purchase any stock in any employer's company as a condition of obtaining payment of past due or future wages or for any purpose designed to substitute such purchase in whole or in part for the full payment of wages.

2. No employee or no one seeking employment shall be required, as a condition of employment, to join or refrain from joining any association of his or her own choosing.

3. No person shall be employed in any cleaning and/or dyeing establishment, who is less than sixteen years of age.

4. No employer shall employ or permit to be employed as apprentices in any class of employment in any cleaning or dyeing establishment more than 25 per cent of the total

number of either male or female employees in that class of employment in that establishment.

5. It is a provision of this Code that no person shall be employed by any dry cleaning establishment, as a full-time employee, at less than the minimum wage as set out in The Minimum Wage Act, being Chapter 181, Revised Statutes of Alberta.

6. It is a provision of this Code that where wages at present above the minimum are being paid, such wages shall not be decreased in any instance.

7. It is a provision of this Code that no apprentice shall be employed whenever it is possible to employ skilled labour.

*Registration and Licensing.*—The fee for registration and licensing of dry cleaning and dyeing establishments is graded as follows: owner or manager and up to three employees—\$5; up to six employees—\$10; over six employees—\$15.

## ANNUAL REPORT ON MINING IN ALBERTA IN 1934

THE annual report of the Mines Branch of the Alberta Department of Lands and Mines, for the calendar year 1934, recently issued, shows that the total output of coal produced during the year amounted to 4,748,848 tons, with a valuation of \$12,440,616.53, being an increase of 33,974 tons over the output for 1933. In addition to the above, 3,036 tons were produced by farmers under permits granted for the purpose of obtaining coal for their own use, and it is reported that there was a further considerable tonnage produced by farmers without either permit or lease.

The disposition of coal produced during the year was as follows: 1,087,898 tons sold for consumption within the province; 1,561,387 tons in other parts of Canada; 13,739 tons sold for consumption in the United States; 1,687,850 tons sold to railroad companies; 14,765 tons used in making briquettes; 91,745 tons used in making coke; 175,263 tons used under colliery boilers; 7,088 tons used by colliery railroads; 53,147 tons put to stock and 112,656 tons put to waste. In addition to the coal mined there were 3 shale pits in operation producing 13,561 tons of clay and shale from which 4,398,032 bricks and 1,171 tons of hollow tile were made.

During the year, 320 mines were in operation of which 21 were opened, 5 re-opened, and 35 abandoned. In addition to the mines abandoned there were 34 mines temporarily closed, leaving 276 mines in operation at December 31, 1934.

On December 31, 1934, the total number employed in all the coal fields—domestic, sub-bituminous and bituminous—was 9,655, of

which 7,288 were underground workers. Of the total employed, 5,866 were in domestic fields, 804 in sub-bituminous fields, and 2,985 in bituminous coal mining. The *per capita* production in all fields, based on the average total (7,863) employed was 604 tons per man employed and 744 tons per man employed underground. A summary of the statistics presented in the report is in part as follows: average number of persons employed below ground, 5,809, and the average employed above ground, 2,054; number of certificates of competency as coal miners issued in 1934, 133; third class certificates, 46; second class certificates, 13; first class certificates, 1; provisional certificates (overman), 162; number of persons prosecuted under the Coal Mines Regulations Act, 20; electrical power purchased, 19,447,621 kilowatt hours.

*Accidents.*—During the year, there was a total of 153 accidents of which 15 were fatal, 10 of these deaths being caused by an explosion. There were 135 accidents below ground, and 18 above ground; 12 of the fatal accidents occurred below ground. In 1933 there were 175 accidents including 6 fatalities.

In 1934 the ratio of accidents per 1,000,000 tons of coal mined was 32.21 and the ratio of accidents per 1,000 men employed was 19.45. The greatest single factor in the cause of accidents was "haulage".

The usual accident prevention measures included the analysis of mine air and tests with gas detectors. Samples of rock dust used for rock dusting the roadways in the bituminous mines were collected and forwarded to the provincial analyst to be tested

for silica content. Also samples of coal have been collected and forwarded to the Industrial Research Department, University of Alberta, for analysis.

A number of mines have installed the latest type of electric cap lamps with 30 to 50 candle power, which materially increase the lighting effect.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION.

### World Unemployment Situation

For almost three years, the quarterly statistics of the International Labour Office have shown a regular decrease in unemployment in the majority of countries for which information is available. The figures for the end of March, 1936 (and which, according to the countries, are for the various months from November to March), show that this improvement continues, though in most cases it is slight.

In comparison with the position at the corresponding date last year, the number of registered unemployed has decreased in Australia, Belgium, Canada, Chile, Denmark, Estonia, Finland, France, Germany, Great Britain, Japan, New Zealand, Norway, Poland, Sweden, and the United States. Moreover, in Luxembourg and South Africa, for which unemployment statistics are not available, the index of employment has risen, and therefore shows a favourable trend.

It is to be noted that France and New Zealand were included in previous quarterly statistics of the International Labour Office among the countries in which unemployment had increased as compared with figures for the preceding year; this time, they show a decrease.

On the other hand, an increase is recorded in Denmark, the Irish Free State, Roumania and Switzerland.

In certain countries—Austria, Bulgaria, Czechoslovakia, Hungary, Latvia, the Netherlands and Yugoslavia—there are different series of figures which render it difficult to determine whether unemployment has increased or decreased.

Once more attention must be drawn to the fact that the statistics collected only permit of comparing trends. They do not afford any comparison between levels of unemployment or employment in several countries. The methods applied in compiling these statistics differ from one country to another, and in some cases the figures are so far from actual facts that they can only be treated as roughly significant, and not as accurate measurements.

### "The Story of the International Labour Organization"

"Industrial and Labour Information," the weekly publication of the International Labour Office, Geneva, refers in its issue of March 30

to a small booklet just issued in England under the main title of "Towards Better Things," which has for its sub-title "The Story of the International Labour Organization." The I.L.O. publication makes the following comment on this booklet:—

"The author, Mrs. Nora Hewett, clearly had a single purpose in view; to tell a 'story' in such plain and homely language that young and old alike could read it without effort and find both pleasure and instruction in the reading of it. The International Labour Organization has already formed the subject of a number of works sufficient to fill a big bookshelf, but this little book is unlike any of them. It is not a historical record, a scientific thesis, or a juristical treatise. It is just a simple, straightforward, 'popular' narrative of how and why the I.L.O. came into being, how it works, and what it has done. All the essential facts are presented accurately but in a style which is delightfully easy and conversational. Where the author finds it absolutely impossible to avoid the use of a formal, official term (e.g., Congress, Convention, ratify), she is careful to give a definition or a paraphrase in more colloquial words. As Professor John Hilton says in a preface to the book, the story told by the author is 'as good as a novel' and better, because 'it is true.'"

### Co-operative Purchasing of Farm Supplies in the United States

"The Co-operative Purchasing of Farm Supplies" is the title of a bulletin recently published by the Farm Credit Administration, Co-operative Division at Washington. In an introductory note it is stated that co-operation in agriculture in the United States has two major aspects—(1) selling agricultural products and (2) purchasing the supplies and services needed in agricultural production and marketing. While many Government bulletins have been devoted to co-operative marketing, there is no comprehensive publication of the Federal Government devoted to the co-operative purchasing of farm supplies even though this form of co-operation is fully recognized in Federal and State laws. This bulletin is designed to provide information on this important phase of agricultural co-operation in the United States.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JANUARY TO MARCH, 1936

**B**USINESS transacted by the offices of the Employment Service of Canada during the quarter January to March, 1936, showed a decline from that effected during the corresponding quarter of 1935, as there was a decrease of

about 2 per cent both in vacancies offered and placements effected. All groups, except farming, transportation and services, showed losses in both cases, the greatest being in construction and maintenance, where relief placements on

work sponsored by the Dominion and provincial governments were fewer in number. A substantial gain was shown in farming, followed by one of lesser magnitude in services, but that in transportation was nominal only. Provincially, the Maritimes, Ontario and British Columbia recorded declines in both vacancies and placements, those in Ontario and British

Columbia being quite marked. Quebec, Saskatchewan and Alberta reported gains in both instances, that in Saskatchewan practically offsetting the loss in Ontario, while Manitoba registered a minor gain in vacancies and a small decrease in placements.

From the chart on page 445 which accompanies the article on the work of the employ-

ment offices for the month of March, 1936, it will be seen that the curves of vacancies and placements in relation to applications showed slight variations throughout the quarter, there being less than 6 points change. The low for vacancies was 45.3 for the first half of January, and the high 51.0 for the first half of February the corresponding low for placements being 42.5 and the high 48.7, also registered during the same periods. At the close of the quarter, the ratio of vacancies in relation to application was 47.9 and that of placements 43.6 in contrast with 52.9 and 48.9, respectively, shown at the end of March a year ago. During the period January to March, 1936, there was a ratio of 48.1 vacancies and 45.2 placements for each 100 applications for employment, as compared with 56.3 vacancies and 53.3 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 1,031, of applicants registered 2,141, and of placements effected 969, in contrast with a daily average of 1,049 vacancies, 1,865 applications, and 994 placements in regular and casual employment during the first quarter of 1935.

During the three months January to March, 1936, the offices of the Employment Service reported that they had made 78,537 references of persons to positions, and had effected a total of 73,584 placements, of which 43,684 were in regular employment and 29,900 in casual work. Of the placements in regular employment, 31,306 were of men and 12,378 of women, while casual work was found for 21,923 men and 7,977 women. A comparison with the same period of 1935 shows that 75,500 placements were then made, of which 44,949 were in regular employment and 30,551 in casual work. Applications for employment during the period under review were received from 122,778 men and 39,900 women, a total of 162,678, in contrast with a registration of 141,691 during the same period in 1935. Employers notified the Service during the first quarter of 1936 of 78,303 positions, of which 53,951 were for men and 24,352 for women, as compared with 79,708 opportunities for work offered during the corresponding quarter of 1935.

In another section of this issue will be found a report in detail of the transactions of the employment offices for the month of March, 1936.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF APRIL, 1936

### Reports of the Superintendents of the Employment Service

The employment situation at the end of April, 1936, was reported by the Superintendents of the Employment Service of Canada to be as follows:

Farmers in the Maritime Provinces had started spring ploughing, which had been somewhat handicapped by adverse weather. Logging was completed for the season, but pulp peeling had started. Fishing was fair, good catches of cod, haddock, halibut, herring and scallops being reported. Coal mines in the New Glasgow area operated from 2½ to 5 days per week, while those in Cape Breton and vicinity, with the exception of one mine which was idle, worked from one to 5 days per week. No idleness was reported in the iron and steel group. Manufacturing remained practically unchanged, with about the average production. Clay products, confectionery and foodstuffs were operating on full time, but some other lines were rather slack. Nothing of importance was transpiring in new building construction, but projects in the course of erection were proceeding steadily. Saint John drydocks were busy with overhaul work. Highway construction was slowly getting underway as roads became dry enough for machines to be placed on them. Trade, wholesale and retail, was

fair, and transportation good. Spring cleaning created a greater call for charworkers and maids in the Women's Division.

Farming showed little activity in Quebec. Log driving had started in different sections of the province, although quiet at Sherbrooke and Three Rivers. Manufacturing was reported as follows: Hull and Sherbrooke, fair improvement; Montreal, tobacco and rubber slack, clothing fairly busy, shoe factories active; Quebec City, 75 per cent of the employees engaged in leather and shoe factories were working full time, but activity in clothing and fur had declined; Three Rivers, industrial plants, except paper which recorded a decline, were operating normally. No new building construction of any importance was underway, but a number of skilled artisans in the building trades and construction labourers found work on projects already started. Highway construction also absorbed a number of men. Transportation was active and trade was somewhat better. The placement of women in domestic service was heavy, for at this time of the year many orders are received for charworkers and house cleaners.

Calls for farm labourers were increasing in Ontario, with a good type of farm hand ap-

plying, wages ranging from \$15 to \$25 per month. Orders in logging were practically confined to skilled help such as cooks, handymen and blacksmiths, who were preparing the camps for the milling season which would open shortly. Lakes and rivers in many sections were still frozen over so that river driving had not yet started. Continued cold weather had held up new work in the mining centres, but the demand for experienced miners was good. Placements in manufacturing remained at about the same level and covered a wide range of industries, with no particular line predominating. Nearly all factories were running fairly steadily, with very little change in staffs. No marked developments were reported in building construction. Some improvement in this line was noted, but it consisted largely of casual work on repair and alteration jobs. Highway construction also continued. Although the Welland Canal had opened, navigation was held up owing to ice in the Great Lakes. In the meantime, crews were arriving at Fort William and boats were being outfitted and painted. Day work for women showed some slight improvement, but experienced help was scarce.

Seeding throughout the Prairie Provinces was underway, but was confined to the higher land and drier districts, as cold weather had considerably delayed field work in other sections. The soil, generally, was reported to be in good condition, with a fair supply of moisture in store. An encouraging demand for married couples for farms was reported from Winnipeg. Logging was only fairly busy. Nearly all mines were operating part time only, and with skeleton crews. Manufacturing was unchanged. Relief undertakings furnished the bulk of work proceeding under the construction group, but some men found employment as section hands in railway maintenance gangs. There was a fair demand for domestics, both city and country; the latter positions, however, were difficult to fill.

There was a slight increase in orders for farm help in British Columbia as the season opened, and orchards were reported as advancing favourably. Conditions in logging were active, except at Nanaimo, where a strike was still in progress. Nearly all sawmills and logging camps were operating at capacity. Coal mining was brisk, but no call for help. Manufacturing was unchanged. While noteworthy improvement from the conditions prevailing latterly was recorded in building construction, there still remained a large surplus of workers in the building and allied trades for whom, at the present, there was little prospect of work. A number of men, however, had lately been absorbed in the fishing industry, as well as in canneries and storage plants. Drydocks and shipyards at Prince Rupert were fairly active,

but water work there was rather slack. At New Westminster, Vancouver and Victoria conditions in this line were good. Trade was better. A steady demand existed for household domestics, but experienced maids were scarce.

---

### Student Employment in Geological Surveys

Announcement has been made that the Dominion Department of Mines would continue this summer its intensive program of geological surveys inaugurated last year (LABOUR GAZETTE, May, 1935, page 393). The field parties will employ approximately 800 science students from the various universities during the summer months. Funds available for this purpose approximate \$700,000, including the unexpended balance of \$150,000 of last year's surveys.

---

At the recent annual convention of the Registered Nurses of Ontario, a committee was appointed to study proposals respecting the eight-hour day with a view to having it more widely adopted.

---

According to a reported announcement by the Hon. David A. Croll, Ontario Minister of Public Welfare, Municipal Affairs and Labour, schedules of the Minimum Wage Board will be amended to extend to all industrial areas whether or not they are in organized municipalities.

---

Complete statistics of immigration to Canada for the calendar year 1935, with some comparative figures for 1934, were given in the LABOUR GAZETTE, March, page 287. A statement has since been published, by the Department of Immigration and Colonization, covering immigration to Canada for the fiscal year ended March 31, 1936, as compared with March 31, 1935. These later statistics indicate that the total number of immigrants during the fiscal year, 1936, was 11,103 as compared with 12,136 in 1935, a decrease of 8.5 per cent.

---

The gross agricultural revenue of Canada is estimated at \$943,081,000 for 1935 as compared with \$942,565,000, the revised estimate for 1934. This represents an increase of only \$516,000, or less than one per cent. Increases are shown in the revenue from farm animals, wool, dairy products, fruit and vegetables, poultry and eggs, maple products and flax fibre, but these increases are largely offset by the decrease in revenue for field crops, fur farming, tobacco, clover and grass seed and honey.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN MARCH, 1936

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on April 1 was 9,474, the employees on their payrolls numbering 918,716 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for April was 1,778, having an aggregate membership of 168,712 persons, 14.5 per cent of whom were without employment on April 1.

It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) The Employment Situation at the Beginning of April, 1936, as Reported by Employers.

Employment at April 1 showed a seasonal curtailment, according to data tabulated in the Dominion Bureau of Statistics from 9,474 establishments whose staffs aggregated 918,716 persons, compared with 933,221 in the preceding month. Statistics furnished by leading employers show that industrial activity at the beginning of April has suffered a between-seasons contraction in fifteen of the sixteen preceding years since 1920. Ordinarily, this mainly results from the release of bushmen following the completion of the season's logging program, before any considerable number of workers have been absorbed into the outdoor industries opening up in the spring and early summer. The general loss at April 1, 1936, exceeded the average decline at that date in the years for which statistics are available, although it was smaller than the reduction indicated at the beginning of April in each of the years, 1921, 1923, 1930 and 1935.

The crude index (based on the 1926 average as 100), showed a decrease from 98.9 at March 1, 1936, to 97.4 at the date under review, when it was higher than at April 1 in any other year since 1931. After correction for seasonal trend, the index at the latest date stood at 103.3, compared with 103.7 in the preceding month. The seasonally adjusted index, though lower than in the first quarter of the present year, and practically the same as at November 1, 1935, was with these exceptions higher than in any other month since the spring of 1931.

The unadjusted indexes at April 1 in the years of the record were as follows: 1936, 97.4; 1935, 93.4; 1934, 91.3; 1933, 76.0; 1932, 87.5; 1931, 99.7; 1930, 107.8; 1929, 110.4; 1928, 102.3; 1927, 97.4; 1926, 92.5; 1925, 88.3; 1924, 90.4; 1923, 88.7; 1922, 81.8 and 1921, 85.1.

The most pronounced contraction at April 1, 1936, was in logging, following a season of considerable activity. Construction also reported large reductions; these greatly exceeded the average losses indicated at the same date in the years since 1920, although they were on a much smaller scale than those noted at April 1, 1935. Partly as a result of unfavourable weather, employment in trade showed a substantial decline, which was of a contra-seasonal character. Coal-mining, hotels and restaurants and railway operation also released employees. On the other hand, manufacturing showed decided improvement, on a scale much larger than the average indicated in the years since 1920; the iron and steel and textile groups recorded greatly increased activity. Additions to staffs were also reported in metallic ore mining and in the service division as a whole.

For April 1, 1935, statistics had been received from 9,066 firms, whose employees had numbered 874,556, or 27,582 fewer than in the preceding month. Most of this decline had taken place in logging and construction. The index had then stood at 93.4, which was the low point for the year.

### Employment by Economic Areas.

The tendency was downward in three of the five economic areas, there being declines in employment in Quebec, Ontario and the Prairie Provinces; those in Quebec were most pronounced. The Maritime Provinces and British Columbia, on the other hand, showed improvement. The situation in each of these geographical divisions was more favourable than at the same date in any other of the years since 1931.

*Maritime Provinces.*—There was at April 1 a small increase in employment in the Mari-

firms employing 68,184 persons, compared with 70,241 in the preceding month.

*Quebec.* — Manufacturing, transportation, building and railway construction and logging showed curtailment in Quebec, the losses in railway construction and lumber camps being extensive; within the manufacturing group, textile, pulp and paper, electric light and power and iron and steel factories recorded considerably greater activity, but a reduction took place in tobacco and beverage, musical instrument and some other plants. On the other hand, highway construction and main-

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

time Provinces; the 649 co-operating employers enlarged their payrolls from 72,582 persons at March 1 to 72,729 at the beginning of April. Logging showed a decided seasonal contraction, and activity also declined in railway construction and maintenance. On the other hand, animal food, lumber and pulp and paper factories, highway and building construction, mining, retail trade and services showed improvement, that on the highways being pronounced. Employment was in greater volume than at the beginning of April, 1935, when substantial reductions had been indicated; the index stood at 101.8 at the latest date, while at April of last year, it was 95.8. Statements had then been received from 626

tenance, services and trade afforded more employment. Data were tabulated from 2,239 firms, with 252,688 employees, as against 262,633 at March 1. The index, at 91.4 at April 1, 1936, was several points higher than at the same date of last year, when the curtailment indicated was on a larger scale. The trend at this date has almost invariably been retrogressive, but the losses at the beginning of April, 1936, were greater than the average, although they have been three times exceeded in the years since 1920, viz., by those in 1921, 1934 and 1935. As at the same date of last year, the important decline at the latest date largely reflects seasonal reaction from the considerable activity in bush operations which

characterized the past winter, together with the release of men temporarily employed in railway construction and maintenance work following severe storms; some 6,000 workers were displaced from logging camps, while those laid off from highway and railway construction and maintenance numbered over 4,000.

At April 1, 1935, statistics had been furnished by 2,170 employers, whose payrolls had aggregated 235,855; this was a reduction of 14,795 from March 1 of last year.

*Ontario.*—Employment showed moderate curtailment in Ontario, where 4,213 employers had reduced their forces by 2,171 workers since the preceding month, bringing them to 397,323 at April 1. A much larger decrease had been registered by the 4,007 firms making returns for the same date in 1935, when their payrolls had aggregated 384,396. Employment then was at a rather lower level, the index standing at 100.7, compared with 103.4 at the latest date. The experience of the years since 1920 shows that activity customarily declines in Ontario at the beginning of April, there having been curtailment of operations in twelve of the fifteen previous years; the decrease at the date under review, how-

ever, was decidedly smaller than the average contraction indicated in these years.

Manufacturing showed further recovery at the first of April, notably in iron and steel products, while improvement also took place in the textile, pulp and paper, tobacco and beverage, chemical, clay, glass and stone and non-ferrous metal industries. In the non-manufacturing groups, mining, transportation, building construction and trade reported increased activity. Logging, however, released large numbers of workers owing to the completion of seasonal operations, and highway and railway construction were also slacker.

*Prairie Provinces.*—As is customary in the early spring, employment in the Prairie Provinces declined at the date under review; the reduction greatly exceeded that noted at April 1, 1935, and was also decidedly larger than the average loss indicated at the beginning of April in the last fifteen years. However, the index, at 90.5 at the latest date, was 3.6 points higher than at April 1, 1935, and was also higher than at that date in any other year since 1931. Most of the falling-off at the beginning of April in the present year took place in coal-mining, logging, construction and

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS  
(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia

April 1.....	97.4	101.8	91.4	103.4	90.5	95.9
Relative Weight of Employment by Economic Areas as at April 1, 1936.....	100.0	7.9	27.5	43.2	12.5	8.9

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

trade. On the other hand, manufacturing reported improvement, particularly in the iron and steel division. The working forces of the 1,386 co-operating employers aggregated 114,732 persons, compared with 120,454 at March 1. The firms furnishing data at the same date of last year had numbered 1,329, and their employees, 109,593.

*British Columbia.*—A substantial advance of a seasonal character was indicated in British Columbia, according to returns tabulated by the Bureau from 987 firms with 81,244 employees, or 3,186 more than in the preceding month. The increase greatly exceeded that indicated at April 1 in any other year of the record except 1926 which approximated the gain at the latest date. The situation was better than in the early spring of any of the preceding five years. There was marked improvement at the date under review in manufacturing, (especially of lumber products), and in logging and building and railway construction, while mining, shipping and highway construction released help. At the beginning of April of last year, the 934 co-operating firms had reported 76,528 employees, or practically

the same number as in the preceding month.

Table 1 gives index numbers by economic areas.

### Employment by Cities

Employment increased in Montreal, Toronto, Ottawa, Windsor and Vancouver, while losses were indicated in Quebec City, Hamilton and Winnipeg.

*Montreal.*—There was a further advance in industrial activity in Montreal, according to 1,304 employers who reported 132,303 persons on their payrolls, as compared with 131,057 at March 1. A decline had been noted at the same date of last year, and employment then was in rather less volume. Manufacturing showed general improvement at April 1, 1936, as compared with the preceding month, textiles and iron and steel reporting considerable increases; services and trade also afforded more employment. On the other hand, there were losses in transportation, and musical instrument and tobacco factories were also slacker.

*Quebec.*—Manufacturing and services registered moderate gains in Quebec City, while

Relative Weight of Employment by Ci- ties as at April 1, 1936.....	14.4	1.3	13.1	1.5	3.4	1.9	4.1	3.5

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

<sup>1</sup> Revised index.

transportation and construction were quieter; the result was a decrease of 213 in the working forces of the 169 firms making returns, who had 12,181 employees at April 1. A smaller decline had been noted at the beginning of April in 1935, when the index, at 93.4, was 1.7 points higher than at the latest date.

*Toronto.*—Toronto employers reported a further substantial increase, mainly due to a betterment in manufacturing, although services and retail trade also afforded more employment; within the factory group, the food textile, chemical and iron and steel divisions reported the greatest gains, while tobacco works were not so busy. Work on the streets and roads and in transportation was also rather slacker. The working forces of the 1,437 co-operating firms totalled 120,819 persons, compared with 119,781 in the preceding month. Employment was more active than at the same date of last year, although a rather larger advance had then been indicated; the index at April 1, 1936, stood at 98.7, as compared with 94.8 at the beginning of April in 1935.

*Ottawa.*—Continued improvement was noted in Ottawa, there being moderate gains in manufacturing, building and services. An ag-

gregate payroll of 13,395 workers was shown by the 177 employers whose statistics were tabulated, and who had 13,179 in their last report. The index, at 103.1, was a few points higher than at the beginning of April in 1935, when little general change had been recorded.

*Hamilton.*—Trade afforded rather more employment in Hamilton, while manufacturing, transportation and construction showed moderate declines. Returns were compiled from 280 firms employing 31,111 persons, or 111 fewer than at March 1. The level of employment was higher than at the same date in any of the last four years.

*Windsor.*—There was a large increase in the Border Cities at April 1. Data were received from 170 firms employing 17,827 workers, as against 15,989 in the preceding month. Automobile plants reported an important share of the additions made to the staffs of the co-operating employers, while those in other industries showed only slight general changes. Employment was not quite so active as at the beginning of April, 1935; this was partly a result of a change in the season for the production of the year's model cars in some factories.

Relative Weight of Em- ployment by Industries as at April 1, 1936.....	100.0	55.5	3.2	6.4	2.2	10.3	9.2	2.8	10.4

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

**Winnipeg.**—Employment declined in Winnipeg, where the payrolls of 465 employers furnishing statistics aggregated 37,793 workers, as compared with 40,408 in the preceding month. Construction and trade were slacker, while the fluctuations in the other divisions were slight. At April 1, 1935, a small advance had been noted, but the index then was lower, standing at 83.5, compared with 88.1 at the date under review.

**Vancouver.**—Improvement occurred in Vancouver, according to 423 firms with 32,073 employees, as compared with 31,058 in the preceding month. The advance took place principally in manufacturing, and within that division, chiefly in lumber mills; construction also afforded more employment. A decrease had been reported at the beginning of April of last year, when activity in this city generally was at a lower level; the index, at 100.1 at the latest date, was 10.4 points higher than at April 1, 1935.

Index numbers by cities are given in Table 2.

### Employment by Manufacturing Industries.

Further improvement was recorded in manufacturing, the advance being much larger than the average increase from March 1 to April 1 in the experience of the years since 1920. The most pronounced gains at the date under review occurred in iron and steel and textiles, in both of which they were decidedly above the average for the last fifteen years. Non-ferrous metal, lumber, pulp and paper, food, chemical, clay, glass and stone and some other groups also reported increased activity. On the other hand, declines were indicated in musical instrument and tobacco factories, those in the latter being partly seasonal in character. Statements were received from 5,606 manufacturers, employing 510,142 operatives, as compared with 502,411 in the preceding month. The index advanced from 99.5 at the beginning of March to 101.1 at April 1; this was

<sup>1</sup> The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

higher than at the same date in any of the last five years. Since the general increase exceeded the average gain at this date in the period 1921-1935, the seasonally-corrected index also advanced, rising from 101.3 at March 1, to 102.3 at the beginning of April.

The following shows the unadjusted index numbers in manufacturing at April 1 in the years for which data are available:—1936, 101.1; 1935, 93.9; 1934, 88.1; 1933, 76.0; 1932, 87.3; 1931, 99.7; 1930, 111.3; 1929, 116.5; 1928, 106.6; 1927, 101.5; 1926, 96.6; 1925, 91.2; 1924, 93.6; 1923, 92.6; 1922, 84.4 and 1921, 87.3.

A brief review of the situation at April 1, 1935, shows that the 5,394 manufacturers then furnishing data had employed 470,475 workers, an increase of 6,237 in comparison with their March 1, 1935, payrolls. The greatest gains had occurred in iron and steel, textile, pulp and paper and leather factories.

*Animal Products, Edible.*—Improvement was noted in dairies, fish canneries and meat-packing establishments. Statements were tabulated from 272 firms employing 21,079 workers, as against 20,601 at the beginning of March. A smaller increase had been recorded at April 1, 1935, when activity was at a lower level.

*Leather and Products.*—Little general change was shown in the leather group, according to statements from 291 employers whose payrolls aggregated 22,802 at the beginning of April. An advance had been indicated at April 1 a year ago, but the index of employment then was over four points lower.

*Lumber and Products.*—Gains were noted in container and vehicle factories, and in rough and dressed lumber mills. There was an increase of 943 in the lumber group as a whole; statistics were compiled from 806 manufacturers, with 35,580 employees, as compared with 34,637 at March 1, 1936. The increase was larger than that indicated at the beginning of April in any other year since 1931. The index, at 67.6 at April 1, 1936, was 4.6 points higher than at the same date of last year.

*Plant Products, Edible.*—There was a small advance in employment in vegetable foods in the period under review, curtailment in sugar and syrup refineries being more than offset by gains in the starch and glucose, coffee and spice and other divisions of this group. Returns were tabulated from 446 firms whose payrolls aggregated 28,025 persons, as compared with 27,921 at March 1. The index was several points higher than at the beginning of April, 1935, when a falling-off had

been noted as compared with the preceding month.

*Pulp and Paper Products.*—The movement in the pulp and paper group was upward, there being gains in the printing and publishing, pulp and paper and paper goods divisions. According to data received from 597 firms in the industry as a whole, they employed 59,312 workers, as compared with 58,557 in their last report. Employment was in greater volume than at April 1, 1935; an increase had then also been indicated.

*Rubber Products.*—Activity in 53 rubber works slightly advanced, 82 persons being added to their staffs, which totalled 12,254. A decline had been shown at the same date last year, and the index then was a few points lower.

*Textile Products.*—There was a further increase in employment in textiles at the beginning of April, chiefly in garment and personal furnishing, knitting and headgear factories, while cotton mills were slacker. Rather more extensive improvement had been noted at April 1, 1935, but the gain at the date under review considerably exceeded the average noted at April 1 in the fifteen preceding years for which data are available. Statements were compiled from 990 manufacturers with 101,542 employees, or 1,516 more than at March 1, 1936. Most of the improvement occurred in Quebec and Ontario. The index was nearly seven points higher than at the corresponding date of last year.

*Tobacco, Distilled and Malt Liquors.*—Seasonal reductions in employment were recorded in this group, 1,349 persons being released from the working forces of the 171 co-operating establishments, which employed 17,355 workers at the date under review. Most of the decline occurred in Quebec. The index was higher than in the spring of last year, when, less extensive curtailment had been noted.

*Chemicals and Allied Products.*—One hundred and ninety-nine plants turning out chemicals and allied products reported 11,146 employees, as compared with 10,830 in their last return. Most of the gain took place in Ontario. The general advance was rather smaller than that indicated at the corresponding date in 1935, but the index was then between seven and eight points lower.

*Clay, Glass and Stone Products.*—There was an increase in the personnel of building material works, 197 of which employed 7,873 persons, as against 7,420 in their last report. Similar additions to staffs had been indicated at April 1, 1935, when the index was many points lower.

*Electric Current.*—Moderate improvement was shown in this group, in which 99 plants reported 14,206 employees, or 126 more than at the beginning of March. There were gains in Quebec, with only minor changes elsewhere. The index of employment was several points higher than at April 1, 1935; a small increase had then also been reported.

*Electrical Apparatus.*—No general change was noted in electrical appliance factories, according to the 119 co-operating firms, who reported 12,811 persons on their payrolls, practically the same number as in their last report. A small gain had been noted at April 1, 1935, when the index was ten points lower.

*Iron and Steel Products.*—Statistics were received from 847 manufacturers in this group, whose staffs were enlarged by 3,430 workers to 123,055 at the beginning of April. There were gains in the automobile and other vehicle, crude, rolled and forged, machinery, heating appliance, wire and other groups. Improvement was shown in all except the Maritime Provinces, where there was no general change; the increase in Ontario was most noteworthy. Additions to the personnel had also been recorded in the same period of last year, but the index number was then nearly nine points lower than at April 1, 1936, when it reached its highest point since the spring of 1931.

*Non-ferrous Metal Products.*—Returns tabulated from 170 manufacturers in this group showed that they employed 20,952 persons, as against 20,246 at March 1. Most of the increase took place in the smelting and refining division. Geographically, the improvement was chiefly in Ontario. The level of employment was much higher than at the beginning of April in 1935; the advance then indicated had been on a decidedly smaller scale.

*Mineral Products.*—Little change on the whole, occurred in the number of workers in these industries at the beginning of April, according to data received from 139 establishments, in which 13,278 persons were employed. The index of employment in this group was four points higher than in the corresponding period of last year, when the situation had not shown much change from the preceding month.

### Logging

Continued and larger seasonal losses were reported in logging camps, 322 of which reduced their payrolls from 41,540 workers at March 1 to 29,071 at the date under review; this decline, though it affected a very large number of men, was smaller than that indicated, on

the average, at April 1 in preceding years of the record. The most extensive curtailment at the beginning of April was in Quebec and Ontario, although the movement was also downward in the Maritime and Prairie Provinces. In British Columbia, on the other hand, considerable improvement was noted. The seasonal contraction reported at April 1, 1935, had involved the release of many more workers, but the index number then was slightly higher than at the latest date, when it stood at 102·6.

### Mining

*Coal.*—As is customary at the beginning of April, there was, on the whole, a falling-off in employment in coal-mines during the period being reviewed; this occurred chiefly in the Western coal-fields. Data were received from 102 operators, whose staffs included 23,975 employees, as against 24,925 in their last report. The index was fractionally higher than in the spring of last year, when rather smaller declines had been reported.

*Metallic Ores.*—Returns were received from 173 firms in this group, employing 28,647 workers, or 439 more than at the beginning of March. An increase had also been indicated at the same date in 1935, when the index stood at 207·2, compared with 237·5 at the beginning of April of the present year.

*Non-metallic Minerals, other than Coal.*—A slight gain occurred in this group; 77 firms employed 6,253 persons, as compared with 6,119 in the preceding month. A small advance had also been recorded by the employers furnishing statistics at April 1 of last year, when activity was at a lower level.

### Communications

According to information received from 85 communication companies and branches employing 20,573 workers, the number on their staffs was unchanged from the preceding month, a small increase in telegraphs offsetting a similar decline on telephones. Little general change had been indicated at April 1, 1935; the index then was the same as at the latest date, viz., 77·7.

### Transportation

There was a slight falling-off in employment in the street railway and cartage division, and a larger, but still moderate reduction in steam railway operation, while shipping was rather more active. Statistics were compiled from 430 employers of 94,269 workers, as compared with 94,660 at March 1. Of the former number, 25,295 persons belonged in the local trans-

portation, 57,402 in the steam railway and 11,572 in the water transportation division. The present late season has retarded spring-time activity in this group, which frequently shows an advance at April 1. Employment in transportation was in slightly greater volume than at the corresponding date last year, when a rather smaller decrease had been recorded.

### Construction and Maintenance

*Building.*—Statements were compiled from 667 building contractors, with 21,149 persons in their employ, of 57 more than in their last report. A much larger gain had been indicated at April 1, 1935, but the index then was several points lower.

*Highway.*—Curtailement in staffs was noted on highway construction and maintenance; 310 contractors employed 41,279 men, as compared with 41,678 in the preceding month. The Maritime Provinces and Quebec reported heightened activity, while there were large losses in Ontario and the Western Provinces. Very pronounced reductions had been shown at April 1 of last year, but the number then engaged in this work was decidedly greater than in the period under review.

*Railway.*—There was a marked curtailement in employment in the construction departments of the railways in all provinces except British Columbia. Most of the decline was due to the completion of track-clearing operations as the winter drew to a close. The working forces of the 32 co-operating contractors and divisional superintendents aggregated 21,337 men, whereas in the preceding month they had 29,086 employees. The index number was slightly lower than in the

spring of 1935, when a much smaller decline had been recorded.

### Services

This group showed further improvement, according to 459 firms with 25,648 workers, or 216 more than in the preceding month. Laundries and dry-cleaning establishments were rather busier, but hotels and restaurants released some employees. A slight general decrease had been reported at the beginning of April, 1935; employment was then in smaller volume than at the date under review.

### Trade

There was a substantial decline in the aggregate forces of the 1,211 co-operating wholesale and retail establishments, which employed 95,873 workers at April 1, as compared with 97,497 at the beginning of March. This reduction, which was contra-seasonal, occurred in the retail division; activity in the group was adversely affected by the unseasonable weather generally prevailing at the beginning of April. A moderate advance had been indicated at the same date a year ago, but the index of employment then was lower, standing at 117.4, compared with 121.0 at the beginning of April, 1936.

### Tables

Index numbers of employment by economic areas, leading cities and industries, respectively, are given in the accompanying tables. The Columns headed "relative weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns at the date under review.

## (2) Unemployment in Trade Unions at the Close of March, 1936

The term unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle due to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Contrary to the slight improvement indicated by local trade union members during February the situation throughout March showed a tendency toward retarded activity,

though the change from the previous month was small. This was manifest from the returns forwarded by 1,778 labour organizations, embracing a membership of 168,712 persons, 24,384 or 14.5 per cent of whom were without work at the close of the month in contrast with a percentage of 13.8 in February. A somewhat better volume of work was afforded, however, than in March a year ago when unemployment stood at 16.7 per cent. Moderate increases in available employment were noted by British Columbia members from February, particularly among fishermen and navigation workers, and in Ontario and Saskatchewan lesser gains occurred. The trend in New Brunswick was favourable, though the variation from February was merely nominal. Between season quietness in the coal fields of

Alberta was the determining factor in the adverse situation noted in that province during March. In Quebec a downward employment movement was also shown when compared with February, the building trades and transportation industries contributing most substantially to the total decline. Activity in Nova Scotia and Manitoba was retarded by less than one per cent. Compared with the returns for March last year Ontario and British Columbia unions reported gains in activity on a noteworthy scale during the month reviewed, and the situation for New Brunswick, Quebec and Manitoba members was also more favourable, though the change

tractions were reflected. Saint John and Winnipeg unions showed but a fractional adverse change from February. When making a comparison with the returns for March, 1935, Toronto and Vancouver members were afforded a considerably better volume of work during the month reviewed, and in Regina more moderate employment gains were registered. Heightened activity, on a small scale was recorded by Halifax, Montreal, Winnipeg and Edmonton unions. Conditions in Saint John, however, were somewhat less favourable than in March last year.

Accompanying this article is a chart which illustrates the trend of unemployment by

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

from March a year ago was slight. In Saskatchewan the same percentage of idleness was indicated in both months under comparison. Nova Scotia and Alberta unions alone reported curtailment in employment, which was of small proportions.

Each month the records of unemployment affecting local trade union members in the largest city in each province, with the exception of Prince Edward Island, are tabulated separately. Halifax, Toronto and Vancouver unions reported moderately improved conditions during March from the previous month. In Edmonton considerable slowing up in activity was evident from February. Montreal members also suffered rather marked losses in employment, while in Regina lesser con-

months from January, 1930, to date. The curve during March traced a course contrary to that of February extending in an upward direction, an evidence of a slight increase in unemployment. The situation as indicated by the curve, was however, more favourable than in March a year ago when the level attained was above that of the month reviewed.

Employment advancement in small measure was evident in the manufacturing industries during March from both the previous month and March a year ago, according to the returns tabulated from 477 organizations with a total of 51,140 members. Of these, 6,164 or a percentage of 12.1 were out of work on the last day of the month as compared with

percentages of 13.9 in February and 13.2 in March, 1935. Hat and cap, leather and fur workers were decidedly more active than in February, and improvement, of much lesser degree, was manifest by glass and garment workers, general labourers, and printing tradesmen. A lower level of employment was, however, indicated by iron and steel, jewellery, textile and carpet, wood, and brewery workers, metal polishers, bakers and confectioners, paper makers and cigar and tobacco workers, though the recessions apparent, were of minor im-

portance. Contrasted with the returns for March last year brewery workers and general labourers reported increases in available work of noteworthy proportions during the month reviewed, and papermakers, and iron and steel workers more moderate expansion. Some employment advance was also manifest by cigar and tobacco workers, bakers and confectioners, metal polishers, and garment and jewellery workers. Wood and fur workers, however, showed some curtailment from March last year, and the situation declined slightly for leather, glass, textile and carpet, and hat and cap workers, and printing tradesmen.

From unions of coal miners 46 reports were received during March, involving a membership of 14,848 persons, 2,057 or 13.9 per cent of whom were idle on the last day of the month in contrast with a percentage of 8.0 in February. The Alberta coal mines reported a large increase in slackness during March due mainly to lack of orders, and in Nova Scotia and British Columbia activity was nominally retarded. Quieter conditions also prevailed in the coal mining industry than in March last year when the percentage of idleness was 11.2, the Alberta coal fields, as in the previous comparison, showing the greatest drop in work afforded, though contributory losses, on a much smaller scale, were reflected in the Nova Scotia mines. In British Columbia, however, substantial improvement was noted from March a year ago. In addition to the unemployment reported among the miners during the month reviewed, short time work continued prevalent.

The building and construction trades showed some slowing up in activity during March from the previous month, though employment recovery in substantial measure was apparent from March last year. Reports for the month reviewed were furnished by 203 associations of building tradesmen, covering a membership of 20,494 persons, 9,072 of whom were unemployed on the last day of the month, a percentage of 44.3 contrasted with percentages of 40.3 in February and 59.2 in March, 1935. Bridge and structural iron workers, and granite and stonecutters reflected decided betterment in the situation from February. Employment for electrical workers, on the contrary, was considerably restricted, and moderate recessions were indicated by plumbers and steamfitters, tile layers, lathers and roofers, steam shovelmen, bricklayers, masons and plasterers, carpenters and joiners, and painters, decorators and paperhangers. Among hod carriers and building labourers the trend was toward lessened activity, though the change from February was fractional. Compared with the returns for March, 1935, pronounced employ-

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

ment expansion was evident among bricklayers, masons and plasterers, carpenters and joiners, and tile layers, lathers and roofers, and improvement of marked degree was also shown by granite and stonecutters and steam shovel men. Heightened activity, on a moderate scale, from March a year ago was recorded by painters, decorators and paperhangers, while plumbers and steamfitters registered gains of less than one per cent. The situation for hod carriers and building labourers, and bridge and structural iron workers was considerably quieter than in March last year, and noteworthy employment curtailment was reflected by electrical workers.

Little variation in conditions affecting workers in the transportation industries was shown during March from the previous month, what slight change was indicated being in an unfavourable direction. This was apparent from the reports received for March from 804 associations, with a membership aggregate of 56,944 persons. Of these, 5,118 or 9.0 per cent were without work on the last day of the month in contrast with a percentage of 8.4 in February. Among steam railway employees, whose returns involved over 78 per cent of the entire group membership reported, minor contractions in available work were registered, and activity for navigation workers, teamsters and chauffeurs, and street and electric railway employees also subsided slightly. A small employment rise was noted in the transportation industries, as a whole from March, 1935, when the percentage of idleness stood at 10.4. In this comparison navigation workers were much better engaged during the month reviewed, and increases in available work of more moderate degree were noted by teamsters and chauffeurs. The situation for steam and street and electric railway employees, also showed some slight improvement.

Unemployment for retail shop clerks was maintained in much the same volume during March as in the preceding month, the percentage of idleness standing at 2.0 as compared with 1.9 per cent in February. The March percentage was based on the reports tabulated from 5 associations of these workers, with a total of 1,714 members. A greater volume of work was afforded than in March of last year when 7.3 per cent of the members reported were without employment.

The 78 associations of civic employees from which reports were received during March, including a membership of 8,412 persons,

showed that 333 or 4.0 per cent were unemployed on the last day of the month, contrasted with percentages of 5.0 in February and 2.0 in March last year.

In the miscellaneous group of trades during March the percentage of idleness remained identical with that of the preceding month, namely 10.4. This percentage for March was based on the reports compiled from 126 unions including 5,858 members, 608 of whom were idle at the end of the month. Fluctuations were apparent, however, in the various groups of trades, hotel and restaurant employees, unclassified workers, and barbers showing a favourable employment movement from February, and theatre and stage employees, and stationary engineers and firemen some curtailment of activity. The changes, however, were not of particular importance in any one group of trades. A higher level of employment was apparent in the miscellaneous groups of trades from March, 1935, when the percentage of inactivity was 15.4, all trades participating in this advance. Hotel and restaurant employees, particularly, were considerably better engaged, and among stationary engineers and firemen, and unclassified workers the gains were of moderate proportions. Theatre and stage employees and barbers showed but a slightly improved situation from March last year.

Fishermen registered extensive employment recovery during March from both the previous month and March, 1935, the 3 associations making returns with 574 members, indicating an unemployment percentage of 1.7 as compared with percentages of 37.3 in February and 64.2 in March last year.

Among lumber workers and loggers there was some slight gain in activity shown during March from the previous month, though unemployment remained in greater volume than in March a year ago. This was apparent from the returns tabulated from 3 unions of these workers with 588 members, 12.1 per cent of whom were reported without work at the end of the month in contrast with a percentage of 14.0 at the close of February and 5.8 per cent in March last year.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1935 inclusive, and also the percentage of unemployment by provinces for March of each year from 1919 to 1933 inclusive, and for each month from January, 1934, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for March, 1936

The volume of business transacted by the offices of the Employment Service of Canada during the month of March, 1936, as represented by the average daily placements effected showed losses of nearly 5 per cent and 10 per cent, respectively, from the previous month and from the corresponding period a year ago. Although nearly all industrial divisions showed gains over February, the highest of which were in services and farming, these were insufficient to offset the heavy decline recorded in construction and maintenance and the smaller loss in logging. In comparison with March, 1935, construction

placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. As may be seen from the graph, the curves, both of vacancies and placements, in relation to applications declined during the first half of the month, but showed an upward trend during the latter half of the period under review. At the end of March, however, they were 5 points below the levels attained at the close of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 45.5 during the first half and 47.9 during the second half of March,

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

and maintenance was again the deciding factor, as the decrease in that group, augmented by others of lesser degree in logging, manufacturing, mining and trade, was considerably greater than the gains in farming, services and transportation, although that in farming was quite substantial. In both instances the loss in construction and maintenance was attributable to the fact that fewer placements had been made during March, 1936, on relief projects sponsored by the Dominion and provincial governments.

The accompanying chart shows the trend of employment since January, 1934, as represented by the ratios of vacancies notified and of

1936, in contrast with the ratios of 54.8 and 52.9 during the corresponding periods of 1935. The ratios of placements to each 100 applications during the periods under review were 42.6 and 43.6 as compared with 52.0 and 48.9 during the corresponding month of 1935.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during March, 1936, was 925, as compared with a daily average of 954 during the corresponding month a year ago and with 1,000 recorded daily in February, 1936.

The average number of applications for employment received daily by the offices of

the Service during the month under review was 1,977, in comparison with 1,770 in March, 1935. Applications for work during the preceding month of 1936 averaged 1,985 daily.

The average number of placements made daily by the offices of the Service during March, 1936, was 854, of which 458 were in regular employment, and 396 in work of one week's duration or less, as compared with a total daily average of 948 during the preceding month. Placements in March a year ago averaged 894 daily, consisting of 554 in regular and 340 in casual employment.

During the month of March, 1936, the offices of the Service referred 24,037 persons to vacancies and effected a total of 22,181 placements. Of these, the placements in regular employment were 11,893, of which 7,474 were of men and 4,419 of women, while placements in casual work totalled 10,288. The number of vacancies reported by employers was 15,109 for men and 8,941 for women, a total of 24,050, while applications for work numbered 51,395, of which 37,730 were from men and 13,665 from women. Reports for February, 1936, showed 24,983 positions available, 49,618 applications made, and 23,687 placements effected, while in March, 1935, there were recorded 24,788 vacancies, 46,014 applications for work, and 23,231 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1926, to date:—

Year	Placements		
	Regular	Casual	Totals
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367
1930.....	187,872	180,807	368,679
1931.....	175,632	295,876	471,508
1932.....	153,771	198,443	352,214
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936 (3 Months).....	43,684	29,900	73,584

#### NOVA SCOTIA

During the month of March, orders received at the Employment Offices in Nova Scotia called for nearly 10 per cent more workers than in the preceding month, but over 6 per cent less than in the corresponding month of last year. There was a gain of nearly 9 per cent in placements when compared with February, but a loss of nearly 10 per cent in comparison with March, 1935. The decrease in placements from March of last year was due to a reduction under con-

struction and maintenance, as a small loss in services was more than offset by a gain in logging, and the changes in all other groups were unimportant. Industrial divisions in which most of the placements were effected during the month were: logging, 73; construction and maintenance, 597; and services, 290, of which 224 were of household workers. There were 88 men and 68 women placed in regular employment during the month.

#### NEW BRUNSWICK

Orders listed at Employment Offices in New Brunswick during March called for nearly 5 per cent less workers than in the preceding month and nearly 25 per cent less than during the corresponding month of last year. The same percentages of loss were reported in placements under both comparisons. A reduction in placements from March, 1935, in construction and maintenance accounted for the decline under this comparison, as all other groups showed nominal changes only. Placements during the month were almost entirely confined to the services division, in which there were 533: of these 417 were of household workers. Placements in regular employment numbered 8 of men and 94 of women.

#### QUEBEC

Opportunities for employment as indicated by orders received at Employment Offices in the Province of Quebec during March were nearly 2 per cent less favourable than during the preceding month and more than 2 per cent below the corresponding month of last year. There was a decline of nearly 12 per cent in placements when compared with February and of nearly 7 per cent in comparison with March, 1935. When comparing the placements in each industrial division during the month under review with March of last year, a substantial decline was recorded in construction and maintenance and a small loss in trade. Services, on the other hand, showed the most noteworthy increase, followed by gains of lesser importance in logging and manufacturing. Placements by industrial divisions included: manufacturing, 213; logging, 309; construction and maintenance, 566; trade, 67; and services, 2,311, of which 2,085 were of household workers. There were 995 men and 1,662 women placed in regular employment.

#### ONTARIO

There was an increase of over 10 per cent in the number of positions offered through Employment Offices in Ontario during March when compared with the preceding month and of over 12 per cent in comparison with

the corresponding month of last year. Placements also were over 8 per cent higher than in February and nearly 12 per cent above March, 1935. The increase in placements over March of last year was due to a large gain under construction and maintenance. Farming also showed improvement and there were small increases in services, trade and transportation. These gains were partly offset by a substantial decline in logging and small losses in manufacturing and mining. Placements by industrial divisions included: manufacturing, 493; logging, 210; farming, 969; mining, 101; transportation, 86; construction and maintenance, 3,995; trade, 319; and services 3,142, of which 2,042 were of household workers. Placements in regular employment numbered 2,289 of men and 1,331 of women.

#### MANITOBA

Employment opportunities, as indicated by orders received at Employment Offices in Manitoba during March, were about 10 per cent less favourable than in both the preceding month and the corresponding month of last year. Placements also showed a decline of about 12 per cent under both comparisons. A large reduction in placements under construction and maintenance accounted for the decline from March, 1935, supplemented by small losses in logging and manufacturing. These decreases were partly offset by a substantial gain in farm placements and a small increase in services. Industrial divisions in which most of the placements were effected during the month were: logging, 48; farming, 821; construction and maintenance, 269; and services, 566, of which 459 were of household workers. There were 1,141 men and 341 women placed in regular employment during the month.

#### SASKATCHEWAN

During the month of March, positions offered through Employment Offices in Saskatchewan were nearly 19 per cent less than in the preceding month, but nearly 16 per cent above the corresponding month of last year. Placements were over 19 per cent less than in February, but nearly 19 per cent above March, 1935. Farm placements were considerably higher than during March of last year and, in addition, there were small gains in manufacturing and services. The only decline of importance was in construction and maintenance, although minor losses were also reported in mining, logging, trade and transportation. Placements by industrial divisions included: manufacturing, 54; farming, 1,036; construction and maintenance, 115; and services, 634, of which 483 were of household

workers. During the month 1,089 men and 394 women were placed in regular employment.

#### ALBERTA

There was a decline of nearly 7 per cent in the number of positions offered through Employment Offices in Alberta during March when compared with the preceding month and of nearly 5 per cent in comparison with the corresponding month of last year. Placements also were nearly 4 per cent less than in February and over 5 per cent below March, 1935. The only decline of importance in placements from March of last year was in construction and maintenance, although there was a small loss also in logging. All other groups showed increases, of which the largest were in farming, services and manufacturing. Placements by industrial divisions included: manufacturing, 78; logging, 64; farming, 784; construction and maintenance, 379; and services, 454, of which 366 were of household workers. There were 1,266 men and 325 women placed in regular employment during the month.

#### BRITISH COLUMBIA

The demand for workers, as indicated by orders received at Employment Offices in British Columbia during March, was nearly 32 per cent less favourable than in the preceding month and nearly 39 per cent below the corresponding month of last year. Similar percentages of decline were reported in placements under both comparisons. A large decrease in placements in construction and maintenance when compared with March, 1935, accounted for the loss under this comparison, although small reductions were also shown in all other groups except services, transportation and trade. These gains, however, were small and did not, to any appreciable extent, affect the decline in the province as a whole. Industrial divisions in which most of the placements were effected during the month were: farming, 122; construction and maintenance, 1,344; and services, 709, of which 367 were of household workers. Placements in regular employment numbered 598 of men and 204 of women.

#### Movement of Labour

During the month of March, 1936, the offices of the Employment Service of Canada made 11,893 placements in regular employment, 5,711 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter, 350 were granted the Employment Service reduced transportation rate, 294 going to centres within the same province as the despatching office and 56 to

other provinces. The reduced transportation rate which is 2.7 cents per mile with a minimum fare of \$4 is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

The labour movement in Quebec during March was of bushmen numbering 29, who journeyed from Hull to employment in the Pembroke zone. In Ontario, 192 persons benefited by the Employment Service reduced rate during March, these going to provincial situations. Travelling to centres within their respective zones the Port Arthur office assisted in the despatch of 62 bush workers, 45 highway construction workers, 38 mine workers, 2 hotel employees, 1 restaurant waitress, and 2 domestics; the Sudbury office of 27 bush workers; and the Fort William office of 11 bush workers and 1 mine blacksmith. In addition, the Fort William zone received 3 mine workers sent from Timmins. The Winnipeg office was entirely responsible for all transfers at the reduced rate in Manitoba during March which totalled 25. Of these, 24 were inter-provincial and one provincial. The latter was of a farm hand despatched to employment within the Winnipeg zone. Of the persons going outside the province, 21 were destined for the Port Arthur zone, among whom were 13 bush workers, 6 mine workers, and 2 hotel employees. The balance of this movement was of farm hands 3 in number, bound for Saskatchewan rural areas. From Saskatchewan centres 9 persons were conveyed to provincial employment during March. These included 7 teachers,

5 of whom travelled from Regina and 2 from Moose Jaw to situations within their respective zones. Securing a certificate at Saskatoon one bushman journeyed to Prince Albert, while from Yorkton one dry cleaner was bound for Weyburn. Alberta transfers at the reduced rate during March numbered 70, all provincial. For centres within its own zone the Edmonton office despatched 15 farm hands, 4 farm domestics, 12 water transportation employees, 12 bushmen, 6 sawmill hands, 5 mine workers, 5 building construction workers, 1 fisherman, 1 carpenter, 1 blacksmith, 1 garage mechanic and 1 bookkeeper. In addition, from Edmonton 1 blacksmith was transferred to Drumheller. The Calgary office arranged for the transportation of one farm hand each to the Drumheller and Edmonton zones, and of 3 farm hands to points within its own zone. Offices in British Columbia granted 25 certificates at the reduced transportation rate during March, 22 for points within the province and 3 for centres outside. Provincially the Vancouver office shipped 16 mine workers and 3 sawmill labourers to Kamloops, and 1 cook within its own zone. Transferred from Nelson 1 mine cook and 1 farm hand were carried to Penticton. The interprovincial movement emanated from Vancouver and included the despatch of 3 shipwrights to Edmonton.

Of the 350 persons who took advantage of the Employment Service reduced transportation rate during March, 213 were conveyed by the Canadian National Railways, 126 by the Canadian Pacific Railway, 8 by the Northern Alberta Railway, and 3 by the Temiskaming and Northern Ontario Railway.

#### (4) Building Permits Issued in Canada During March, 1936

According to returns tabulated by the Dominion Bureau of Statistics, the value of the building permits issued by 58 cities during March was \$2,361,271; this was an increase of \$449,387 or 23.5 per cent over the February total of \$1,911,884. On the other hand, there was a decline of \$1,661,484 or 41.3 per cent as compared with the aggregate of \$4,022,755 reported for March, 1935, when authority had been granted for the erection of a large public building in one of the co-operating cities. Construction work so far this year has been retarded by unusually severe weather in many sections of the country.

The value of the building authorized during the first quarter of the present year amounted to \$5,556,871; this was a decrease of \$2,950,399 or 34.7 per cent as compared with the same period of 1935, although it was higher than in the months, January-March of 1934 or 1933. The cumulative total for the first quarter in

each of the last five years has been considerably lower than in any other year of the record.

Some 50 cities furnished detailed statistics for March, 1936, showing that they had granted some 265 permits for dwellings valued at more than \$1,166,000 and over 1,200 permits for other buildings estimated to cost approximately \$994,000. In addition, engineering projects, valued at approximately \$12,300, were authorized in two cities. During February, authority was given for the erection of about 100 dwellings and almost 600 other buildings, estimated to cost approximately \$310,000 and \$1,580,000, respectively.

Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba and Alberta reported increases in the value of the building authorized during March, 1936, as compared with the preceding month. The greatest gain was that of \$711,796 or 162.2 per cent in Ontario.

There was a large reduction in British Columbia, where the value of the construction permits taken out declined from \$1,184,062 in February, to \$496,750 in the month under review, or by 58 per cent.

As compared with March, 1935, Nova Scotia, New Brunswick, Quebec and British Columbia recorded increases, that of \$274,808 or 123·8 per cent in British Columbia being most marked. Of the reductions elsewhere recorded, that of \$1,477,400 in Manitoba was greatest.

Of the larger cities, Montreal showed increases as compared with February, 1936, and March, 1935; in Toronto and Winnipeg there were gains over the preceding month, but losses as compared with the same month of last year. On the other hand, Vancouver reported a decline in the first, but an increase in the second comparison. Of the other centres, Halifax, Sydney, Fredericton, Saint John, Quebec, Sherbrooke, Belleville, Fort William, Hamilton, Kingston, Niagara Falls, Peterborough, Port Arthur, Stratford, Sarnia, York and East York Townships, Welland, Edmonton, Medicine Hat, Kamloops, Nanaimo, New Westminster and North Vancouver reported higher totals than in either February, 1936, or March, 1935.

*Cumulative Record for First Quarter, 1936.*—The following table gives the value of the building authorized by 58 cities during March and in the first quarter of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building

materials in the first quarter of the same years are also given (1926=100).

Year	Value of permits issued in March	Value of permits issued in first quarter	Indexes of value of permits issued in first quarter (1926=100)	Average indexes of wholesale prices of building materials in first quarter (1926=100)
	\$	\$		
1936.....	2,361,271	5,556,871	24·7	84·0
1935.....	4,022,755	8,507,270	37·8	81·4
1934.....	1,109,085	2,710,999	12·1	82·2
1933.....	953,966	3,065,821	13·6	75·2
1932.....	3,396,729	9,453,012	42·0	79·3
1931.....	9,948,979	24,746,094	110·0	83·7
1930.....	13,356,787	29,493,262	131·1	96·7
1929.....	24,068,018	42,950,228	190·9	99·2
1928.....	15,128,413	33,163,338	147·4	95·5
1927.....	11,713,640	25,028,353	111·3	96·4
1926.....	10,634,491	22,493,574	100·0	102·0
1925.....	8,631,627	19,981,015	88·2	102·9
1924.....	9,493,620	18,047,999	80·2	112·2
1923.....	9,658,950	19,478,119	86·6	110·6
1922.....	10,615,531	18,680,173	83·0	108·0
1921.....	7,290,589	13,569,512	60·3	139·1
1920.....	8,736,675	18,909,986	84·1	139·4

As already stated, the value of the building authorized in the first quarter of 1936 was lower by 34·7 per cent than in the same months of 1935, when permits had been issued for large public buildings in several centres; however, the aggregate value of the building authorized in the first three months of the present year was higher than in either 1934 or 1933. The index numbers of wholesale prices of building materials in the last few years have been considerably below the average for the years since 1920.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, April, 1936, summarized the employment situation as follows:—

EMPLOYMENT showed a further substantial improvement in March, extending to the great majority of the principal industries. The most marked improvement, between February 24 and March 23, occurred in the building industry; but there were also substantial reductions in the numbers unemployed in public works contracting, stone quarrying, brick and tile making, the iron and steel, engineering, and motor vehicle industries, miscellaneous metal goods manufacture, the clothing trades, the woollen and worsted and cotton industries, furniture making, etc., pottery and earthenware manufacture, printing, the food industries, the transport and distributive trades, and hotel and boarding house service. On the other hand, there was a further increase in the

numbers temporarily stopped in the coal mining industry.

The improvement affected all administrative divisions except Wales, where there was a slight decline.

The estimated number of insured persons, aged 16-64, in employment in Great Britain at March 23, 1936, was 10,630,000. This was 155,000 more than at February 24, 1936, and 411,000 more than at March 25, 1935.

Among workpeople, aged 16-64, insured against unemployment in Great Britain and Northern Ireland, the percentage unemployed at March 23, 1936 (including those temporarily stopped as well as those wholly unemployed), was 14·4, as compared with 15·4 at February 24, 1936, and with 16·4 at March 25, 1935. In Great Britain the percentage at March 23 was 14·2, compared with 15·3 at February 24, and with 16·2 at March 25, 1935.

At March 23, 1936, the numbers of persons on the Registers of Employment Exchanges in Great Britain were 1,560,574 wholly unemployed, 235,280 temporarily stopped, and 85,677 normally in casual employment, making a total of 1,881,531. This was 143,490 less than a month before and 272,339 less than a year before. The total included 1,482,442 men, 53,800 boys, 289,986 women, and 53,303 girls. The persons on the Registers included 852,580 persons with claims for insurance benefit; 701,437 insured persons with applications for unemployment allowances; 199,303 insured persons (including 20,149 insured juveniles under 16 years of age) not in receipt of insurance benefit or unemployment allowances, and 128,211 uninsured persons.

In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at March 23, 1936, was 1,947,998.

### United States

*Manufacturing Industries.*—The increase of 1·2 per cent in factory employment from February to March brought the level of the preliminary March employment index to 84·2. With the exception of the last three months of 1935, the March employment index exceeds the levels reported in any month since November, 1930. Pay rolls increased 4·7 per cent over the month interval, the preliminary March index (75·7) exceeding the levels recorded in any month since November, 1930, with the single exception of December, 1935.

Factory employment in March, 1936, was 2·1 per cent higher than in March, 1935 (82·5), 4·1 per cent above March, 1934 (80·9), and 43·2 per cent above March, 1933 (58·8), in which month the low point of factory employment was recorded. Pay rolls in March, 1936, were 6·9 per cent above the level of March, 1935 (70·8), 17·0 per cent above March, 1934 (64·7), and 104 per cent above March, 1933 (37·1).

The gains in employment and pay rolls between February and March were widespread, 66 of the 90 industries surveyed showing increases in employment, and 78 reporting larger pay rolls. The fertilizer industry reported the largest percentage increase in number of workers (50·2 per cent), due to spring shipments. Many industries related to building construction activities reported substantial seasonal gains in employment, among which were marble, granite, slate (21·6 per cent), cement (16·7 per cent), brick, tile, and terra cotta (8 per cent), structural ironwork, 5·4 per cent), sawmills (4·5 per cent) and millwork (2·8 per cent). Each of the six apparel industries surveyed reported gains in employ-

ment, the increases ranging from 20·6 per cent in the millinery industry, to 1·1 per cent in the corset and allied garment industries. Employment in the women's clothing industry increased 6·1 per cent and in men's clothing, 1·3 per cent. The electric and steam railroad car and the locomotive industries reported gains in employment of 12·3 per cent and 13·2 per cent respectively, due to orders placed for new equipment, and the shipbuilding industry showed a gain of 8·7 per cent. Other industries reporting substantial gains in employment from February to March were: beet sugar (9·9 per cent), beverages (7·1 per cent), ice cream (6·6 per cent), aircraft (5·6 per cent), pottery (5·2 per cent), stoves (4·7 per cent), and steam railroad repair shops (3·6 per cent). Smaller gains in employment were noted in a number of industries of major importance, among which were foundries and machine shops (1·9 per cent), electrical machinery (1·3 per cent), baking (1·1 per cent) blast furnaces-steel works-rolling mills (0·8 per cent), and newspapers and periodicals (0·8 per cent). The gain of 0·9 per cent in employment in the machine-tool industry in March continued the unbroken rise which has been shown each month since October, 1934. The March, 1936, employment index (104·5) exceeds the level recorded in any month since October, 1930. The agricultural implement industry, which reflects orders placed for farm equipment, also continued to absorb additional workers. The March, 1936, index of employment (138·7) in this industry is the maximum registered in any month since March, 1930.

The most pronounced decline in employment over the month interval (24·5 per cent) was in the automobile tire and tube industry and was due primarily to a temporary plant shut-down caused by labour difficulties. Radio and phonograph plants reported seasonal decline of 5·1 per cent, and woollen and worsted goods mills reported 4·5 per cent fewer workers in March than in February. Employment decreased 3·9 per cent in the lighting equipment industry, and 3·4 per cent in jewellery. In the book and job printing, slaughtering, chewing and smoking tobacco, and smelting and refining industries, losses ranging from 1·7 per cent to 1·3 per cent were reported. The declines in employment in the remaining industries were 1·1 per cent or less.

Employment in the automobile industry in preceding years has usually shown substantial gains between February and March. The introduction of new models at an earlier period, however, has resulted in a shift in the seasonal movement of employment in this industry during recent months, and instead of usual gains in March a decline of 0·8 per cent in

employment was shown. Weekly pay rolls in this industry in March, however, were 11.9 per cent greater than in the preceding month.

The indexes of factory employment and pay-rolls are computed from returns supplied by representative establishments in 90 manufacturing industries. The base used in computing these indexes is the 3-year average, 1923-25, taken as 100. They have not been adjusted for seasonal variation.

Gains in employment and pay-rolls from February to March were shown in both the durable and non-durable goods groups. Employment rose 1.6 per cent in the durable goods group, the March index on the 1923-25 base as 100, standing at 75.8. The gain of 0.9 per cent in employment in the non-durable goods industries raised the March index of that group to 93.3. These indexes indicate that for every 1,000 workers employed in the durable goods industries during the index base period (1923-1925=100), 758 were employed in March, 1936, while in the non-durable goods industries, for every 1,000 workers employed during 1923-1925, 933 were at work in March. Over the year interval, employment in the durable goods industries showed a gain of 6.8 per cent.

*Non-manufacturing Industries.*—Among the 11 non-manufacturing industries which showed gains in number of workers from February to March, the seasonal expansion in retail trade resulted in the re-employment of the largest number of workers. Based on reports supplied by 53,745 retail-trade establishments, it is estimated that 79,000 additional persons secured employment in the retail establishments of the country. The general merchandising group, composed of department, variety and general merchandising stores and mail order houses showed a seasonal gain of 6.0 per cent, indicating an increase of 41,500 workers. A net gain of 1.6 per cent was shown in other lines of retail trade. A sharp seasonal increase was shown in retail apparel stores and smaller gains were reported in retail lumber and building materials, drug, automotive, hardware, and other retail lines.

Wholesale trade establishments added approximately 13,000 workers to their pay-rolls between February and March. Improved weather conditions gave momentum to private building construction activities, reports from 8,893 contractors showing a net increase in employment of 28.9 per cent. Quarrying and non-metallic mines, due to the more favourable weather, reported an increase of 14.3 per cent in number of workers. Seasonal gains were also reported in laundries and dyeing and cleaning establishments.

Employment in the power and light industry increased 0.9 per cent, the gain being at-

tributable, to some extent, to extra maintenance crews necessary in the "flood" areas. Metalliferous mines reported a further gain in employment. The increase of 0.7 per cent in this industry continued the rise which has been shown consistently each month since August of last year, and raised the March level of employment to the highest point reached since July, 1931. With the exception of the seasonal decrease of approximately 12,400 workers in the anthracite mining industry, the declines in employment were negligible.

*Private Building Construction.*—Increases of 28.9 per cent in employment and 36.9 per cent in pay-rolls from February to March were shown by the combined reports received from 8,893 contractors employing 71,513 workers engaged in the erecting, altering and repairing of private buildings. Increases were shown in March in 3 of the 4 immediately preceding years, but they were much smaller than the current gains. The pronounced gains in March not only represent a resumption of operations that had been curtailed in February because of the sub-zero weather, but also indicate greater activity because of new building operations. The information furnished by reporting contractors relates to employees engaged in erecting, altering, and repairing private buildings and does not include projects financed by the Public Works Administration, Reconstruction Finance Corporation funds or regular appropriations of the Federal, State, and local governments.

Forest production in Canada in 1934 was valued at \$105,539,000 compared with \$93,773,000 in 1933 and \$206,853,000 in 1930. Pulpwood led the items of production with \$38,303,000, followed by firewood at \$31,489,000. The value of logs and bolts was \$29,115,000. Quebec led the provinces with a value of \$38,312,000, Ontario \$24,726,000, and British Columbia \$21,439,000.

A National Conference on silicosis was held recently at Washington. Convened by the United States Secretary of Labour, Miss Frances Perkins, it included representatives of industry and labour, federal and state health and labour commissioners, and safety experts and engineers. The purpose of the conference was to plan for a co-operative campaign to fight this disease. Secretary Perkins, in opening the meeting, said that silicosis exposure in some degree faces 500,000 wage-earners. She advocated a comprehensive plan for workmen's compensation in connection with silicosis and other dust diseases.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Governmental supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the *LABOUR GAZETTE* for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wage Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, provided for the observance of the wages rates generally accepted as current in the district for competent workmen, or if there were no current rates, then fair and reasonable rates, and for adherence to the hours of work generally accepted as current in the district; or fair and reasonable hours. These "A" conditions, in so far as

wages and hours are concerned, were superseded in 1930 by the adoption of an Act of Parliament entitled "The Fair Wages and Eight Hour Day Act" (Chapter 20-21, Geo. V), the full text of which was published in the *LABOUR GAZETTE* of June, 1930, p. 652. The clause relating to wages and hours in this Act is in the terms following:--

All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable.

The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency, as may be approved by the Minister.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

In addition to the schedule of fair wages and working hours, Government contracts for the construction, remodelling, repair or demolition of any work contain certain other labour conditions for the protection of the workpeople employed, sanctioned by the Fair Wages Order in Council of June 7, 1922, as amended on April 9, 1924.

Both in the case of contracts for building and construction work, and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the

contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contract for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month, statements were received in the Department of Labour show-

ing that the following contracts, containing fair wages conditions, have been recently executed by the Government of Canada:—

#### DEPARTMENT OF FISHERIES

##### *Contract in Group "A" (Construction, Remodelling etc.)*

Repairing and overhauling the C.G.S. "Givenchy" at North Vancouver, B.C. Name of contractors, Burrard Dry Dock Company. Date of contract, April 9, 1936. Amount of contract, approximately \$3,258.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Ship's carpenters.....	\$0 78½	8
Platers.....	0 83	8
Riveters.....	0 83	8
Rivet holders.....	0 70	8
Iron caulkers.....	0 83	8
Boilermakers.....	0 83	8
Machinists.....	0 75	8
Machinists' helpers.....	0 50	8
Blacksmiths.....	0 75	8
Blacksmiths' helpers.....	0 50	8
Electric welders.....	0 83	8
Electricians.....	0 81	8
Iron moulders.....	0 75	8
Patternmakers.....	0 81	8
Bricklayers.....	1 10	8
Painters.....	0 73½	8
Labourers.....	0 50	8
Riggers.....	0 65½	8
Ship's fitters.....	0 83	8
Teamsters, team and wagon.....	1 00	8
Teamsters.....	0 45	8

N.B.—Where by agreement or current practice the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contracts in Group "A" (Construction, Remodelling etc.)*

Supply and installation of an Automatic Sprinkler System in Hangar A-1 at R.C.A.F. Station, Trenton, Ont. Name of contractors, Viking Automatic Sprinklers Ltd., Toronto, Ont. Date of contract, March 13, 1936. Amount of contract, \$12,000.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Sprinkler fitters.....	\$0 75	8
Painters.....	0 55	8
Labourers.....	0 35	8

Klim.....	The Drimilk Co. of Canada Ltd., Winnipeg, Man.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

**A** SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Printing and Publishing

**HAMILTON, ONTARIO.**—A CERTAIN NEWSPAPER PUBLISHING COMPANY AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL No. 176.

Agreement to be in effect from January 1, 1936, to December 31, 1936, but the wage scale may be re-opened for consideration any time after July 1, upon 30 days' notice being given by either party.

Union members to be employed, when available. The head pressman of a web pressroom must be a practical web pressman. He is to hire and discharge all help under his charge. The union reserves the right to refuse to execute struck work.

Hours: 8 per day, 7½ per night.

Overtime: time and one half. Work on Sundays and eight specified holidays, double time.

Wages for journeymen pressmen: \$36.75 per week. When four or more journeymen are employed, one shall be assistant head pressman and be paid at least \$1.00 per week additional.

Apprentices to be paid \$14 per week during first year, \$16 during second year, \$18 during third year, \$20 during fourth year and \$22 during fifth year.

The minimum number of journeymen and apprentices to be employed on each type of press is specified.

### Manufacturing: Fur and Leather Products

**TORONTO, ONTARIO.**—CERTAIN LEATHER GOODS MANUFACTURING ESTABLISHMENTS AND THE INTERNATIONAL POCKETBOOK WORKERS' UNION.

Agreement reached following strike reported on page 399 of this issue.

Agreement to be in effect from April 9, 1936, to December 31, 1936.

Only union members to be employed, if available. If qualified workers not so available, any non-union workers employed must join the union. No discrimination to be shown any worker on account of union activity. Only authorized union representatives to have access to the factory.

Hours: 44 per week.

Overtime: time and one quarter.

Wages: All questions relating to wage increases are referred for final decision to a board of three arbitrators, one member to be appointed by the employers, one by the union and a third to be agreed upon by these two, or failing such agreement, by the federal Minister of Labour, who also is to have the right to appoint an arbitrator in the name of the employers or the union if either fail to appoint their own. This Board to deal with all wage questions, but is not to impose any wage disadvantage upon the Toronto market.

All work available for any craft in a shop is to be divided as equally as possible among all the workers in such craft by a representative of the firm and by the shop chairman.

No home work to be performed by or for the employers on any of the products manufactured by them.

Any disputes which cannot be settled by the shop chairman and the union representative with the employers are to be referred to an impartial chairman whose decision will be final.

### Transportation and Public Utilities: Electric Railways

**LONDON AND PORT STANLEY, ONTARIO.**—SCHEDULES OF WAGES AND WORKING CONDITIONS FOR EMPLOYEES OF THE LONDON AND PORT STANLEY RAILWAY AS ARRANGED BETWEEN THE LONDON RAILWAY COMMISSION AND THE LOGAN-TAYLOR DIVISION No. 262 OF THE CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES.

The schedule of working conditions came into effect August 1, 1935, and remains in effect until either party gives 30 days' notice of desire to change. The schedule of wages came into effect October 1, 1935.

A duly accredited general committee of employees to represent all employees covered by the schedule in matters pertaining to rates, rules, seniority and general grievances. In filling vacancies, merit and ability being sufficient, seniority governs. In reduction of staff, senior employees with sufficient ability to be retained.

Any employee who has been in the service sixty days shall not be suspended (except for investigation) or dismissed until given an impartial hearing.

After five years' service, employees and their wives to have free transportation on the lines.

Employees paid at a monthly rate to be allowed a vacation of 12 working days per year with pay. Employees paid at hourly rate after five years' service to be allowed a vacation of 6 working days per year with pay.

Hours: except as otherwise mutually agreed upon by the Manager and the employees' general committee, 8 consecutive hours, exclusive of meal period to be a day's work, but where it has been the practice for monthly rated employees to work less than 8 hours per day, this practice will be continued. Employees on an 8 hour continuous shift to be allowed 20 minutes for lunch without deduction in pay.

Overtime: over 8 hours per day, time and one half, except for passenger crew when overtime to be paid only after 9 hours' work.

Employees required to work on their day off to be paid at rate of time and one half with a minimum of 4 hours' pay. As far as practicable employees to be allowed one day off in seven. Work on Christmas Day and New Year's Day, time and one half. Maintenance of way men and linemen remaining on call at home on Sundays to be paid a minimum of 4 hours' pay.

Extra work required for the train service to be as evenly distributed as possible.

Passenger crews of one or two cars to consist of one motorman and one conductor; for three or more passenger cars coupled together, with certain exceptions and for work train except in yard, one motorman, one conductor and one trainman to be the crew. The crew of a regular freight train to consist of one motorman, one conductor and two trainmen.

Wages: the schedule in effect from October 1, 1935 is higher than that in effect before the agreement, the increases varying considerably for the several classes. Wage rates for certain classes from October 1, 1935 are: agents from \$132.50 to \$165 per month, ticket clerks from \$77.50 to \$105, baggagemen \$95 to \$97.50, despatchers \$142 and \$157.50, shedmen 47 cents per hour. Wages per hour for trainmen: conductors and motormen 48 cents and 52 cents; trainmen 44 and 46 cents. Wages per hour for shops employees: carpenters 45 and 52 cents, machinists 55 cents, linemen 47 and 55 cents, inspectors 45 to 47 cents; repairmen 47 and 52 cents, painters 46 and 55 cents, car cleaners 42 cents, temporary labour 40 cents. Wages per hour for section men 45 cents, temporary labour 40 cents.

Further wage increases are provided in the wage schedule to come into effect October 1, 1936: agents \$140 to \$170 per month; ticket clerks \$90 to \$110, baggagemen \$100, despatchers \$150 and \$165, shedmen 48 cents per hour. Wages per hour for trainmen: conductors and motormen 50 and 55 cents; trainmen 45 and 47 cents. Wages per hour for shops employees: carpenters 45 and 55 cents, machinists 55 cents, linemen 49 and 55 cents, inspectors 47 and 48 cents, repairmen 48 and 55 cents, painters 50 to 55 cents, car cleaner 42 cents, temporary labour 40 cents. Wages per hour for sectionmen 46 cents, temporary labour 40 cents.

### Collective Labour Agreements Extension Act of Quebec

The following agreements and amendments to agreements in the Province of Quebec have recently been made obligatory by Orders in Council and the terms so made obligatory are summarized in the next article of this issue:

Longshoremen (Inland Navigation), Montreal  
Granite Cutters, Province of Quebec  
Stonecutters, Hull  
Building Trades, Montreal  
Barbers, Quebec (Amendment)  
Stonecutters, Province of Quebec (Amendment)  
Bread salesmen, Quebec (Amendment)  
Bakers, Quebec (Amendment).

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include the extension to all employees and employers in the same industry or business and in the same district, by Orders in Council, of four agreements which are summarized below, and of amendments to four other agreements in effect under Orders in Council, also noted below. Notices of application for changes in agreements affecting men's and boys' clothing workers throughout the Province and building trades at Three Rivers appeared in the April 25 issue of the *Quebec Official Gazette*. Notices of application for the extension of new agreements were published in the following issues of the *Quebec Official Gazette*: glove makers throughout the Province in the issue of April 4, building trades at Joliette and fur workers at Montreal in the issue of April 11, ornamental iron and bronze workers at Montreal in the issue of May 2. Corrections made to notices of application for extension of agreements were made in the *Quebec Official Gazette* as follows: longshoremen (inland navigation), Montreal, in the issue of April 4, granite cutters throughout the Province in the issue of April 18, building trades at Joliette, glove makers

throughout the Province and printers at Montreal in the issue of May 2.

The text of the Collective Labour Agreements Extension Act, Quebec, was printed in the *LABOUR GAZETTE*, May, 1934, page 417, and amendments to the Act were summarized in the issue of June, 1935, page 526. Under this Act applications may be made to the provincial Minister of Labour by either party to a collective agreement made between, on the one hand, one or more associations of *bona fide* employees, and, on the other hand, employers or one or more associations of employers, to have those terms of such agreement which concern rates of wages, hours of labour and apprenticeship made obligatory on all employees and employers in the same trade, industry or business within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade, industry or business in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* for the duration of the agreement. The provisions of an agreement thus made obligatory govern all

individual labour contracts in the trade, industry or business and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreements have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934. Beginning with the issue of the *LABOUR GAZETTE* for July, 1935, the terms of agreements have been summarized instead of being printed in full.

**LONGSHOREMEN (INLAND NAVIGATION), MONTREAL.**—An Order in Council, approved April 15, and published in the *Quebec Official Gazette* April 18, makes obligatory the terms of an agreement between steamship and other companies engaged in inland navigation and L'Union des Travailleurs du Port de Montréal, Incorporée (The Longshoremen's Union of the Harbour of Montreal Incorporated). The previous agreement for these workers was published in the *LABOUR GAZETTE*, July, 1935, page 632 and August, page 733.)

The industrial jurisdiction comprises the loading and unloading of all ships (except the handling of grain) engaged in inland and coastal navigation in the harbour of Montreal and in the Lachine Canal zone.

The agreement is in effect from April 18, 1936 for the whole of the navigation season of 1936, providing the union remains in affiliation with and in good standing with les Syndicats Catholiques et Nationaux de Montréal (the National Catholic Unions of Montreal), and will be renewed automatically for the whole of any succeeding season of navigation unless either party gives notice by March 1 of any year.

Wages per hour for longshoremen: between 7 a.m. and 7 p.m., 42 cents per hour, between 7 p.m. and midnight, 45 cents, between midnight and 7 a.m., 48 cents. Foremen, except those employed by the week or by the month, 5 cents per hour extra.

Overtime: If, in case of necessity, men are required to work more than 6 consecutive hours without an hour off for meal, time and one half to be paid after the six hours until relieved. For work on Sundays and five specified holidays, time and one half.

Men called out at 7 a.m., 1 p.m. and 8 p.m., will wait one hour for orders without pay, but all other waiting time to be paid at prevailing rate. Time for shifting and rigging ships to be paid at prevailing rate, and when longshoremen in the course of their work are required to move from one place to another, they shall be paid during the transfer time at the prevailing rate.

**GRANITE CUTTERS, PROVINCE OF QUEBEC.**—An Order in Council approved April 23 and published in the *Quebec Official Gazette*, April 25, makes obligatory the terms of an agreement between certain owners of granite quarries and granite cutting plants and Le Syndicat National des Travailleurs aux Carrières de Frontenac (The National Union of Quarry Workers of Frontenac).

The territorial jurisdiction comprises the Province of Quebec with the exception of the municipalities of Saint Joseph d'Alma, of Victoriaville and of Rimouski.

The agreement is in effect from April 25, 1936 to December 31, 1936.

The agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, January, 1935, page 25 with the following exceptions:

The hourly wage rates are unchanged at 50 cents per hour for granite cutters and surface machine operators who are fully competent granite cutters, 35 cents for quarrymen employed in quarries and 25 cents for inexperienced labourers in quarries, but piece work is now allowed for certain types of work and such piece work rates are specified.

The term of apprenticeship for the granite cutter trade is fixed at three years and one apprentice allowed for each 14 granite cutters and one apprentice for each incomplete group employed in each granite workshop.

**STONECUTTERS, HULL.**—An Order in Council, approved April 23 and published in the *Quebec Official Gazette*, April 25, makes obligatory the terms of an agreement between certain quarry owners of Hull and Le Conseil des Métiers de la Construction du district d'Ottawa, Inc., (The Building Trades Council of the district of Ottawa Inc.).

The territorial jurisdiction includes the counties of Hull, Gatineau, Pontiac, Wright, Labelle and Papineau.

The industrial jurisdiction covers all the operations of cutting stone for the building trade, the construction of bridges, embankments and the erection of monuments and is applicable in any quarry or in any other place where limestone is cut, with the exception of granite and marble. It includes also all operations for quarrying limestone, sandstone, artificial stone and any other stone with the exception of crushed stone.

Hours for stonecutters, apprentice stonecutters and for any other workmen employed in quarry operations and included in the agreement: 8 per day, 44 per week.

Overtime to be worked if necessary to complete urgent work and to be paid for at time and one half.

Wages per hour: stonecutters 80 cents; apprentice stonecutters 25 cents during first year, 35 cents during second year, 45 cents during third year and 60 cents during fourth year; quarriers and drillers 50 cents; other workmen employed in quarry operations except timekeepers and water boys, 40 cents. Handicapped workers may be employed for lower wages, but only one such workman allowed per 10 stonecutters.

Apprenticeship in stonecutting trade to be four years. One apprentice allowed for each gang of five stonecutters, one apprentice also allowed for each gang of less than five men in each quarry or shop.

**BUILDING TRADES, MONTREAL.**—An Order in Council, approved April 23 and published in the *Quebec Official Gazette*, April 25, makes obligatory the terms of an agreement between The Montreal Builders' Exchange Incorporated and Le Conseil des Syndicats des Métiers de la Construction de Montréal, Incorporé (The

Building Trades Council of Montreal, Incorporated) and the Building Trades Council of Montreal and Vicinity.

Agreement to be in effect from April 1, 1936, to March 31, 1937 and 30 days thereafter pending the adoption of an Order in Council giving legal effect to an agreement to replace this one.

The agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, May, 1935, page 424, with the subsequent changes noted in the issues of June, page 582, September, page 869 and November page 1065, with the following changes:

In the wage schedule applicable to the Island of Montreal and to Valleyfield the wage rate for painters, spraymen, glaziers, decorators and paper hangers is changed from 60 cents to 50 cents per hour, a wage rate for plumber and steamfitter contractors for personal services is inserted at a wage rate of 85 cents per hour. Applicable throughout the whole jurisdiction of the agreement the rate for elevator mechanics' helpers is changed from 52½ to 53 cents. Floor-layers and floor finishers are omitted in the list of trades in the wage schedules. Sprinkler fitters are added at a wage rate of 75 cents per hour and for this trade, as also for structural steel workers, the territorial jurisdiction extends to the whole Province. Sprinkler fitters ordinarily resident in the city of Montreal to be paid 20 cents per hour additional when required to work outside the Island of Montreal.

Overtime: the number of holidays in the year, for work on which the overtime rate must be paid is increased from three to seven.

**BARBERS AND HAIRDRESSERS, QUEBEC.**—An Order in Council, approved April 15 and published in the *Quebec Official Gazette*, April 18, amends the order in Council for this trade (*LABOUR GAZETTE*, July, 1935, page 631, December, page 1157, and January, 1936,

page 89) by making a change in the price of a certain piece of work.

**STONECUTTERS, PROVINCE OF QUEBEC.**—An Order in Council, approved April 15 and published in the *Quebec Official Gazette*, April 18, changes the original Order in Council for this trade (*LABOUR GAZETTE*, April, page 371) by inserting the word "minimum" before "rates of wages."

**BAKERS, QUEBEC.**—An Order in Council, approved April 23, and published in the *Quebec Official Gazette*, April 25, amends the original Order in Council for this industry (*LABOUR GAZETTE*, February, 1935, page 148, June, page 531, November, page 1065 and February, 1936, page 199) by changing the territorial jurisdiction to be the judicial district of Quebec with the exception of the counties of Lotbinière and Portneuf. The provision that master bakers in certain neighbouring counties outside this area selling all or part of their production in the counties of Quebec, Levis and Montmorency be governed by the agreement is retained.

**BREAD SALESMEN, QUEBEC.**—An Order in Council, approved April 23 and published in the *Quebec Official Gazette*, April 25, amends the original Order in Council for this industry (*LABOUR GAZETTE*, July, 1935, page 629, February, 1936, page 199 and April, page 371) by providing that work on the specified holidays be paid at double time, and by changing the territorial jurisdiction to be the same as for bakers at Quebec mentioned above.

### Australian Year Book

The official year book of the Commonwealth of Australia for the year 1935, which has recently been received, contains a detailed review of practically every phase of state activity in the Commonwealth. It is explained in the preface that "economic and financial conditions during recent years have caused a demand for new information, or information expressed in new terms, concerning many matters of finance, trade, production and industry. The need for economy hampers the collection of this material, and the need for abbreviation precludes adequate presentation of some that is available."

It is further pointed out that some progress was made in later volumes towards bringing closer to present day requirements the chapters dealing with production, trade, finance, population and vital statistics, etc., and further progress in this direction is indicated in several chapters of the present volume.

According to a survey by the U.S. Bureau of Labour Statistics, workers in the motor-vehicle industry, including both automobile and automotive parts' plants, earned an average of approximately 70 cents an hour during 1934.

Their annual earnings from individual plants, however, averaged less than \$900. One-third of the motor-vehicle employees worked throughout the year. One-fourth of the employees had less than 6 months work; another quarter worked 6 to 10 months. Monthly data from the industry, it is stated, lead to the conclusion that employment fluctuated more severely during 1934 than during 1930, 1931, and 1935, but to approximately the same degree as during 1929 and 1932. The Bureau's information as to annual earnings and the distribution of employment relate only to the year 1934.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, APRIL, 1936

### Cost of Living, Prices of Staple Articles and Index Numbers

**T**HE cost of the weekly family budget in terms of retail prices was about two per cent lower than in the previous month, due almost entirely to a decline, mostly seasonal, in the cost of foods, while the Dominion Bureau of Statistics index number of wholesale prices was little changed from the level in March.

In retail prices the cost per week of a list of twenty-nine staple foods for an average family of five was \$7.82 at the beginning of April as compared with \$8.12 for March; \$7.50 for April, 1935; \$6.67 for March, 1933 (the low point in recent years); \$11.24 for April, 1930; \$10.26 for April, 1922; \$16.92 for June, 1920 (the post war peak); and \$7.51 for April, 1914. Of the list of foods included in the budget nineteen were lower in the month under review as compared with March, while there was only one slight increase. More than half the total decline occurred in the cost of eggs. Other decreases were of a minor nature, the largest being in meats, butter, lard and flour. Including the cost of fuel and rent with that of foods the total budget cost \$16.33 at the beginning of April, as compared with \$16.63 for March; \$15.97 for April, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.53 for April, 1930; \$20.66 for April, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.32 for April, 1914. Fuel showed a fractional fall, due to lower prices for coal and wood in some localities. Rent was unchanged.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 again showed little change week by week during April as compared with March. This index number was 72.1 for the week ended May 1 as compared with 72.3 the preceding week, and 72.2 for the week ended March 27. On a monthly basis the figures for March (the latest available) are 72.4 as compared with 72.5 for April, 1935; 71.3 for April, 1934; 63.5 for February, 1933 (the low point in recent years); 91.2 for April, 1930; 98.4 for April, 1922; 164.3 for May, 1920 (the post war peak); and 64.0 for April, 1914. During the month under review both grains and live stock showed moderate price increases, a factor in the movement of cattle prices being the substantial increase in the number of cattle exported to the United States. During recent weeks the price of potatoes has shown marked increases, amounting to 65 cents per eighty pound bag at some eastern points. The index for vegetables rose from 53.0 to 72.3 during April,

48 points above that of May 3, 1935. The price of raw silk fell 20 cents per pound, thereby losing the advance of the previous month. In non-ferrous metals, tin, lead and zinc were lower and copper somewhat higher.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of April of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the *LABOUR GAZETTE*, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the *LABOUR GAZETTE* for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western

(Continued on page 470)

# COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL, AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

price per cord from price quoted. f. Petroleum coke. g. Natural gas used extensively. h. Lignite. i. Including birch.  
r. Mining company houses in district \$5-\$10 per month; others, five and six rooms, \$10-\$35. s. Delivered from mines.

(Continued from page 462)

provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Meat prices in April averaged lower than in March, the downward movement in beef being unusual at this season. Sirloin steak declined from an average price of 23.5 cents per pound in March to 23.1 cents in April and rib roast of beef from 17.6 cents per pound to 17.4 cents. Veal averaged about 14 cents per pound lower at 13.8 cents, while fresh leg roast of pork was down from 21.2 cents per pound to 21 cents. The price of lard averaged 16 cents per pound as compared with 16.6 cents in March.

Egg prices were substantially lower in all localities, the decrease in some cities on the prairies being nearly fifty per cent. The price of fresh grades averaged 23.1 cents per dozen in April as compared with 38.1 cents in March and 24.3 cents in April, 1935. Cooking grades averaged 23.2 cents per dozen in April and 31.6 cents in March. Milk has been unchanged at an average price of 10.3 cents per quart since the beginning of the year. Butter was about 1 cent per pound lower, dairy averaging 24.7 cents per pound and creamery 27.6 cents. Bread has been unchanged in the average during the last four months at 6.2 cents per pound. The price of beans declined from 5.4 cents per pound in March to 5 cents in April. Potatoes were little changed during the month, averaging \$1.34 for ninety pounds. The price in April, 1935, was, however, much lower at an average of 78.3 cents per ninety pounds. Granulated sugar was fractionally lower, averaging 6.1 cents per pound. Lower prices for anthracite coal were reported from several cities.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$16; Windsor, N.S., \$16.50; Charlottetown, \$14.40; Moncton, \$16; Saint John, \$13.50; Quebec, \$13.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe,

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended May, 1, 1936; monthly figures not yet available.

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

\$13.50; Montreal, \$14.25; Ottawa, \$16.50; Kingston, \$14.50; Belleville, \$15; Peterborough, \$16.50; Oshawa, \$14.75; Toronto, \$14.75; St. Catharines, \$14.50; Hamilton, \$15; Galt, \$16.50; Windsor, \$12.50; Sudbury, \$17.50; Cobalt, \$18; Timmins, \$18.75; Sault Ste. Marie, \$14.50; Port Arthur, \$17; Fort William, \$17; Winnipeg, \$19.50.

Almost 70,000 children received medical inspection in the Schools of New Brunswick during the year ending October 31, 1935, according to the report of the Chief Medical Officer of the province. The percentage of these children reported as normal was 45, or 6 per cent, below the previous year. During the year, public health nurses visited 20,196 homes and attended 1,198 clinics. The report deals comprehensively with all phases of public health in the province.

The year 1935 saw the highest production of tobacco ever recorded in Canada. Total acreage increased from 40,963 in 1934 to 46,870 in 1935, while total production rose from 39 million pounds to 54,500,000 pounds. Most of this increase occurred in Ontario where there was a rise in the production of all types of tobacco, flue-cured production advancing from 22 million pounds in 1934 to 35 million in 1935. Seasonal conditions were very favourable and there was practically no loss from hail or frost.

The Legislature of Quebec on May 19 defeated an amendment providing for the establishment of a rural credit system in that province. The vote was 46 to 39.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

The following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries appeared in the April issue of the LABOUR GAZETTE.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number, on the base 1930=100, was 91·7 for March, showing no change from the previous month's level. A decrease in food and tobacco prices, chiefly in the "meat, fish and eggs" group was offset by a slight increase in industrial materials and manufactures, of which non-ferrous metals advanced 2 per cent.

The *Statist* index number, on the base 1867-1877=100, was 86·4 at the end of March, a decrease of 0·3 per cent for the month. Small decreases were recorded in every group except textiles which showed an advance of 0·7 per cent.

**COST OF LIVING.**—The Ministry of Labour index number, on the base July, 1914=100, was 144 at April 1, a decrease of 1·4 per cent for the month, due chiefly to lower food prices, chiefly eggs and butter prices. There was a slight decrease in rent prices, while fuel and light were higher.

### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base 1913=100, was 103·6 for March, showing no change from the previous month's level. The changes in all groups were small.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 124·2 for March, a decrease of 0·1 per cent for the month. All groups remained practically unchanged.

### New Zealand

**WHOLESALE PRICES.**—The index number of the Census and Statistics Office, on the base 1909-1913=1000, was 1384 for February, a decrease of 1·5 per cent for the month due to decreases in foodstuffs, etc. of vegetable origin, textile manufactures, wood and wood products and animal products. Increases were recorded in metals and in non-metallic minerals and their products.

**COST OF LIVING.**—The Census and Statistics Office index number, on the base 1926-1930=1000 was 839 for February, a fall of 1·6 per cent from the November level. Decreases were shown in all groups except rent and miscellaneous goods which were slightly higher.

### United States

**WHOLESALE PRICES.**—*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the sum total of the prices per pound of 96 commodities of common consumption was \$9·8541 at April 1, a fall of 0·7 per cent for the month and is the lowest index number recorded since July 1, last year. The principle declines occurred in grains, provisions and hides and leather.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities was \$173·649 at April 1, a fall of 3·3 per cent from the previous month due to lower food prices, especially dairy and garden produce.

**COST OF LIVING.**—The index number of the National Industrial Conference Board, on the base 1923=100, was 84·1 for March, a decline of 0·4 per cent for the month due chiefly to lower food prices. Clothing was also slightly lower, while housing and sundries advanced.

## FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE FIRST QUARTER OF 1936

THE number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the first quarter of 1936 was 205, there being 53 in January, 81 in February and 71 in March.

The report for the fourth quarter of 1935, showing 245 fatalities, was given in the LABOUR GAZETTE, February, 1936, page 211. In

the first quarter of 1935, 202 fatal accidents were recorded (LABOUR GAZETTE, May, 1935, page 475). The supplementary list of accidents, not reported in time for inclusion in the reports covering the periods in which they occurred, contains 23 fatalities for 1935.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Railway Commissioners of Canada from certain other official sources and from the correspondents of the LABOUR GAZETTE. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the first quarter of 1936 were as follows: agriculture, 19; logging, 31; fishing and trapping, 9; mining, non-ferrous smelting and quarrying, 38; manufacturing, 20; construction, 5; electric light and power, 1; transportation and public utilities, 52; trade, 11; finance, 2; service, 17.

Of the mining accidents 24 were in "metalliferous mining," 11 in "coal mining," and 3 in "non-metallic mineral mining and quarrying, n.e.s."

Of the accidents in manufacturing, 2 were in "textiles and clothing," 1 in "leather, fur and products," 8 in "saw and planing mill products," 3 in "pulp, paper and paper products," 4 in "iron, steel and products," 1 in "non-metallic mineral products," and 1 in "chemical and allied products."

In construction there were 3 fatalities in "buildings and structures," and 2 in "highway and bridge."

In transportation and public utilities there were 39 fatalities in "steam railways," 2 in street and electric railways," 3 in "water transportation," and 8 in "local transportation."

In trade there were 3 fatalities in "wholesale," and 8 in "retail."

Of the fatalities in service, 5 were in "public administration," 1 in "recreational," 1 in "laundering, dyeing and cleaning," 4 in "custom and repair," 2 in "personal, domestic and business," and 4 in "professional establishments."

There was one serious disaster during the period under review which occurred in steam railways, near Downie, British Columbia, on March 2, when a tender which had been derailed in a snowslide broke loose from a crane and crashed into a group of workers who were clearing another slide which had occurred about one mile farther down the grade. Sixteen of the men were killed and five injured when they were caught between the 15-foot snow banked walls and were crushed against the engine. A chinook wind had loosened the heavy snowfall of the past winter, sending down numerous slides through the mountains and creating a further danger of slides and a flood threat over great territories.

Other accidents resulting in the loss of two or more lives were as follows:

A section foreman and labourer lost their lives on being thrown from a gas speeder when it crashed into a snowplough, near Horizon, Saskatchewan, on February 5; and a foreman and brakeman died following a collision of two trains at Capreol, Ontario, on February 15.

Two drillers were killed by an explosion when their drill struck a missed hole at mine at Kirkland Lake, Ontario, on February 20. A premature dynamite explosion caused three fatalities in a mine near Northbrook, Ontario, on March 27; and two drillers lost their lives in a similar accident in a mica mine at Perkins Mills, Quebec, on March 26.

Two truckers were killed near Belleville, Ontario, on January 20, when a train struck their truck. Two labourers lost their lives at Toronto, Ontario, on March 26, when a cable chain broke while lowering a transformer into an excavation.

*Supplementary List of Accidents.*—A supplementary list of accidents occurring during 1935 has been compiled which contains 23 fatalities, of which 1 was in agriculture, 1 in logging, 2 in mining, 8 in manufacturing, 5 in construction, 1 in electric light and power, 2 in transportation and public utilities, 2 in trade, and 1 in service. One of these accidents occurred in January 1 in April, 1 in May, 2 in June, 1 in July, 2 in August, 1 in September, 2 in October, 5 in November, and 7 in December.

[NUMBER 6

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

INDUSTRIAL employment in Canada showed an increase at the beginning of May, according to returns received by the Dominion Bureau of Statistics from 9,544 firms, each employing a minimum of 15 workers and representing all industries except agriculture, fishing, hunting and highly specialized business. The working forces of these firms aggregated 939,409 persons, or 20,426 more than in the preceding month. The employment index (with the average in the calendar year 1926 as the base equal to 100) stood at 99.5, as compared with 97.4 at April 1, and 95.2 at the beginning of May of last year. In the preceding fourteen years, the indexes for May 1 were as follows: 1934, 92.0; 1933, 77.6; 1932, 87.5; 1931, 102.2; 1930, 111.4; 1929, 116.2; 1928, 106.8; 1927, 101.8; 1926, 95.4; 1925, 91.9; 1924, 92.9; 1923, 92.5; 1922, 84.3 and 1921, 85.1. While the industrial expansion indicated at the latest date provided work for a very considerable number of workers, it was on a scale rather smaller than the average recorded between April 1 and May 1 in the fifteen preceding years for which data are available; the index of employment, after correction for seasonal influences, therefore showed a decline from 103.3 in the preceding month to 102.4 at the beginning of May.

At the beginning of May, 1936, the unemployment percentage reported to the Department of Labour by local trade unions throughout Canada stood at 15.1 in comparison with 14.5 per cent at the beginning of April, 1936, and 17.0 per cent at the beginning of May, 1935. This percentage for May was established from the reports furnished by 1,810 labour organizations with an aggregate of 174,429 members.

Reports received by the Department of Labour from the Offices of the Employment Service of Canada for the month of April, 1936, recorded an increase over the previous month, but a decrease from April a year ago in the average daily placements effected, farming and services showing the

highest gains under the first comparison, and construction and maintenance the greatest loss under the second. Although these groups were the deciding factor in each instance, appreciable changes in other divisions somewhat modified the gains or losses above mentioned. Vacancies in April, 1936, numbered 26,521, applications 50,836 and placements in regular and casual employment, 24,102.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was little changed at \$16.36 at the beginning of May as compared with \$16.33 for April. The slight advance was due to increases in rent in several cities, while fuel was somewhat lower owing to seasonal decreases in prices of coal. Food was practically unchanged. Comparative figures for certain previous dates are: \$15.97 at the beginning of May, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.49 for May, 1930; \$20.57 for May, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.21 for May, 1914. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 showed little change week by week during May, being 71.8 for the week ended May 29, as compared with 72.1 for the week ended May 1. The figure for the week ended April 3 was 72.1 and for that of February 28, 72.5. On a monthly basis this index number was 72.2 for April; 72.3 for May, 1935; 71.1 for May, 1934; 63.5 for February, 1933 (the low point in recent years); 93.4 for May, 1929; 98.5 for May, 1922; 164.3 for May, 1920 (the post war peak); and 64.2 for May, 1914.

The table on page 476 gives the most recent statistics available reflecting industrial conditions in Canada. The index of the physical volume of business, corrected where necessary for seasonal variation, was 5 per cent higher in April than in March and 9 per cent higher than in April last year. All of the principal groups included in the calculation showed advance in both comparisons except construc-

Carloadings.....		82.8	75.4	73.4	79.1	73.3
Imports.....		82.7	71.4	84.0	71.5	65.6
Exports.....		(8)	91.0	84.1	(8)	73.8

\*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

†For the week ended May 29, 1936.

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations.

(4) Figures for end of previous month.

(5) Figures for four weeks ending May 30, 1936 and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending May 16, April 18, and March 21, 1936. May 18, April 20 and March 23 1935.

(7) MacLean's Building Review.

(8) Index of exports: April 1935 = 102.2; April 1936 = 123.9; these figures not comparable with other months as non-monetary gold is included.

tion, the index of which was substantially lower both as compared with the previous month and with the corresponding month in 1935. Mineral production more than recovered the loss of the previous month, copper, nickel and gold shipments, as well as the production of coal, being the chief factors in the advance of the index for this group. Manufacturing also showed important increases as did also the indexes of electric power output, of imports and of exports. Information available for May shows wholesale prices slightly lower than in April and lower also than in May, 1935. Contracts awarded were seasonally higher than in the previous month but lower than in May last year, while car-loadings were lower than in April but higher than in May, 1935. Sugar manufactured and gross earnings of the Canadian National Railways showed gain in both the foregoing comparisons.

The number of strikes and lockouts on record for May was 12, involving 2,911 workers and causing time loss of 28,469 man working days, as against 15 disputes involving 1,844 workers and a total time loss of 17,790 days in April. The increase in the number of workers involved and in the time loss, although the number of disputes was less, was due to a strike involving about 2,000 loggers, sawmill and shingle mill workers in British Columbia. In May, 1935, there were 25 disputes, involving 5,923 workers, with time loss of 33,024 days, nearly one-half of the time loss being due to strikes of longshoremen at Montreal, P.Q., and gold miners in British Columbia, but there were several disputes involving comparatively large numbers of workers as well as others which involved comparatively few employees. Of the twelve disputes in May, seven were recorded as terminated, four resulting in favour of the employer while compromise settlements were reached in three cases. Five disputes, involving approximately 130 workers, were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

#### **Industrial Disputes Investigation Act**

Five applications for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department during the past month, particulars respecting these, being outlined in the section on page 481 dealing with the proceedings under this statute. In addition, one Board was established to deal with a dispute arising out of a request for wage increases.

#### **Royal Commission to investigate coal marketing**

Appointment of Dr. H. M. Tory as a Royal Commissioner to conduct an investigation into matters concerning the importation and distribution of anthracite coal was announced on June 7 by Hon. Norman McL. Rogers, Minister of Labour. Intention to institute such an enquiry was announced in the Speech from the Throne at the opening of the present session. The official statement proceeds as follows:—

"Complaints made to the Dominion Government alleging unsatisfactory conditions arising from monopolistic control in the anthracite coal trade, and referring particularly to Welsh anthracite importations in the Province of Quebec, led to the decision to proceed with an enquiry. The purpose of the Commission's investigation will be to ascertain whether conditions prejudicial to the public exist in connection with the importation and distribution of anthracite coal.

"An investigation was made under the Combines Investigation Act in 1933 into an alleged combine of importers of British anthracite coal in the Province of Quebec. In prosecutions against members of the alleged combine, conducted under the Attorney General of Quebec, fines totalling \$43,500 were imposed. Appeals in which the convictions were sustained were concluded in the Quebec courts in June of last year after the case had been carried to the Privy Council by defendant coal companies." (Proceedings in this investigation were reviewed in the *LABOUR GAZETTE* for July, 1935, page 709; and February, 1935, Page 145, and in previous issues.)

Dr. Tory was president of the National Research Council of Canada from 1923 to 1935, and from 1927 to the time of his retirement last year was director of the National Research Laboratories. He came to Ottawa from Alberta, where for twenty years he had been president of the University of Alberta. Dr. Tory has had a long career of public service outside of his university connections and has previously served on a number of important commissions. In 1913 he was a member of the American Commission for the study of Agricultural Credit in Europe; he was Commissioner on Agricultural Credits for the Canadian Government in 1923, Chairman of the Commission on Taxation for the Province of Alberta in 1926, and chairman of a Royal Commission to study the fruit industry in Nova Scotia in 1930.

### **Appointment of Secretary of National Employment Commission**

Hon. Norman McL. Rogers, Minister of Labour announced on June 6, that after consultation with the members of the National Employment Commission, it was decided to appoint

H. Spencer Relph as secretary of the Commission. Major Relph will commence his duties immediately. It is also intended that there will be a bilingual French-Canadian assistant secretary, and his appointment will be announced at an early date.

Major Relph, who is being recalled to the Government service after an absence of three years, has had previous executive experience in the following positions: Director of Military Estates in the Department of National Defence; Controller of the Canadian Clearing Office; Assistant Deputy Custodian and Deputy Commissioner of Reparations in the Department of the Secretary of State.

He is also a barrister-at-law for the provinces of Alberta and Ontario, and a Notary Public of the province of British Columbia. He joined the First Canadian contingent in Edmonton, and saw active service in England and France.

**Construction in Canada in 1934** The Dominion Bureau of Statistics has issued a report on construction in Canada during the year 1934, the first since 1920.

Information was collected from contractors, subcontractors, officials of cities, towns, villages and other municipalities, as well as from Dominion and Provincial Government Departments and Harbour Commissions. The information is published by provinces and includes value of work performed in various classes of construction, including not only buildings but roads, wharfs, dredging, etc., and numbers of workers employed in each month and wages paid during the year. The report will be reviewed in the next issue of the LABOUR GAZETTE. Copies may be obtained on application to the Dominion Statistician, Ottawa, there being a nominal charge of ten cents.

### **Employees Earnings in Trade and Theatres in 1935**

"Weekly Earnings of Employees in Merchandising and Service Establishments in Canada, 1935," is the title of a report recently published by the Dominion Bureau of Statistics, the

data having been secured in the annual census of such establishments for that year. The report shows not only the average weekly earnings of males and females but the number

who received specified amounts during the week for which the reports were made out, that is under \$6, \$6 to \$6.99, and up to \$50 per week and over. The figures given are for retail trade (chain stores and independents stores), and for wholesale trade, and are given by provinces and kind of business. Data for theatres is also given by provinces. The report will be reviewed in the next issue of the LABOUR GAZETTE. Copies may be obtained on application to the Dominion Statistician, Ottawa, price 25 cents.

### **Adult Education and Co-operation in Eastern Nova Scotia**

The Calendar of St. Francis Xavier University for 1936-37 contains a review of the activities of its Extension Department, organized in 1930 for the purpose of developing a scheme of adult education, its object being defined as "the improvement of the economic, social, educational, and religious conditions of the people of eastern Nova Scotia."

The program as laid down in 1930 was an ambitious one, and included, in addition to educational activities, surveys (a) of economic possibilities in farming, mining, fishing, lumbering, etc., (b) of possible social improvement in industrial and rural communities, and (c) to discover the best educational practices for the development of eastern Nova Scotia. These were to be undertaken in conjunction with various governmental agencies designed to do this work.

Operating through county and parish conferences and community organizations, the Department has achieved many of its original objectives, particularly in the development of study clubs and co-operative projects.

In initiating a community program, a general meeting is first held at which leaders are selected and study clubs organized. As progress warranted participation in some co-operative enterprise, subsequent meetings are held for this specific objective. Recent statistics reflect the growth of this educational work. In 1930-31, there were 192 general meetings held with an attendance of 14,856, and in 1935-36, these totals had increased to 470 and 43,000, respectively.

Study clubs have been the main feature of the department's educational program. In 1930-31, these numbered 173 with a total of 1,384 meetings, and in 1935-36, these totals were 860 and 8,000, respectively.

It is pointed out that the success of the program of adult education is dependent upon local leadership. Generally, the policy adopted is to utilize the services of local clergymen or school teachers in the initial stages. After its first mass meeting, the community as a rule selects its own study

group leaders. Qualities of leadership are also discovered in subsequent co-operative projects and these are developed by the Department.

Some idea of the development and successful operation of co-operative organizations of various types is shown in a tabular summary of the five year period from 1932 to 1936. In 1932, there were 9 communities served by 13 co-operative societies, eight of which were credit unions. In 1936, there were 117 societies serving 75 communities. Of these 117 societies, 65 were credit unions, 18 were co-operative stores; 5 co-operative buying clubs; 10 co-operative fish plants, 2 community industries, and 17 lobster factories.

### **Twentieth International Labour Conference**

The twentieth session of the International Labour Conference opened at Geneva on June 6 with a large and representative attendance of delegates from approximately 50 countries. A complete report of the proceedings with texts of Draft Conventions and adopted recommendations will be given, if possible, in the July issue of the LABOUR GAZETTE. (Elsewhere in this issue there is a review of the annual report of the Director of the International Labour Organization which was presented to the Conference). The agenda of the Conference includes the following subjects:—

- I. The regulation of certain special systems of recruiting workers.
- II. Holidays with pay.
- III. Reduction of hours of work on public works undertaken or subsidized by Governments.
- IV. Reduction of hours of work in the building and civil engineering industry.
- V. Reduction of hours of work in iron and steel works.
- VI. Reduction of hours of work in coal mines.
- VII. Reduction of hours of work in the textile industry.
- VIII. Safety provisions for workers in building construction with reference to scaffolding and hoisting machinery.

Items I to VI inclusive appear on the agenda for the second stage of the double-discussion procedure of the Conference while items VII and VIII are for first discussion.

### **Canadian delegation to Geneva**

The Canadian delegation to the twentieth session of the International Labour Conference of the League of Nations, now being held at Geneva, includes the following representatives on behalf of the Government, Employers and Workpeople of Canada:—

*Delegates representing the Government of Canada:* Dr. W. A. Riddell, Canadian Advisory

Officer accredited to the League of Nations, Geneva, Switzerland; and Mr. Gerald H. Brown, Assistant Deputy Minister of Labour, Ottawa.

*Technical Advisers to the Government Delegates:* Mr. Edouard C. St. Pere, M.P., Montreal; Mr. Gerard Picard, General Secretary, La Confederation des Travailleurs Catholiques du Canada, Inc., Quebec; and Mr. W. T. Burford, Secretary-Treasurer, the All-Canadian Congress of Labour, Ottawa.

*Delegates representing the Employers of Canada:* Mr. A. R. Goldie, President of The Goldie & McCulloch Co., Ltd., and Chairman of the Industrial Relations Committee of the Canadian Manufacturers' Association, Galt.

*Technical Adviser to Employers' Delegate:* Mr. R. N. McCormick, Assistant Manager of the Tariff Department of the Canadian Manufacturers' Association, Toronto.

*Delegate representing the Workpeople of Canada:* Mr. P. M. Draper, President of the Trades and Labour Congress of Canada, Ottawa.

*Technical Adviser to the Workpeople's Delegate:* Mr. James Simpson, Vice-President of the Trades and Labour Congress of Canada, Toronto.

### **Forty Hour Week in New Zealand**

The New Zealand House of Representatives on May 12 passed the Industrial Conciliation and Arbitration (Amendment) Bill, the

principal provisions of which are as follows:—

- (1) The restoration of the compulsory arbitration system in labour disputes.
- (2) The Arbitration Court to fix the maximum weekly hours at 40, unless this is shown to be impracticable in a particular industry.
- (3) Membership of unions to be compulsory.
- (4) The Court shall fix a basic wage sufficient for an adult male worker with a wife and three children.

Further Bills have been introduced amending the Factories and Shops and Offices Acts with provision for a 40-hour week in factories and 44-hour week in shops and offices.

### **Federal Regulation of coal industry invalid in United States**

The Bituminous Coal Conservation Act (usually referred to as the Guffey Act) enacted by the Congress of the United States in 1935 was declared unconstitutional by the United

States Supreme Court on May 18, 1936. The Act was passed after the National Industrial Recovery Act had been declared unconstitutional on May 27, 1935 (LABOUR GAZETTE, June, 1935, p. 54), the Bituminous Coal Code under the statute being, therefore, along with

all others, no longer effective. The new law provided for the establishment of a Bituminous Coal Commission, authorized to formulate a code for that industry under which production, marketing and labour conditions would be regulated so as to conserve the natural resources of coal, secure economic and safe operation of mines, prevent unfair methods of competition in selling and regulate prices so as to permit the stabilization of wages and working conditions. The right of freedom of association for employees was specified, with provisions for collective bargaining. The Code promulgated by the Commission was outlined in the *LABOUR GAZETTE* for December, 1935, page 1121.

The decision of the court was chiefly on the ground that the constitutional power of Congress to control interstate commerce does not include the regulation of wages and hours in coal mining, the production of the commodity being entirely within a state before it began to move in interstate commerce. The excise tax on production intended to enforce the acceptance of federal regulation was held to be not a proper tax but a penalty designed to coerce the producers into agreements in accordance with the code. The tax was fifteen per cent of the sale prices at the mine, ninety per cent of it being refunded to those accepting the code. The majority of the court did not pass on the price fixing provisions but the Chief Justice in a separate opinion held these were valid but that the labour provisions were not. A dissenting opinion by three justices held that the price regulating provisions were valid and that the labour provisions were not properly before the Court.

A bill to enact separately the price fixing provisions of the Act was immediately introduced into Congress, supported by the President, and adopted in June.

Since the enactment of the National Industrial Recovery Act and the Bituminous Coal Commission Act the bituminous coal miners, through the United Mine Workers of America, have made agreements with operators as to wages and working conditions covering production generally throughout the United States, and it is considered that the prevention of undue competition in prices will tend to prevent the termination of many of these agreements such as occurred between 1922 and 1930.

#### **State minimum wage legislation in United States ruled invalid**

In a decision involving the validity of a statute of the State of New York establishing a system for fixing minimum wages for women and minors the United States Supreme Court held that the law was unconstitutional, as it violated the clause of

the Constitution which requires that "no person shall be .... deprived of life, liberty, or property, without due process of law," the state, therefore, having no power "to prohibit, change or nullify contracts between employers and adult women workers as to the amount of wages to be paid." The court cites the Adkins case, decided in 1923, in which a minimum wage law enacted by Congress for the District of Columbia was held to be invalid.

In dissenting opinions the Chief Justice and three other justices held that the Adkins case did not apply as the facts and law were not the same. In a supplementary opinion, these three justices held that there was no justification for holding that contracts respecting wages are not within legislative control any less than the regulation of insurance premiums, the charges of grain elevators, the prices of milk, etc.

#### **Recent Dominion Relief Statistics**

Replying to a query in the House of Commons, the Hon. Norman McLeod Rogers, Minister of Labour, stated that the number of relief recipients in Canada, according to preliminary figures for May of this year totalled 1,244,961 as compared with 1,277,452 in May, 1935. The total cost of relief to the Dominion, provincial, and municipal governments was also lower, preliminary figures for April of this year indicating that relief costs totalled \$7,490,801 as compared with \$7,771,279 for April, 1935.

Prior to the dissolution of the Quebec Legislature recently, legislation enabling the province to participate in the Federal old age pension system was given Royal assent.

The British Columbia Gazette of June 4 announced the addition of the sign and pictorial industry (including commercial bulletin and painted display signs) to Schedule A of the Apprenticeship Act.

The report of the Old Age Pensions Board of Nova Scotia shows that on November 30, 1935, the total number of pensioners under the Act in the province was 12,886, and the total amount paid them during the fourteen months, caused by the change in the end of the fiscal year from September 30 to November 30 was \$2,505,794. Of this amount \$629,518 was paid by the province.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

FIVE applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

1. From certain employees of the Guelph Light and Heat Commission, being members of Local Union No. 548, International Brotherhood of Electrical Workers. The dispute was caused by the employer reducing hours of work on May 1, from 50 hours per week to 44 hours without increasing the hourly wage rate. An officer of the Department visited Guelph and discussed the matters in dispute with the parties concerned. He was unable, however, to alter the views of the Commission in regard to their policy in this matter. While the application stated that 10 employees were directly affected by the dispute, information obtained by the departmental officer while in Guelph indicated that not more than 8 employees were directly affected. On this point the statute provides that no dispute shall be the subject of reference to a Board of Conciliation and Investigation in any case in which the employees affected by the dispute are fewer than 10. Apart from this the application was not in order inasmuch as it did not show that authority had been obtained to declare a strike failing an adjustment of the dispute by reference to a Board.

2. From employees of the Western Stevedore Company at Fort William, Ontario, being stevedores, checkers, sealers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. Six hundred employees are stated to be directly affected by this dispute, which relates to their demand for increased wages and certain changes in working conditions. At the close of May officials of the Department were holding conferences in Ottawa with representatives of the employer; also with officials of the union.

3. From employees of the Canadian National Railways at Port Arthur, Ontario, being checkers, assistant stevedores, sealers, coopers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. This dispute also relates to the employees' request for increased wages and certain changes in working conditions, 302 men being directly affected. At the close of May officials of the Department were holding conferences in Ottawa with representatives of the employer, also with officials of the union.

4. From certain employees of the Hamilton By-Product Coke Ovens Limited at Hamilton, Ontario, being members of Local Union No. 700, International Union of Operating Engineers. The dispute directly affects 33 workmen, who request an increase in their present wage rate, together with an improvement in their working conditions. This application was receiving consideration at the close of May.

5. From employees of Moore's Taxi Limited at Winnipeg, Manitoba, being members of the Taxi Drivers' Unit of the One Big Union. It is stated in the application that the approximate number of employees directly affected or likely to be affected by the dispute is 70. The dispute arises out of the dismissal of 14 employees, which the applicants allege was due to their union affiliation. This application was receiving consideration at the close of May.

Reference was made in the April issue of the LABOUR GAZETTE, page 309, to the receipt in Department of Labour of an application for a Board of Conciliation and Investigation from the pursers' and stewards' staffs of the Canadian National Railways engaged in Pacific Coast steamship services, members of the Canadian Brotherhood of Railway Employees. During May a Board of Conciliation and Investigation was established to deal with this dispute and members thereof were appointed as follows:—Mr. R. O. Campney, of Vancouver, B.C., chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members; Captain B. L. Johnson, of Vancouver, nominated by the company, and the Rev. C. D. Clarke, of Prince Rupert, nominated by the employees. The dispute relates to the employees' request for increased wages and certain changes in working conditions, 177 employees being directly affected.

The personnel of the Board of Conciliation and Investigation established to deal with a wages dispute between the Winnipeg Electric Company and certain of its employees, being members of Locals Nos. 1037 and 435, International Brotherhood of Electrical Workers (See LABOUR GAZETTE, May, 1936, page 396) was completed on May 22 by the appointment of Mr. W. C. Hamilton, K.C., of Winnipeg, Manitoba, as third member and chairman. This appointment was made by the Minister of Labour in the absence of a joint recommendation from the other Board members, Messrs. C. A. Clendening, of Winnipeg, and Fred Bancroft, of Oakville, Ontario, nominees of the company and employees respectively.

It was reported in the March issue of the *LABOUR GAZETTE*, page 224, that an application had been received in the Department of Labour during February from employees of the Canadian Pacific Railway Company at West Saint John, N.B., being subforemen, checkers, coopers, sealers, heatermen and freight handlers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The dis-

pute related to the employees' request for increased wages, 600 men being directly affected. The application, however, was considered defective in certain respects, and as negotiations in regard to wage rates of all classes of railway employees were about to proceed between the principal Canadian Railways and the various groups of railway employees, a Board was not established.

## STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1936

THE following table shows the number of disputes, workers involved and time loss for May, 1936, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*May, 1936 .....	12	2,911	28,469
*Apr., 1936 .....	15	1,844	17,790
May 1935 .....	25	5,923	33,024

\*Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time is frequently not received until some time after its commencement.

The figures for May as to time loss and numbers of workers involved show increases over those for April, although the number of disputes were less, owing to the strike of loggers, sawmill and shingle mill workers in British Columbia which involved a relatively large number of employees for a considerable time. In May, 1935, several disputes involved large numbers of workers with considerable time loss, particularly the strikes of longshoremen at Montreal, P.Q., and gold miners in British Columbia, and there were also several strikes involving comparatively small numbers of workers.

Four disputes, involving 311 workers, were carried over from April, one of these, wood-

workers at Toronto, Ont., not having been reported to the Department in time for inclusion in the May issue of the *LABOUR GAZETTE*. Eight disputes commenced during May. Of these twelve disputes, seven terminated during the month, four resulting in favour of the employer while compromise settlements were reached in three cases. At the end of May, therefore, there were on record five disputes recorded as strikes or lockouts, namely: truck drivers, helpers, warehouse employees, etc., Toronto, Ont.; salmon fishermen, Upper Fraser River, B.C.; taxi drivers, Winnipeg, Man.; restaurant employees, Toronto, Ont.; and garage employees, Winnipeg, Man.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information had been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to four such disputes, namely: photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; moulders, Peterborough, Ont., February 27, 1934, one employer; and laundry employees, Toronto, Ont., May 18, 1936, one employer, this last being added this month.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

The strike of fur collar and cuff workers at Toronto, commencing on March 23, 1936, for the forty-hour week was recorded in the May issue of the *LABOUR GAZETTE* as having lapsed at the end of April. Very little work was in progress for some time but as a result of conferences between the employers' association and the union it was agreed, about May 15, to adopt the forty hour week as provided

for in the agreement for other fur shops. The agreement is outlined elsewhere in this issue.

Disputes involving sugar beet field workers in south-western Alberta and in Kent County, Ontario, occurred during May. The workers demanded higher rates per acre and in Alberta secured a slight increase. In Ontario only a small percentage of the workers were reported to be involved. In both cases the demands were made before the season opened and work was not held up.

The following paragraphs give particulars regarding certain disputes in addition to the information in the tabular statement.

**LOGGERS, COWICHAN LAKE, B.C.**—This strike, which commenced on March 10, against the discharge of two employees, alleged by the strikers to be the result of union activity, was terminated on May 26 when the strike in various logging camps, sawmills, etc., commencing on May 4, was called off; but it is reported that operations have not been resumed by the employer.

The sympathetic strike in another camp of the same employer, commencing March 20, was also called off.

**WOOD WORKERS (INTERIOR FITTINGS, ETC.), TORONTO, ONT.**—Employees in one establishment ceased work on April 29, a demand for increased wages and union recognition being refused. Work was resumed on May 2 as a result of negotiations between the workers and the employer, an increase in wages of ten per cent being given and also a reduction in hours from 50 per week to 44, but union recognition was not granted. Some of the employees were working away from Toronto in various localities, installing fittings. The dispute was not reported in time for inclusion in the May issue of the *LABOUR GAZETTE*.

**SALMON FISHERMEN, UPPER FRASER RIVER, B.C.**—Fishermen ceased work on May 26, demanding seven cents per pound, the rate paid on the lower part of the river, instead of six cents. At the end of the month the dispute was unternminated. Early in June the fishermen on the lower Fraser ceased work in sympathy. The catch was for sale on the fresh fish market and a large quantity of salmon from other points reached Vancouver, so that supplies from the Fraser River were not required.

**LOGGERS, SAW MILL AND SHINGLE MILL WORKERS, VANCOUVER ISLAND AND COAST DISTRICT, B.C.**—Employees in a number of logging camps and in sawmills, shingle mills, etc., ceased work on May 4 demanding recognition of the locals of the United Brotherhood of Carpenters and Joiners of America which had been formed by the transfer of members from

the Lumber Workers' Industrial Union. This was done in accordance with the policy adopted in 1935 by the Workers' Unity League, namely the transfer of the membership of its various organizations to the international unions. The union scale of wages in the States of Washington and Oregon was also demanded, this involving increases of \$1.50 per day and upward, or about twenty per cent. The reinstatement of the two union members discharged at Cowichan Lake was also demanded by some of the strikers. The employers had been granting increases of about ten per cent before these demands were made and this continued while the dispute was in progress, so that work was resumed in many of the camps and mills between May 11 and May 18. On May 26 the strike was called off and work was resumed generally on May 28. Many of the employers reported that their employees were not on strike but owing to the interference of pickets the camps and mills were closed for an interval. A number of pickets were reported in the press to have been arrested on charges of intimidation, assault, etc.

**GRANITE WORKERS, ST. SAMUEL, P.Q.**—A number of employees in one granite cutting establishment, including cutters, machine operators, polishers, hoisting engineers and labourers, ceased work on May 1, the agreement having expired, demanding a new agreement with increased wages and employment of members of the National Catholic Union of Quarry Workers of Frontenac. As a result of conciliation by the provincial Department of Labour work was resumed at noon, May 6, under conditions prevailing prior to the dispute, an agreement to be reached later, which would cover all classes not under the granite cutters' agreement for the province, approved and extended under the Collective Labour Agreements Extension Act (*LABOUR GAZETTE*, May, 1936, page 460). The strike did not involve all of the employees in the establishment and the strikers were partially replaced, but it was agreed that the new employees would be discharged, within thirty days, and the strikers reinstated. The agreement is outlined elsewhere in this issue.

**TAXI DRIVERS, WINNIPEG, MAN.**—A number of taxi drivers in the employ of one company were dismissed on May 4, on refusing to give up their membership in the One Big Union, the employer posting a notice that no members of the union would be employed. The company is reported to have had seventy-eight drivers and to have replaced those dismissed from the spare list. The union claimed in its membership a large percentage of the drivers. The employer had refused to sign an agree-

## STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1936\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>(a) Strikes and Lockouts in progress prior to May, 1936.</b>			
LOGGING— Loggers, Cowichan Lake, B.C...	140	3,080	Commenced Mar. 10, 1936; against discharge of workers; terminated May 26, 1936; in favour of employer.
Loggers, Cowichan Lake, B.C...	120	2,640	Commenced Mar. 20, 1936; in sympathy with loggers on strike from Mar. 10, 1936; terminated May 26, 1936; in favour of employer.
MANUFACTURING— <i>Miscellaneous Wood Products—</i> Wood workers (interior fittings, etc.), Toronto, Ont.....	40	40	Commenced April 29, 1936; for increased wages and recognition of union; terminated May 1, 1936; compromise.
SERVICE— <i>Business, etc.—</i> Truck drivers, helpers, warehouse employees, etc., Toronto, Ont.....	11	286	Commenced Mar. 31, 1936; against discharge of workers and for increased wages; untermiinated.
<b>(b) Strikes and Lockouts commencing during May, 1936.</b>			
FISHING, ETC.— Salmon fishermen, Upper Fraser River, B.C.....	70	350	Commenced May 26, 1936; for increase in piece rates; untermiinated.
LOGGING— Loggers, saw and shingle mill workers, etc., Vancouver Island and Coast District, B.C..	2,000	20,000	Commenced May 4, 1936; for union recognition and increased wages; terminated May 26, 1936; in favour of employer.
MANUFACTURING— <i>Non-Metallic Minerals—</i> Granite workers, St. Samuel, P.Q.....	17	77	Commenced May 1, 1936; to secure renewal of union agreement; terminated May 6, 1936; compromise.
TRANSPORTATION— <i>Local—</i> Taxi drivers, Winnipeg, Man...	14	296	Alleged lockout, May 4, 1936; re employment of union members; untermiinated.
<i>Water—</i> Longshoremen, Toronto, Ont..	400	400	Commenced May 16, 1936; for renewal of agreement with retroactive increase in wages; terminated May 16, 1936; compromise.
SERVICE— <i>Business, etc.—</i> Restaurant employees, Toronto, Ont.....	20	500	Commenced May 1, 1936; for reinstatement of workers discharged for alleged union activity; untermiinated.
Garage employees (automobile body workers), Winnipeg, Man.....	14	300	Commenced May 5, 1936; against discharge of worker; untermiinated.
Laundry employees (drivers and pressers), Toronto, Ont.	65	500	Commenced May 18, 1936; against discharge of worker; employment conditions no longer affected by May 31, 1936; in favour of employer.

\*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

ment with the union which was organized in December, 1935, and afterwards claimed that it was interfering with the business. The union requested the Taxicab Board to amend the regulations as to wages and working conditions. On May 5 the union reported the situation to the Minister of Labour, stating that the Industrial Disputes Investigation Act had been violated. After securing information from both parties, the Minister instructed the western representative of the Department to proceed to Winnipeg and attempt to bring about a settlement. From May 17 to May 27 negotiations were carried on and the employer offered to reinstate nine of the fourteen discharged, stating the others had been guilty of misconduct. These charges were denied to a great extent by representatives of the employees, who insisted on the reinstatement of all. The union on May 28 applied for a Board under the Industrial Disputes Investigation Act, and at the end of the month the application was under consideration.

**LONGSHOREMEN, TORONTO, ONT.**—Members of the Toronto Longshoremen's Union refused to work for three companies after midnight, May 15, when the agreement expired. The union had proposed certain changes in the new agreements. An increase in wages for day work from 40 cents per hour to 42 cents and for night work from 42 cents per hour to 45 cents had been agreed to by the employers but the union asked to have the increase made retroactive to the opening of navigation. The union also desired separate agreements with each employer. The demand for the retroactive increase in wages being withdrawn, agreements were reached on May 16 by 11 p.m. It is reported that there were no large boats in the harbour during the day so that not many of the longshoremen, 400 in number, were needed and the work was performed by others.

**RESTAURANT EMPLOYEES, TORONTO, ONT.**—A number of the employees in one restaurant ceased work on May 1, in protest against the discharge of several employees allegedly because of union activity. An interim injunction in restraint of picketing, carrying placards, etc., was obtained by the employer. It is reported that an extension of the injunction was refused some ten days later except that it was continued with respect to those former employees who, when engaged, had signed a contract not to picket. Some of those picketing were arrested for not obeying the injunction, but were released with a warning. At the end of the month a settlement had not been reported.

**GARAGE EMPLOYEES (AUTOMOBILE BODY WORKERS), WINNIPEG, MAN.**—A number of the employees in one establishment ceased work on May 5 in protest against the discharge of a union officer who, the employer stated, could not perform the duties as required on account of ill health. The strikers were reported to have been replaced to a great extent. At the end of the month the dispute was un-terminated, but early in June a settlement was reported. The employer offered to reinstate those involved and work was resumed by all except those who had secured work elsewhere, among these being the man discharged.

**LAUNDRY WORKERS (DRIVERS & PRESSERS), TORONTO, ONT.**—A number of the employees in one establishment ceased work on May 18 in protest against the dismissal of an employee, allegedly because of union activity. At the request of the National Union of Laundry and Dry Cleaning Employees, the Toronto representative of the Department of Labour brought about negotiations between the management and a union officer. The employer stated the man had been dismissed for misconduct and not for union activity and would not be reinstated, also that twelve out of the sixty-five strikers had resumed work and the others had been replaced. At the end of the month employment conditions appeared to be no longer affected and the dispute is, therefore, recorded as terminated, and has been added to the list of such disputes in a previous paragraph.

More than 3,500 enumerators including Royal Canadian Mounted Police and Indian agents, began on June 1 to take the five-yearly census in the prairie provinces, according to recent press reports. Aeroplanes and pack trains have been called into service for census activities in out-of-the-way districts. It is expected that it will be possible to give out the results of the census, from many cities and towns, in two months and that the complete survey will be available in three months.

From this census it is hoped to obtain new information relative to unemployment, health, education, finance and agriculture. Data will be obtained concerning the years of schooling, and ability to read or write. This census is also designed to afford a thorough survey of agriculture. Field crops, live stock, dairying, fruit and vegetable growing will be brought under comprehensive review.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

The latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing down to date that given in the issue of February 1936, in the review of Strikes and Lockouts in Canada and Other Countries, 1935. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in April was 53 and 22 were still in progress from the previous month, making a total of 75 disputes in progress during the month, involving 24,000 workers with a time loss of 141,000 working days. Of the 53 disputes beginning in April, 10 were over demands for increases in wages, 5 over proposed wage reductions, 11 over other wage questions, 15 over questions respecting the employment of particular classes or persons, 8 over other questions respecting working arrangements, 3 over questions of trade union principle; one dispute was a sympathetic stoppage. During the month, settlements were reached in 58 disputes, of which 14 were settled in favour of workers, 33 in favour of employers and 11 resulted in compromise. In 3 other disputes work was resumed pending negotiations.

### Mexico

A strike of 48,000 railway workers was called off May 19 after a one day stoppage, when federal government officials declared it illegal.

### France

Strikes occurred in the metal industries during the last days of May. It was reported that 80,000 workers were on strike May 28 in automobile, aircraft and munition factories. Of these, 40,000 automobile factories secured substantial wage increases and other concessions

when their dispute was settled May 29. The other 40,000 workers were still on strike at the end of the month.

### United States

The number of disputes beginning in March was 125 and 108 were still in progress from the previous month, making a total of 233 disputes in progress during the month involving 116,000 workers, with a time loss of 1,322,000 working days for the month.

A strike of several thousand seamen on the Atlantic Coast, which was not sponsored by the headquarters of the union, after lasting ten weeks, was called off May 29.

Outlining the benefits to be derived from highway construction and urging federal aid towards a program of road building, a comprehensive brief was recently presented to Hon. N. McL. Rogers, Dominion Minister of Labour, by a delegation of road contractors, crushed stone and gravel producers, and representatives of manufacturers and supply firms, organized by the Ontario Road Builders' Association.

The Act establishing a contributory system of health insurance in British Columbia has been proclaimed in effect from May 18. A review of this legislation appeared in the last issue of the *LABOUR GAZETTE*, on page 422). In a press statement, Hon. G. M. Weir, Provincial Secretary, considered that it would take from four to six months to set up the machinery for the scheme.

According to the annual report of the Nova Scotia Department of Public Works and Mines covering the fiscal year 1934 to 1935, the average number of men employed in the coal mines during that period was 12,946 as compared with 12,297 in the previous year. The total number of man-days worked was 2,720,357 in 1935 and 2,680,265 in the fiscal year 1934—an increase of 40,092 man-days. The coal output for the period under review was 5,310,112 tons. This compared with the previous year's output of 5,526,987 tons shows a decrease of 216,875 tons. Coal sales for the year 1935 were 4,747,185 tons while for 1934 they amounted to 5,169,767, a decrease of 422,582 tons. The number of fatal accidents during a fourteen month period was 31.

## LABOUR AND INDUSTRY IN ONTARIO IN 1935

### Sixteenth Annual Report of Provincial Department of Labour

THE sixteenth report of the Ontario Department of Labour reviews the administration of the various acts under its jurisdiction during the fiscal period October 31 to March 31, 1935. As this report covers only five months the statistics are not comparable with those given in previous annual reports.

In the present report are sections dealing with the following enactments which are administered by the Department: The Factory, Shop and Office Building Act; the Minimum Wage Act; the Sanitary and Hoisting Engineers Act; the Employment Agencies Act; the Steam Boiler Act; and the Apprenticeship Act.

Reviewing industrial conditions in the province, the Deputy Minister noted general improvement in employment as compared with the same period last year in all the thirteen divisions of industry, with the exception of the communication group in which the index number was a fraction of a point lower. Moreover, in all groups, except communications, transportation and construction, each month showed an advance over the same month of the previous year. The greatest gains were reported for mining, logging, iron and steel and in construction.

Further evidence of improvement in employment conditions was shown in the percentage of unemployment as reported by trade unions, which was 18.5 as compared with 22.7 for the same period last year, or a decline of 4.2 points.

Increased activity was indicated in the building trades, the value of permits issued in Ontario for the five months amounting to \$8,114,483 as compared with \$3,324,072 for the corresponding period of the previous year.

*Employment Service.*—During the five-month period from November 1, 1934 to March 31, 1935 there were 115,677 applications for employment received at all Ontario offices. Employers, including municipal, provincial and federal government departments called for 59,856 men and women; 56,919 placements were made, of which 35,777 were casual and 21,142 were of a more permanent nature.

The series of employment service broadcasts, which commenced in October, 1934, continued during the period under review. Positions in approximately sixty occupations were put on the air and replies received from qualified applicants who otherwise would not have known of the vacancies.

In accordance with an understanding reached in March, 1935, the agricultural representatives of the province and the employment office superintendents were linked more closely in a farm placement scheme with the object of improving the service to farm employers during the spring and summer months. This plan, the report states, promises to result in an increase in the number of farm placements. In February, the employment offices in southern Ontario were asked to co-operate with the Social Research Council of McGill university in compiling specific information regarding agricultural conditions. This information was used by the Council in preparing a study of conditions affecting this industry throughout the whole Dominion.

Superintendents of the Employment Service were given an opportunity to join the Ontario Vocational Guidance Association recently formed in Toronto.

*Private Employment Agencies.*—During the period reviewed nine private employment agencies were licensed under the Employment Agencies Act but with three exceptions practically no business was reported for the five-month period.

A complaint was received that the proprietor of a rooming house was operating an employment office and charging fees for securing position for his patrons. While no direct violation of the Act was found upon investigation, the operator was warned against charging a fee.

*Factory Inspection.*—In the report of the Factory Inspection Branch reference was made to a conference, under the chairmanship of Dr. J. G. Cunningham, Director of Industrial Hygiene, which was attended by representative foundrymen from all parts of the province. Featuring this conference was the discussion on silicosis, and it was indicated "that approximately 25 per cent of the moulders examined by the Industrial Hygiene Branch, with an average exposure of 28 years, were suffering from silicosis; 35 per cent of the grinders; 40 per cent of the sandblasters and approximately 15 per cent of various other groups. All these men had many years of service and none were cases which had developed within the year, but rather had accumulated over a lengthy period."

The report stated that "the conference proved of great assistance to our inspectors and we feel we are receiving a greater degree

of co-operation from the foundry owners and management than at any time in the past. Too much importance cannot be attached to this class of industrial disease and our inspectors are urged to accept no half measures where this insidious hazard is known to be present."

During the five-month period 80 plans representing a total value of approximately \$1,812,000 were approved under section 14 of the Factory, Shop and Office Building Act. The majority of these plans were for additions and alterations to existing plants, only one permit being granted for a new industry.

During the period reviewed 95 complaints were received. Upon investigation, 50 were upheld, 34 were not upheld, 4 did not come under the jurisdiction of the Branch and the others were pending investigation.

Violations of the Act in the enforcement of which the inspectors have a responsibility were reported as follows: Operating Engineers Act, 26; Adolescent School Attendance Act, 2; Minimum Wage Act, 731; and Steam Boiler Act, 16.

Proceedings were taken against four firms, under Section 30 of the Factory, Shop and Office Building Act. Conviction was recorded in all cases.

There were 1,125 accidents reported for the five-month period with 15 fatalities.

Six men and one woman were reported as having contracted some form of industrial disease, four cases being dematitis, two pneumoconiosis and one a hand infection.

In the accompanying tables are given the number of employees by sex and age in in-

dustrial and mercantile establishments and office buildings, together with hours of work during the period reviewed.

There were also 13,234 employees, male and female, working approximately 50 hours per week.

*Boiler Inspection.*—The report of the Boiler Inspection Branch for the five month period detailed the number of inspections made, and the certificates issued.

The total amount transmitted to the Treasurer of Ontario for the period ending March 31, 1935, was \$5,206.20.

*Operating Engineers.*—The Board of Examiners reported that 15,276 certificates were issued to operating engineers and 264 certificates were refused during the period under review. The fees collected amounted to \$18,984.53 while the net revenue was \$19,844.78.

*Industrial Disputes.*—During the period reviewed there were 15 industrial disputes reported in Ontario in which 4,574 employees were involved, with a time-loss of 24,483 working days.

*Apprenticeship Act.*—The chief inspector of the Apprenticeship Board in his review of activities, stated:—

"The general tendency throughout the Province is to regard the Apprenticeship Act as being dormant and it would appear that little can be done to revive an active interest in apprentice training until such time as most of the mechanics in the building trades are re-employed in normal activities. As pointed out in the report for the previous year, there will undoubtedly be a shortage of skilled mechanics when normal activity returns and it is hoped that some steps may be taken to reorganize the work of the Apprenticeship Board before this shortage becomes acute."

The number of active contracts, representing apprentices in the nine designated trades, decreased from 343 on November 1, 1934, to 319 on March 31, 1935. Despite this decrease it is noted that during the five-month period 11 new contracts were registered, whereas only 15 were registered during the whole of the previous year.

During the period reviewed, several meetings were held with representatives of the hairdressing and barbers associations and it is hoped that this occupation may be brought within the scope of the Act in the near future.

The 319 apprentices registered in the trades at the end of March 31, 1935, were distributed as follows: Bricklaying, 38; masonry, 3; carpentry, 24; painting and decorating, 10; plastering, 11; plumbing, 116; steamfitting, 34; sheet metal work, 31; and electrical work, 52.

## Minimum Wages in Ontario in 1935

Reviewing the administration of the Ontario Minimum Wage Act during the five-month period ending March 31, 1935, the chairman of the Minimum Wage Board states that "economic pressure resulting from the continued period of depression has forced many employers to reduce wage rates of female employees to the legal limit so that it is becoming increasingly difficult to enforce the provisions of the Act and Orders." Continuing, the chairman observed: "Many employers have been forced to adopt a hand-to-mouth system of production, whereby orders are taken for immediate or short-time delivery and little or no stock is manufactured in advance of the seasonal demands. This results in overtime and a shortage of competent workers during the short peak of production, followed by extended periods of idleness or short-time employment, during which the tendency on the part of the worker is to stretch the work as far as possible. Where the piecework method of payment is employed, this reduces the hourly earnings and it is extremely difficult for the Board to enforce the minimum weekly wage."

As the present report covers only a brief period the usual statistical data summarizing wages and hours have been omitted. It is the intention of the Board, however, to include this information in the next annual report for the fiscal year ending March 31, 1936.

During the period under review, there were 18 court prosecutions. In four of these, fines amounting to \$725 were imposed, and arrears of \$659.87 ordered to be paid to seven girls. In seven, action was withdrawn as arrears of \$1,071.74 were paid to ten girls. In five cases, no fines were imposed but arrears amounting to \$169.71 were ordered paid to five girls. Two other cases were dismissed. In the five months covered by the report, a total of \$9,219.06 in arrears of pay was paid by 181 employers to 254 employees.

The number of permits in force on March 31 was 65, seven having been cancelled and six new permits being issued since November 1, 1934. These 65 permits cover 111 employees.

Wage returns collected during this period revealed under payments of 521 employees in 331 firms, all of which were adjusted. Complaints from 359 individuals were dealt with, most of which required action by the Board.

## ASSESSMENT RATES FOR WORKMEN'S COMPENSATION IN ONTARIO INDUSTRIES FOR 1936

THE Ontario Workmen's Compensation board has recently issued its table of provisional assessment rates for 1936 with adjusted rates for 1935. In its introduction to the changes in the assessments levied upon the industries of the province, the Board makes an explanation of its method of rating. For assessment and compensation purposes under the Act, the industries covered are divided into 24 classes. Always considering that the Accident Fund is one and indivisible and that the liability for accident cost is collectively upon all industry, each class carries its own burden, except that a very small general fund, known as the Disaster Reserve, is set aside to assist in meeting any extraordinary call that may arise in any class. With the exception of the Disaster Reserve the moneys collected are just what are considered necessary to take care of the accidents that have actually happened, as well as the expenses of administration of the Act and the upkeep of the Safety Associations authorized by the Act.

Separate accounts are kept of all assessments received and all compensation and medical aid awarded for each of these classes.

Each of the 24 classes of industry is thus in effect a mutual insurance association of the employers in that class.

It is further explained that the rates for each class are fixed and the assessments determined upon the requirements. In other words, rates are based in accordance with the accident experience of each industry in each class.

If it is seen that the rate charged has produced just sufficient money, or if the surplus or deficit is small, the rate will be maintained. If there is any considerable difference, it will be increased or decreased accordingly.

Any surplus to the credit of a class remains in the class funds, and this is also taken into consideration in fixing the rates.

All industries in the same class do not necessarily, nor usually, bear the same rate. The classes are subdivided into groups, and even within the group the rates are different where this is shown to be justified. The experience is kept for the group as well as for the class. In fixing the rates, however, regard must always be had to the fact that each class is an insurance group and that all lines of industry in the class must share to some

extent the good or ill fortune of the class as a whole. The rating for each separate line of industry cannot be made to depend upon the experience in that particular line alone. This is especially the case where the total amount of the pay rolls in any line of industry is small. To charge that line of industry with its own cost might place a very excessive burden upon its employers for one year while perhaps relieving them almost wholly from assessment another year. This would destroy the underlying principle of collective liability or mutual insurance which is the basis of the system.

The schedule of assessment in each industry is based upon \$100 of payroll.

Decreases in the assessment rates are shown in only four groups as compared with 1935. The greatest reduction in the accident rate is that indicated in the group designated as "Transportation of freight by aeroplane." This group, formerly in Class 20, carried an accident assessment of \$13.50 per \$100 of payroll. For 1936, in class 5, this group is given a provisional rating of \$7.50.

Other decreases include a reduction from \$1.20 to 90 cents in the erection of wire fences when done as separate work; a reduction from 70 to 60 cents in rate for the manufacture of incandescent lamps, radio tubes, neon tube lights; and a reduction from \$6 to \$5.50 in brick work, stone masonry, concrete or cement work, carpentry or general construction connected with buildings, n.o.s.

The increases in the provisional rates for 1936 were as follows:—

	1936 \$	1935 \$
Logging, etc. (n.o.s.) . . . . .	8 00	6 00
Logging operations (plants with \$10,000-\$15,000 payroll) . . .	10 00	9 00
Planing mills, sash and door factories . . . . .	3 00	2 25
Hardwood flooring . . . . .	2 35	1 75
Mining (n.o.s.):		
Surface labour . . . . .	2 50	2 10
Ore treatment (with heat) . .	2 50	2 10
Boring Artesian wells . . . .	5 00	3 35
Explosives (mfg.) . . . . .	5 00	1 00
Fireworks, torpedoes (mfg.) .	5 00	1 00
Fuses (mfg.) . . . . .	3 00	1 00
Cartridges (mfg.) . . . . .	2 00	1 00
Loading and fixing artillery ammunition . . . . .	4 00	1 00
Rolling mills or steel works, with blast furnace . . . . .	1 00	0 75
Foundries, malleable iron . .	1 15	1 00
Sheet metal articles (mfg.) . .	1 00	0 75
Typewriters, adding machines, cash registers, radios, sten- cils, buttons, cameras, etc. (mfg.) . . . . .	0 60	0 40
Assembly of such machines . .	0 40	0 25
Phonograph records, ivory, etc.	0 30	0 20
Dry batteries (mfg.) . . . .	0 75	0 50
Storage batteries (mfg.) . . .	1 65	1 10
Agricultural implements, etc. .	1 20	0 90
Auto, repairing . . . . .	1 00	0 60

	1936 \$	1935 \$
Wood chemicals and charcoal (mfg.) . . . . .	1 75	1 25
Preparation of meat products .	1 00	0 80
Cereal products or bakeries . .	1 00	0 80
Canning plants (milk, vege- tables, fish, foodstuffs) . .	1 00	0 75
Jam or fruit juice (mfg.) . . .	1 00	0 70
Sugar refineries . . . . .	0 90	0 75
Starch or glucose (mfg.) . . .	1 80	1 50
Macaroni (mfg.) . . . . .	1 20	1 00
Cider or vinegar (mfg.) . . .	0 80	0 65
Pickle factories . . . . .	1 20	0 80
Spices or condiments (mfg.) . .	0 45	0 35
Brewers, distillers . . . . .	1 10	0 75
Malt (mfg.) . . . . .	0 40	0 30
Mineral or soda water (mfg.) .	0 65	0 50
Wine (mfg.) . . . . .	1 50	1 30
Plastering or lathing . . . . .	3 00	2 60
Sheet metal work, metal roofing, etc. (other than by carpenter) . . . . .	5 50	4 10

The annual convention of the Industrial Accident Prevention Associations of Ontario was held recently in Toronto, and was attended by 1,376 plant executives and safety experts. At the opening of the conference, meetings were held of the ten safety associations, representing 17 different classes of industry under compensation, which constitute the Associations. According to Mr. R. B. Morley, general manager, the members of these associations make their "safety influence" felt in nearly 10,000 industrial plants in Ontario, with payrolls totalling over \$250,000,000.

A feature of the convention was the rehabilitation clinic. The function of this clinic is to restore industrial accident victims to the maximum possible degree of bodily activity. This is done by a series of carefully planned exercises and by the application of manual and electrical therapeutic treatments.

Another section of the convention was the safety exhibit which displayed hundreds of devices and materials designed to prevent accidents.

The officers of the Industrial Accident Prevention Associations for 1936 are President, J. H. Vernor, Western Clock Co., Peterborough; first vice-president, A. G. Wright, Dominion Foundries and Steel Co., Hamilton; second vice-president, A. J. Harvey, Lever Brothers, Toronto; honorary treasurer, F. M. Kimbark, Business Systems, Toronto.

All employees on the operating staffs of the Ontario Hydro-Electric Power Commission are to be placed on a 48-hour week, according to a recent announcement. This will include one day off in seven. In the smaller and outlying districts where transportation costs in providing relief every week would be excessive, the operators will be given four days rest in 28.

## ANNUAL REPORT OF THE DEPARTMENT OF LABOUR OF THE PROVINCE OF QUEBEC FOR 1934-35

Administrative activities of the Department of Labour of the Province of Quebec are detailed in the annual report for the year ending June 30, 1935, this being the third review since the Department was established separately from the former joint Department of Public Works and Labour.

*Collective Labour Agreements Extension Act.*—Included is the first review of the administration of the Collective Labour Agreements Extension Act. (The provisions of the Act were given in the LABOUR GAZETTE for May, 1934, page 417, and the collective agreements are summarized in the monthly issues and also in the January wages supplements.)

In a summary of the year's operations, the provincial Deputy Minister of Labour referred to the fact that large numbers of employers' and employees' organizations availed themselves of the provisions of the Act. During the year, 42 orders-in-council were adopted to make obligatory the provisions of collective agreements between employers' and workers' representatives. Of these, 24 concerned trades of the building industry in all the industrial centres of the province; 3 concerned the shoe, clothing and glove industry; 2, long-shoremen; 5, barbers and hairdressers; 6, baking industry; and one each for the fur industry (Montreal) and the printing industry (district of Quebec).

The deputy further considered that, owing to the gradual enforcement of the Act, "proportioned to the degree of co-operation of the contracting parties, troublesome reactions to legal regulation of labour were reduced to a minimum."

He emphasized that "the Act was enforced chiefly where labour organizations were strong enough to enter into and carry through such collective labour agreements," and that "the establishments of a legal system in the collective relations between employers and workmen had the excellent result of restoring social peace where class struggle with its strikes, lock-outs and hardships had formerly prevailed."

Another result of this social legislation was the "development of professional bodies and forming of an elite of employers and workmen, capable of imparting a sound direction to each industry respecting working hours, apprenticeship and wage rates."

Dealing with the effect of the legislation on wages, the deputy estimated that it had resulted in an increase of "from 10 to 100 per cent, according to the state of organiza-

tion or disorganization of the industry or trade." While declaring it was impossible to specify the amount of the wage increase he considered "that workmen's payrolls increased by several millions."

*Labour Inspection Service.*—The report of the chief inspector indicated that 1,601 investigations and 5,569 inspections were conducted during the year. In the previous year there were 4,058 inspections.

Building yard inspection was conducted to ensure the enforcement of provisions respecting the security of workmen, the eight-hour day and the 40 or 48 hour week. The Order-in-Council limiting work to 55 hours a week in beauty parlours called for 675 inspections.

Under the Public Building Safety Act, 1,084 inspections were made during the year, the inspectors visiting churches, schools, theatres, cinemas and public halls of all kinds.

*Board of Examining Electricians.*—The board of examiners of electricians and the inspection service of electrical installations reported 94,937 inspections. The registration of apprentices in electrical work showed that 350 young men are now learning this trade, the proportion of apprentices to journeymen being 1 to 10.

*Pipe Mechanics Act.*—Under the Pipe-Mechanics' Act which came into force in 1933, the board issued a total of 580 pipe-mechanic contractors' licences, and 1,452 journeymen's licences. Registered apprentices numbered 810. It was pointed out that the licensing of pipe-mechanics resulted in increased competency among contractors and workmen practising the trade of steamfitters, refrigerator mechanics and plumbers. Compulsory examinations necessarily eliminated a large number of persons who made installations without having the required technical competency.

*Pressure Vessels Act.*—Administrative activities under the Pressure Vessels Act and the Stationary Enginemen's Act involved the licensing of stationary enginemen, inspecting boilers and pressure vessels, and appliances under repairs.

The Board also ascertains that appliances made or sold in the province are manufactured according to approved plans. Inspections under these Acts in 1934-35 totalled 14,438.

*The Provincial Employment Bureaus.*—The statistics showed that this service continued to increase its activities. Placements during the fiscal year 1934-35 amounted to 48,317

as compared with 30,291 for 1934 and 19,599 for 1933. Associations, corporations, and employers holding special employment bureau permits reported the placement of 42,521 persons. Thus a grand total of 90,838 persons obtained positions through public or private employment bureaus.

*Trade Disputes and Conciliation.*—This section of the report deals with arbitration and conciliation in trade disputes. Details were given of the proceedings of the chief cases under the Quebec Trades Disputes Act. The registrar largely attributed the prevalence of industrial peace to the operation of the Collective Labour Agreements Extension Act.

*Fair Wages.*—The report of the department's fair wage officers detail their activities in enforcing the provincial minimum wage schedule in government contracts. Included is the official fair wage scale for all trades which was in effect until May 1, 1935.

*Labour Legislation.*—The report includes the text of labour legislation enacted during 1934-35. A review of this legislation was outlined in the LABOUR GAZETTE, June, 1935, page 525.

Included also is the report of the Minimum Wage Board which is given elsewhere in this issue.

## MINIMUM WAGES IN QUEBEC

### Ninth Annual Report of Minimum Wage Commission

THE ninth annual report of the Women's Minimum Wage Commission of the province of Quebec, which reviews the administration of the Act for the fiscal year 1934-35, indicates that the tendency toward increased employment, which was recorded last year, has continued. The total number of women subject to the minimum wage enactments in 1935 was 48,821 as compared with 37,866 in 1934. Of the 1935 total, 30,348 were in the city of Montreal while the number of workwomen in the rest of the province was 18,473. Comparative statistics, covering the number of workwomen governed by the Act during the last three years, are given in the accompanying table:

#### WORKWOMEN GOVERNED BY ENACTMENTS

Industry	Montreal			Province (outside of Montreal)		
	1933	1934	1935	1933	1934	1935
Laundry.....	1,192	1,102	1,273	343	228	292

Further statistics show that no industry in Montreal employs working women for the full weekly period of 48 hours, the average being 41 hours. In the industrial establishments of the province, outside Montreal, work exceeded 48 hours in three industries, but the average was only 45 hours. The number of industrial and commercial establishments increased from 1,237 in 1934 to 2,416 in 1935.

An analysis of the statistics also indicates an increase in the weekly basic wage (the sum which a workwoman should receive if she worked during the whole working time fixed by most Orders at 48 hours a week). In Montreal, for all industries, this basic wage per workwoman in 1934 was \$12.64 which increased to \$12.78 in 1935. Throughout the rest of the province, this rate averaged \$9.84 in 1934 and \$10.27 in 1935. The report points out, however, that there is a fairly marked difference between the basic wage and the actual wage. The average actual wage in all industries, in Montreal was \$11.00 in 1935 as compared with \$10.94 in 1934. For the rest of the province the average was \$9.07 in 1935 and \$8.45 in 1934.

Discussing the problem of piece work, the report states:

"An analysis of employers' reports shows a falling off in the number of women doing piece work as compared with those working by the hour. We think this is due to the fact that, through revisions, we have substituted as a base of remuneration, the proportion of experienced and partly experienced workwomen and beginners for the system of a wage fixed by the employee's experience. This system gives the employer greater latitude to remunerate his workwomen according to their merit. An employer cannot logically be forced to grant periodic wage increases to a workwoman

\*Order No. 18 relating to commerce; incomplete statistics.  
† Zone No. 1, Montreal; Zone No. 2, Quebec; Zone No. 3, Municipalities of 10,000 to 25,000; Zone No. 4, less than 10,000.

after a period in the workshop, regardless of her ability, efficiency or the importance of the work entrusted to her. In this way, a workwoman unable to furnish a normal output of work, may keep her place as she may be classified in an intermediate or lower group.

"The percentage of workwomen at piece work rose to 60 per cent in 1934; it was 56 per cent in 1935. That of workwomen by the week or hour was 40 per cent in 1934 and 44 per cent in 1935."

During the year the Montreal office initiated action in 56 suits against employers guilty of violating the Act. Convictions were secured in all these cases, the fines collected amounting to \$2,900. The Quebec office took action in 11 suits with the result that seven employers were fined \$283; three cases were withdrawn and one was lost. The commission discovered a number of infringements which they did not report to the court as they considered it preferable to compel the employer to reimburse his workwomen through payment of arrears in wages wherever the employer had offended for the first time or through ignorance of the law. By such action, the Montreal office caused 150 employers to pay \$9,837.85 to 330 workwomen, and the Quebec office collected \$1,296.87 as balance of wages. The Three Rivers office had a sum of \$602.14 refunded to 76 employees by the management of 10 shops. Some differences in wages were collected in the Eastern Townships and in Hull. The sums paid were included in the total given for the Montreal office.

*Permits.*—During the year, the number of permits has been greatly reduced by the method of substituting a system of wage remuneration based on a proportion of experienced workwomen, partly experienced women and beginners for remuneration according to time spent in the industry. These permits (for payment of wages lower than those established by the regulations) afford employment to aged or handicapped women and women doing minor work requiring little experience.

The total number of permits granted in 1934 was 1,426 while in 1935 the total was 606, of which 101 were for aged or handicapped workwomen and 505 were issued to women doing minor work.

The report for 1935 presents a statistical analysis of the industries covered by the regulations. (Since the publication of the 1934 report, many of the Orders have been revised, the chief effect of the revision being to change the basis on which rates for learners were established. The early orders of the Board provided for minimum rates for learners to be increased at regular intervals until the full minimum wage for adult workers was reached.

In the opinion of the Commission this left the way open for an undue proportion of workers to be employed at the lower rates of pay. Accordingly, the revised orders provide for fixed percentages of workers at specified rates). The chief statistics for each industry in 1935 are summarized in the following paragraphs:

*Laundries, dye works.*—For the city of Montreal—number of firms, 66; number of women employed, 1,273; average weekly wage per workwoman, \$9.80 (\$9.75 in 1934). For the rest of the province—number of firms, 41; number of women employed, 292; average weekly wage per workwoman, \$7.58 (\$7.70 in 1934).

*Printing industry.*—For the city of Montreal—number of firms, 90; number of women employed, 803; average weekly wage per workwoman, \$11.24 (\$9.88 in 1934). For the rest of the province—number of firms, 34; number of women employed, 245; average weekly wage per workwoman, \$8.85 (\$9.07 in 1934).

*Textile industry.*—For the city of Montreal—number of firms, 33; number of women employed, 2,510; average weekly wage per workwoman, \$9.40 (\$11.96 in 1934). For the rest of the province—number of firms, 58; number of women employed, 7,136; average weekly wage per workwoman, \$9.67 (\$9.92 in 1934).

*Leather industry.*—For the city of Montreal—number of firms, 74; number of women employed, 2,312; average weekly wage per workwoman, \$11 (\$10.96 in 1934). For municipalities over 3,000 population—number of firms, 45; number of women employed, 1,209; average weekly wage per workwoman, \$9.12 (\$8.30 in 1934). For the rest of the province—number of firms, 31; number of women employed, 944; average weekly wage per workwoman, \$9.08 (\$7.88 in 1934).

*Women's, men's and boys' clothing.*—For the city of Montreal—number of firms, 268; number of women employed, 2,743; average weekly wage per workwoman, \$11.92 (\$12.49 in 1934). For the rest of the province—number of firms, 25; number of women employed, 1,258; average weekly wage per workwoman, \$7.75 (\$7.68 in 1934).

*Hat and cap factories.*—For the city of Montreal—number of firms, 51; number of women employed, 951; average weekly wage per workwoman, \$12.09 (\$13.73 in 1934).

*Women's and children's dresses, silk underwear, etc.*—For the city of Montreal—number of firms, 242; number of women employed, 6,751; average weekly wage per workwoman, \$11.08 (\$10.78 in 1934).

*Manufacturers of overalls, mackinaws, cotton underwear, etc.*—For the city of Montreal—number of firms, 98; number of women employed, 2,586; average weekly wage per workwoman, \$9.27 (\$9.61 in 1934). For the rest of the province—number of firms, 45; number of women employed, 2,565; average weekly wage per workwoman, \$7.79 (\$8.04 in 1934).

*Tobacco, cigar and cigarette industry.*—For the city of Montreal—number of firms, 21; number of women employed, 2,728; average weekly wage per workwoman, \$11.82 (\$10.25 in 1934). For the rest of the province—number of firms, 23; number of women employed, 848; average weekly wage per workwoman, \$8.27 (\$7.07 in 1934).

*Fur industry.*—For the city of Montreal—number of firms, 96; number of women employed, 543; average weekly wage per workwoman, \$14.80 (\$13.82 in 1934). For the rest of the province—number of firms, 45; number of women employed, 221; average weekly wage per workwoman, \$10.85 (\$11.91 in 1934).

*Food industry.*—For the city of Montreal—number of firms, 87; number of women employed, 2,147; average weekly wage per workwoman, \$10.35 (\$8.62 in 1934). For the rest of the province—number of firms, 18; number of women employed, 290; average weekly wage per workwoman, \$8.60 (\$6.63 in 1934).

*Rubber, waterproof and oiled cloth products.*—For the city of Montreal—number of firms, 12; number of women employed, 168; average weekly wage per workwoman, \$11.22.

For the rest of the province—number of firms, 7; number of women employed, 810; average weekly wage per workwoman, \$10.38.

*Jewellery, silverware, watch-making, etc.*—For the city of Montreal—number of firms, 9; number of women employed, 45; average weekly wage per workwoman, \$10.05. For the rest of the province—number of firms, 4; number of women employed, 159; average weekly wage per woman, \$9.22.

*Paper industry and its by-products.*—For the city of Montreal—number of firms, 26; number of women employed, 710; average weekly wage per workwoman, \$9.12. For the rest of the province—number of firms, 26; number of women employed, 529; average weekly wage per workwoman, \$9.63.

*Department, chain and retail stores.*—Zone 1 (City of Montreal—number of firms, 421; number of regular employees, 3,567; extra employees, 201; average weekly wage per employee (regular) \$11.74; (extra) \$10.13. For zone 2 (Quebec, Three Rivers, Sherbrooke, Hull and towns of 25,000 inhabitants or over)—number of firms, 209; number of regular employees, 1,201; number of extra employees, 116; average weekly wage per employee (regular) \$10.48, (extra) \$7.03. Zone 3 (cities and towns of 10,000 to 25,000 population)—number of firms, 68; number of regular employees, 206; average weekly wage per employee \$8.80. For Zone 4 (cities and municipalities of 5,000 to 10,000 inhabitants)—number of firms, 26; number of regular employees, 70; average weekly wage per employee, \$8.88.

## New Orders governing employment in restaurants and lunch counters, etc., and in Hotels

Two new orders governing employment in restaurants and lunch counters, etc., and in hotels, were issued recently by the Minimum Wage Board of Quebec. These are:—

**ORDER No. 22.**—*governing female employees and males when replacing females in any class of employment in restaurants, dining rooms, lunch counters, refreshment rooms (curb service) or other similar services or connected therewith.*

1. *Minimum wage.*—Any person, engaged in any capacity whatsoever, shall not be paid less than the rates mentioned below:—

Zone 1.—Montreal and all municipalities of over 5,000 population situated in the Island of Montreal, 17 cents per hour, meals included.

Zone 2.—Quebec, Hull, Sherbrooke, Three Rivers and all cities having a population of over 25,000, excepting those situated on the

Island of Montreal, 15 cents per hour, meals included.

(a) All employees having worked less than 30 hours per week will be entitled to a bonus of 3 cents per hour. At least three hours wages shall be paid for each call.

(b) Working hours mean the time that an employee is at the disposal of the employer and requested to be present; however, the time placed at the disposal of the employee to take her meals shall not be counted as working time.

(c) There are no reduced rates for learners.

2. *Gratuities.*—(tips) are the property of the employee and cannot be retained by the employer or be included as part of her salary, even with the employee's consent.

3. *How salary must be paid.*—The employee's salary shall be paid to her wholly

in cash; no deduction being permitted for any cause or purpose whatsoever; this salary will be given to her in a sealed envelope on which shall be written: her name, the date of the working week, the number of hours performed, the amount of money included in the envelope, same must be initialed by the person who paid the employee.

4. *Meals*.—Any employee having worked three hours or less per day will be entitled to one meal; if she has worked at least five hours, she will be entitled to two meals and if she has worked eight hours or more per day, she will be entitled to three meals. No deduction whatsoever can be made for the meals, they form an integral part of the employee's salary.

5. *Uniforms*.—Uniforms will be furnished and laundered by the employer; in case of made-to-measure uniforms, the employer may sell them at cost price to his employees, this not to exceed the sum of \$3. In special cases, however, the Board may modify this section.

6. *Discharge of employees*.—No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint with the Board or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of this Act. All complaints are strictly confidential.

7. *Exemption*.—The Board may grant permits of variation or suspension of any of these regulations to meet exceptional conditions.

The usual regulations respecting the conspicuous posting of the order, and the penalties for violation are set forth.

The order comes into effect on August 1, 1936.

ORDER No. 23.—*governing female employees and males when replacing females in any class of employment in hotels.*

The minimum rates are as follows:—

Zone 1.—Montreal, Outremont, Verdun and Westmount: Waitresses and chamber-maids, not less than \$17 per month; kitchen help and other employees, not less than \$22 per month, room and board included.

Zone 2.—Quebec, Hull, Sherbrooke, Three Rivers and other cities having a population of more than 25,000: Waitresses and chamber-maids, not less than \$15 per month; kitchen help and other employees, not less than \$20 per month, room and board included.

(a) If the employee is not lodged, she will be entitled to a supplement of \$8 per month; if she receives neither lodging nor board, she will be entitled to a supplement of \$18 per month.

(b) There are no reduced rates for learners.

As in the previous order, the same provisions are applicable respecting gratuities, method of payment, uniforms, discharge of employees, posting and penalties.

## Decline in Occupational Fatalities Among Insured Wage-Earners in 1935

The "Statistical Bulletin," for May, 1936, published by the Metropolitan Life Insurance Company, reports a further decline in occupational fatalities among male industrial policy holders in the United States and Canada. This decline took place in spite of the return of large numbers of workers to industry last year. Amplifying this fact, the report states that "past experience covering a period of 24 years shows that the occupational accident rate among these workers generally rises and falls with the employment index. Quite to the contrary, the death rate from occupational accidents declined 7.2 per cent in 1935; that is, from a rate of 23.6 deaths per 100,000 policy holders in 1934 to 21.9 deaths per 100,000. Except for the extremely low figure of 21.2 per 100,000, recorded in 1933 when unemployment was at its height, the rate for 1935 was the lowest in the 24 years for which records are available. It was 39 per cent lower than in 1929, the last year of relatively high business activity.

It is also indicated by the survey that not all types of fatal accidents shared in the decline. In fact the rate for some types in-

creased, fatal falls rising 16.2 per cent and higher rates being recorded for burns and traumatism by machines. Mine and quarry accidents and drownings also increased.

Referring to the decline, the report states that "an appreciable part of the decrease in the total rate was the result of lower mortality from transportation accidents of all types. Highly encouraging is the decline of 11.1 per cent in occupational automobile accidents, exclusive of collisions between automobiles and railroad trains or engines, and collisions between street cars and automobiles. The decline last year followed upon an increase of 21.6 per cent in the rate for 1934 over 1933. Some of the reduction in street railroad accidents also resulted from a lowering of the incidence of automobile collisions. It is to be hoped that the recession in 1935 was due in part at least to the continuing efforts of industrial companies to promote safe driving among their employees, and to the intensive effort of municipal authorities to reduce the hazards to which pedestrians and drivers are exposed on city thoroughfares."

## ANNUAL REPORT OF MANITOBA BUREAU OF LABOUR

THE annual report of the Bureau of Labour and Fire Prevention Branch of the Department of Labour of Manitoba reviews the operations of the Branch for the fiscal year May 1, 1934, to April 30, 1935. This report has in previous years been published by the Department of Public Works. In 1931 the Legislature of Manitoba adopted the Department of Labour Act to come into effect upon proclamation and as the Act was declared in effect on July 6, 1934, the present report is the first published under the Department of Labour, which is now responsible for the administration of the following enactments: The Bureau of Labour Act; The Manitoba Factories Act; The Bake Shops Act; The Shops Regulation Act; The Minimum Wage Act; The Elevator and Hoist Act; The Steam Boiler and Pressure Vessel Act; The Building Trades Protection Act; The Fair Wage Act; The Electricians License Act; The Public Amusements Act (The licensing of Cinema Projectionists); The One Day Rest in Seven Act; The Fires Prevention Act.

The administration of the above Acts entailed considerable inspection service and the number of inspections and orders issued in respect of each Act are summarized in tabular statistics in the report. During the year there was a total of 15,571 inspections made and 6,175 orders issued as compared with 13,567 inspections and 6,545 orders in the previous year. Most of the orders issued under the various Acts were for improvements in the interests of safety or health and sanitation, while under the Minimum Wage Act the orders largely concerned hours and wages. There was not one case of child labour found.

In the accompanying table, the number of inspections and orders under each Act during the year are summarized:—

*Accidents and Prevention.*—During the year there was a total of 1,041 industrial accidents of which four were fatal. Of the total number of accidents, 1,007 were in the industrial group; 20 in the building trades; and 10 were attributed to elevators. In regard to accident prevention the report states that one of the first activities of the year was the holding of the annual safety week from May 27 to June 2, 1934. The total number of cars tested in Winnipeg during the week was 3,203, of which 1,127 were certified as satisfactory and 2,076 failed to obtain approval. Throughout the year, safety education was continued by means of the press and the radio. Educational and warning posters and bulletins were also issued. First aid classes were conducted in the Bureau of Labour under the auspices of the Saint

John Ambulance Association with the co-operation of the Workmen's Compensation Board. Classes were also organized in other parts of the province. These classes were open to all industrial workers, and 175 persons availed themselves of the opportunity, 101 completing the course and qualifying by examination for certificates. It is pointed out that each year thousands of accident cases are treated by people who have been trained in these classes.

*Steam Boilers, Etc.*—As in previous years, supervision of all steam plants throughout the province was maintained for the purpose of guaranteeing that only properly qualified and licensed engineers are employed in conformity with the Act. A total of 4,574 inspections was made of high pressure boilers, heating boilers, threshing engine boilers, compressed air tanks and refrigeration plants. The fees received for these inspections during the year amounted to \$2,252.14.

The Steam Engineers Board of Examiners issued a total of 1,217 certificates and renewals to engineers during the year, the fees of which amounted to \$2,388.

*Fair Wage Act.*—The Fair Wage Board held a number of meetings in connection with the revision of the schedule for the current year. Fifteen claims for wages were made under this Act, involving \$399.95, and all were satisfactorily adjusted.

*Licensing of Workmen.*—The Board of Examiners under the Electricians License Act issued 269 licences and 86 contractors' certificates during the year, the total collected in fees being \$2,835.15. Fourteen candidates tried the examinations to qualify as cinema projectionists. Eight qualified as second class operators and six failed. Fees collected for examinations, operators' licences and apprentices' licences amounted to \$553. Licence fees for dry cleaning establishments amounted to \$528.75.

*Fire Prevention.*—The fire loss for Manitoba in 1934 amounted to \$1,195,160 or \$1.70 per capita as compared with \$1,146,000 or \$1.64 per capita in 1933. Fire prevention methods were reviewed and the causes of fires were analysed. Thirty-six suspicious cases were brought to the attention of the Department but there was not sufficient evidence to warrant charges of arson being laid.

*General Complaints.*—During the year the Board received 718 complaints, under the several Acts administered by the Bureau, all of which were adjusted. These were as

follows: Minimum Wage Act, 657; Electricians License Act, 47; Steam Boilers and Pressure Vessel Act, 7; Elevator and Hoist Act, 1; and One Day Rest in Seven Act, 6.

**SUMMARY OF INSPECTIONS MADE AND ORDERS ISSUED BY THE BUREAU OF LABOUR FROM MAY 1, 1934, TO APRIL 30, 1935.**

Statute	Number of Inspections	Number of Orders
The Manitoba Factories Act.....	613	408
The Bake Shops Act.....	30	11
The Shops Regulations Act.....	12	5
The Minimum Wage Act.....	3,684	1,520

The Fair Wage Act.....	169	49
<b>Total.....</b>	<b>15,571</b>	<b>6,175</b>

### Minimum Wage Board

Included in the annual report of the Manitoba Bureau of Labour covering the fiscal year May 1, 1934, to April 30, 1935, is the report of the Minimum Wage Board. During the year, 53 meetings were held and two new regulations were issued, i.e., Regulation 17, effective December 24, 1934, governing the employment of general employees, 18 years of age or over, in occupations not otherwise regulated and not specifically excepted in all portions of the province (LABOUR GAZETTE, January, 1935, p. 27); and Regulation 18, effective March 1, 1935, governing employment of "men performing work generally done by boys," "part-time," "piece-work," and "employment and apprentices" (LABOUR GAZETTE, April, 1935, p. 332). There was also a revision of Regulation 2, governing employees in departmental stores and mail order houses, which came into effect on March 1, 1935.

There were 36 prosecutions for violations of the Act under regulations governing the following: beauty parlours and barber shops, 3; hotels and restaurants, 21; artificial flowers and ladies' wear, 6; boys in manufacturing industries, 4; theatres, 1; and offices, 1. Convictions were obtained in 16 of the above cases and judgments given for back wages. Seven cases were settled out of court. Stay of proceedings was entered in 12 cases, and in one case the summons could not be served owing to inability to locate the proprietor. In addition, 540 claims for wages were adjusted and collections effected. Of these, 241 were claims of female employees, while 299 were

wage claims of male employees. The total amount collected in these wage adjustments for men and women was \$9,066.51.

The number of inspections in Winnipeg under all the regulations governing employment of female workers totalled 1,613. These resulted in 452 orders respecting either conditions of work, hours, or wages, plus 153 other regulations. Outside of Winnipeg, there was a total of 203 inspections and 110 orders were issued.

In addition to the foregoing, there were 1,868 inspections throughout the provinces under regulations governing male employees. These resulted in 727 orders respecting either conditions of work, hours or wages, plus 75 other regulations.

### Production of Nova Scotia Fisheries in 1935

The total value of production of the fisheries of Nova Scotia in 1935 was \$7,877,000 compared with \$7,674,000 in 1934 and \$6,011,000 in 1933. These figures represent the value of the fish as marketed, whether sold fresh, canned, dried or smoked. The lobster fishery was of chief importance with a value of \$2,757,000. The quantity was less than in 1934 but the marketed value substantially increased. The cod fishery decreased both in catch and value, but haddock showed increases in both. There were increases in the catch and value of herring, halibut and swordfish.

In the June issue of *Labour Research* the following reference is made to pensions of various kinds in Great Britain and Northern Ireland. "In 1934-35, 3,639,551 people in Great Britain and Northern Ireland were in receipt of old age, widows', blind, or orphans' pensions. Of these, 2,448,693 were men and women over 65 years of age and 1,090,858 were widows and orphans. In 1908 these pensions were unknown to the British workers." The survey of the situation continues indicating that the cost of these pensions was £80½ millions in 1934-35 of which the workers and employers contributed £21.6 millions and the State (Treasury) £13 millions, the balance being drawn from the accumulated funds of the Contributory Pensions Fund Account.

The National Council of Women, at its recent annual convention at Halifax, are reported to have adopted, in principle, a code for household workers and employers which, among other things, would call for a work week of not more than 69 hours, overtime pay and a minimum wage schedule.

## LABOUR LEGISLATION IN ALBERTA IN 1936

THE Alberta Legislature, which was in session from February 6 to April 7, 1936, enacted new laws providing for a minimum wage for men, the establishment of a Bureau of Relief and Public Welfare, the examination and licensing of certain tradesmen and of trades and businesses. Amendments were made to the statutes dealing with minimum wages for women, industrial standards, settlement of labour disputes, workmen's compensation and mothers' allowances.

### Minimum Wages

The Male Minimum Wage Act, which will come into force on Proclamation, is generally similar to the Male Minimum Wage Act of British Columbia. The Alberta statute applies to all adult male persons who are in receipt of, or entitled to, any compensation for labour or services in any industry, trade, business or occupation and to their employers. Farm labourers and domestic servants are excepted. Provision is made for the appointment by the Lieutenant-Governor in Council of a minimum wage board consisting of a chairman and two other members who are to hold office during pleasure and receive such remuneration as may be fixed by the regulations. The Board may hold such inquiries as it considers adequate and make orders fixing minimum wages. Such orders may apply to all employees or to any group or class of employees in any industry, business, trade, or occupation or in all or in any two or more industries, businesses, trades, or occupations; they may fix different minimum wages for the same industry, business, trade or occupation in different parts of the province or a minimum wage applicable only in the part or parts of the province designated in the order. The minimum wage may be fixed upon a daily, weekly or hourly basis. The Board may also make inquiries into the wages and conditions of labour of male employees under 21 years of age and make orders establishing minimum wages for such employees.

All orders of the Board fixing a minimum wage are to be applicable throughout the province, unless restricted by their terms to some part or parts thereof, and are to become effective on the date of publication or on such later date as may be stated in the order. The Board may, by written permit, authorize the employment of handicapped or part-time employees or apprentices at a wage less than the fixed minimum and may limit the number of such persons to be employed by any employer. Upon petition of employers or employees, or

of its own motion, the Board may suspend, vary, rescind or renew any order. The Board may investigate cases where board or lodging is furnished by an employer to any employee covered by a minimum wage order and, if the price charged by the employer is found to be excessive and unduly affecting the wages of the employee, an order may be made fixing the maximum rate to be charged. The Board is also given power to hold an inquiry into any partnership, association or scheme of profit-sharing, co-operation, etc., which may be intended to defeat the object of the Act. If such intention is found, the Board may prohibit the carrying on of such partnership or scheme. A maximum fine of \$500 and costs may be imposed for contravention of such an order and, in the case of a second offence, in default of payment of the fine, a term of imprisonment of not more than six months may be imposed and any licence held by the offender under the Licensing of Trades and Businesses Act may be suspended or cancelled.

Employers must keep, in the English language, records of wages and hours and registers of the names, nationalities, ages, and addresses of all employees. Inspectors to be appointed under the Act are authorized to inspect premises, examine and take extracts from books and payrolls, relating to wages, hours and conditions of labour, to require the production of records, statements, etc., and to obtain information on oath from either employers or employees. An employer who contravenes an order of the Board by paying a wage less than the fixed minimum or by charging more for board or lodging than the rate fixed by the Board is liable to a fine not exceeding \$500 for each employee affected. He is liable, also, to pay to each employee the difference between the wage actually paid and the minimum wage. An employer or employee neglecting or failing to perform any duty imposed by the Act is liable to a fine of \$500. In either of the above cases a second offence is punishable, in default of payment of the fine, by a term of imprisonment not exceeding six months if the offender be an employer, and suspension or cancellation of any licence he may hold under the Licensing of Trades and Businesses Act.

Where an employee, by collusion with his employer or otherwise, works for less than the minimum wage or, directly or indirectly, returns to his employer any part of his wages, so that the wages actually received and retained by the employee are reduced to an amount less than the minimum to which he is entitled, the employer and the employee are

each liable to a fine of \$100 in addition to all other penalties to which they may be liable under the Act. An employer who discharges or otherwise discriminates against an employee making a complaint or testifying in any proceedings under the Act is liable to a fine not exceeding \$500 and in default of payment to imprisonment for not more than six months. The Board may not disclose the identity of a complainant who desires it to be withheld except in cases where such disclosure is necessary for purposes of prosecution or is deemed by the Board to be in the public interest.

An employee who is paid less than the minimum wage may claim the difference, with costs, in a civil action, but where his service with the employer has terminated no action may be brought after six months from such termination. This provision applies only to wages earned during the six months' period immediately preceding the termination of his services or the taking of civil action whichever first occurs. No prosecution for an offence under the Act may be commenced or carried on except with the written authorization of the Minister. The Lieutenant-Governor in Council is empowered to make regulations for carrying out of the provisions of the Act.

The Minimum Wage Act applying to women was amended to provide for transferring the administration of the Act from the Minister of Public Works to any member of the Executive Council charged with its administration. The amendment is to come into force on Proclamation.

### Licensing of Trades and Tradesmen

The Licensing of Trades and Businesses Act, which came into force on April 15, 1936, applies to all trades, businesses, and occupations (in the Act called "trades") which are carried on in the province and to which the powers of the Legislative Assembly extend. The following are excepted: trades licensed pursuant to any Act of the province, professions or callings governed by special Acts, members of the Accountants' and Creditors' Associations in Ontario, and of the International Accountants' and Executives' Corporation of Canada, and businesses subject to the control of the provincial Board of Public Utility Commissioners. The Lieutenant-Governor in Council is empowered to designate the trades or any class of any trade as trades to which the Act applies and to provide for the registration and licensing of all persons engaged in a trade so designated. He may prohibit the carrying on of such trade by any person not licensed or registered. The Minister is empowered to suspend or cancel any

licence, if satisfied that the holder is habitually contravening any of the provisions of any code or of any regulations made pursuant to the Department of Trade and Industry Act, Factories Act, Minimum Wage Act, Male Minimum Wage Act or Industrial Standards Act.

The Tradesmen's Qualification Act, which was proclaimed in force June 1, 1936, empowers the Lieutenant-Governor in Council to designate as a trade to which the Act applies all or any of the following trades: the trade of a mechanic engaged in all or any of the following activities, namely, the construction, building and repair of automobile engines, steam engines, boilers, internal combustion engines, radios, refrigerators and refrigerating machines, the trade of a plumber, steam fitter, gas fitter, electrician, electric welder, and acetylene gas welder, the trade of a barber and any other trade in which 66 per cent of the persons engaged have petitioned the Lieutenant-Governor in Council to have it designated as a trade to which the Act applies. The Lieutenant-Governor in Council may prohibit any person from following a trade so designated if such person is not the holder of a certificate of proficiency under the Act. The Government may also appoint boards of examiners for the various trades, prescribe the nature of the examinations to be held, the classes of certificates, the standards of proficiency required of candidates and make regulations, in general, for carrying out of the Act. Where provision is made for the certification of persons in any trade, any person who engages in such trade without a certificate is liable to a penalty not exceeding \$5 and costs, and for a second or subsequent offence, to a like fine and, in default of payment, to imprisonment for not more than seven days.

Nothing in the Act is to apply to any engagement of non-certificated persons in cases where it is not practicable to secure the services of a certificated person or in cases of emergency. The Act does not apply to any case in which provision is made for certification or authorization of any person to engage or follow a trade under the Boilers Act, the Coal Mines Regulation Act or the Theatres Act.

### Unemployment Relief

Part I of the Bureau of Relief and Public Welfare Act makes provision for the establishment of a bureau in charge of a Commissioner of Relief and Public Welfare appointed by the Lieutenant-Governor in Council. The Commissioner is to make provision, out of moneys appropriated by the Legislature, for the maintenance or partial main-

tenance of all transient indigents and for their care and treatment in illness. In cases in which it is doubtful whether such indigent is a transient or is an indigent in respect of whom some municipality is liable, the Commissioner may provide relief and may recover the cost from the municipality found to be so liable. The Commissioner may also provide for the burial of a deceased person in any case where the cost of burial would be a public charge and no municipality is liable to make such provision. The Commissioner is to superintend the collection and publication of information and statistics affecting indigency and indigent relief as directed by the Minister in charge of the Act; to supervise the administration of such Acts and relief measures as may be assigned to the Bureau by the Lieutenant-Governor in Council; and to perform such other duties as may be assigned to him by the Minister. The Lieutenant-Governor in Council may make regulations governing the granting of relief and disbursement of moneys under the Act.

Part II of the Act sets out the conditions for the granting of unemployment relief. A "resident" is defined as any person who has had his home, or has resided, within the boundaries of a municipality for at least twelve consecutive months out of the twenty-four months immediately prior to the date of receiving unemployment relief and who has not received assistance from municipal or provincial funds during the twelve months immediately preceding the granting of relief. "Unemployment relief" is defined to mean food, fuel, clothing or shelter provided for persons who are destitute of means to provide for themselves, who are physically and mentally fit to accept employment but for whom no employment is available and who have been approved by the Bureau of Relief and Public Welfare as persons eligible for unemployment relief. "Unemployment relief" does not include medical attendance or treatment or hospitalization.

Certain rules are laid down in the Act in case provision is made at any time by the Government of the Province or by the Government of Canada or by both for assisting a municipality in defraying the cost of unemployment relief. A person who is afforded relief is not deemed to be an indigent for the purpose of any municipal Act; the liability of a municipality to any person qualified to receive unemployment relief, and who, but for this Act, would have been an indigent, is as provided by Part II of the Act; the fact that a person is in receipt of unemployment relief is not to affect the duty of a municipality, under the Act governing such municipality, to provide for care and

treatment of such person if he is indigent and sick; every municipality is to make provision for unemployment relief for its residents who are eligible therefor, and, in case of urgent necessity, for any person who is temporarily within the municipality but is not a resident, but in the latter case, assistance is only to be given for such period as is necessary to determine the residence of such person and the responsibility for unemployment relief. In cases of urgent necessity the Commissioner may provide unemployment relief until residence has been determined. Where a municipality or the Bureau provides assistance for a person for whom another municipality is liable to provide, the municipality of which such person is a resident is to repay on demand the actual amount of the assistance provided.

If a resident of a municipality while receiving unemployment relief or within twelve months after receiving assistance under the Act moves into another municipality, such other municipality is not liable for assistance but the first mentioned municipality continues to be liable until such person has been wholly self-supporting for twelve consecutive months while residing outside the boundaries of such municipality. Any person in receipt of assistance under the Mothers' Allowance Act, the Workmen's Compensation Act (Accident Fund) or the Old Age Pensions Act or in receipt of a pension or allowance for military or naval services is deemed to be self-supporting to the extent of such assistance.

Where it is necessary to afford unemployment relief to a resident of a municipality who is actually residing outside its boundaries, the municipality may give written notice requiring him to reside within the municipality while receiving relief, but must furnish reasonable facilities for the transportation of such person and his dependants and effects and must also provide a home which is reasonably fit for human habitation. Any disputes arising under this provision may, upon application of either party, be referred to a Judge of the District Court for determination. A resident who fails to comply with an order of the Judge is liable to a fine not exceeding \$100 and costs and, in default of payment, to imprisonment for not more than three months.

A municipality which, without lawful excuse, fails to provide adequate unemployment relief for any resident is liable on summary conviction to a fine not exceeding \$500 and costs, but no prosecution for such an offence may be commenced without leave of the Attorney-General.

A municipality must pay the cost of administering unemployment relief. It may re-

quire a recipient of unemployment relief residing within the boundaries to perform any work or service of which he is capable upon any public work of the municipality, which is unemployment relief work and which is not disallowed by the Minister as such, or it may require him to give a satisfactory undertaking for the repayment of sums for unemployment relief. In exercising any power under this provision a municipality is to give special consideration to persons who served overseas in the Great War as members of the Canadian Expeditionary Force or of the military or naval forces of Great Britain or of any of her allies. An applicant for, or a recipient of, unemployment relief may be required by the Minister or any municipality concerned as a condition precedent to the granting or to the continuance of unemployment relief, to make an affidavit or statutory declaration setting forth all facts relating to his means, property, etc. The Act is to be read and construed with, and, in case of conflict, to prevail over, the Municipal District Act, the Town and Village Act, the Improvement Districts Act and any other Act or charter governing a municipality.

The Unemployment Relief Act, 1933, Continuation Act, 1936, continues in force the Unemployment Relief Act, 1933, until March 31, 1937. The latter Act enables the Government of the Province to make agreements with the Government of Canada and with the municipalities respecting relief measures. It is now provided that obligations created under this Act prior to March 31, 1936, may be discharged out of the General Revenue Fund notwithstanding the expiration of the Act on that date.

The Agricultural Relief Advances Act provides for furnishing certain farm supplies to needy farmers.

#### **Workmen's Compensation**

The Workmen's Compensation Act (Accident Fund) was the subject of a number of amendments. The section which rendered the presence of two Commissioners necessary to form a quorum was replaced by a provision enabling any Commissioner to exercise all the jurisdiction and powers of the Board. The clause empowering the Board to classify the industries in Schedule 2 was amended to provide for sub-classification, differentials and proportions in the rates as between different kinds of employment in the same class and for levying a special rate in respect of an industry which is shown to be so circumstanced or conducted that the hazard is greater than the average of the class or subclass to which such industry is assigned.

The section enabling the Board to extend the period for reporting cases of hernia where

reporting within the time set by the Act would involve hardship for the workman, was amended to provide for similar extension of the period within which the workman must submit to an operation for cure of hernia. An amendment to the clause requiring the Board to provide for the repair, maintenance and renewal of special apparatus supplied by the Board to the workman for alleviation of the injury, makes it clear that any such apparatus is covered by the provision. The Act enables the Board to make a per diem subsistence allowance to a workman undergoing treatment under its direction at a place other than that in which he resides. Such allowance formerly ranged from \$1.50 to \$2.50 but under the amending Act only the maximum of \$2.50 is prescribed. The Act validates all assessments heretofore made by the Board.

A Bill which was introduced but was later withdrawn would have transferred administration of the Factories Act and the Boilers Act from the Bureau of Labour to the Workmen's Compensation Board.

#### **Industrial Standards**

The Industrial Standards Act was amended by repealing the sections enabling the Lieutenant-Governor in Council to make regulations prescribing standard specifications for commodities for industrial use or sale in the Province. With this change, the Act is now similar to the Ontario Industrial Standards Act.

#### **Industrial Disputes**

An amendment to the Labour Disputes Act made a change similar to that effected in the Minimum Wage Act by defining "the Minister" as used in the Act as the member of the Executive Council for the time being charged with the administration of the Act. The statute was formerly administered by the Minister of Public Works.

#### **Licensing of Bakeshops**

The Bread Act, 1934, which requires every person conducting a bake-shop to obtain a licence from the Minister of Health, was amended to enable the Minister to suspend or cancel any such licence if satisfied that the holder is habitually contravening the provisions of the Act or of any code or of any regulations made pursuant to the Department of Trade and Industry Act, the Factories Act, the Minimum Wage Act, the Male Minimum Wage Act or the Industrial Standards Act.

#### **Trade Schools**

An amendment to the Trade Schools Regulation Act, 1931, empowers the Lieutenant-Governor in Council to make regulations providing that in the case of any specified trade school no certificate or other document as to

the competency of any person shall be issued by that school until such person has taken the examination prescribed by Order in Council for such school or class of schools. Regulations may also be issued governing the nature of examinations for certificates, the manner, time and place of holding them and the persons who shall act as examiners.

### **Chauffeurs**

The Public Service Vehicles Act, which came into force on May 1, 1936, replaces the Public Vehicles Act, 1927, and consolidates and amends the law regulating public service and commercial vehicles. The Highway Traffic Board to be appointed to administer the Act, may make regulations governing, *inter alia*, the hours of employment and wages of drivers. No person may operate a public service or commercial vehicle unless he holds a certificate from the Board which is issued subject to certain conditions, including satisfactory evidence that the applicant has complied with the provisions of the Workmen's Compensation Act (Accident Fund). No holder of a certificate may employ a driver or operator who is not in possession of the chauffeur's licence required by the Vehicles and Highway Traffic Act. Every owner of a public service vehicle who dismisses a driver or operator must report the dismissal forthwith to the Board, giving the reason therefor. Provisions of the former law which are embodied in the revision require drivers to satisfy the Board of their physical fitness and to abstain from drinking intoxicating liquor or smoking while on duty.

The Vehicles and Highway Traffic Act was amended to provide that the Minister may require an applicant for a driver's or chauffeur's licence to submit himself to an examination as to his competency, and may make orders prescribing cases in which such examination may be, and those in which it may not be, dispensed with. A judge, magistrate, or justice convicting the holder of a chauffeur's licence of an offence under the Act may suspend or cancel the licence of such chauffeur and shall thereupon transmit the licence to the Minister with a report.

### **Mothers' Allowances**

Amendments to the Mothers' Allowance Act, which will come into force on July 1, 1936, include a new section requiring a beneficiary to reside within the boundaries of the municipality which is liable for the payment of a portion of the allowance. It is provided, however, that upon obtaining the written consent of the municipality so liable, the beneficiary may move to, or remain in, another municipality within the Province. In such event, the allowance payable to her is to be an amount fair and reasonable, having regard to allowances paid under the Act to other women residing in the municipality liable for pay-

ment. The proportion of mothers' allowances payable by municipalities is reduced from 50 per cent to 25 per cent.

The definition of "widow" was amended to include a married woman who by order of a District Court Judge is declared to have been deserted, without reasonable cause, by her husband for a continuous period of five years or upwards immediately preceding the date of such order.

### **Department of Trade and Industry**

Amendments to the Department of Trade and Industry Act, which are retroactive to October 18, 1934, include a provision that codes formulated under the Act must be approved by a majority of persons engaged in the trade or by the persons owning over fifty per cent of the aggregate capital invested. Formerly such codes had to be approved by 66 per cent of the persons engaged or by those owning 66 per cent of the aggregate capital.

Both maximum and minimum prices for commodities or services may now be fixed in a code whereas formerly only minimum prices for commodities could be fixed. The section empowering the Lieutenant-Governor in Council to make regulations under the Act is repealed. The Act is made applicable to producers and manufacturers as well as to wholesale dealers. The clauses were repealed which provided that the Act should not apply to the retail sale of second-hand goods or goods advertised in bona fide mail-order catalogues and sold in the course of a bona fide mail order business.

The amending Act provides that if the Minister is satisfied that it is expedient and in the public interest that any trade other than those expressly covered by the statute should be brought within its scope, he may make a recommendation to that effect to the Lieutenant-Governor in Council and a proclamation may be issued declaring such trade to be subject to the Act. Under the original Act, a trade could be brought within the Act by proclamation issued as above if a petition was made to the Government by a representative number of persons in the trade.

### **Housing**

The Dominion Housing Mortgages Act declares that certain provisions of the Judicature Act governing actions upon mortgages shall not apply to any mortgage given to secure a loan for the purpose of assisting the construction of a house under the Dominion Housing Act of Canada. The Alberta statute further provides that notwithstanding any provision in any provincial Act or law to the contrary every such mortgage shall have priority over every claim or charge filed or registered subsequent to the due registration of such mortgage except in respect of taxes.

## ANNUAL CONVENTION OF CANADIAN MANUFACTURERS' ASSOCIATION

CONVENING in Quebec City on June 2, 3 and 4, the Canadian Manufacturers' Association held its 65th annual meeting. Among the features of this convention were the adoption of the executive council and various committee reports through which the views of the Association on economic and social questions were expressed.

### President's Annual Review

The annual review of the President, Mr. W. S. Morden, K.C., constituted a comprehensive survey of international and national conditions as reflected in trade, production and recovery efforts. Summarizing the industrial situation in Canada, the president stated:

"While the country, as a whole, has been recovering for about three years, many persons and individual companies do not seem to have benefited. How often we hear it said: 'Recovery has not helped me.' The building and construction industry, for example, although it has shown some expansion, is still far below the records of even moderate pre-depression years. Many industries that were making progress before the depression have not survived, and many that weathered the storm find their markets restricted or greatly changed. Similar disappointing experiences are reported from various departments of business, agriculture, finance, transportation, retail and wholesale trade."

Reiterating the pledged assistance of the Association to the National Employment Commission, Mr. Morden continued:

"We all realize, however, that, after all temporary and external aids have been provided, in the final resort the only effective methods for getting people off relief is to find them work in normal economic activities and, consequently, policies and measures that will result in increasing production in industry, mining, agriculture, lumbering and fishing, and in expanding trade, and thereby furnishing more opportunities for employment in the ordinary fields of endeavour in which people have had previous training offer the real and permanent cure for unemployment and relief. This applies to employable people willing to work. Unemployables and those who do not desire work constitute another problem."

Reviewing the "general position of industry in the national political economy" the president pointed out that 83 per cent of the production of Canadian factories is used in this country with the remaining percentage

marketed in over a hundred other countries.

Emphasizing the importance of manufacturing in the national sphere, Mr. Morden added:

"It is estimated that those who receive salaries and wages from Canadian factories, with their dependents, constitute at least one-quarter of the entire population of Canada; that is, about two and one-half million Canadians, in normal times, are directly dependent on the salaries and wages paid by Canadian industry for their maintenance. In addition to these there are many more who are indirectly assisted by industrial operations. For example, to what extent does transportation rely upon manufacturing for passenger and freight receipts? What percentage of the sale of clothing, food, household furnishings and equipment and many other kinds of merchandise is made to industrial employees? How many of the existing six million policies of life insurance have the companies written for industrial workers? What groups in Canada are economically indifferent to industrial conditions? Even the most elementary attempts to answer these questions will convince reasonable people that the industrial system, during the past sixty or seventy years, has sent its roots deep into every part of Canadian activity; that its interests are intertwined with those of persons in every other occupation; that these interests are common; and that industry cannot be restricted or injured in any way without doing some damage to practically everyone in the country."

"It may be objected that our industrial system does not prevent unemployment. In reply, it may be asked, what proportions unemployment would have reached in the absence of factories? At the depth of the depression, it is estimated that Canadian factories continued to find work for about seventy per cent of the number usually employed. It should be remembered that the United States is no longer a refuge for Canadians who cannot find work here, and that, on the contrary, our unemployed ranks have been increased by many Canadians who have been obliged to return to their own country. Moreover, as a great share of taxes is obtained from industry, both directly and indirectly, where would the national revenue have been secured if there had been no industry to tax?"

Urging a better understanding of industrial problems on the part of the public, the presi-

dent referred to the factors involved in manufacturing, under modern conditions, as follows:

"We also ask for a better understanding of industrial problems on the part of the public. Manufacturing, under modern conditions, is not controlled by individuals; it has become a co-operative effort of groups, including employers, employees, carriers, suppliers of raw materials, owners or lessors of property, suppliers of services, wholesale and retail distributors, governments, shareholders and creditors, and the fair remuneration of the services of all these decides the ultimate prices at which products are sold."

### Industrial Relations Committee

The report of the Executive Council, adopted by the meeting, included reports of the various committees, viz., tariff, transportation, industrial relations, legislation, commercial intelligence, insurance, education, etc. Of these, the report of the Industrial Relations Committee dealt chiefly with questions concerning working hours, wages, employment, apprenticeship, etc. The text of the report of this committee is as follows:

*Reduction of Hours.*—"As regards the reduction of hours of work, it will be recalled that an eight hour day law was passed at the last session of Parliament, and nominally came into effect on the 5th of October last. The Association having taken a leading part in securing the insertion in the Act of a provision allowing important exceptions and exemptions to meet the special circumstances of seasonal, intermittent, complementary and certain other industries, steps were taken to secure from members affected the information necessary in order to ensure that the regulations under the Act are drafted in such a way as to safeguard the interests of the industries in question. Further, the Association has reason to believe that it will be called by the Government into consultation on the drafting of the comprehensive regulations, which will be required for the proper administration of such legislation. It remains to add that the question of the constitutionality of the Act has been referred to the Supreme Court of Canada, and a decision may be expected shortly.

"With the eight hour day and forty-eight hour week question still unsettled, the Association has been confronted with the proposal to reduce hours of work to 40 per week. This comes in the form of a proposal for an International Convention laying down the principle of a reduction of hours to 40 per week, in the textile, iron and steel, building and civil

engineering industries, as well as in coal mines and public works,—this, with a special view to helping relieve unemployment. The Committee took steps to consult the general membership, through a questionnaire. The replies to the questionnaire showed that those members of the Association who are engaged in the industries affected are practically unanimous in opposing compulsory 40 hour week legislation, even though a few of them have themselves been working on a 40 hour week basis in recent years. The general point of view was that even if the 40 hour week were adopted universally, throughout the world, which was at the present time unthinkable, it would not achieve the desired end of helping to relieve unemployment, but, on the contrary, would tend to increase unemployment, inasmuch as it would tend by increasing costs, and therefore prices, to reduce sales, and therefore employment.

"The representatives of the employers of Canada at the forthcoming International Labour Conference, at which the 40 hour week question will be up for final discussion, will be instructed accordingly."

*Collective Labour Agreements.*—"Experience to date under the collective labour agreement legislation, providing for the establishment of codes governing hours and wages, which has been passed in Quebec, Ontario, and Alberta, goes to show, in the opinion of the Committee, that what purports to be a measure for putting a stop to the payment of unduly low wages has turned out to have the effect, as your Committee predicted in vigorously opposing the legislation, of aiding and abetting organized labour in their endeavour to increase the unionization of the workers, and to maintain at their present level, or even raise wages which, for example, in the building industry, are already far from low. The Committee is, therefore, of the opinion that this legislation, so far from aiding, has actually retarded recovery without achieving to any marked extent the elimination of sweat-shop wages."

*Unemployment and Relief.*—"As regards unemployment and relief, your Committee has seen no reason for changing the view which it expressed before the Senate Committee, at the time the Employment and Social Insurance Act was before Parliament last year, that it is imperative that coincidentally with the introduction of unemployment insurance, there should be inaugurated some nation-wide scheme in which the provinces and the municipalities should co-operate with the Dominion Government for dealing with the very large number of people who would not be entitled

to benefit under the Employment and Social Insurance Act. That being so, your Committee is holding itself in readiness to give every assistance possible to the National Employment Commission which has now been set up to study and report upon the whole question of taking care of those who are now on relief, both the employable and the unemployable. Your Committee naturally regards the choice of a man of Mr. A. B. Purvis' wide experience to head the Commission as an excellent one, though it feels it necessary to point out that it is a mistake to assume, as is apparently done in certain quarters, that the 330 odd thousand employable unemployed are, for the most part, industrial workers, and should be re-absorbed by industry. The fact, of course, is that only a comparatively small proportion (probably not more than 20 per cent) of these are industrial workers, the responsibility for re-absorbing the remainder belonging to other forms of employment, such as primary production, transportation, commerce, services and other non-industrial occupations."

**Apprenticeship.**—"One of the questions which the new National Employment Commission is to investigate and report on being that of the establishment of an apprenticeship system in industry, the Committee, after some study of the question, is of the opinion that while it is highly desirable and indeed necessary, that as business improves steps should be taken to train an increasing number of apprentices, no good reason has been shown why this cannot be done better by various industries, each in its own way, and indeed, by individual firms, each in its own way, than under a scheme laid down by legislation and administered by governmental authority."

**Health Insurance.**—"Finally, reference should be made to the fact that the British Columbia Legislature at its recent session passed a Health Insurance Act providing for extensive but ill-defined benefits for practically all employees earning less than \$1,800 a year, the cost to be met by a levy of 2 per cent of wages on employees and 1 per cent of wages on employers. What assistance was possible was given to the British Columbia Division, which, in collaboration with other organizations of employers, and with the Canadian Medical Association, vigorously opposed the legislation on the ground that it was so indefinite in respect of the extent of the medical benefits, the amount of the remuneration to physicians, and safeguards against abuse, that both the financial and social consequences were likely to be disastrous. Another ground of objection was the unwisdom of a single province embarking on such a venture independently of the rest of the Dominion, particularly in view of the fact that a Dominion-Provincial Health Conference held just a year ago decided to set up a National Commission to study the whole question on a national basis, with a view to framing a national measure. The Act, though passed, has not yet been proclaimed and there is some hope that the British Columbia Division may be able to secure some much-needed amendments before the Act is actually brought into operation."

Hon. W. D. Euler, Minister of Trade and Commerce, addressed the convention, and present at one of its sessions were Mr. W. M. Dickson, Deputy Minister of Labour, and Mr. R. A. Rigg, Director of the Employment Service of Canada.

## AGREEMENT BETWEEN UNITED STATES RAILWAYS AND LABOUR UNIONS RESPECTING COMPENSATION FOR EMPLOYEES LAID OFF

**R**EFERENCE was made in the LABOUR GAZETTE for March, 1935, page 226, to the introduction in the Congress of the United States of a Bill to provide compensation for railway employees losing their positions as a result of the merger, consolidation and co-ordination of railways or parts thereof, terminals or other services. A similar Bill was introduced in March, 1936, and considered by committee of the Senate and House of Representatives from time to time until May 21, when the signing of an agreement between the railways and the unions to make provision for this was stated to make the enactment of the Bill unnecessary.

### Pensions on Retirement

Apart from this arrangement for compensation for employees deprived of employment through mergers, etc., provision for pensions on retirement on account of age, etc., was made in the Railroad Retirement Act, 1933 (LABOUR GAZETTE, July, 1934, page 655), which was declared unconstitutional by the United States Supreme Court (LABOUR GAZETTE, November, 1934, p. 1025). In 1935 a new Railroad Retirement Act was passed, signed by the President on August 29, to come into effect on March 1, 1936, pension payments to begin ninety days thereafter. Under this statute, workers retiring at sixty-five, or after

thirty years service, receive pensions based upon length of service and average salary received but not to exceed \$120.00 per month. An Act to raise the funds required was also passed, which provides for an excise tax on the employers of three and one-half per cent of the payrolls and a similar tax on the wages of employees.

### Negotiations For Agreement

Negotiations between the Association of American Railroads, representing the various railways, and the Railway Labour Executives Association, representing the various labour organizations with membership wholly or partly consisting of railway employees, were begun on February 3 with a view to reaching an agreement providing for compensation by the railways to employees losing their positions as a result of co-ordination, etc. The negotiations were broken off but were resumed in March at the request of the President of the United States, and the signing of the agreement was strongly commended by the President, the Secretary of Labour, and by the Federal Co-ordinator of Railways.

The agreement was signed by nearly all of the principal railways and contains a provision that none of the railways which are parties to it will enter into any co-ordination plan with any railway not under the agreement unless the provision for compensation to displaced employees is complied with. Each of the railways not under the agreement is stated to be so situated that consolidation with any other railway of importance is not possible except in accordance with the terms of the agreement.

The unions signing the agreement include those of the locomotive engineers; locomotive firemen, hostlers, etc.; conductors; trainmen; switchmen; telegraphers; train despatchers; maintenance of way employees; clerks, freight handlers, express and station employees; signalmen; sleeping car conductors; carmen and the various craft unions with membership among other employees in railway shops, namely machinists, boilermakers, blacksmiths, sheet metal workers, and electrical workers; also firemen and oilers; masters, mates and pilots; and marine engineers. Classes of employees not represented by the organizations which are parties to the agreement are to be dealt with in accordance with the terms of the agreement.

The agreement is reported to apply to 1,000,000 employees, of whom it is estimated 150,000 would be displaced by mergers, consolidations and poolings in contemplation.

### Terms of Agreement

The agreement is to be effective from June 18, 1936, for a period of five years and thereafter, except that any railway or labour organization may then withdraw on one year's notice but any rights of parties to the agreement, or the rights of any individuals established under the agreement, are to continue in full force and effect. The agreement is subject to revision at any time by mutual consent of the parties on sixty days' notice.

Disputes arising out of the agreement are to be referred to a committee consisting of representatives of the parties to the agreement, and if the committee does not agree a neutral referee is to be selected by the committee, or by the National Mediation Board (LABOUR GAZETTE, July, 1934, p. 655).

The term "co-ordination" is defined as meaning joint action by two or more railways whereby they unify, consolidate, merge or pool in whole or in part their separate facilities or any of the operations or services previously performed by them through separate facilities. But, fluctuations, rises and falls, and changes in volume or character of employment brought about solely by other causes are not covered by the agreement.

The agreement provides that each railway must notify employees affected by any contemplated co-ordination by posting a notice on the bulletin boards, and also by registered letters to the representatives of such employees, and that a conference shall be arranged within ten days, to commence within thirty days of the notice. The assignment of employees is to be made on the basis of an agreement between the representatives of the railways and the labour organizations affected. If they fail to agree the dispute is to be dealt with by the committee on disputes set up under the agreement.

If any employee continued in service is placed in a position less favourable with respect to compensation and rules governing working conditions than he occupied at the time of co-ordination, he is to be given a "displacement allowance" to bring his earnings up to the average for the previous twelve months until he is able to secure a position producing compensation equal to or exceeding that of his former position, or for five years.

If any employee is deprived of employment he is to receive a "co-ordination allowance" equal to sixty per cent of his average earnings in the previous twelve months, the period of payment depending on length of service as follows:—

- 1 year and less than 2 years—6 months.
- 2 years and less than 3 years—12 months.

- 3 years and less than 5 years—18 months.
- 5 years and less than 10 years—36 months.
- 10 years and less than 15 years—48 months.
- 15 years and over—60 months.

In determining the length of service of an employee who has acted as an officer or representative of an employee organization, leave of absence for such purpose is to be included as service.

An employee is to be regarded as deprived of employment if his position is abolished and he is unable by the exercise of his seniority rights to secure another position on the road or in the co-ordinated system, or if he loses his position as the result of the exercise of seniority rights by another employee whose position is abolished, and is then unable to secure another position by the exercise of his seniority rights.

An employee is not to be regarded as deprived of employment (and therefore eligible for an allowance) in case of resignation, retirement on pension under the rules, dismissal for justifiable cause, or if furloughed (laid off) because of reduction of forces due to seasonal requirements of the service. He is not entitled to an allowance if not deprived of employment within three years of the co-ordination.

Each employee receiving an allowance is to keep the railway company informed of his address, and the address of any person by whom he may be regularly employed, and is subject to recall to service. Provisions are made for the adjustment of the allowances if so recalled, or if employment is secured on another railway, and for the discontinuance of the allowance if an employee fails to return to service without good reason or is pensioned.

Employees affected by co-ordination are not to be deprived of benefits attaching to previous employments, such as free transportation, pensions, etc.

An employee eligible for a co-ordination allowance may resign and in lieu of all other benefits and allowances accept a lump sum on the following basis:

- 1 year and less than 2 years—3 months pay.
- 2 years and less than 3 years—6 months pay.
- 3 years and less than 5 years—9 months pay.
- 5 years and less than 10 years—12 months pay.
- 10 years and less than 15 years—12 months pay.
- 15 years and over—12 months pay.

An employee with less than one year's service is entitled to a lump sum equal to five days' pay for each month in which service was performed, with a maximum of sixty days at the straight time daily rate for the position last occupied.

Any employee retained in service who is required to change his place of residence as a result of co-ordination within three years is to be reimbursed for expenses in moving his family, household goods, etc. Employees are to be compensated for loss due to the sale of houses or due to unexpired leases. If a dispute arises as to the amount of such loss it is to be referred to a board of three real estate appraisers, one being appointed by the Chairman of the Interstate Commerce Commission if the parties do not agree on the selection. If furloughed within three years and he elects to move back, the employee is to be reimbursed for the necessary expense.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Annual Report of Director Presents Social-Economic Survey of World Conditions

**I**N a Report to the Governing Body, Mr. Harold Butler, Director of the International Labour Office, notes that the year 1935 was, on the whole, one of continued general economic improvement. But the economic picture was far from uniform over the whole world; a considerable section of world economy continued in a state of stagnation, or even suffered a further deepening of depression.

From the point of view of economic recovery in 1935, Mr. Butler divides the countries of the world into three groups.

To the first group belong the countries with devaluated currencies, such as the United States, Japan, the sterling bloc, a number of European countries, and most South American countries. All the countries in this group have enjoyed some improvement in their general economic situation, and their influence on world economic development as a whole has been strengthened by the improved situation of the United States, and by the addition of two new members, Belgium and Danzig.

The second group includes the main countries of the gold bloc, such as France, Switzerland, the Netherlands and Poland. On the whole there was a further deterioration in these countries during 1935, although a slight recovery was experienced in Poland.

The third and intermediate group includes such countries as Germany and Italy, which, like those of the first group, have achieved a considerable degree of internal economic recovery by credit expansion of a special sort and by public investment, but which have not officially devaluated their currencies. Some of these countries—notably Germany—have given some stimulus to their foreign trade by means of export premiums, which have had the effect of a partial devaluation of the currency.

The recovery is characterized in most countries by a particular increase in the production of investment goods. In this connection, Mr. Butler notes that the forms and origins of this stimulation of capital goods production are of two main classes. In Germany, Italy and Japan the recovery in capital goods industries can be traced largely to direct State expenditure, much of it on armaments, and it is particularly in the industries directly or indirectly related to armaments that the main production increases have taken place. In the sterling bloc and in the United States the revival of investment seems to have taken place

rather through individual enterprise responding to cheap money and improved confidence, and shows itself at the same time in an increase in new capital issues.

After analysing the tendencies of general price movements and national monetary policy, the Director of the International Labour Office emphasizes the improvement in the situation of the producers of raw material. He notes that the movement of international trade differed considerably from one region or country to another, and points out the improvement in credit conditions. One of the main features of exchange-rate developments in 1935 was the remarkable stability of rates in the sterling area and of the United States dollar. In contrast to this, 1935 was a year of great disturbances in the main gold bloc currencies, all of which were involved in serious crises.

#### Curbing of Unemployment

Measuring the economic situation by the index of unemployment, Mr. Butler first gives a preliminary summary as follows:—

“The continued decline of unemployment yields a further indication of the upward trend, but the rate of decline has been slow and its range is by no means universal. For the countries supplying data on unemployment it may be said on a rough estimate that there has been a further drop of about 15 per cent during the past year, which represents a total reduction of about 37 per cent since 1932. Three important qualifications must, however, be borne in mind, which are calculated to temper any optimism generated by these figures. First, vast areas such as India and China are not included in the reckoning, where unemployment or unremunerative employment exists on a huge scale. Secondly, in a number of countries, notably France, Holland and Switzerland, the total number out of work was larger at the end of 1935 than at the end of 1934. Thirdly, even in countries like Great Britain, Germany and the United States of America, where a substantial improvement has been recorded, the ‘hard core’ of unemployment still persists and still greatly exceeds the level which existed before the depression. At this point it may be noted, however, that, despite the improvement registered, the reduction of unemployment so far achieved is altogether insufficient to indicate that the solution of the problem is in sight.”

Subsequently, in his report, he made a most comprehensive survey of this problem in a chapter entitled "The Curbing of Unemployment," in which he analyzed all the complex factors. He found a new approach, thus:—

"What is perhaps most encouraging is the steady penetration of the notion that the real test of economic recovery is to be found in the level of social well-being. It is no longer by stock-exchange quotations or by statistics of production or by trade returns that progress is now judged so much as by the number of persons out of work. When all has been said, unemployment still remains the crucial test of economic and social policy. A community which has failed to enable all its citizens to contribute by their work to their own well-being and to the common heritage of the society to which they belong has failed to solve the fundamental problem of statesmanship. It is tolerating not only untold distress among individuals but also a corresponding waste in the use of its own human resources or the development of its potential wealth.

"But a further change of approach of equal importance seems now to be taking place. The view that business activity depends mainly on the volume of spending is now gaining more general recognition. It is obvious enough that manufacturers and merchants cannot sell unless they can find customers ready and able to buy. But the implications of this simple truth were not fully understood, and are still obstinately ignored by those who believe themselves to be the disciples of the old and only true gospel. Among these implications are the facts that a general decline in earnings is bad not only for the wage earner but also for the community at large; that a small number of large buyers consume less, and less regularly, than a large number of small buyers; that the amount of money withheld from active circulation is of vital importance to the level of business activity, from which it follows that not only hoarding but also saving may in some circumstances be detrimental to the general interest.

"None of these propositions, except perhaps the last, is very difficult to grasp in itself; but it is only in quite recent years that they have been regarded as significant as guides to policy. Once it is seen that every man and woman who can no longer buy means a shrinkage of sales and therefore of production, the judgment passed on doles or the payment of social insurance benefits tends to be modified. Once it is seen that public expenditure on social services tends to sustain the market, the taxation which makes it possible is no longer looked upon as such an unmixed evil. It is striking evidence of this new approach to

find the official organ of a great bank declaring that the inevitable disadvantages arising from the development and extension of the social services "are far outweighed by the beneficial economic as well as social results. . .

### Protective Measures

After discussing various tendencies in economic planning, the Director then traces the developments in various countries in coping with unemployment. He first observes, however, that "from whatever point of view the social situation is regarded, unemployment remains and is likely to remain the outstanding problem. No system of labour protection or of health insurance or of safeguarding wages, however admirable, is of much significance to a man who has no work. Nor can any economic system be considered to be functioning adequately which condemns large numbers of workers to involuntary idleness. . .

"The first point which may be noted is that the adoption of protective measures for the unemployed has continued to develop. Belgium is in process of reorganizing its system, while in Great Britain unemployment insurance has been extended to agriculture. But the most salient steps taken in this direction during the past year were the institution of national systems of unemployment insurance in Canada and the United States. Until a very few years ago, any such measures were scouted in both these countries as being unnecessary, harmful and impracticable. The experience of the depression proved the necessity of some national system of insurance while the experience of relief has demonstrated, as it has elsewhere, that money spent in the alleviation of unemployment goes directly into circulation and constitutes a stimulant for the home market. In 1933, for instance, RM. 1,128 million in Germany and £94 million in Great Britain were paid out to the unemployed in the shape of benefit or relief. In the United States the amounts distributed in various forms to the unemployed were far larger. It can hardly be disputed that by putting these large sums into active circulation a substantial contribution was made towards reviving the activity of business.

"But although the prejudice against unemployment insurance and assistance on the ground that they are "uneconomic" has now been largely dispelled, the objection that at best they are but a palliative still holds good. No one seriously supposes that to provide a man with a bare subsistence out of public funds is satisfactory either to himself or to society. Even though the amount of money thus put into circulation has some economic value, that value would manifestly be much

greater if some productive work were given in exchange. In the case of the young it is equally evident that, if work is unavailable, they would be much better occupied in improving their intellectual or technical equipment than in undergoing the inevitable demoralization of complete idleness. As the depression has lengthened out, these home truths have become so patent that they cannot be ignored. In consequence public attention has been directed more and more towards methods of providing work for adults or of prolonging education for juveniles.

### Effect of Public Works

"Even a few years ago public works were generally derided as being economically unsound and practically inefficacious. The theoretical objection is now being vigorously combated by a number of latter-day economists, of whom Mr. J. M. Keynes is not the least eminent. But it is from the field of fact that the most cogent arguments have been derived. The practical demonstrations given in the last two years have put a new complexion on the whole matter. The actual experience acquired in Sweden, the United States and other countries has shown that within limits well-planned schemes of public development may not only make a real contribution to diminishing unemployment, but may also provide facilities, services or commodities of great permanent value to the community. The results of the American experiment are particularly important on account of the wide variety of the measures applied and of their social objectives. During the past year the public authorities in the United States, both Federal and State, have energetically pursued the aim of putting every employable man out of work to some kind of job. Congress appropriated the immense sum of \$4,880 million for the purpose of transferring 3,500,000 persons from relief to productive employment, leaving to the individual States the responsibility for caring for the unemployable, and of gradually suppressing cash relief from Federal funds. Reports are conflicting as to how far this ambitious object has been achieved; but that the Works Program as a whole has had a considerable measure of success is not open to doubt.

### Economic Surveys of Various Countries

*United States.*—The Director then deals with other phases of President Roosevelt's reflation program. In summarizing the results, he notes one disquieting feature of the American picture, thus:

There is, however, one disquieting feature of the American picture. Although industry

is sweeping forward again, there is a considerable lag in the expansion of employment. It is estimated that private industry generally has reabsorbed some 5,000,000 workers since March 1933. Nevertheless, according to the returns of the American Federation of Labor, there were still 7,860,000 totally unemployed in December excluding 3,541,000 persons employed on Government work. For this lag several explanations are put forward. It is asserted, for instance, that in many industries hours of labour are again being lengthened since the disappearance of the codes, with the result that the benefit to employment accruing under the forty-hour week is gradually being lost. It has further been pointed out that the revival in industrial production is only reflected after a certain interval in the production of services which normally employ nearly half the population. These causes have no doubt operated in a greater or lesser degree to check the progress of re-employment, but they are hardly sufficient to account for the wide gap between the pace of restoration in production and employment. That recovery has made and is still making rapid strides in the United States is certain, but it is equally certain that the problem of unemployment is far from being solved with the same rapidity.

*Germany.*—Continuing his analysis of various countries the Director notes that "In Germany new aims of German recovery policy have been substituted for employment creation, one of the important objects being to create the economic foundations of rearmament. Meanwhile, the loans raised in recent years, of which some account was given in last year's Report, have for the most part not been repaid and remain a burden on the national finances. It is true that in recent months the slowing down of the public works program has enabled a part of the employment development bills to be redeemed, but as against this must be set the large but indeterminate State investment undertaken for armament purposes. In 1934 approximately two-thirds of the total investments in Germany—including armaments, housing, railways and similar developments—were made by bodies or individuals whose action was influenced in one way or another by the Government. There is no doubt that this policy was primarily responsible for the rapid and extensive drop in unemployment, but it may be doubted whether this vast public expenditure has succeeded in 'priming the pump' of general business recovery to the same extent as in the United States. It may be observed, for instance, that since August

1935 there has been a steady increase in the number of registered unemployed from 1,700,000 to 2,500,000 in December, although several hundreds of thousands of men have been incorporated in the army. This increase is probably of more than seasonal significance. Taken in conjunction with the continued decline of exports and the apparent lack of resilience in wages, it seems to suggest that the revival of production and employment is still mainly dependent upon State expenditure, which has not yet succeeded in greatly accelerating the tempo of private business."

*Italy.*—"The situation in Italy is difficult to gauge as the position is abnormal owing to war measures, the large number of men under arms and the fact that none of the relevant indices has been published since the autumn of 1935. The last returns available show a rapid diminution in the numbers registered as unemployed and a rapid rise in the amount of currency notes in circulation and in prices. By the beginning of 1936 the exchange value of the lira has fallen rather more than 10 per cent below gold parity.

*Sweden.*—"The case of Sweden affords a remarkable illustration of the result which a bold policy of public investment combined with a well-devised monetary control can attain. The fact of recovery may be seen succinctly from a few figures. The index of production of capital goods which was already 100.9 in January 1935 (1929=100) had risen by a further 12 per cent by November. The activity, which in 1934 had depended largely on the export industries, spread to the trades relying on the home market, particularly building, which exceeded all previous records, thanks to a combination of low rates of interest. State encouragement of house construction and the demand for housing springing from the general dissemination of purchasing power. Unemployment continued to decline steadily. Whereas in 1933 the average number of applicants for relief was 165,000 per month, it fell from 93,000 in January 1935 to 61,000, in January 1936, having touched a low point of 41,000 in the summer. It is particularly interesting to note that, thanks to the energetic measures taken by the Government, the number of youthful unemployed (16-25 years), which was 57,000 in November 1933, had dropped to 10,000 in July 1935. In achieving these gratifying results the public works program played an important part, in 1935 some 55 million crowns being appropriated for this purpose. Moreover, it is clear that public investment on a large scale stimulated rather than checked

the process of general recovery. Its financial justification is strikingly demonstrated by the budget position. In 1936 all non-revenue-producing works are to be financed out of income, the budget will be once more balanced and all the short-term loans raised in 1933 and 1934 for emergency public works are to be redeemed. It is even proposed to reduce the income-tax, good presumptive evidence of the soundness of the policy adopted of balancing the budget over a series of years instead of annually."

*Great Britain.*—The Director also considers that "a further case in which considerable success has been achieved in combatting unemployment by monetary management is Great Britain," and states:

"It can hardly be doubted that the abandonment of the gold standard, the large increase of central bank credit, the lowering of the interest rate by a bold conversion policy, and the favourable effects of these measures on the budget position have been the principal factors responsible for the expansion of employment. At the end of 1935 more persons were in work than at any previous time and about 1,300,000 more than at the low point of the depression (1932). During last year the unemployment total dropped by about 228,000, but, as in Sweden, it still remained considerably higher than in the years before the depression. Much of the unemployment remained concentrated in four specially depressed areas, and it is symptomatic of public sentiment that in spite of the general revival much criticism continued to be levelled at the Government for failing to deal with these areas adequately.

As has already been indicated, the recovery of export trade accounted for only a small proportion of the improvement. It was the home market which expanded and especially the building industry, which developed astonishing activity. In the course of 1935 the volume both of commercial and residential construction was more than twice as great as in 1931; but the greater part of the boom was caused by housing. Between March 1934 and March 1935 327,517 houses were built, of which 286,050 were constructed by private enterprise and 41,467 with the assistance of Government and municipal subsidies."

*Japan.*—"In Japan the expansionist monetary policy followed during recent years has been continued. Again in 1935, approximately a third of the total budget was financed out of loans. It is difficult to tell what proportion of this expenditure is going to social amelioration, but an effort is being made to give assistance to the hard-pressed agricultural

population. The expenditure on armaments continues to be by far the largest item. Over the last five years the allocations under this head have more than doubled, amounting in 1935 to 46.2 per cent. of the total budget. The need for financing future Government expenditure out of taxation is the subject of earnest discussion at the present time. It appears to be well understood in Japan that public expenditure in excess of receipts cannot be looked upon as a permanent policy. While applicable to times of depression it is, of course, potentially dangerous in a period of prosperity. As yet, however, the levels of production and employment have continued to rise. For 1935 the general index of production averaged 141.8 (1929=100) as against 128.7 in 1934. Unemployment showed a further decline and the returns of the Bank of Japan showed that the number of persons employed has since April, 1935, been 10 per cent greater than in 1929.

*Australia.*—"In Australia the situation showed a marked improvement in 1935, and unemployment fell from 18.8 per cent in November 1934 to 13.7 per cent. in November 1935. That is due largely to the influence of the steady rise in wool prices during the year and to a smaller rise in wheat and butter prices, particularly during the latter part of the year. Australia has for a number of years been pursuing an active works policy. In 1935-1936 the estimated expenditure on Commonwealth works and services and assistance to States was £A.5,600,000 as compared with an actual expenditure of £A.3,200,000 in 1934-1935, and in most of the States the loan expenditure shows an upward tendency. The opinion expressed in Queensland in the Governor's speech at the opening of Parliament last August that the public works program had been an important factor in bringing about an increase in the number of men fully employed is shared by many economists and statesmen in the Commonwealth.

*Canada.*—"In Canada unemployment also declined during 1935, and the average percentage of trade unionists unemployed was 15.4 as compared with 18.2 in 1934. The public works program was continued and expanded during the year. Most of the \$40 million appropriated in 1934 for this purpose were in fact spent in 1935 and in addition a further appropriation of \$18 million was made by the Supplementary Public Works Construction Act which received the Royal Assent on June 13, 1935. In December a new unemployment policy was agreed to by the Dominion and Provincial Governments providing for the appointment of a Dominion Commission on Employment and Relief, one

of the functions of which will be to co-ordinate public works and employment policies, for the taking of a census of the unemployed, for an increase in the Dominion grants for relief purposes, for schemes for the training of the young unemployed and for an appeal to business undertakings for co-operation in increasing employment.

*Belgium.*—"In the opinion of the Director "perhaps the most dramatic of all the attempts made to utilize monetary control to reduce unemployment is that carried out with so much success in Belgium." Tracing the steps taken by a Coalition government in pursuit of a policy of economic expansion, the Director states that the "combined effect of these various operations has been to produce an increase in wholesale prices, to restore the soundness of the banking position, to facilitate foreign trade and to reduce unemployment by about 30 per cent."

*France.*—"In France," he points out, that "the year 1935 was characterized by the determined opposition of the government to any tendency towards devaluation which took the form of a clear and strong deflationary policy." He showed how, under the authority of legislation, the government issued a series of "Decree Laws which embodied an organic system of deflation." This program included a uniform reduction in all State expenditures. Commenting on the effect of this policy the Director states in part: "The energetic and comprehensive action of the French Government represents a systematic attempt to meet the depression by a thorough going policy of deflation. Sufficient time has not yet elapsed to enable a final judgment of its success to be formed. All that can be said is that as yet there has been no general revival of industry or trade. Unemployment continued to increase during 1935. The index of building activity, continuing the steady downward movement which has been in progress since 1930, reached a figure approximately one-half of what it was in that year. Steel and textile production, while abnormally low, showed a slight improvement; but the output of coal, iron, and automobiles declined further."

Other countries dealt with in his survey included the Netherlands, Switzerland, Czechoslovakia and Poland.

### Conclusions on Unemployment

In summing up the general situation the Director stated that "a considerable measure of improvement has occurred in about three quarters of the world, this had been affected not by the old 'naturalistic' methods but rather by a series of resolute endeavours on

the part of the governments to set their national houses in order."

In accomplishing this, he points out that "they have acted energetically in order to revive internal activity by financing public enterprises, by reducing the burden of Government debt and the rate of interest, by subsidising various forms of industrial and agricultural activity, by encouraging housing and by spending lavishly on relief. That these measures have provided an effective stimulus to business revival in many countries can hardly be disputed, but the period over which they have been tested is too short to warrant a final judgment. While it seems plain that expansionist policies can afford a powerful antidote to depression, they are no doubt subject to limitations, which experience has not yet clearly defined. It may prove that in some cases they have been pushed too far and that excessive drafts have been made on public credit which will in the end weaken it by imposing a burden of debt disproportionate to the resources and taxable capacity of the community. In others it may be found that the injection of public money into circulation has been continued too long, and that when the normal rhythm of economic activity has been resumed, its continuance is injurious rather than beneficial. The whole expansionist technique is still comparatively novel, and further knowledge of its operation may well disclose that mistakes have been made. Though it can be safely affirmed that it has made a very important contribution to the struggle against the depression, to claim that it has succeeded in finally overcoming it would be a dangerous exaggeration. Reasons have been advanced for thinking that this partial recovery is less solid and complete than might appear at first sight. Not least among them is the failure of re-employment to keep abreast of the improvement in production and trade. Although there has been a fairly substantial reduction of unemployment it by no means corresponds to what might reasonably have been expected. In countries like Belgium, Germany, Great Britain, Sweden and the United States, where under the impulsion of an expansionist policy a marked upswing has taken place, the unemployed figure still remains abnormally and disproportionately high. This disturbing phenomenon cannot be conjured away and cannot be regarded as of negligible importance."

*Technological Unemployment.*—Discussing the influence of population increase and technological unemployment as factors in the situation, Mr. Butler proceeds:

"As was suggested in last year's Report, displacement of labour by technical improvements, so far from being arrested by a depression, is apt to proceed at a more rapid rate. Employers, obliged to look for every possible economy in order to reduce costs, naturally seek first of all to cut their labour costs by introducing labour-saving methods and machinery wherever it is possible. With the return of better business the time for replacing old plant comes. Every alert manager naturally installs the best and the most modern machinery he can find, which in almost every case means some reduction, large or small, of the labour force. Hence his production develops at a much brisker pace than the numbers on his pay-roll, and the national unemployment register remains swollen to an extent which in older days would have been impossible.

"This is not the place to enter deeply into the discussion of this thorny and perplexing problem; but its continued existence cannot be glossed over at a time when the hopes of reducing unemployment to normal proportions by the ordinary method of business revival are apparently being disappointed everywhere..."

Touching on experiments to restore hand labour, the Director refers to these as follows:

"In Belgium an interesting attempt was made to encourage hand-labour and to discourage the use of mechanical appliances on public works. After a full trial, however, the system was entirely abandoned as it was found too slow, too expensive and too laborious. In Holland the Government tried to substitute hand-threshing for mechanical threshing by offering a considerable bonus for hand-threshed wheat. Though the proportion of hand-threshed wheat rose immediately, the effect upon employment was not sufficient to warrant the continuation of the experiment. In Spain, Czechoslovakia, Holland, Italy and other countries legal restrictions have been placed on mechanical development, and similar action was taken under some of the codes in the United States. Such measures may have some temporary result; but technological unemployment cannot be combated by preserving antiquated methods by artificial means. The real problem is to ensure that the economies in wages effected by mechanical improvements do not reduce the volume of available consuming power. Where they are used to reduce prices, the benefit to the community as a whole is in compensation for the temporary loss of employment by some of its members. If they are used to increase the wages of the workers left in employment

to reward their increased productivity, a general benefit again results. But where, as in the United States before the depression, prices are maintained at a stable level, while profits increase much more rapidly than wages, a state of disequilibrium is set up, which is bound to have serious economic and social consequences."

*Birthrate.*—Referring to the downward trend of the birthrate in all industrial countries, the Director stated that while it was a cause of concern in many quarters yet "it would be exceedingly unwise to found upon it prophecies that unemployment will be replaced by a dearth of labour in one or two decades. Although the birth rate has been declining in many countries for a generation or more, none of them has been able to escape the problem of unemployment. The action of population movements is slow, and for the present they are not likely to exert much influence on the trend of employment."

Concluding his chapter on unemployment, Mr. Butler observes:

"In any case it cannot be said that overpopulation is the root cause of the unemployment problem. If the world's wealth were rationally exploited and distributed, there is no reason to suppose that all its inhabitants of working age could not be fully employed or that they could not enjoy a better standard of life than now obtains over large areas of all the five continents. The lessons of the present depression, of which some illustrations have been given, indicate sufficiently clearly in what direction the true solution lies. Better organisation of industry, a freer flow of trade and a more intelligent management and distribution of money would enable the bogey of unemployment to be mastered. Already considerable progress has been made along this road in particular countries; but, as has been regularly emphasised in these Reports national action is no longer adequate to solve the social-economic problem. It must be supplemented and co-ordinated by international measures. The wisest national planning or the utmost national foresight cannot hope to reap their full fruits in a world which is still internationally chaotic. National order is helpless in the face of international disorder. Any search for the cure of unemployment is bound ultimately to overstep national boundaries and to find itself confronted with the real economic problem of this century—how to evolve an international economy corresponding to the unescapable interdependence of nations which the genius of man has now created."

## Social and Industrial Policies

In his chapter on "Social and Industrial Policies" the Director reviews and summarizes the principal developments in the sphere of social insurance, hours of work, wages, organization of industry, and organization of agriculture.

*Social Insurance.*—In the field of social insurance, Mr. Butler traced the effects of the depression on systems of unemployed benefits. The depression years resulted in reductions in the numbers of insured persons owing to the inability of unemployed to maintain contributions, and in consequence receipts of social insurance funds, as well as the volume of state revenue declined. At the same time, the charges on sickness and invalidity funds increased, particularly in countries which had no system of unemployment insurance. In spite of all these adverse conditions, the Director reports there is no case in which compulsory insurance was abandoned.

During 1934, a period of recovery set in, and this movement was considerably accentuated in 1935 so that he could state:

"On the whole, whether the movement of legislation or the statistics of operation are considered, the situation of social insurance in 1935 is thus definitely more favourable than at any time since 1929. While in the depths of the depression, some of those who had devoted their lives to the introduction and administration of social insurance began to doubt whether the system would survive the gravest crisis which it had had to face. It may now be said with some confidence that, thanks to the strength of the social insurance principle and the depths to which its roots had already been pushed in every country which had adopted it, the storm has been weathered with remarkable success."

*Hours of Work.*—With reference to working hours, the Director's observation was that "in countries such as Italy and the United States where a week of forty hours or less was adopted, a substantial reduction of unemployment resulted. Nevertheless, as production increased, the strength of the motive for reducing hours might have been expected to be considerably diminished. It is true that in some countries and in some industries where large numbers of workers have been re-absorbed, the pressure for reducing hours has perhaps not been maintained at its previous level of intensity. In industries where wages have been drastically reduced, it is natural that the workers and their organizations should strive in the first instance to restore their standard of life before proceeding to demand improvement in their working conditions. As better times have returned, their first pre-

occupation has therefore been to increase earnings rather than leisure.

"None the less, the general belief that a further reduction of hours in industry is sooner or later inevitable, which found expression in the adoption of a general Convention at last year's Conference, does not seem to have been seriously shaken."

**Wages and Wage Policy.**—The Director noted that "there has been no very marked change during the year either in nominal wage rates or in real wage rates. In those countries—such as the United States, Great Britain, Australia and New Zealand—where some slight rise has occurred in nominal wage rates, this has been offset or more than offset by the rise in the cost of living. Conversely, in those countries—such as the Netherlands and Poland—where wage rates have fallen somewhat, the decline in the cost of living has more or less balanced this movement, leaving real wage rates little changed. In Belgium the index number of nominal wage rates remained approximately stable during the year, but the rise in the cost of living brought about a reduction in real wage rates.

"At the same time," he added, "it must be remembered that wage rates, whether 'real' or 'nominal,' do not give a true indication of the income of the workers. Hourly rates of wages may increase, or the cost of living diminish, from which it might be concluded that the economic position of the workers had substantially improved. This is only the case, however, in so far as they have been able to obtain constant and regular employment."

**State Organization of Industry.**—In taking up the subject of the organization of industry by the State or under its auspices, the Director referring to his report of the previous year, stated:

"The question was asked whether it was possible to find a 'half-way house' between complete freedom and complete regimentation, between a completely State-planned and directed economy and the old system of unregulated competition. The need for some measure of discipline and organization to prevent cut-throat competition had led to a series of experiments in the direction of the regulation of prices and production in order to check the downward spiral of deflation. It was pointed out that one of the characteristic features of most of these experiments was the introduction of a social objective. Emphasis was laid by various Governments, notably those of Czechoslovakia, Italy and the United States, upon the necessity of securing social justice by rendering the industrial structure more stable and more rational.

"It would be not unreasonable to expect that with the improvement of business a

revolt should set in against limitations imposed by the State. To some extent this expectation has been justified by recent events. Nevertheless, it would be very imprudent to assert that the tendency in the direction of planning or of a 'directed economy' is generally giving away to a return to liberal practices." . . . . .

Continuing, the Director sketched the reactions to this development in various countries. He found the most noticeable re-action against the regulation of industry to be in the abolition of the codes of fair competition in the United States.

### The I. L. O. in 1935

In a review of the work of the International Labour Organization in 1935, the Director considered that one of the events of historical importance, featuring the year was the convening of the American Regional Conference at Santiago, and he gave an outline of its proceedings and achievements.

"As proof of the vitality of the Organization" he pointed to the 50 ratifications by various countries during the year.

"Of the total of 50 ratifications registered during the year, 23 came from the American continent, 19 from Europe, 5 from Australia, 2 from Asia and 1 from South Africa. This represents a better distribution than in 1934, when the paucity of European ratifications was conspicuous. The most important contribution was that of Chile, which appropriately ratified 14 Conventions." He noted that 6 ratifications have been registered by Cuba and considered it not too sanguine "to expect that as a result of the Santiago Conference still further progress may be achieved in Latin America, where such an impetus has been given to social legislation in recent years."

He regarded the ratification by Canada of the Conventions on Hours of Work, Weekly Rest, Minimum Wage Fixing Machinery as being of special interest "as raising a constitutional question of far-reaching importance."

### Task of Reconstruction

In a concluding chapter in which he delineated the major objective of the International Labour Organization, viz.—"the quest of social justice"—the Director emphasized the dangers confronting civilization. All that is involved in the alternatives he portrays in his closing paragraph in these words: "The forces which are driving the world towards closer integration must prevail, unless the whole fabric of our civilization is to collapse and another Dark Age is to ensue. As has already been shown, the political tensions which are now becoming intolerable are to

a large extent economic in their origin. They are the outward and visible signs of the unworkableness of the present system. They indicate clearly enough that an economic world-war, in which every man's hand is against his neighbour, is leading to inevitable disaster. To escape the fate which now threatens is not impossible, but it can only be done on one condition—that there is a general will to escape. If nations wish to work together to find a way out, a way out will be found. If they prefer to allow political hatreds to guide economic policy, if they elevate the ideals of acquisitiveness or possessiveness above that of social justice, then there is no way out. The real decision which now confronts the world is one of values. There can be no social justice without peace. The moral and military ideals are totally incompatible. Higher ethical and cultural standards can only be developed by social and economic progress, to which war is an insuperable bar. Under modern conditions the belief that prosperity can be promoted by conquest has been shown to be an illusion. Victory can only be had by undermining the moral, social and economic foundations of our civilization. The world is still struggling to avoid the

abyss to the brink of which it was brought by the last great war. A repetition would engulf it irremediably. But, on the other hand, peace is not possible without social justice between nations and between individuals. Those who believe it to be unattainable under the present constitution of society or under the existing international order are liable to become rebels against them. Only through an equitable organization of the world's economic life can peace and justice and freedom be made secure. For that the sacrifice of narrower interests for the sake of wider objectives will be necessary, for the principle of equality is inconsistent with privileges, whether exercised by nations or private interests, at the expense of the general good of the world community. Unless there is a consciousness of moral solidarity among nations corresponding to the material interdependence by which they are now so closely knit together, the task of reconstruction is impossible. But if they are inspired by the firm resolve to banish warfare in all its forms, whether political, military or economic, a far better and juster civilization than any it has known is well within the compass of humanity."

### Minimum Wages in Ontario Hotels and Restaurants

The ONTARIO GAZETTE, of May 23rd, 1936, contains an announcement of a new order issued by the provincial Minimum Wage Board with reference to Hotels, Restaurants and Refreshment Rooms. The new order to become effective on and after May 23rd, 1936, replaces previous Orders No. 27 and No. 46. Referring particularly to female employees, the new order also includes male employees, when replacing female employees.

Minimum wage rates and Board allowances remain the same as set forth in the previous order, viz: City of Toronto, 26 cents per hour; Ottawa, Hamilton, London, Windsor, 25 cents per hour; cities and towns between 10,000 and 50,000 population, 22 cents per hour; towns between 4,000 and 10,000 population, 20 cents per hour.

Definitions of "hotel," "restaurant," "refreshment room," "unincorporated urban community," "application" and "population," are given. The provision regarding "waiting time" also remains unchanged, providing that an employee required to wait on the premises shall be paid for all time thus spent. The order further provides that employers keep records of employees' names, addresses, dates of beginning and termination of employment

of all employees, besides accurate records of wages paid and actual hours of employment.

The economic betterment of Canada was maintained at a relatively higher level in recent months than that of the United States, according to a bulletin issued by the Dominion Bureau of Statistics. Industrial production in the latter showed marked advance from September to November after having been well maintained during the first eight months of 1935. After receding from December to March, a rebound was recorded in April.

The value of manufactured products in Ontario in 1934 which totalled \$1,255,326,000 represents an increase of almost 25 per cent as compared with the previous year. Reports were received from 10,322 manufacturing establishments with a capital investment in fixed and current assets of \$2,063,721,000. The number of persons employed totalled 259,621 and the salaries and wages paid \$270,834,000.

According to information contained in a recent news report the number of registered jobless in Germany as at the end of May had dropped to 1,491,201. This is reported to be the lowest figure for May since 1929.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF MAY, 1936

### Reports of the Superintendents of the Employment Service

The employment situation at the end of May, 1936, was reported by the superintendents of the Employment Service of Canada to be as follows:—

Farmers in the Maritime Provinces were busy seeding and planting, but prospects for a good apple crop in the Annapolis Valley received a severe blow, as it was estimated frost had spoiled about 20 per cent of the blossoms. Cutting of pulpwood continued, with vacancies for cutters being received and filled. There was a plentiful supply of shad, haddock and mackerel; a scarcity of lobsters, however, was reported from several points, with prices rising from ten and eleven cents to fifteen and twenty cents per pound. Coal mines in the New Glasgow area, except for one which recorded a week's idleness, operated from two to five days per week, while those in Cape Breton and vicinity, where one also was idle, worked four, four and a half, and five days per week. Manufacturers found conditions fair but no added volume apparent. Seasonal products, such as ice-cream and mineral waters, were busier than usual. Sawmills, foundries, wood working plants and the iron and steel group were likewise well employed. Little new building construction was in evidence, but highway paving was rapidly proceeding and afforded employment for a number of men. Others found work on railroads or on waterfronts. Transportation by steam and rail was active, and trade was fair. A number of requests were received for housemaids and charworkers and corresponding placements were made.

Cold weather somewhat delayed farm work in the Province of Quebec. Logging showed an increase at Chicoutimi but a decline in Hull, river driving being the chief activity in this industry at present. Manufacturing centres reported as follows: Chicoutimi and Hull—good; Montreal—tobacco and cigars showed a little improvement, but shoe factories were quiet, and metallurgy only fairly busy; Quebec City—clothing and leather active; Sherbrooke—conditions somewhat better; Three Rivers—all manufactures running normally but with reduced production. There was marked improvement noted in building construction, for many orders had been received in various cities for bricklayers, carpenters, masons and labourers. A number of men had also found work on highway construction. Transportation was active and trade was seasonally better than at this time

last year. Numerous requests were received in the Women's Division for domestics, especially those suitable for positions in hotels and restaurants, while a shortage of registered applicants appeared in some districts.

A fairly steady demand for farm help continued in the Province of Ontario, but with few calls for married couples. Tobacco planting had commenced in Norfolk County; however, little extra help was required there, as yet. Requests for skilled sawmill hands were received, and engineers, planermen, cooks and river drivers were placed in the logging industry. Unusual activity in mining was noticeable and many skilled workers found employment, although there was little call for common labourers and muckers. While the industrial improvement for the past few months in manufacturing was being maintained and the general outlook continued favourable, slackening in production and a curtailment of staff had occurred in some plants, but improvement made in others which were operating at high capacity. This was chiefly due to seasonal conditions, as in the auto industry, where a scarcity of experienced men for body workers and panel beaters was noted. Iron, steel and nickel, also abrasive plants, showed consistent gains, and canning factories at St. Catharines were particularly busy. Erection of private dwellings was improving, due, no doubt, to the Dominion Housing Act. Numerous skilled and semi-skilled workers were employed, but still there remained a good supply of building workers available. A number of men were placed as section hands on Western lines of the railways, and others found employment in highway construction and maintenance, or in long-shore work; all of which contributed to a substantial reduction in relief lists. Trade was good, augmented to a certain extent by tourist traffic. Many vacancies continued to be received by the Women's Section for household and hotel help, city positions being more easily filled, as many girls objected to service in the country. Experienced domestic help was, however, still at a premium.

Placements in farming in the Prairie Provinces showed a decline. Wheat seeding in Manitoba was completed and crop conditions there were fairly good, but in Saskatchewan and Alberta, continued dry weather was proving a menace. Logging was fairly active, with a few requests for mill hands being received. Mining, except in the vicinity

of Winnipeg, was quiet. Manufacturing showed no change. Building construction was somewhat better; nevertheless a number of skilled men were still idle. Highway construction likewise was being carried on. Trade was better. A scarcity of capable maids prevailed, and several very desirable openings for experienced housekeepers were unfilled in the Women's Division.

Only a few calls were received for farm hands in British Columbia and little extra help was hired for orchard work. Logging was active, the recent strike having been settled, and the majority of crews back at work. All sawmills were also busy and well supplied with orders. Mining and manufacturing showed little change. Seasonal employment was absorbing quite a number of men

on fishery patrol and other work connected with the Fisheries Department. Improvement was noted in general construction work, mainly Federal Government contracts, although the building trades also were active in repair work, and many men had been taken from the National Defence camps for work in railway ballasting. Drydocks and shipyards at Prince Rupert were quiet, but waterfront work was plentiful there and at Vancouver and Victoria. A scarcity of experienced household help was shown in the Women's Departments, with a slight increase noted in requests for chambermaids and waitresses in summer hotels. Wages for domestic service were somewhat higher, due to a shortage of suitable applicants.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN APRIL, 1936

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on May 1 was 9,544, the employees on their payrolls numbering 939,409 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for May was 1,810, having an aggregate membership of 174,429 persons, 15.1 per cent of

whom were without employment on May 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) The Employment Situation at the Beginning of May, 1936, as Reported by the Employers

Data tabulated by the Dominion Bureau of Statistics from 9,544 firms showed a pronounced increase in the employment they afforded at the beginning of May, their staffs aggregating 939,409 persons, or 20,426 more than in the preceding month. Reflecting this advance, the crude index, based on the 1926 average as 100, rose from 97.4 at April 1 to 99.5 at the date under review, when it was higher than at May 1 in any other year since 1931. While the industrial expansion indicated at the latest date provided work for a very considerable number of workers, it was on a scale rather smaller than the average between April 1 and May 1 in the years, 1921-1935, so that the index, when corrected for seasonal

influences, declined from 103.3 in the preceding month to 102.4 at the beginning of May.

The unadjusted indexes at May 1 in the years for which statistics are available are as follows:—1936, 99.5; 1935, 99.2; 1934, 92.0; 1933, 77.6; 1932, 87.5; 1931, 102.2; 1930, 111.4; 1929, 116.2; 1928, 106.8; 1927, 101.8; 1926, 95.4; 1925, 91.9; 1924, 92.9; 1923, 92.5; 1922, 84.3 and 1921, 85.1.

Manufacturing reported improvement at the date under review, mainly in food, lumber, pulp and paper, clay, glass and stone and iron and steel divisions. Transportation, construction and maintenance, services and trade also recorded considerably heightened activity. The gain in each of these groups except

construction exceeded the average increase indicated at the beginning of May in the last fifteen years. On the other hand, large numbers of workers were released from logging camps, coal-mines and tobacco and non-ferrous metal factories, the losses being mainly of a seasonal character.

A brief review of the situation at May 1, 1935, shows that the 9,203 firms then co-operating had employed 892,506 persons, as compared with 875,149 in the preceding month. Manufacturing, transportation, construction, services and trade had shown improvement, but the increases were not so large as those indicated at the beginning of May in the present year.

under review, was six points above that for the beginning of May in 1935. Six hundred and seventy firms reported 73,950 employees, or 1,232 more than in their last return. Manufacturing (especially in fish-preserving and lumber factories), logging and construction showed gains; those in the last-named, which were pronounced, occurred largely in highway work. On the other hand, coal-mining, transportation and railway construction released many workers, the declines being mainly seasonal in character. The 656 employers furnishing statistics for the same date last year had an aggregate staff of 69,417 persons, being greater by 1,217 than at April 1, 1935.

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

**NOTE.**—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

### Employment by Economic Areas

Heightened activity was reported in four of the five economic areas, while in the fifth—Ontario—no general change occurred. The situation in each of the economic areas was better than at May 1, 1935, being also more favourable than at the same date in 1934, 1933 or 1932.

**Maritime Provinces.**—Employment in the Maritime Provinces advanced, although the increase was rather smaller than the average recorded from April 1 to May 1 in the years since 1920. The index, at 103.4 at the date

**Quebec.**—Conditions improved in Quebec, according to 2,253 employers of 266,340 persons, as against 252,609 in the preceding month. This increase of 13,731 was only once exceeded at May 1 in the last fifteen years, viz., by that recorded in 1929. Notable gains were made in manufacturing, particularly of food, pulp and paper, lumber and clay, glass and stone products. Transportation, construction, metallic ore mining, services and trade also afforded more employment, the additions to staffs in the two groups first-named being large. On the other hand, there were slight declines in logging and in non-metallic mineral

mining. Activity was brisker than at the beginning of May in 1935, when 2,193 firms had reported 246,342 employees, or 10,326 more than in the preceding month.

*Ontario.*—No general change was noted in Ontario; improvement in manufacturing, mining, transportation, construction, services and trade was offset by a decline in logging. In the group of factory employment, there were gains in the food, lumber, pulp and paper, clay, glass and stone, iron and steel and other divisions, while textile, tobacco and non-ferrous metal works were slacker. The working forces of the 4,219 co-operating firms aggregated 397,535 employees, compared with 397,340 at April 1, a difference too slight to be recorded in the index. Employment at May 1, 1935, had shown a moderate increase, but the index then was slightly lower than at the latest date, when it was 103.4. The 4,052 establishments from which information was tabulated for the same date of last year had enlarged their staffs by 3,865 persons, to 388,701 at May 1.

*Prairie Provinces.*—Manufacturing, construction and trade reported heightened activity,

the gains in railway construction being most pronounced; in the group of factory employment, a considerable part of the advance took place in the lumber, food, clay, glass and stone, textile and mineral product divisions. On the other hand, coal-mining and logging were seasonally slacker. Statements were compiled from 1,400 employers in the Prairie Provinces, whose staffs rose from 114,753 persons at April 1 to 117,444 at the beginning of May. This improvement was much greater than that recorded at May 1, 1935, but was below the average increase indicated at the same date in the years since 1920. The index at the date under review, standing at 92.7, was nearly five points higher than at the beginning of May of last year; statistics had then been received from 1,339 firms with 110,815 employees, or 1,323 more than at April 1, 1935.

*British Columbia.*—The increase in British Columbia greatly exceeded that noted at the beginning of May in 1935, when the index was over six points lower than that of 99.0 recorded at May 1 of the present year. An aggregate payroll of 84,140 persons was

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS  
(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
May 1, 1921.....	85.1	98.2	77.0	89.0	86.0	79.9

Relative Weight of Employment by Economic Areas as at May 1, 1936.....	100.0	7.9	28.4	42.3	12.5	8.9

Note.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

employed by the 1,002 firms furnishing data, who had 81,563 employees in the preceding month. Logging, mining, transportation, building and railway construction, trade and manufacturing showed improvement over April 1, that in the last-named being most marked. Within the manufacturing division, the greatest gains took place in lumber, food and iron and steel factories. Highway construction, however, released a considerable number of workers. For May 1, 1935, 964 employers had reported 77,231 workers, as compared with 76,605 in the preceding month.

### Employment by Cities

Improvement was shown in seven of the eight cities for which separate tabulations are made; firms in Quebec City, Montreal, Toronto, Ottawa, Hamilton, Windsor and Vancouver reported heightened activity, while the tendency in Winnipeg was downward. The largest gains were in Montreal. Except in Quebec City, the situation in each of these centres was rather better than at May 1, 1935.

*Montreal.*—Transportation recorded a substantial seasonal advance in Montreal, and

manufacturing, services, trade and construction were also busier; within the manufacturing group, expansion took place in leather, food, chemical, clay, glass and stone and other factories. The 1,312 co-operating employers reported 139,007 persons on their payrolls, compared with 132,281 at April 1. This increase greatly exceeded the average gain at the beginning of May in the years for which statistics are available. The level of employment was higher than at May 1, 1935, when the general gain had been on a very much smaller scale.

*Quebec.*—Statements were tabulated from 168 firms with 12,745 employees, as against 12,150 at April 1. Most of the improvement took place in shipping and trade. The gain involved fewer workers than that recorded at the same date in 1935, when the index was fractionally higher.

*Toronto.*—Transportation, building and road construction and maintenance, services, trade and manufacturing reported increases in personnel in Toronto. The advance in manufacturing, which was most marked, was of a general character, but the largest additions to staffs were in the iron and steel group.

Relative Weight of Employment by Ci- ties as at May 1, 1936	14.8	1.4	13.1	1.5	3.4	2.0	4.2	3.5

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

According to data furnished by 1,435 employers in Toronto, their payrolls aggregated 122,705 persons, as compared with 120,825 at April 1. This increase was smaller than that indicated at May 1 of last year, but it exceeded the average gain at the same date in the fourteen previous years for which statistics for Toronto are available. Employment was in greater volume than at the beginning of May last year, when the index stood at 96.7, as compared with 100.2 at the latest date.

*Ottawa.*—Construction, transportation, manufacturing and trade registered moderate improvement in Ottawa; the general increase in this city was larger than that noted at the beginning of May, 1935, when the index stood at 101.3, compared with 107.7 at the date under review. Statistics were tabulated from 179 firms employing 13,996 persons, compared with 13,384 at April 1.

*Hamilton.*—A combined working force of 31,531 was reported by the 280 co-operating establishments, who had 31,105 employees at April 1. Manufacturing was brisker, and construction and transportation also showed

greater activity. Employment was at a higher level than in the same month of 1935, when a larger advance had been indicated.

*Windsor.*—Further improvement was noted in Windsor, most of the gain occurring in factory and construction work. Returns for May 1 were tabulated from 170 employers with 18,498 workers, compared with 17,827 in the preceding month. Additions to their payrolls had been recorded by the establishments reporting at May 1, 1935, but employment was then at a rather lower level, the index standing at 133.5, as compared with 136.1 at the date under review.

*Winnipeg.*—Manufacturing and trade showed heightened activity, but there was a considerable falling-off in construction in Winnipeg. The 474 co-operating employers had 37,542 persons on their payrolls, compared with 37,869 at April 1. Employment was in rather greater volume than at the same date of last year, although a large gain had then been noted.

*Vancouver.*—The number of persons employed in manufacturing increased in Van-

Relative Weight of Employment by Industries as at May 1, 1936.....	100.0	55.2	2.7	6.2	2.2	10.5	9.9	2.9	10.4

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

couver, the food and iron and steel groups in particular showing improvement; trade was also brisker, but construction afforded less employment. According to data received from 421 firms, they had an aggregate working force of 32,613 employees, compared with 32,053 at April 1. The index was higher than at the beginning of May of a year ago, in spite of the fact that a decidedly larger advance had then been reported.

Index numbers by cities are given in Table 2.

### Employment by Manufacturing Industries

The number of persons employed in manufacturing at the beginning of May showed a further increase, the fourth reported since the opening of the year. Returns were tabulated from 5,652 manufacturers having 518,327 employees, compared with 510,003 at April 1, 1936. The general improvement approximated the average indicated in the years since 1920. The unadjusted index rose from

101.1 in the preceding month to 102.7 at May 1, 1936; after adjustment for seasonal variation, the index at the latest date was 102.2, or practically the same as at April 1. The crude index at May 1 in preceding years was as follows:—1935, 95.6; 1934, 90.2; 1933, 76.8; 1932, 85.8; 1931, 100.7; 1930, 112.4; 1929, 119.8; 1928, 109.0; 1927, 103.9; 1926, 98.8; 1925, 93.7; 1924, 94.9; 1923, 97.9; 1922, 85.5 and 1921, 86.8.

The most marked advances at May 1, 1936, took place in lumber, iron and steel, animal and vegetable food, pulp and paper and clay, glass and stone factories, but leather, chemical, electric light and power, electrical apparatus, mineral product and miscellaneous manufacturing plants also reported important gains. On the other hand, tobacco and non-ferrous metal works showed curtailment, and there was a slowing-up in the textile group as a whole.

For May 1, 1935, reports had been compiled from 5,466 manufacturing establishments,

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	<sup>1</sup> Relative Weight	May 1, 1936	April 1, 1936	May 1, 1935	May 1, 1934	May 1, 1933	May 1, 1932	May 1, 1931

<sup>1</sup> The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

employing 479,503 persons, an increase of 8,483 over their April 1 payrolls. The most marked gains had then occurred in the lumber, metal, animal food and clay, glass and stone divisions.

*Animal Products, Edible.*—Large increases in employment were noted in fish and meat-packing plants and dairies; the improvement was not so extensive as that reported at May 1, 1935, when the index was, however, 4.8 points lower. Statements were tabulated from 305 firms in this group, employing 22,329 workers, or 1,230 more than at the beginning of April. There was expansion in all provinces, but the largest gains were in the Maritimes and British Columbia.

*Fur and Fur Products.*—Employment in the fur division gained, according to the 60 co-operating manufacturers, who had 1,911 workers, compared with 1,849 at April 1. Activity was greater than in the corresponding period of last year, when a larger increase had been indicated.

*Leather and Products.*—Employment in boot and shoe and other leather factories showed moderate improvement according to 295 manufacturers of leather products with 23,008 employees, as compared with 22,769 in the preceding month. The gain, which occurred mainly in Quebec and Ontario, was not so large as that noted at May 1, 1935, when the index was several points lower.

*Lumber and Products.*—Seasonal activity caused a pronounced advance in this group, particularly in sawmills. Data were received from 814 employers of 38,527 persons, as against 35,575 in the preceding month. There were increases in all provinces. Rather smaller additions to staffs had been registered at May 1, 1935, and the index then was below its level at the beginning of May of the present year.

*Plant Products, Edible.*—There was an increase in personnel in vegetable food factories, chiefly in sugar and syrup and fruit and vegetable canneries. The general improvement resulted in work for many more persons than that noted at May 1, 1935, when the index stood at 92.6, compared with 102.2 at the beginning of May this year. Statements were compiled from 436 employers, whose payrolls aggregated 29,479, as compared with 27,959 at April 1. The gains took place chiefly in Quebec, Ontario and British Columbia.

*Pulp and Paper Products.*—Further improvement was noted in these industries, in which employment was in greater volume than at the same date in 1935, when a much smaller advance had been reported. Increases took place at May 1, 1936, in pulp and paper and paper product mills, while printing and publishing

houses generally showed little change. The working forces of the 595 co-operating establishments aggregated 60,313 employees, as against 59,294 in their last report. The largest gain was in Quebec, although the tendency was generally favourable.

*Rubber Products.*—No general change occurred in rubber factories at May 1, 1936, when the index was rather higher than at the same date last year. Returns were tabulated from 52 manufacturers employing 12,238 workers, or almost the same number as at the commencement of April.

*Textile Products.*—Practically no change, on the whole, took place in this group at the beginning of May, according to statistics from 1,002 manufacturers having 101,475 persons on their payrolls, as compared with 101,633 at April 1. Cotton, woollen and garment and personal furnishing factories were slacker, while there were slight increases in silk and other textile plants. The situation at the same date of last year was unchanged from the preceding month; the May 1, 1935, index stood at 111.9, compared with 118.6 at the date under review.

*Tobacco, Distilled and Malt Liquors.*—Data were received from 176 plants in this group employing 16,308 persons, or 1,059 fewer than in the preceding month. This decrease, which was smaller than that recorded at May 1 of last year, took place chiefly in tobacco manufacturing in Quebec and Ontario. Activity was higher than at the same date in 1935.

*Chemicals and Allied Products.*—Employment in chemical and allied products showed an increase; this occurred mainly in the Maritime Provinces, Quebec and Ontario. Information was compiled from 201 manufacturers, whose staffs included 11,506 workers, as against 11,160 in April. The gain was larger than that of May 1 a year ago, when the index was between nine and ten points lower.

*Clay, Glass and Stone Products.*—Building material factories in all provinces indicated seasonal improvement, but the general gain resulted in the employment of a rather smaller number of additional employees than that reported at the beginning of May last year, however, the index was then over ten points lower. The 199 co-operating firms had 8,816 employees, as against 7,916 in the preceding month.

*Electric Light and Power.*—Improvement was recorded at May 1 in electric current plants, in which employment was rather brisker than in the spring of 1935. Statements were received from 99 companies employing 14,338 workers, an increase of 136 over their April 1 forces.

*Electrical Apparatus.*—Employment, on the whole, advanced in electrical appliance works, according to data furnished by 120 establishments, which had 12,972 employees. No general change had been registered at May 1, 1935, when the index was many points lower.

*Iron and Steel Products.*—The automobile, rolling mill, machinery, iron and steel fabrication, sheet metal, foundry and machine shop and some other groups reported moderately heightened activity at May 1, employment in the iron and steel group as a whole showing its fourth consecutive increase since the beginning of the year. Returns were tabulated from 843 manufacturers with 124,204 operatives, as compared with 122,915 in the preceding month. Larger gains had been indicated at the beginning of May of last year, but employment was then in lesser volume. The movement was upward in Ontario and British Columbia, but elsewhere there were declines.

*Non-Ferrous Metal Products.*—Non-ferrous metal products showed decreased employment, according to data from 167 firms with a working force of 20,197 persons, or 697 fewer than at April 1. Most of the reduction took place in smelters and refineries. Additions to staffs had been recorded in this group in the same month in 1935, but the index number was then much lower.

*Mineral Products.*—Improvement was indicated in the mineral products division; the increase was of much the same size as that which occurred at May 1 of a year ago, when the index number was a few points lower than at the date under review. Reports were received from 139 manufacturers, whose payrolls included 13,509 persons, as compared with 13,273 in the preceding month. There were general but moderate advances, that in the Prairie Provinces being greatest.

### Logging

Seasonal losses that exceeded the average for May 1 in the last fifteen years were recorded in logging; increases in the Maritime Provinces and British Columbia were more than offset by declines in the other provinces. The 309 co-operating firms employed 25,033 men, or 3,997 fewer than at April 1. The index, at 88.6, was lower than at the beginning of May in 1935, but was higher than at May 1 in most other years of the record.

### Mining

*Coal.*—Employment in coal-mining showed a seasonal contraction, which was smaller than that noted in the same month of last year. The index then was slightly lower than at May 1, 1936. Data were received from 102 operators with 22,768 employees, as compared

with 23,975 in the preceding month. The decline took place mainly in the coal-fields of the Maritime Provinces and Alberta.

*Metallic Ores.*—There was a further increase in metallic ore mines, chiefly in Quebec, Ontario and British Columbia. An aggregate working force of 29,328 persons was employed by the 171 co-operating firms, who had 28,616 workers in their last report. A smaller advance had been indicated at the beginning of May a year ago, but activity then was not so great as at the date under review, when it reached the highest level yet recorded in the years since 1920.

*Non-metallic Minerals (Other than Coal).*—Employment in this group showed a seasonal gain; 77 employers enlarged their payrolls by 112 workers to 6,350 at the beginning of May. Quarries and other divisions reported heightened activity. The index was higher than at May 1, 1935, when considerable improvement had taken place.

### Communications

A minor increase was noted in communications, in which the level of employment was slightly higher than at the corresponding date of last year. The co-operating branches and companies reported an aggregate working force of 20,762 persons, or 189 more than at the beginning of April.

### Transportation

*Street Railways and Cartage.*—Improvement was shown in local transportation at May 1, when the 227 firms from whom information was received, reported 25,787 employees, or 390 more than in the preceding month. The index was several points higher than at the same date in 1935, when a similar gain had been noted. Quebec and Ontario registered most of the advance recorded at May 1, 1936, but the tendency was generally favourable except in the Prairie Provinces.

*Steam Railways.*—Steam railway operation afforded less employment in the Maritime Provinces, while in Quebec heightened activity was shown. Statements were received from 100 employers in this division, whose payrolls increased from 57,412 persons at April 1 to 57,464 at the beginning of May. A larger gain had been noted at May 1, 1935, but the index then was slightly lower.

*Shipping and Stevedoring.*—A combined staff of 16,292 men, as compared with 11,579 in the preceding month, was reported by the 110 firms furnishing statistics in the water transportation group. The improvement exceeded that noted at the same date last year; the index then, however, was fractionally higher. Seasonal reductions in the Maritime

Provinces were more than offset by increases in Quebec, while the tendency in Ontario and British Columbia was also upward.

### Construction and Maintenance

*Building.*—Employment in building construction showed further expansion; the industry was rather more active than at May 1, 1935. The working forces of the 669 co-operating contractors aggregated 22,470 persons, as against 21,092 at the beginning of April. The trend was favourable in all provinces, but the largest gains occurred in Quebec.

*Highway.*—Work on roads and highways increased at the beginning of May; 4,665 men were taken on by the 333 employers making returns, who had 45,913 workers at May 1. There were gains in the Maritime and Prairie Provinces and Quebec, while in Ontario and British Columbia curtailment was reported. A smaller advance had been recorded at the same date last year, but employment on highways was then in greater volume than in the spring of the present year.

*Railway.*—Thirty-two companies and divisional superintendents in this group employed 24,777 workers, as against 21,837 in their last report. The Prairie Provinces recorded most of the increase; moderate improvement took place in Quebec, Ontario and British Columbia, but there were seasonal reductions in the Maritime Provinces. Expansion involving a very much smaller number of workers was

noted at the beginning of May a year ago; the index number then was some four points lower than at the date under review.

### Services

The service group showed considerably heightened activity, according to statements from 458 establishments employing 26,062 persons, as against 25,609 in their last report. Gains were made in laundries and dry-cleaning plants and in hotels and restaurants. Employment was brisker than at May 1 of 1935, or of any other year since 1931.

### Trade

Continued additions to personnel were shown in wholesale and retail trade; 1,219 trading establishments enlarged their forces by 1,702 persons to 98,076 at the date under review. The increase in the group as a whole greatly exceeded the average for May 1 in the years, 1921-1935. The index was higher than at the beginning of May in any of the last four years.

### Tables

The accompanying tables give index numbers of employment by economic areas, leading cities and industries. The column headed "relative weight," shows the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at May 1, 1936.

## (2) Unemployment in Trades Unions at the Close of April, 1936

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

There was a further slight decline in the volume of work afforded local trade union members at the close of April as was manifest by the returns tabulated from 1,810 labour organizations with a total of 174,429 members. Of these, 26,312, or a percentage of 15.1, were unemployed, in contrast with 14.5 per cent in March. Activity tended more favourably, however, than in April of last year when 17.0 per cent of idleness was recorded. The changes in the various provinces from March were very

slight, Quebec unions showing a drop in work available of about 2 per cent and New Brunswick recessions of lesser proportions. In Nova Scotia, Ontario and Alberta fractional adverse changes only occurred. The situation in British Columbia, on the contrary, showed some improvement, and in Saskatchewan and Manitoba also, conditions were slightly better. Employment for British Columbia and New Brunswick members was maintained in considerably greater volume during the month reviewed than in April of last year, the building and construction trades, and the fishing industry in the former province, contributing in a large measure to the gain, while in the latter, the expansion was chiefly located in the pulp and paper industry. Ontario, Manitoba and Alberta unions also showed advancement, though on a smaller scale. Quietness in the coal mines of Nova Scotia was the determining factor in the less favourable situation indicated by that province from April a year ago. Little variation in the employment level, however, was noted in Quebec and Saskatchewan during April from the corresponding month last year,

though the tendency was toward lessened employment.

A separate compilation is made each month of unemployment among local trade unions in the largest city in each province, with the exception of Prince Edward Island. Of these, Halifax unions registered noteworthy gains in available work from March and in Regina improvement of somewhat lesser degree was shown. In Vancouver and Winnipeg the trend of employment was also upward, though the changes from March were less than one per cent. On the other hand, moderate curtailment in activity was apparent among St.

the close of April projected upward from the previous month, a continuation of the movement shown during March and denoting an increasing volume of unemployment. In this April trend the curve followed a course parallel to that of the corresponding month last year, though activity as represented by the chart at the close of the month was in more pronounced volume than in April a year ago.

The manufacturing industries, with 506 organizations making returns for April, combining a membership of 54,163 persons, showed that 6,187, or a percentage of 11.4, were idle at the end of the month, compared with per-

#### PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

John and Toronto unions. In Edmonton, recessions of minor importance occurred and employment for Montreal members eased off very slightly. Compared with the situation for April, 1935, Vancouver and Toronto unions indicated a much better volume of activity during the month reviewed and in Regina and Halifax the improvement registered was fairly noteworthy. Winnipeg members also showed a more favourable employment movement, though the variation from April last year was rather small. Somewhat quieted conditions, however, prevailed for Saint John members, and in Montreal and Edmonton losses in activity on a small scale were recorded.

The chart which appears with this article shows the trend of unemployment by months from January, 1930, to date. The curve at

centages of 12.1 in March and 13.5 in April, 1935. Fur workers, whose membership was rather small and, hence, did not materially affect the situation in the manufacturing industries as a whole, showed a large percentage increase in employment over March. A general betterment of conditions was reflected by brewery, wood, and iron and steel workers, general labourers, bakers and confectioners pulp and paper makers and jewellery workers, but the changes were not of particular importance in any one group of trades. On the other hand, hat, cap and glove workers, suffered substantial percentage losses in employment, but like fur workers their membership included a small proportion of the total represented in the manufacturing industries, Glass workers also, showed a noteworthy drop

in activity from March, and among cigar and tobacco workers, metal polishers, textile and carpet, leather and garment workers, and printing tradesmen activity was somewhat retarded. In making a comparison with the returns for April last year general labourers, pulp and paper makers, and brewery workers were afforded a considerably better volume of work during the month reviewed and the situation for bakers and confectioners, iron and steel, wood, textile and carpet, garment and glass workers showed more moderate improvement. Increased slackness on a rather substantial scale from April last year was evident among hat, cap and glove, fur and jewellery workers, and metal polishers, while minor contractions were registered by leather workers, printing tradesmen, and cigar and tobacco workers.

Restricted activity in the coal mines was indicated during April, both when compared with the previous month and April a year ago, unemployment standing at 16.6 per cent in contrast with 13.9 per cent at the end of March and 14.9 per cent in April, 1935. The April percentage was based on the reports compiled from 53 unions of these workers with 15,269 members, 2,528 of whom were idle on the last day of the month. Nova Scotia miners recorded a slight drop in work afforded from March, though the curtailment apparent from April, 1935, was somewhat more pronounced. Unemployment in the Alberta mines showed an increase of over 4 per cent from March, but the change from April last year, while adverse, was small. In British Columbia a better situation obtained during April than in either the previous month or April last year, the improvement in the latter comparison being quite substantial. A number of unions continued to show a noteworthy proportion of their working membership on short time.

The level of employment in the building and construction trades remained much the same during April as in the preceding month according to the reports tabulated from 197 associations involving a membership of 20,508 persons. Of these, 91,191 were out of work on the last day of the month, a percentage of 44.8, as compared with 44.3 per cent in March. Decidedly more favourable conditions prevailed than in April, 1935, when 61.1 per cent of the members reported were without employment. Bricklayers, masons and plasterers registered gains in work afforded from March affecting the greatest number of members. Among electrical workers also quite noteworthy improvement was shown, plumbers and steamfitters and steam shovelmen indicating advances on a somewhat smaller scale. The trend of employment for granite and stone cutters, and painters, decorators and paper-

hangers was upward though the changes from March were slight. Tile layers, lathers and roofers, hod carriers and building labourers, and bridge and structural iron workers, on the contrary, were much slacker than in March, and among carpenters and joiners there was a considerable slowing up in activity. The majority of trades participated in substantial measure in the employment recovery noted from April last year, hod carriers and building labourers, electrical workers, bricklayers, masons and plasterers, and carpenters and joiners showing exceptionally improved con-

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	3.1	2.0	3.4	2.7	2.1	3.2	2.0	7.9	3.4

ditions though the gains recorded by granite and stone cutters, tile layers, lathers and roofers and steam shovelmens were quite extensive. Noteworthy expansion was also registered by plumbers and steamfitters. Among bridge and structural iron workers, however, there was some slight curtailment shown from April, 1935, while painters, decorators and paperhangers reflected but a fractional drop in activity.

In the transportation industries the same volume of employment was maintained during April as in the preceding month, the percentage of idleness for these months standing at 9.0. Forwarding reports for April were 810 associations of transportation workers, embracing 58,288 members, 5,224 of whom were without work at the end of the month. Steam railway employees whose returns constituted nearly 78 per cent of the total group membership reported, showed a slight tendency toward an increasing employment volume from March, which was counteracted by the less favourable movement noted among navigation workers, teamsters and chauffeurs, and street and electric railway employees. Minor gains in activity only were shown in the transportation industries as a whole, from April of last year when 9.9 per cent of unemployment was recorded, steam, and street and electric railway employees, navigation workers, and teamsters and chauffeurs all sharing slightly in this better trend.

Retail shop clerks indicated a slight drop in activity during April from the previous month, though conditions were considerably more favourable than in April of last year. This was manifest by the reports received from 5 associations, with 1,814 members, 4.4 per cent of whom were idle at the end of the month, as compared with percentages of 2.0 in March and 11.5 at the close of April, 1935.

Among civic employees a nominal change, though favourable, was noted in the volume of work accorded during April from the preceding month, the 75 associations making returns, with a membership involving 8,322 persons, showing 3.2 per cent of inactivity, compared with a percentage of 4.0 in March. Some slight falling off in available work, however, was reflected from April last year when 1.7 per cent of the members reported were idle.

The miscellaneous group of trades recorded important losses in available work during April from the previous month, unemployment

standing at 16.9 per cent compared with a percentage of 10.4 at the close of March. The percentage for April was based on the reports tabulated from 123 associations of these tradesmen, with 5,974 members, 1,008 of whom were without employment on the last day of the month. Minor contractions in activity were apparent from April of last year when 15.9 per cent of idleness was registered. Inactivity for barbers accounted almost in entirety for the less favourable situation noted in the group, as a whole, from March, though unclassified workers also showed a nominal adverse change. On the other hand, stationary engineers and firemen, theatre and stage, and hotel and restaurant employees were somewhat better engaged than in March. Compared with conditions in April a year ago, hotel and restaurant employees were much busier during the month reviewed and improvement on a substantial scale was noted by stationary engineers and firemen. Theatre and stage employees reported increases in activity of more moderate degree and unclassified workers small gains in work afforded. The curtailment indicated among barbers, however, was sufficient to slightly more than offset these advances.

Fishermen were quite actively engaged during April, the three unions from which reports were compiled, with 575 members showing that 0.7 per cent were unemployed at the end of the month, compared with a percentage of 1.7 in March. Very quiet conditions prevailed in April a year ago when 47.4 per cent of the members involved were out of work.

Some slowing up in employment was evident among lumber workers and loggers during April from both the preceding month and April a year ago, the curtailment in the latter comparison being more pronounced. Returns were tabulated for April from 5 associations of these workers, with a total of 664 members, 107 or 16.1 per cent of whom were idle on the last day of the month, contrasted with percentages of 12.1 in March and 8.2 in April, 1935.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1935, inclusive, and also the percentage of unemployment by provinces for April of each year from 1919 to 1933, inclusive, and for each month from April, 1934, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for April, 1936

The volume of business transacted by the Offices of the Employment Service of Canada during April, 1936, as indicated by the average daily placements effected showed an increase of nearly 18 per cent over that of the previous month but a loss of 2 per cent from April a year ago. Noteworthy gains over March were recorded in farming and services, augmented by others of smaller proportions in logging and trades, but these were partly offset by declines in construction and maintenance, mining, manufacturing and transportation. In comparison with April, 1935, de-

followed a marked upward course throughout April and at the close of the month each level was over two points lower than that recorded at the end of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 50.2 and 53.8 during the first and the second half of April, respectively, in contrast with ratios of 47.7 and 56.4 during the corresponding periods of 1935. The ratios of placements to each 100 applications during the periods under review, were 46.0 and 48.6 as compared with 43.5 and 50.8 during April, 1935.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o-o-o-o-o-o

creases were reported in construction and maintenance, logging, trade, mining and transportation, with increases registered in farming, services and manufacturing, the groups in which the most marked changes occurred being construction and maintenance in the first instance, and farming in the second. The accompanying chart shows the trend of employment from January, 1934, to date, as represented by the ratio of vacancies offered and of placements effected for each 100 applications for employment registered at the Offices of the Service throughout Canada, computations being made semi-monthly. As may be seen from the graph, the curve of vacancies and of placements in relation to applications

The average number of vacancies reported daily to the Offices of the Service throughout Canada was 1,106, as compared with 925 in the previous month and with 1,133 in April a year ago. The average number of applications for employment received daily by the offices during the month under review was 2,119, as compared with 1,977 in March and with 2,184 in April last year. The average number of placements made daily by the Offices of the Service during April, 1936, was 1,005, of which 593 were in regular employment, and 412 in work of one week's duration or less, as compared with a total daily average of 854 during the preced-

ing month. Placements in April last year averaged 1,027 daily, consisting of 619 placements in regular and 408 in casual employment.

During the month of April, 1936, Offices of the Service referred 25,888 persons to vacancies and effected a total of 24,102 placements. Of these, the placements in regular employment were 14,216 of which 9,809 were of men and 4,407 of women, while placements in casual work totalled 9,886. The number of vacancies reported by employers was 16,390 for men and 10,131 for women, a total of 26,521, while applications for work numbered 50,836, of which 38,064 were from men and 12,772 from women. Reports for March, 1936, showed 24,050 positions available, 51,395 applications made, and 22,181 placements effected, while in April, 1935, there were recorded 27,183 vacancies, 52,397 applications for work and 24,641 placements in regular and casual employment.

The following table gives the placements effected by the Offices of the Employment Service of Canada, each year, from January, 1926, to date:—

Year	Regular	Placements	
		Casual	Totals
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367
1930.....	187,872	180,807	368,679
1931.....	175,632	295,876	471,508
1932.....	153,771	198,443	352,214
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936 (4 months).....	57,900	39,786	97,686

### Nova Scotia

Orders received at Employment Offices in Nova Scotia during April called for over 13 per cent fewer workers than in the preceding month and 26 per cent less than during the corresponding month of last year. There was a decrease also in placements of 15 per cent when compared with March and nearly 26 per cent in comparison with April, 1935. The decline from April last year was due to the reduction in relief placements, as a small loss in services was more than offset by gains in manufacturing and logging and the changes in other groups were quite small. Industrial divisions in which most of the placements were effected were: manufacturing, 54; logging, 38; construction and maintenance, 355; and services 360, of which 275 were of household workers. There were 115 men and 93 women placed in regular employment during the month.

### New Brunswick

Opportunities for employment, as indicated by orders received at Employment Offices in New Brunswick during April, were over 10 per cent better than in the preceding month, but nearly 29 per cent less favourable than during the corresponding month of last year. Placements were over 10 per cent higher than in March, but nearly 28 per cent less than during April, 1935. The only changes of importance in placements by industrial divisions from April of last year were losses in construction and maintenance and services, and accounted for the reduction under this comparison. Placements in services numbered 569, of which 451 were of household workers. During the month 19 men and 72 women were placed in regular employment.

### Quebec

There was an increase of over 21 per cent in the number of orders received at Employment Offices in the Province of Quebec during April when compared with the preceding month and of nearly 6 per cent in comparison with the corresponding month of last year. Placements also were over 18 per cent higher than in March and nearly 10 per cent above April, 1935. Placements in services, manufacturing and construction and maintenance were considerably higher than during April last year and accounted for the gain under this comparison. Small declines in trade, finance and logging were the only adverse changes reported. Placements by industrial divisions included: manufacturing, 202; logging, 466; construction and maintenance, 1,206; trade, 81; and services, 2,171, of which 1,976 were of household workers. There were 1,847 men and 1,452 women placed in regular employment during the month.

### Ontario

Employment opportunities, as indicated by orders received at Employment Offices in Ontario during April, were nearly 2 per cent better than in both the preceding month and the corresponding month of last year. Placements showed a nominal gain over March, but were over 2 per cent higher than in April, 1935. Farm placements were considerably higher than during April of last year and increases were also reported in construction and maintenance and services. These gains were partly offset by declines in logging, manufacturing, trade and transportation. Placements by industrial divisions included: manufacturing, 388; logging, 246; farming, 1,315; construction and maintenance, 3,233; trade, 261; and services, 3,764, of which 2,310 were of household workers. Placements in

\*28 Placements effected by offices since closed.

regular employment numbered 2,804 of men and 1,373 of women.

### Manitoba

During the month of April, positions offered through Employment Offices in Manitoba were nearly 16 per cent higher than in the preceding month, but over 9 per cent less than in the corresponding month of last year. Placements were 16 per cent above March, but nearly 10 per cent below April, 1935. There was a large reduction in relief placements when compared with April of last year, which accounted for the decline for the province as a whole. Farm placements, however, were considerably higher and there were small gains in services and trade. Industrial divisions in which most of the placements were effected during the month were: farming, 938; construction and maintenance, 321; and services, 663, of which 552 were of household workers. During the month 1,301 men and 370 women were placed in regular employment.

### Saskatchewan

Employment Offices in Saskatchewan were notified of nearly 29 per cent more vacancies during April than in the preceding month and nearly 9 per cent more than during the corresponding month of last year. Placements also were 32 per cent higher than in March and over 10 per cent above April, 1935. A substantial gain in farm placements was the most important change from April of last year. This increase was partly offset by a decline in construction and maintenance. Unimportant changes, only, were reported in all other groups. Placements by industrial divisions included: manufacturing, 53; farming, 1,538; construction and maintenance, 136; and services, 708, of which 570 were of household workers. There were 1,608 men and 430 women placed in regular employment.

### Alberta

The demand for workers, as indicated by orders received at Employment Offices in Alberta during April, was over 19 per cent greater than in the preceding month, but nearly 11 per cent less than during the corresponding month of last year. There was an increase of nearly 14 per cent in placements when compared with March, but a decline of over 11 per cent when compared with April, 1935. Except for a small gain in services and trade, fewer placements were made in all industrial divisions than during April of last year, but the only loss of importance was in construction and maintenance, and represented a reduction in relief placements. The industrial divisions in which most of the placements

were effected during the month were: manufacturing, 76; farming, 1,046; construction and maintenance, 339; and services, 579, of which 456 were of household workers. During the month 1,442 men and 397 women were placed in regular employment.

### British Columbia

Orders received at Employment Offices in British Columbia during April called for nearly 10 per cent more workers than in the preceding month, but 11 per cent less than during the corresponding month of last year. Placements were over 9 per cent higher than in March, but over 11 per cent below April, 1935. Placements under construction and maintenance were considerably less than during April of last year. Of the changes in all other groups, none of which were important, a gain in services and a loss in mining were the largest. Placements by industrial divisions included: farming, 173; construction and maintenance, 1,479; and services, 725, of which 388 were of household workers. There were 673 men and 220 women placed in regular employment during the month.

### Movement of Labour

During the month of April, 1936, the offices of the Employment Service of Canada effected 14,216 placements in regular employment, 8,125 of which were of persons for whom the employment located was outside the immediate district of the offices at which they were registered. Of the latter, 555 were granted the Employment Service reduced transportation rate, 509 travelling to points within the same province as the despatching office, and 46 to other provinces. The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at the Employment Service who may wish to travel to distant employment for which no workers are available locally.

Taking advantage of the Employment Service reduced transportation rate in Quebec during April 27 bushmen were carried to centres in the Pembroke zone on certificates secured at Hull. Offices in Ontario issued 389 certificates for reduced transportation during April, 383 of which were provincial and 6 inter-provincial. Within the province the Port Arthur office arranged for the transportation of one diesel engineer to Timmins and of 225 bushmen, 82 highway construction workers, 25 mine workers, 2 hotel employees, 2 restaurant waitresses, one teamster and one domestic to various centres within its own zone. To the Port Arthur zone also, one diesel repair man was sent from St. Catharines. For points

within their respective zones the Fort William office despatched 16 bush workers, 2 mine employees and one engineer, and the Sudbury office 14 bush workers and 2 mine employees. Destined to the Fort William zone in addition were 7 mine workers journeying from Timmins, while the Sudbury zone received one foreman from Kingston. Transfers outside the province were for the Rouyn zone and included 5 mine workers who were conveyed from Timmins and one gas boat engineer from North Bay. Those who availed themselves of the reduced transportation rate in Manitoba during April numbered 20, of whom 8 went to provincial employment and 12 to centres outside. The former were farm helpers going from Winnipeg to points within the same zone. The movement to other provinces was also from Winnipeg, the Port Arthur zone receiving 6 bush workers, 2 mine employees, one teamster and one farm hand and the Weyburn zone one farm hand and one farm domestic. Transfers at the reduced rate in Saskatchewan during April were 14 in number, all provincial. From Saskatoon 2 sawmill workers and one farm hand were bound for Prince Albert, 2 hotel employees and one farm hand for North Battleford and 4 farm hands for employment within the Saskatoon zone. The Regina office assisted in the despatch of one garage mechanic and one farm hand to Swift Current and of 2 teachers within the territory covered by the Regina office. Business transacted by Alberta offices during April included the issue of 87 reduced rate certificates, 86 of which were to

points within the province. Of these 64 were granted at the Edmonton office to one granite cutter proceeding to Calgary, 3 farm hands to Drumheller, 2 farm hands to Lethbridge and to 23 farm hands, 3 farm domestics, 9 sawmill workers, 7 steamship company employees, 5 bushmen, 3 carpenters, 2 hotel employees, one café waitress, one blacksmith, one domestic, one warehouse man, one mechanic and one mine labourer going to employment at centres throughout the Edmonton zone. The labour movement from Calgary was entirely of farm hands, 6 of whom went to Drumheller, one each to the Lethbridge and Edmonton zones and 14 within the Calgary zone. The one transfer outside the province was of a farm hand journeying from Edmonton to Saskatoon. In British Columbia during April 18 persons travelled at the reduced rate, these bound for situations within the province. From Vancouver one sawmill engineer was transferred to Prince Rupert, 3 mine workers to Kamloops and 10 mine workers to employment within the Vancouver zone. At the Nelson office 2 bushmen and 2 farm hands were granted certificates for transportation to Penticton.

Of the 555 workers who profited by the Employment Service reduced transportation rate during April 172 travelled over the Canadian National Railways, 355 over the Canadian Pacific Railway, 12 over the Temiskaming and Northern Ontario Railway, 10 over the Pacific Great Eastern Railway and 6 over the Northern Alberta Railway.

#### (4) Building Permits issued in Canada during April, 1936

The Dominion Bureau of Statistics tabulated returns from 58 cities which granted permits for construction work valued at \$3,183,336 during April, as compared with \$2,361,771 in the preceding month, and \$6,300,046 in the same month of last year. There was, therefore, an increase of \$821,565 or 34.8 per cent as compared with March, but the April, 1936, total was smaller by \$3,116,710, or 49.5 per cent, than in April, 1935, when permits had been taken out for the construction of public buildings in certain centres.

The estimated value of the construction authorized in the first four months of the present year was \$8,740,707; this was considerably lower than the aggregate of \$14,807,316 reported in the period January-April, 1935, although it was higher than in these months of either 1934 or 1933. The cumulative total for the first four months of each of the last five years has been very much lower than in any earlier year of the record; the wholesale prices of building materials have also been

decidedly lower since 1931 than in any preceding year since 1920.

Some 50 cities furnished detailed statistics for April, 1936, showing that they had issued more than 300 permits for dwellings valued at approximately \$1,300,000, and for nearly 2,000 other buildings, estimated to cost almost \$1,800,000. In March, authority was given for the erection of about 265 dwellings and 1,200 other buildings, valued at approximately \$1,166,000 and \$994,000, respectively, while engineering projects estimated to cost some \$12,300 were also reported.

Prince Edward Island, Nova Scotia, Ontario, Manitoba, Saskatchewan and Alberta recorded moderate increases in the value of the building represented by the permits issued during April as compared with the preceding month, the greatest gain of \$558,062 taking place in Alberta. In New Brunswick, Quebec and British Columbia there were small declines in this comparison.

As compared with April, 1935, there were increases in Nova Scotia, Alberta and British Columbia, that of \$246,131 or 60·2 per cent in Alberta being most noteworthy. In this comparison, New Brunswick, Quebec, Ontario and Manitoba showed declines, of which that of \$2,197,109 or 62·3 per cent in Ontario was greatest.

Of the four largest cities, Winnipeg and Vancouver registered increases in the building authorized during April as compared with the preceding month, and also as compared with April, 1935. In Toronto, the value was higher than in March, 1936, but lower than in April, 1935, while in Montreal there was a decrease in both comparisons. Of the other centres, Halifax, Sydney, Shawinigan Falls, Three Rivers, Westmount, Chatham, Fort William, Galt, Niagara Falls, Oshawa, Owen Sound, Peterborough, St. Thomas, Sault Ste. Marie, Riverside, Woodstock, Regina, Calgary, Edmonton, Lethbridge, Kamloops and Victoria reported increases in the value of the permits issued as compared with March, 1936, and also with April, 1935.

*Cumulative Record for First Four Months, 1920-1936.*—The following table gives the value of the building authorized by 58 cities during April and in the first four months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices

of building materials in the first four months of the same years are also given (1926=100).

Year	Value of permits issued in April	Value of permits issued in first four months	Indexes of value of permits issued in first four months (1926=100)	Average indexes of wholesale prices of building materials in first four months (Average 1926=100)
	\$	\$		
1936.....	3,183,336	8,740,707	21·0	84·2
1935.....	6,300,046	14,807,316	35·6	81·5
1934.....	2,269,157	4,980,156	12·0	82·4
1933.....	1,595,502	4,661,323	11·2	75·1
1932.....	4,370,863	13,823,873	33·3	79·1
1931.....	13,495,165	38,241,259	92·1	83·7
1930.....	16,978,076	46,471,338	111·9	96·2
1929.....	29,656,709	72,606,937	174·8	99·4
1928.....	18,606,167	51,769,505	124·6	95·7
1927.....	17,312,470	42,340,823	101·9	96·3
1926.....	19,044,499	41,538,073	100·0	101·7
1925.....	15,452,383	35,463,398	85·4	103·1
1924.....	13,689,101	31,737,100	76·4	111·6
1923.....	19,530,851	39,008,970	93·9	110·8
1922.....	15,833,688	34,513,861	83·1	107·7
1921.....	13,500,360	27,069,872	65·2	136·9
1920.....	15,648,915	34,558,901	83·2	143·1

As already stated, the aggregate for the first four months of this year was lower than in the same period of 1935, although it was greater than in 1934 or 1933. The index numbers of wholesale prices of building materials in the last few years have been considerably below the average for the years since 1920.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

**T**HE British *Ministry of Labour Gazette*, May, 1936, summarized the employment situation as follows:—

There was a further improvement in employment between March 23 and April 27, affecting most of the principal industries. The industries in which the improvement was most marked included building and public works contracting, engineering, shipbuilding and ship-repairing, metal goods manufacture, the tinplate industry, electrical apparatus manufacture, the motor vehicle, cycle and aircraft industry, tailoring, dressmaking and millinery, furniture manufacture, brick and tile making, road transport, shipping, food preparation, the distributive trades, and hotel, boarding house, etc. service. On the other hand, there was a further decline in employment in the coal mining industry, and there was also a slight setback in the wool textile industry and in hosiery manufacture.

The estimated number of insured persons, aged 16-64, in employment in Great Britain at April 27, 1936, was 10,712,000. This was 82,000 more than at March 23, 1936, and 371,000 more than at April 15, 1935.

Among workpeople, aged 16-64, insured against unemployment in Great Britain and Northern Ireland, the percentage unemployed at April 27, 1936 (including those temporarily stopped as well as those wholly unemployed), was 13·8, as compared with 14·4 at March 23, 1936, and with 15·6 at April 15, 1935. In Great Britain the percentage at April 27, was 13·7, compared with 14·2 at March 23, and with 15·4 at April 15, 1935.

At April 27, 1936, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,498,579 wholly unemployed, 247,272 temporarily stopped, and 85,379 normally in casual employment, making a total of 1,831,230. This was 50,301 less than a month before and 213,230 less than a year before. The total of 1,831,230 included 1,435,045 men,

63,496 boys, 274,416 women, and 58,273 girls. The total number of unemployed boys and girls at April 27, 1936, was 12,666 greater than at March 23, owing to the registration of juveniles who left school at Easter.

The persons on the Registers included 805,964 persons with claims for insurance benefit; 687,007 insured persons with applications for unemployment allowances; 196,842 insured persons (including 19,712 insured juveniles under 16 years of age) not in receipt of insurance benefit or unemployment allowances, and 141,417 uninsured persons.

In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at April 27, 1936, was 1,895,122, as compared with 1,947,998 at March 23, 1936, and 2,113,851 at April 15, 1935.

### United States

*Manufacturing industries.*—Factory employment increased 1·2 per cent from March to April and pay rolls increased 2·1 per cent. The April 1936 employment index (85·1) shows a gain of 3·0 per cent compared with April 1935 (82·6) and, with the exception of one month (October 1935), exceeds the levels reported in any month since October 1930. The factory payroll index in April 1936 (77·9) stands 10·0 per cent above the April 1935 index (70·8) and marks the highest level reached in any month since October 1930. Factory employment and pay rolls normally decline between March and April, decreases in employment having been shown in April in 10 of the 17 preceding years for which data are available while pay rolls have declined in 12 of these 17 years. The current gains therefore are contrary to the previous seasonal movements.

Fifty-seven of the 90 manufacturing industries surveyed showed gains in employment over the month interval and 49 industries showed gains in pay rolls. With the exception of the sharp gain in employment in the rubber tire and tube industry (30·5 per cent) which was due largely to a settlement of labour difficulties, the more pronounced percentage gains in April were seasonal in character. The canning and preserving industry reported a gain of 20·3 per cent in employment from March to April; cement, 17·9 per cent; beet sugar, 14·3 per cent; brick, tile, and terra cotta, 13·1 per cent; marble-slate-granite, 11·7 per cent; and ice cream, 11·3 per cent.

The transportation equipment industries reported gains: locomotives, 13·7 per cent; shipbuilding, 11·6 per cent; steam- and electric-car building, 9·5 per cent; aircraft, 6·1 per cent; and automobiles, 2·7 per cent. The increase in employment in the automobile industry was coupled with a gain of 15·5 per cent

in pay rolls, reflecting the accelerated production schedule of April. In addition to the sharp gains in the cement and brick industries mentioned above, other industries allied to building construction reported substantial gains. The structural metalwork industry reported a gain of 5·8 per cent; millwork, 3·4 per cent; sawmills, 3·6 per cent; glass, 2·4 per cent; steam and hot-water heating apparatus, 2·8 per cent; and cast-iron pipe, 2·8 per cent. Among the industries of major importance which showed gains in employment were blast furnaces-steel works-rolling mills (2·7 per cent), electrical machinery (3·6 per cent), foundries (2·7 per cent), petroleum refining (2·0 per cent), and newspapers and periodicals (0·9 per cent). In the blast furnaces, steel works, and rolling mills industry the April gain raised the level of employment above that of any month since November 1930. Employment in the machine-tool industry continued to expand, the rise of 1·3 per cent in April marking the 18th month in which consecutive gains have been shown. The April employment index for this industry (105·9), which is a barometer of orders placed for power-driven metal-cutting machinery, stands above the level reported in any month since October 1930 and is 250 per cent above the low point registered in this industry in April 1933. The agricultural implement industry also continued the forward movement which has been shown consistently each month since October of last year. The increase of 1·3 per cent in employment in April raised the April employment index to 140·4, which is the highest level reported in any month since March 1930.

With the exception of the seasonal decline of 30·9 per cent in employment in the cottonseed oil, cake, and meal industry, the major portion of the declines were not pronounced. The rayon and allied products industry showed a decrease of 6·0 per cent in employment, due primarily to curtailment of operations because of repair work made necessary by floods, and woollen and worsted goods establishments reported a loss of 5·6 per cent over the month interval. Seasonal decreases of 4·9 per cent and 4·5 per cent, respectively, were reported in the millinery and confectionery industries; the fertilizer industry showed a falling-off of 4·9 per cent; and explosives showed a decrease of 4·6 per cent. Boot and shoe establishments showed a seasonal drop of 3·5 per cent and the men's clothing industry, having passed the peak of seasonal activity, reported 3·2 per cent fewer employees. Employment in the jewelry industry declined 2·4 per cent in April and in the remaining 23 industries reporting decreased employment, the decreases were 1·8 per cent or less.

Substantial gains in the blast furnace-steel works-rolling mill, automobile, electrical machinery, foundry, and sawmill industries, which are of major importance in the durable goods group, were primary factors contributing to the increase of 2.5 per cent in employment in that group. The April employment index in the durable goods group (77.6) exceeds the levels reported in any month since October 1930, and is 77 per cent above the low point, March 1933. The non-durable goods group showed no change in employment over the month interval, the April index (93.2) remaining at the same level as in the preceding month. The April indexes indicate that for every 1,000 workers employed in each group during the index-base period (1923-25=100), 776 were employed in the durable goods group in April 1936, and 932 were employed in the non-durable goods group. Employment in the durable goods group in April 1936 was 8.1 per cent above the level of April 1935, while, in the non-durable goods group, a decrease of 1.1 per cent was shown over the year interval.

*Non-manufacturing.*—Only 2 of the 16 non-manufacturing industries surveyed failed to show gains in employment from March to April. The increases in employment in several industries raised the April level to the highest point recorded in recent years. Hotel employment exceeded the maximum shown since October 1931, employment in power and light

companies reached the highest point reported in any month since January 1932, and metal mines continued to add workers to their pay rolls for the ninth consecutive month, the April employment index surpassing the level of employment in any month since June 1931.

The net gain in employment in the combined non-manufacturing industries surveyed was estimated to be 175,000 workers. The largest number of persons were returned to jobs in retail trade establishments, in which it was estimated there was an increase of 134,000 workers. Increased volume of business due to spring and Easter shopping accounted largely for this substantial expansion. The general merchandising group of retail establishments, which is composed of department, variety, and general merchandising stores and mail-order houses, showed an increase of 7.2 per cent or 53,000 in number of workers.

A substantial increase in employment was shown in private building construction and was due to the increased volume of construction now under way, together with improved weather conditions, which permitted general outdoor operations. Quarrying and non-metallic mining establishments also reported seasonal gains due largely to more favourable weather, and dyeing and cleaning establishments showed substantial gains expected at this season of the year. Employment in anthracite and bituminous coal mines declined, due to lessened demand for fuel.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in

the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the

Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by The Fair Wages and Hours of Labour Act, 1935, which came into force on May 1, 1936. The clause relating to wages and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, sub-contractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted

in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contract for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month, statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been recently executed by the Government of Canada:—

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contracts in Group "A" (Construction Remodelling, etc.)*

Supply and installation of steel partitions in Buildings Nos. 25 and 27 of the Dominion Arsenal, Valcartier, P.Q. Name of contractors, Eastern Steel Products Ltd., Montreal, P.Q. Date of contract, May 8, 1936. Amount of contract, \$2,728.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
		per day	per week
Sheet metal workers.....	\$0 65	8	44
Labourers.....	0 40	8	44

N.B.—Where, by agreement or current practice, the working hours of any class of labour are less than 44 per week, such lesser hours shall not be exceeded on this work.

##### *Contracts in Group "B" (Manufacture of Supplies and Equipment, etc.)*

The following is a statement of contracts awarded by the Department of National Defence during the month of May, 1936, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Supplies ordered	Contractor
Sheets.....	Dominion Textile Co., Ltd., Montreal, P.Q.
Dish Cloths.....	Dominion Textile Co., Ltd., Montreal, P.Q.
Canvas Shoes.....	Colonial Footwear Ltd., Toronto, Ont.
Socks.....	Code Felt & Knitting Co., Ltd., Toronto, Ont.
Conversion of Wheels.....	Ottawa Car Mfg. Co., Ltd., Ottawa, Ont.
Trouser Drill.....	Dominion Textile Co., Ltd., Montreal, P.Q.
Shirt Drill.....	Dominion Textile Co., Ltd., Montreal, P.Q.
Hospital Sheets.....	Dominion Textile Co., Ltd., Montreal, P.Q.
Household Soap.....	Diamond Cleanser & Soaps, Ltd., Toronto, Ont.
Corn Brooms.....	Superior Broom Co., Kingston, Ont.
Oilskin Clothing.....	Seythes & Co., Ltd., Montreal, P.Q.
Barrack Bedsteads.....	Ives Bedding Co., Ltd., Cornwall, Ont.
Drab Forage Caps.....	William Scully Ltd., Montreal, P.Q.
Ankle Boots.....	Tebbutt Shoe & Leather Co., Ltd., Three Rivers, P.Q.
Ankle Boots.....	St. Arnaud Miron & Co., Ltd., St. Genevieve de Batiscan, P.Q.
Ankle Boots.....	Alfred Lambert Ltee., Montreal, P.Q.
Ankle Boots.....	Eudore Fournier, Plessisville, P.Q.
Ankle Boots.....	J. A. & M. Cote, Ltd., St. Hyacinthe, P.Q.

In addition to the foregoing list of supplies, the Department of National Defence awarded contracts for the following equipment to which the "B" labour conditions were applicable:—

Four standard equipped Fleet Model 7 Aircraft. Name of contractors, Fleet Aircraft of Canada, Ltd., Fort Erie, Ont. Date of contract, May 8, 1936. Amount of contract, \$5,380.00 each.

Complete overhaul and modification of Kinner B.5 Engine. Name of contractors, Fleet Aircraft of Canada, Ltd., Fort Erie, Ont. Date of contract, May 19, 1936. Amount of contract, \$1,084.70.

Four Tiger Moth Airframes. Name of contractors, deHavilland Aircraft of Canada, Ltd., Toronto, Ont. Date of contract, April 20, 1936. Amount of contract, \$4,555.00 each.

Spare parts for Irvin parachutes. Name of contractors, the Irvin Air Chute Co., Ltd., Bridgeburg, Ont. Date of contract, May 8, 1936. Amount of contract, \$3,452.29.

Rebuilding of one Avro Tutor type 621 Airframe. Name of contractors, Armstrong Siddeley Motors Ltd., Ottawa, Ont. Date of contract, May 8, 1936. Amount of contract, \$8,143.20.

Overhauling and modifying Wright engine. Name of contractors, the Canadian Wright Ltd., Montreal, P.Q. Date of contract, May 16, 1936. Amount of contract, \$1,227.76.

Overhauling and modifying Siskin Mark IIIA Landplane No. 60. Name of contractors, Armstrong Siddeley Motors Ltd., Ottawa, Ont. Date of contract, May 23, 1936. Amount of contract, \$6,052.64.

Overhauling and modifying Moth 60 M Aircraft No. 70. Name of contractors, the deHavilland Aircraft of Canada Ltd., Toronto, Ont. Date of contract, May 8, 1936. Amount of contract, \$1,573.00.

One Radio Transmitter. Name of contractors, Northern Electric Company, Montreal, P.Q. Date of contract, May 23, 1936. Amount of contract, \$15,069.00.

One Marconi Type Radiotelephone Telegraph Transmitter. Name of contractors, Canadian Marconi Company, Montreal, P.Q. Date of contract, May 23, 1936. Amount of contract, \$2,080.00.

#### DEPARTMENT OF PUBLIC WORKS

##### *Contracts in Group "A" (Construction, Remodelling, Repair, etc.)*

Construction of a 5-ton Travelling Crane, electrically operated, for the Assembly Wharf, Nanaimo, B.C. Name of contractors, the Dominion Bridge Co., Ltd., Lachine, P.Q. Date of contract, May 4, 1936. Amount of contract, \$23,400.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Steel erectors.....	\$1 00	8
Rivet heaters.....	1 00	8
Rivet stickers.....	1 00	8
Riveters.....	1 00	8
Machinists.....	0 70	8
Painters and glaziers.....	0 65	8
Plumbers and steamfitters.....	0 80	8
Electric wiremen.....	0 75	8
Carpenters and Joiners.....	0 70	8
Teamster, team and wagon.....	0 85	8
Teamster.....	0 45	8
Motor truck driver and truck.....	1 50	8
Motor truck driver.....	0 50	8
Labourers.....	0 45	8

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Dredging in the inner harbour and river at Port Dover, Ontario. Name of contractors, The C. S. Boone Dredging and Construction Co., Ltd., Toronto, Ont. Date of contract, May 28, 1936. Amount of contract, approximately \$6,045.00. The General Fair Wages Clause was inserted in this contract.

Dredging areas at the mouth of the Thames River in Lake St. Clair, Ontario. Name of contractors, The Chatham Dredging and General Contracting Co., Ltd., Chatham, Ont. Date of contract, May 20, 1936. Amount of contract, approximately \$13,800.00. The General Fair Wages Clause was inserted in this contract.

Supply and installation of the screen and fittings for the lobby and working space of Postal Station "D," Keele Street, Toronto, Ont. Name of contractors, Messrs. Witchall & Son, Toronto, Ont. Date of contract, May 11, 1936. Amount of contract, approximately \$15,650.00. The "B" labour conditions above mentioned were inserted in this contract.

Supply and installation of Customs fittings in Postal Station "D," Keele Street, Toronto, Ont. Name of contractors, The Valley City Seating Co., Ltd., Dundas, Ont. Date of contract, May 14, 1936. Amount of contract, \$1,664.75. The "B" labour conditions were inserted in this contract.

Supply and installation of interior fittings in the Customs and Immigration Building at St. Stephen, N.B. Name of contractors, Haley & Son, Ltd., St. Stephen, N.B. Date of contract, May 12, 1936. Amount of contract \$684. The "B" labour conditions were inserted in the contract.

Supply and installation of interior fittings in the public building at Galt, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, May 19, 1936. Amount of contract, \$2,685.00. The

"B" labour conditions were inserted in the contract.

Supply and installation of interior fittings in the public building at Bradford, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, May 19, 1936. Amount of contract, \$686.00. The "B" labour conditions were inserted in the contract.

Supply and installation of interior fittings in the public building at New Toronto, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, May 19, 1936. Amount of contract, \$3,333.00. The "B" labour conditions were inserted in the contract.

Supply and installation of interior fittings in the public building at Dunnville, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, May 1, 1936. Amount of contract, \$1,532.00. The "B" labour conditions were inserted in the contract.

Supply and installation of interior fittings in the public building at Whitewood, Sask. Name of contractors, W. H. Cushing Ltd., Regina, Sask. Date of contract, May 8, 1936. Amount of contract, \$557.25. The "B" labour conditions were inserted in the contract.

Supply and installation of interior fittings in the public building at Rivers, Manitoba. Name of contractors, W. H. Cushing Ltd., Regina, Sask. Date of contract, May 15, 1936. Amount of contract, \$588.75. The "B" labour conditions were inserted in the contract.

Supply and installation of interior fittings in the public building at Rouyn, P.Q. Name of contractors, Paquet & Godbout, St. Hyacinthe, P.Q. Date of contract, June 24, 1936. Amount of contract, \$1,374.00. The "B" labour conditions were inserted in this contract.

Supply and installation of interior fittings in the public building at Mission City, B.C. Name of contractors, B. C. Hardwood Floor Co., Ltd., Vancouver, B.C. Date of contract, May 4, 1936. Amount of contract, \$1,094.00. The "B" labour conditions were inserted in the contract.

#### POST OFFICE DEPARTMENT

##### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Post Office Department during the month of May, 1936, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Supplies ordered	Contractor
Metal dating stamps and type, brass crown seals, cancellers, etc.	Pritchard-Andrews Co., Ltd., Ottawa, Ont.
Rubber Stamps (making and repairing).	Pritchard-Andrews Co., Ltd., Ottawa, Ont.
Letter-Carriers' Uniforms....	Workman Uniform Co., Ltd., Montreal, P.Q.
Letter-Carriers' Uniforms....	Uniform Cap Co., Ottawa, Ont.
Letter-Carriers' Uniforms....	J. R. Shuttleworth & Sons Ltd., London, Ont.
Letter-Carriers' Uniforms....	Kaufman Rubber Co., Ltd., Kitchener, Ont.
Letter-Carriers' Uniforms....	J. A. Humphrey & Son, Ltd., Moncton, N.B.
Letter-Carriers' Uniforms....	Pollack & Dorfman, Quebec, P.Q.
Mail Bag Fittings.....	Pritchard-Andrews Co., Ltd., Ottawa, Ont.
Mail Bag Fittings.....	Fred W. Carling, Ottawa, Ont.
Mail Bag Fittings.....	Thos. Lawson & Sons, Ltd., Ottawa, Ont.
Satchels.....	Grant-Holden-Graham, Ltd., Ottawa, Ont.
Stamping Machines, etc.....	Machine Works Ltd., Montreal, P.Q.
Scales.....	Pritchard-Andrews Co., Ltd., Ottawa, Ont.

# ROYAL CANADIAN MOUNTED POLICE

## *Contracts in Group "B" (Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Royal Canadian Mounted Police during the month of May, 1936, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Supplies ordered	Contractor
Shirts—khaki broadcloth....	Cluett, Peabody & Co., Ltd., Kitchener, Ont.
Batons.....	Hugh Carson Co., Ltd., Ltd., Ottawa, Ont.
Eiderdown Robes.....	Woods Mfg. Co., Ltd., Ottawa, Ont.
Riding Boots.....	The Hartt Boot & Shoe Co., Ltd., Fredericton, N.B.
Cavalry Braid.....	Belding-Corticelli Ltd., Montreal, P.Q.
Combination Underwear.....	The C. Turnbull Co., Ltd., Galt, Ont.

# DEPARTMENT OF FINANCE

## *Contracts in Group "B" (Manufacture of Equipment, Supplies, etc.)*

During the month of May, 1936, the Department of Finance awarded the following contracts covering the equipment requirements of the Canadian Pacific Railway Company, pursuant to the Supplementary Public Works Construction Act, 1935, both of which were subject to the "B" labour conditions above referred to:—

(a) Completion of the interior finish and all other work, etc., necessary to complete the

four combination baggage and buffet cars contracted for with the National Steel Car Corporation Ltd., Hamilton, Ont., in October last. Name of contractors, Canadian Pacific Railway Co., Montreal, P.Q. Date of contract, May 5, 1936.

(b) Completion of the interior finish and all other work, etc., necessary to complete the eight steel coaches contracted for in October last with the National Steel Car Corporation Ltd., Hamilton, Ont. Name of contractors, Canadian Pacific Railway Co., Montreal, P.Q. Date of contract, May 5, 1936.

## **Annual Convention of Ontario Labour Educational Association**

With a representative attendance of 91 delegates from all sections of the province, the thirty-fourth annual convention of the Labour Educational Association of Ontario was held recently in Hamilton, under the chairmanship of the president, Mr. Humphrey Mitchell.

Featuring the convention was the discussion on a resolution from the Toronto District Labour Council which urged that when the convention adjourned it stand adjourned until re-convened by resolution adopted at a regular convention of the Trades and Labour Congress of Canada. Upon the vote being called, however, it only received the support of two delegates.

The report of the executive, which was adopted, contained a section reviewing the legislative enactments of the Dominion government, particularly in regard to relief and employment. In this respect, the establishing of the National Employment Commission was commended, and the appointment to the commission of Mr. Tom Moore, formerly president of the Trades and Labour Congress of Canada, was endorsed.

By an adopted resolution, the Association urged continued support of the League of Nations, and emphasized that the contribution to social betterment made by the International Labour Organization of the League had been outstanding and of value to workers.

Another resolution, dealing with the Industrial Standards Act of Ontario, requested the Ontario government to provide adequate means and personnel to enforce the Act.

The officers elected were: President, Mr. Humphrey Mitchell, Hamilton, (third term); vice-president, O. H. Hughes, Kitchener (third term); secretary-treasurer, Mr. Rod Plant, Ottawa (seventh term).

Kitchener was selected as the next convention city.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A summary is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Mining: Non-ferrous Smelting and Quarrying

**SAINT SAMUEL, QUEBEC.**—A CERTAIN GRANITE QUARRY FIRM AND THE NATIONAL CATHOLIC UNION OF QUARRY WORKERS OF FRONTENAC.

Agreement reached following strike reported on page 483 of this issue.

Agreement to be in effect from May 1, 1936, to April 30, 1937, and will be renewed automatically if either party gives notice of change.

Only union members to be employed, if available. Facilities for the holding of union meetings on the employer's premises to be granted.

Hours to be in accordance with the agreement for granite cutters which was extended under the Quebec Collective Labour Agreements Act (*LABOUR GAZETTE*, May, page 460), that is 8 per day, 45 per week for granite cutters and their apprentices, and 9 hours per day and 50 per week for other employees.

Overtime: time and one quarter.

All work is to be paid by the hour except for certain specified types of work for which piece rates are fixed.

Wages: certain classes are governed by the Order in Council under the Quebec Collective Labour Agreements Extension Act (*LABOUR GAZETTE*, May, page 460). Minimum hourly wage rates for other classes are: stonecutters, operators of surface machines (competent cutters), blacksmiths, engineer-mechanic-electrician, carborundum saw operators, 50 cents; stone polishers (machine), operators of surface machines (not cutters), stationary enginemen, 45 cents; assistant mechanics, engineers (portable engines), saw operator (*scie à Châsse*), man and horse, carpenters, firemen, 40 cents; drillers, hand polishers, 35 cents; labourers, night watchmen, 25 cents; apprentice granite cutters and apprentice blacksmiths—10 cents during first year, 20 cents during second year, 30 cents during third year.

Not more than one apprentice to be employed for every fourteen cutters.

Penalties are provided for the non-observance of the agreement.

### Manufacturing: Fur, Leather and Their Products

**TORONTO, ONTARIO.**—THE TORONTO INDEPENDENT FURRIERS' ASSOCIATION AND THE INTERNATIONAL FUR WORKERS' UNION, LOCALS NOS. 35, 40 AND 65.

Agreement to be in effect from April 15, 1935, to April 14, 1938.

Only union members to be employed, if available. If not available, others employed to join the union. Foremen need not be union members.

Hours: 40 hours per week to be worked during the first five days of the week, except for the period September 1, 1936, to November 15, 1936, when the 40 hours may be worked during the six days of the week.

Overtime to be permitted during a period of not more than 20 weeks between July 1 and December 30, but only when all workers in the trade are employed except in case of emergency. Overtime to be completed by 7 p.m. All overtime to be paid for at time and one-half. Employees working during the week in which any of the eight specified holidays occur to receive pay for such holidays. Any work on such holidays to be paid for at time and one-half in addition to the day's pay for such holiday.

Minimum weekly wage rates: cutters—first class \$40, second class \$35; operators (male)—first class \$30, second class \$25; operators (female)—first class \$25, second class \$20; finishers (male)—first class \$30, second class \$25; finishers (female)—first class \$25, second class \$20; blockers and nailers \$23 for first five years, \$28 after five years' experience; assistant finishers and tapers \$18.

No apprentices to be taken on during 1936 except to replace another apprentice leaving employment. The ratio of apprentices to be one apprentice to every 13 experienced workers.

No employer to make any individual or separate contract with any employee, nor accept or require any cash deposits or other security from any employee.

Equal division of work in each shop to be carried out as far as practicable.

No contracting or sub-contracting or piece work to be permitted inside or outside the factory except in emergency when the union's consent will be obtained. No employee to be permitted to do home work in any case.

Employers agree to pay to the Toronto Fur Workers' Unemployment Insurance Fund one per cent of the weekly payroll and union members to pay into it one per cent of their wages, this fund to be used for unemployed union members, employees of members of this Furriers' Association.

No work to be done for any other firm or employer at whose establishment a strike is in progress.

Provision is made for the settlement of all disputes through a permanent conciliation committee to be approved.

Both parties agree to take the necessary steps to have put into effect the schedule of wages and hours of this agreement under the Industrial Standards Act of Ontario.

### Construction: Buildings and Structures

EDMONTON, ALBERTA.—GENERAL CONTRACTORS' ASSOCIATION AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCAL No. 1325.

Agreement to be in effect from April 6, 1936, to March 31, 1937. During March, 1937, an agreement for the next period to be negotiated.

Only members of this union to be employed.

Hours: 8 per day, 4 on Saturdays, a 44-hour week, except in case of night shifts for which 7½ hours to be equivalent to 8 hours.

Overtime: time and one-half. Work on Sundays and four specified holidays, double time.

Minimum wage rates for carpenters: 75 cents per hour.

For work out of town, transportation to be paid for both ways by the employer when definite arrangements made with the contractor before the job.

### Collective Labour Agreements Extension Act of Quebec

The following agreements and amendments to agreements in the Province of Quebec have recently been made obligatory by Orders in Council and the terms so made obligatory are summarized in the article beginning on this page:—

Building Trades, Quebec.

Glove Cutters (Fine Gloves), Province of Quebec.

Printing Trades, Montreal.

Building Trades, Joliette.

Fur Workers, Montreal.

Barbers, County of Portneuf (Amendment).

Stonecutters, Hull (Amendment).

### Industrial Standards Act of Ontario

The following schedule has been made binding by Order in Council and the terms summarized in this issue on page 549:—

Millinery Workers, Province of Ontario.

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include the extension to all employees and employers in the same industry or business and in the same district, by Orders in Council, of five agreements which are summarized below, and of amendments to two other agreements and a correction to a third agreement which are also noted below. Notice of a request for the extension of an agreement affecting glove cutters (work gloves, etc.) throughout the province was published in the *Quebec Official Gazette*, May 30. A correction to the request for the extension of the fur workers' agreement at Montreal was published in the *Quebec Official Gazette*, May 9. Requests for the modification of the Orders in Council affecting building trades at Hull were published in the *Quebec Official Gazette*, May 16, and in that affecting fine glove cutters throughout the province in the issue of May 30.

The text of the Collective Labour Agreements Extension Act, Quebec, was printed in the *LABOUR GAZETTE*, May, 1934, page 417, and amendments to the Act were summarized in the issue of June, 1935, page 526. Under this Act applications may be made to the provincial Minister of Labour by either party to a collective agreement made between, on the one hand, one or more associations of *bona fide* employees, and on the other hand, employers or one or more associations of employers, to have those terms of such agree-

ment which concern rates of wages, hours of labour and apprenticeship made obligatory on all employees and employers in the same trade, industry or business within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade, industry or business in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette*, for the duration of the agreement. The provisions of an agreement thus made obligatory govern all individual labour contracts in the trade, industry or business and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreements have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934. Beginning with the issue of the *LABOUR GAZETTE*

for July, 1935, the terms of agreements have been summarized instead of being printed in full.

**BUILDING TRADES, QUEBEC.**—An Order in Council, approved May 4, and published in the *Quebec Official Gazette*, May 9, makes obligatory the terms of an agreement between L'Association des Constructeurs de Québec, Inc. (The Builders' Association of Quebec, Incorporated) and certain National Catholic building trade unions.

The territorial jurisdiction comprises the judicial district of Quebec (except the county of Lotbinière) and the counties of Beauce and Megantic.

The agreement is in effect from May 9, 1936 to May 1, 1937, and thereafter from year to year unless either party gives notice of change 30 days before the expiration date.

Hours of work are governed by Orders in Council passed under the Act respecting the limiting of working hours, which provide in this district for a maximum of 8 hours per day and 40 per week, with the exception of contracts for a municipal or school corporation, fabrique or parish trustees, the provincial government, or for an institution, association or corporation, at least 50 per cent of the costs of which work is guaranteed by the provincial government or municipal corporation, for which work a system of two shifts of 6 hours per day, 6 days per week is to be effective between May 1 and October 1, if the cost of the work exceeds \$20,000. Any contractor may adopt this same two shift system on any work. In case of non-application or authorized derogation of these Orders in Council governing working hours, hours to be 9 per day from April 1, to September 30, and 8 hours from October 1 to March 31.

Overtime: any work outside of regular hours, time and one-half until midnight, double time after midnight. No work on Sundays, holy days of obligation, St. Jean Baptiste day and Labour Day, except in case of necessity, in which case double time to be paid.

Minimum hourly wage rates in the cities of Quebec and Levis and a radius of 10 miles from their limits: bricklayers, masons and plasterers, 70 cents; carpenters and joiners, joint pointers, cement finishers, marble setters, tile setters, terrazzo layers, stationary engine-men (portable engines), steam shovel engine-men, hoisting engine-men, gas mixer engine-men, compressor engine-men, metal lathers, 50 cents; wood lathers, caulkers, painters, tinsmith-roofers, drillers, 45 cents; men working on machines for the polishing of terrazzo, 40 cents; mortar makers, celanite mixers, plaster pourers, hod carriers and common labourers, 35 cents, (a decrease for these last five classes of 5 cents per hour from last year's rates).

Hourly wage rates for apprentices in the cities of Quebec and Levis and a radius of 10 miles from their limits: apprentice bricklayers, masons and plasterers, 25 cents during first six months, 30 cents during second six months, 45 cents during second year and 60 cents during third year; apprentice carpenters 15 cents during first year, 20 cents during second year and 25 cents during third year; apprentice painters 10 cents during first year, 15 cents during second year and 20 cents during third year, for fourth year 10 cents less than journeyman's rate; apprentice tinsmiths and roofers 10 cents during first year, 15 cents during second year, 20

cents during third year and 25 cents during fourth year; apprentice tile, marble, terrazzo and cement layers, 15 cents during first six months, 25 cents during second six months, 35 cents during second year, 45 cents during third year. Not more than one apprentice allowed to ten journeymen or fraction thereof in the brick-laying, masonry and plastering, carpentry and painting trades; not more than one apprentice to each six journeymen or fraction thereof in the marble, terrazzo, tile and cement laying trades; not more than one apprentice to each five journeymen or fraction thereof in the roofing trade.

An employer engaging a workman usually living in the cities of Quebec or Levis or within ten miles of them, for work outside this zone must pay him the same wage rates as provided for this zone.

Hourly wage rates in the rest of the territorial jurisdiction, that is outside the cities of Quebec and Levis and a radius of 10 miles from their limits: bricklayers, masons and plasterers, 50 cents (a decrease of 5 cents per hour from the previous rate); tile setters, marble setters, terrazzo layers, 45 cents; carpenters and joiners, tinsmith-roofers, joint pointers, engine-men (portable machines), cement finishers, 40 cents; caulkers, painters, men working on machines for polishing terrazzo, wood and metal lathers, 35 cents; mortar makers, celanite mixers, plaster pourers, hod carriers and common labourers, 25 cents.

Hourly wage rates for apprentices in the territorial jurisdiction but outside the cities of Quebec and Levis and 10 miles of their limits: 10 cents per hour during first six months, 15 cents during second six months, 20 cents during second year and 25 cents during third year.

Permanent employees paid by the month or by the week working in the maintenance of public buildings or in an industrial or commercial establishment may work a 48 hour week without any daily limitation of hours.

Wages for such maintenance men: in the cities of Quebec and Levis, \$19 per week for journeymen or skilled workers, \$13 for labourers; outside the cities of Quebec and Levis and of the municipalities of Bienville and Lauzon, \$16 for journeymen and skilled workers and \$12 for labourers. Where such employees live within the establishment, employers may charge them a maximum rent of \$3 per room per month and 20 cents per meal.

**GLOVE CUTTERS (FINE GLOVES), PROVINCE OF QUEBEC.**—An Order in Council, approved May 9 and published in the *Quebec Official Gazette*, May 16, makes obligatory throughout the province an agreement between certain glove manufacturers of Montreal, Three Rivers and Quebec and Le Syndicat Catholique et National des Gantiers de Montréal (The National Catholic Union of Glove Workers of Montreal), Le Syndicat Catholique et National des Gantiers de Loretteville (The National Catholic Union of Glove Workers of Loretteville) and Le Syndicat des Gantiers des Trois Rivières (The Glove Workers Union of Three Rivers).

The territorial jurisdiction includes the whole Province of Quebec.

The agreement is to be in effect from May 16, 1936, to May 15, 1937, and thereafter from year to year until notice.

The agreement is similar to the one previously in effect and published in the *LABOUR GAZETTE*, May, 1935, page 421, with amendments mentioned in the issue of November, page 1065 and January, 1936, page 90, with certain new additions to the list of piece work operations.

Employees covered by this agreement are glove cutters.

The question of apprenticeship is left to the Joint Committee.

Hours are unchanged at 9 per day, 4 on Saturdays, a 49 hour week.

**PRINTING TRADES, MONTREAL.**—An Order in Council, approved May 9 and published in the *Quebec Official Gazette*, May 16, makes obligatory the terms of an agreement between The Association of Master Printers, L'Association des Maîtres Imprimeurs de Montréal (The Association of Master Printers of Montreal), certain individual Master Printers and the Montreal Typographical Union, Local No. 176, the Montreal Printing Pressmen and Assistants' Union, Local No. 52, the International Brotherhood of Bookbinders, Local No. 91, Le Syndicat Catholique et National des Typographes, Inc., (The National Catholic Union of Printers, Inc.), Syndicat Catholique et National des Pressiers, No. 1, Inc., (The National Catholic Union of Pressmen, No. 1, Inc.), Syndicat Catholique et National des Relieurs, (The National Catholic Union of Bookbinders), Conseil Syndicat Catholique des Métiers Alliés de l'Imprimerie Incorporée, (The Catholic Union Council of Allied Printing Trades, Incorporated), Amalgamated Lithographers of America, Local No. 27, Union Typographique Jacques-Cartier, No. 145 (Jacques Cartier Typographical Union, Local No. 145), L'Union Typographique Internationale, Local No. 856 (The International Typographical Union, Local No. 856), L'Union Typographique de Sherbrooke, Local 672 (The Typographical Union of Sherbrooke, Local No. 672), Le Syndicat National Catholique des Imprimeurs de St. Hyacinthe (The National Catholic Union of Printers of St. Hyacinthe).

Agreement to be in effect from May 16, 1936, to November 1, 1937, and thereafter from year to year until notice.

The agreement excludes: work on daily newspapers; lithography on metal; operators on typewriters, on gelatine processes and addressographs; operators on multigraphs, mimeographs, roneos, rotaprints, multilithes or any multi-copying machines of any description in letter shops or elsewhere provided such operators are limited to the production of facsimile reproduction of typewritten letters; art bookbinding. Newspapers published weekly or twice a week outside the Island of Montreal and a radius of 10 miles from its limits are excluded until September 1, 1936. If at that time no collective agreement has been presented for extension under this Act, the parties to this agreement may present an amendment to bring such work under this agreement.

The territorial jurisdiction includes the Island of Montreal and a radius of 100 miles from its limits in the Province of Quebec. Such territorial jurisdiction is divided into three zones: Zone I comprises the Island of Montreal and a radius of 10 miles; Zone II comprises the municipalities of Three Rivers, Sherbrooke, Sorel, Saint Hyacinthe, Valleyfield, Joliette, Granby, Saint Jean d'Iberville, Laprairie, Saint Jerome, and within 2 miles of their limits; Zone III comprises remainder of the territorial jurisdiction.

Hours: for the day shift 48 hours per week with no work after noon on Saturday; for the night shift, 45 per week to be worked during five nights. In shops where the standard shifts are shorter, such shorter shifts to be continued until the expiration of the agreement.

Overtime: time and one half for the first three hours for all work, either before or after the regular hours of each working day or night; over three hours, double time. Double time for work on Sundays and holidays (3 holidays in French shops and 7 in English shops).

The accompanying table shows minimum weekly wage rates for a 48 hour week for regular day work. In the case of apprentices' wages, only the range of wage rates is shown in this table, the rate at the beginning of apprenticeship (which rate in all classes is increased each six months) and the rate for the

last six months. In all cases the apprenticeship covers a period of five years except for women bookbinders for whom apprenticeship time is for three years.

Minimum hourly wages for night work 15 per cent higher than the hourly rate for day work.

In shops where wage scale is higher than specified in the agreement, such higher rates are to remain in effect until the expiration of the agreement. The Joint Committee may fix lower wage rates for handicapped workers.

The number of apprentices allowed is one apprentice to the first three journeymen or fraction thereof and one apprentice to each three additional journeymen. In the press departments, at least one pressman must be employed for every three presses or less; the remainder may be assistant pressmen, feeders or apprentices provided the apprentices do not exceed the number specified. Multi-copying machine operators are not included in this restriction of proportion of apprentices.

No piece work to be done in any shop.

A Joint Committee to be formed for supervising the carrying out of the agreement.

**BUILDING TRADES, JOLIETTE.**—An Order in Council, approved May 22 and published in the *Quebec Official Gazette*, May 23, makes obligatory the terms of an agreement between the Montreal Builders' Exchange, Inc., certain contractors of Joliette, and L'Association des Ouvriers de Joliette (The Workers' Association of Joliette).

The territorial jurisdiction comprises the counties of Joliette and Montcalm.

The agreement is in effect from May 23, 1936, to March 31, 1937, and shall be renewed automatically unless either party gives notice of change on or before February 1 of any year.

Hours are governed by Orders in Council under the Act respecting the limiting of working hours which provide in this district for a maximum of 8 hours per day and 40 hours per week, with the exception of contracts for a municipal or school corporation, fabrique or parish trustees or the provincial government or for an institution, association or corporation, at least 50 per cent of the cost of which work is guaranteed by the provincial government or by a municipal corporation or both, for which work a two shift system of 6 hours each for six days a week, making a 36 hour week for each shift, must be in effect between May 1 and October 1, if the cost of the work exceeds \$20,000. Any contractor may adopt this system on any work.

Work on Sundays and holidays, double time.

Hourly wage rates in all municipalities of a population of 4,000 or more and in all other municipalities for contracts the total cost of which is \$2,000 or more: bricklayers, masons and plasterers 60 cents; carpenters and joiners 50 cents; apprentices 20 cents for first year, 25 cents for second year, 30 cents for third year, 35 cents for fourth year; painters—contractors (personal services) 50 cents, journeymen painters 35 cents, apprentice painters 15 cents for first year, 20 cents for second year, 25 cents for third year, 30 cents for fourth year; cement finishers 40 cents; electricians—contractors (personal services) 60 cents, journeymen electricians 45 cents, apprentice electricians 15 cents for first year, 20 cents for second year, 25 cents for third year, 30 cents for fourth year; hod carriers 35 cents; lathers (wood or

metal) 40 cents; marble setters 50 cents, tile and terrazzo layers 40 cents; labourers 30 cents; ornamental iron workers—1st class erectors 50 cents, 2nd class erectors 40 cents; tinsmiths and roofers—contractors (personal services) 60 cents, journeymen 45 cents; plumbers and steamfitters—contractors (personal services) 60 cents, journeymen 45 cents; apprentice plumbers and steamfitters and tinsmith-roofers 15 cents for first year, 25 cents for second year and 35 cents for third year; enginemen—steam shovel, gas and electric 60 cents; enginemen—hoisting 45 cents; enginemen—gas mixer 40 cents; enginemen—compressor 40 cents; firemen—construction 40 cents; weather strippers 35 cents.

Hourly wage rates in municipalities of less than 4,000 on contracts, the total cost of which is less than \$2,000: bricklayers, masons and plasterers 50 cents; carpenters and joiners 40 cents, apprentices 15 cents for first year, 20 cents for second year, 25 cents for third year and 30 cents for fourth year; painters—contractors (personal services) 40 cents, journeymen 30 cents, apprentices 10 cents during first year, 15 cents during second year, 20 cents during third year and 25 cents during fourth year; cement finishers 30 cents; electricians—contractors (personal services) 60 cents, journeymen 45 cents, apprentices 15 cents during first year, 20 cents during second year, 25 cents during third year and 30 cents during fourth year; hod carriers 30 cents; lathers (wood or metal) 30 cents; marble setters 40 cents, terrazzo and tile layers 30 cents; labourers 25 cents; ornamental iron workers—1st class erectors 40 cents, 2nd class 30 cents; tinsmith-roofers—contractors (personal services) 60 cents, journeymen 45 cents; plumbers and steamfitters—contractors (personal services) 60 cents, journeymen 45 cents; apprentice plumbers, steamfitters and tinsmith-roofers—15 cents during first year, 25 cents during 2nd year, 35 cents during 3rd year; enginemen—steam shovel, gas or electric, 50 cents; enginemen (hoisting, gas mixer and compressor) 35 cents; firemen—construction 30 cents; weather strippers 30 cents.

A journeyman who due to advanced age or infirmity cannot give regular competent service may have his case referred to the Board of Examiners of the Joint Committee which Board may revise his wage rate.

For work outside the place of residence of the employee, travelling expenses and board to be paid by the employer.

For the trades of bricklayer, plasterer, mason, carpenter, joiner and painter, one apprentice allowed for each five journeymen or fraction thereof; for the trades of plumbers, steamfitters and tinsmiths, one apprentice per journeyman. Apprenticeship consists of 36 months of work under the supervision of a contractor approved by the Joint Committee; when an apprentice attends a special course in an industrial school, each study month to be equivalent to a month of apprenticeship if the studies be done jointly with the work.

Maintenance journeymen employed in churches, chapels or buildings used as churches or chapels, seminaries, universities, colleges, convents, monasteries, public or private hospitals, orphan asylums, asylums, refuges, charity workrooms to be paid \$18 per week. The employer may charge a maximum of \$3 per month for room if employee lives in the establishment, and of 25 cents per meal if employee boards in the establishment.

**FUR WORKERS, MONTREAL.**—An Order in Council, approved May 19 and published in the *Quebec Official Gazette*, May 23, makes obligatory the terms of an agreement between The Montreal Furriers' Association and the International Fur Workers' Union, Locals Nos. 66 and 67.

The agreement is in effect from March 9, 1936, to March 1, 1938. Thirty days before the expiration date the parties will negotiate a new agreement.

The territorial jurisdiction comprises the Island of Montreal and a radius of 50 miles from its limits. This territory to be divided into two zones: Zone I comprising the Island of Montreal and a radius of 10 miles from its limits and Zone II the remainder of the territorial jurisdiction. Within 60 days of the enforcement of this Order in Council, the main group of manufacturers operating in Zone II must enter into an agreement, in conformity with the Act, which agreement will later be an amendment to this Order in Council.

Hours: 40 per week. For the manufacturers 8 per day for the first five days of the week and for the retailers 7 per day on the first five days of the week and 5 on Saturdays. (This is a reduction of 4 hours per week from the hours in the previous agreement.)

No overtime permitted except during the months of January to June inclusive for all except trimmers who may work overtime during June. During the other months, no overtime permitted unless all the workers of the factory are fully employed. Overtime in any establishment shall not exceed 20 weeks and shall never extend after 9 p.m. All work after 5 p.m. on first five days of the week, all Saturday work for wholesalers and all work after 1 p.m. on Saturdays for retailers to be paid at time and one half. Employees to be entitled to be paid for the seven named legal holidays. If required to work on such holidays they will be paid time and one half in addition to the regular rate.

Minimum weekly wage rates: cutters—\$35 for 1st class, \$28 for 2nd class; male operators—\$28 for 1st class and \$20 for second class; female operators—\$20 for 1st class and \$15 for 2nd class; male finishers—\$24 for 1st class and \$20 for 2nd class; female finishers \$18 for 1st class and \$14 for 2nd class; examiners—\$24 for 1st class and \$12 for 2nd class; male apprentice cutters, trimmers, blockers and nailers \$20 for first class and \$12 for 2nd class; female apprentices to be paid according

to the orders of the provincial minimum wage board. (These weekly wage rates for a 40 hour week are the same as provided in the previous agreement for a 44 hour week, with the addition of the class of male finishers.)

In factories employing less than five workmen, no new male apprentices to be added during the term of this agreement; in factories employing from five to fifteen workmen, one new apprentice may be employed, and in factories employing over fifteen workmen, two new apprentices may be employed.

No employer to make any individual contracts with any employee nor exact or accept any cash deposits or other securities from any employee nor shall any agreement be entered into with an individual employee guaranteeing any length of employment.

No work to be given employees to be manufactured or worked upon at home. No contracting or sub-contracting or piece work allowed either inside the factory or at an outside plant or premises unless sent to factories working under the conditions and wage scale of this agreement.

The inspectors employed by the Joint Committee may visit the manufacturing establishments and examine work of employees and the books of the employer.

**BARBERS, COUNTY OF PORTNEUF.**—An Order in Council, approved May 4 and published in the *Quebec Official Gazette*, May 9 amends the original Order in Council for this trade (LABOUR GAZETTE, October, 1935, page 952) by making certain changes in the job rates.

**STONECUTTERS, HULL.**—An Order in Council, approved May 9 and published in the *Quebec Official Gazette* May 16, makes a slight change in the wording of the Order in Council for this trade, which does not change the summary which was published in the LABOUR GAZETTE, May, page 460.

**LONGSHOREMEN (INLAND NAVIGATION) MONTREAL.**—A correction is published in the *Quebec Official Gazette* May 9, to the Order in Council for these workers, which changes the wording of one sentence but does not affect the summary which was given in the LABOUR GAZETTE, May, page 460.

## INDUSTRIAL STANDARDS ACT OF ONTARIO

### Agreements Recently Approved by Orders in Council

**T**HE Industrial Standards Act of Ontario, the text of which was printed in the LABOUR GAZETTE, June, page 534, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in the industry in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours

of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If in the opinion of the Minister a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be

in force for a period not exceeding twelve months and thereupon such schedule shall be binding upon every employee or employer in such industry in such zone or zones to which the schedule applies, the schedule not coming into effect until ten days after publication of the Order in Council in *The Ontario Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Beginning with the July issue of the LABOUR GAZETTE, summaries are given in this article of the schedules which have thus been approved.

**MILLINERY WORKERS, PROVINCE OF ONTARIO.**—An Order in Council, dated April 22 and published in *The Ontario Gazette* May 2, makes binding on all employers and employees throughout the Province, the terms of a schedule governing the millinery industry.

The schedule is in effect from May 12, 1936, to February 28, 1937.

The schedule covers all those engaged in the manufacture of ladies' and children's hats except the following: hats for infants and children under 12 years of age; hoods, berets, toques, made solely from knitted materials and manufactured in knitting mills by the knitting processes; harvest hats. It is provided that the schedule does not include alteration workers employed in retail stores and engaged in and for the purpose of making customers' alterations required in the course of individual sales; however any retail establishment engaged also in manufacturing millinery for its own retail business and employing five or more employees in such manufacturing shall as to any employees so engaged be deemed to

be manufacturing millinery within the purpose of this schedule.

Hours: 8 per day for the first five days of the week, a 40-hour week. This clause was only to become effective if a similar provision were in effect in Montreal under the Collective Labour Agreements Extension Act. (These hours are to be continued in effect in Montreal until February 15, 1937, under an amendment to the Order in Council for this industry as noted in the LABOUR GAZETTE, March, page 275.) Sample makers may however work 4 hours on Saturday mornings, but not more than four sample makers to be so employed by any one employer.

Overtime to be paid at time and one-half. Overtime may only be worked when authorized by the Board (appointed under this schedule) through the chief inspector of the Inspection Branch, Ontario Department of Labour, permits to be limited to any 24 working days during the spring season and any 16 working days during the fall season, with a maximum of two and one-half hours overtime in any one day and of four days in any one week.

All workers to receive two holidays, Good Friday and Labour Day, with pay.

Minimum weekly wage rates: all hand blockers \$32, operators, blockers and cutters \$29, drapers \$19, trimmers \$15. (These are the same wage rates as in the previous schedule which was published in the LABOUR GAZETTE, August, 1935, page 736.)

All work to be on a time work basis; no piece-work allowed.

A Board of five is to be formed consisting of two members appointed by the employers, two by the employees and a fifth to be mutually agreed on, or, failing such agreement, appointed by the Minister of Labour. Such Board may fix lower wage rates for handicapped workers.

## Annual Survey of Education in Canada, 1934

The Dominion Bureau of Statistics has recently published its Annual Survey of Education in Canada, covering the year 1934. The report shows that expenditure on the public school systems was lower in 1934 than in 1926, although the attendance was 20 per cent higher in the more recent years, and a very high proportion of the increase was in the secondary and more costly grades. Relatively the greatest reductions were in the outlay for new buildings and equipment, but it is pointed out that teachers' salaries suffered severely in some quarters, as much as 40 or 50 per cent in the rural sections of some provinces. The report indicated that on the average each school district is individually responsible for the payment of more than 60 per cent of all the institutional education that its children receive, and for the cost of about 80 per cent of all the instruction received in the public elementary and secondary schools. "As there are over 23,000 independent local administrative units, or school districts,"

the report states, "this means that on the average each community of 450 people (or 100 families) is obliged to rely on its own resources for the greater part of the cost of its children's education."

A comparison is made in the report of the percentage of rural and urban children in school according to the census of 1931 showing that: "At all ages there is a higher proportion of urban than of rural children in school, but the difference is not very noticeable until the high school level is reached. There it becomes very marked, especially in the case of boys." Commenting on this trend, the report observes: "The percentage of country boys in school at the ages 15-19 is less than half the percentage of town boys, considering the Dominion as a whole. One rural boy in five is at school; two urban boys in five. In the prairie provinces, the proportion of town and city boys of these ages at school is more than half. The proportions range down to about one-third in Quebec. Among the

rural boys there is not much difference as between provinces (all being close to the ratio one in four or five) except in British Columbia where it is one in three, and in Quebec where it is about one in nine, at school. Large as is the discrepancy between the proportions of rural and urban boys in school, these statistics minimize it, even show it less than it is, for the following reason. Some boys raised in the country find employment in town or city before they reach the age of 20, thereby swelling the total number reported as city or town dwellers, and reducing the number reported as rural boys to a figure probably considerably smaller than the actual number raised in rural communities. If allowance could be made for this movement,

it is probable that less than one-fifth of country-raised boys, age 15-19, would be found in school, and nearly half of city-raised boys."

It is further indicated in the report that the percentage of rural girls between the ages 15-19 who attend school is 30.2, while the proportion of urban girls is 38.9.

In addition to enrolment figures for the various classes of schools and educational institutions, the report contains statistics covering enrolment in the following: technical and vocational educational schools; the Workers' Educational Association of Ontario; schools for the blind and deaf; junior Red Cross; Girl Guides; Boy Scouts; and Victorian Order of Nurses.

### Revised Regulations under the Stationary Enginemen's Act of Quebec

O.C. No. 1416, May 9, 1936, approves revised regulations under the Stationary Enginemen's Act. The following is a summary of the principal changes:—

Inspectors are now empowered to determine whether the regulations are being complied with and to require production of certificates provided for in the regulations. It is forbidden to employ any person not possessed of the proper certificate. The following are not governed by the regulations: persons operating cast iron sectional boilers used for low pressure heating, or boilers not exceeding 25 h.p. in butter and cheese factories; installations used for refining processes recognized as an auxiliary type by the Board of Examiners, provided operation of such installation is not a danger to operator or public, but pumps, over 9 inches in diameter having a piston speed of over 400 feet per minute, must be operated by a mechanic qualified under the Act and regulations.

The Board of Examiners may write to a candidate's employers to verify his references and ascertain the extent of his knowledge. All candidates must be British subjects, the former alternative of a five years' residence in Canada having been deleted. Candidates must return correct answers to 70 per cent of the questions instead of 60 per cent as formerly. Any candidate may be given an oral examination. Examinations may be held in any municipality as well as in the specified centres.

Provisions for examination and licensing of stokers which were included in the old regu-

lations have been omitted from the revision. As formerly, enginemen's certificates are of four classes but each class is now divided into grades A and B, the former entitling the holder to be employed in connection with a heating plant installation and the latter entitling to employment on a motive power or heating installation. A certificated engineman, before being employed in connection with a refrigerating installation, must pass an examination concerning his knowledge of such installations. Provisional permits to holders of certificates from other provinces are now good for one year instead of three months, as formerly. Provision is made for the examination of, and the granting of special certificates to, operators of steam portable machines and refrigerating machines driven by power other than steam.

The minimum age for a candidate for a fourth-class certificate is raised from 19 to 21 years. A stationary engineman is forbidden to carry on other duties simultaneously if these are of a nature to lead to neglect of his work as a stationary engineman. The Minister of Labour may decrease the period of apprenticeship required for any certificate in the case of a person who has completed a four years' course at a technical school.

The accidents reported to The Ontario Workmen's Compensation Board during the month of May numbered 4,574, as compared with 4,250 during April, and 4,734 during May of last year. The benefits awarded amounted to \$422,377.73, \$334,442.04 of which was for compensation and \$87,935.69 for medical aid.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, MAY, 1936

### Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight. In retail prices the cost of the weekly family budget was somewhat higher, a slight decline in fuel being more than offset by an advance in rent, while in wholesale prices the Dominion Bureau of Statistics' index number on a weekly basis was little changed, the tendency however being downward week by week during the month.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices was \$7.82 for the beginning of May, the same figure as for April, as compared with \$7.52 for May, 1935; \$6.67 for June, 1933 (the low point in recent years); \$11.17 for May, 1930; \$10.22 for May, 1922; \$16.92 for June, 1920 (the post-war peak); and \$7.43 for May, 1914. Of the list of foods included in the budget twelve were higher, the principal increases being in the prices of potatoes, meats and rolled oats. Nine commodities were lower in price, the most important being eggs and butter. Fuel showed a slight decline due to a seasonal fall in the price of coal, while rent was higher, increases being reported from several cities. Including the cost of fuel and rent with that of foods the total budget was \$16.36 at the beginning of May as compared with \$16.33 for April; \$15.97 for May, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.49 for May, 1930; \$20.57 for May, 1922; \$26.92 for July, 1920 (the post-war peak); and \$14.21 for May, 1914.

The index number of wholesale prices calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 continued to show little change, being, however, slightly lower than in April. For the week ended May 29 this index was 71.8 as compared with 72.1 for the week ended May 1, which was also the figure for April 3. At the end of May, 1935, the index number was 71.9. On a monthly basis the latest figures available are for April when the index stood at 72.2 as compared with 72.3 for May, 1935; 71.1 for May, 1934; 63.5 for February, 1933 (the low point in recent years); 93.4 for May, 1929; 98.5 for May, 1922; 164.3 for May, 1920 (the post-war peak); and 64.2 for May, 1914. During the month under review the principal basic commodities for which price declines were recorded were wheat and live stock. The former influenced by reports as to weather conditions moved lower during the greater part of the month and then recovered about half of the loss during the last few

days. The price of rubber, raw cotton, sugar and most non-ferrous metals showed little change. The decline in raw silk prices continued, cancelling the gains which had occurred in the latter months of 1935.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of May of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the

quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Meat prices for the most part averaged higher in May, recovering most of the decline recorded in April. In beef, round steak averaged 19 cents per pound as compared with 18.8 cents in April and shoulder roast 12.9 cents per pound as compared with 12.6 cents. Leg roast of mutton advanced from 22.1 cents per pound to 22.4 cents and fresh leg roast of pork from 21 cents to 21.2 cents. The price of lard has declined since the beginning of the year, averaging 15.9 cents per pound in May and 17.9 cents in January.

Eggs were lower in practically all localities, the Dominion average for fresh grades being 23.6 cents per dozen as compared with 28.1 cents in April and 41.5 cents in January. Prices were somewhat lower in the prairie provinces than in other parts of the Dominion. Reduced prices for milk were reported from several cities in the province of

Quebec and the Dominion average was fractionally lower at 10.2 cents per quart. Butter prices have been gradually downward since the beginning of the year, dairy averaging 26.8 cents per pound in May, 27.6 cents in April and 30.6 cents in January. Onions were generally higher in price, the Dominion average being up from 4 cents per pound in April to 4.7 cents in May. Substantial increases in the prices of potatoes were reported from nearly all localities in Ontario and other eastern provinces, while in the western provinces little change occurred. Prices in the prairie provinces were much lower than in other parts of the Dominion. The average price was \$1.62 per ninety pounds in May as compared with \$1.34 in April. Lower prices for

(Continued on page 560)

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada) and Other Countries; quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended May 29, 1936; monthly figures not yet available.

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 552)

United States anthracite coal were reported from several cities in Ontario and Quebec and the Dominion average price was down from \$14.87 per ton to \$14.72. Advances in rent for workmen's houses were reported from several cities.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$16; Windsor, Nova Scotia, \$16.50; Charlottetown, \$14.40; Moncton, \$16; Saint John, \$13; Quebec, \$13.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$13.50; Montreal, \$14.25; Ottawa, \$16.50; Kingston, \$14.50; Belleville, \$15; Peterborough, \$15.75; Oshawa, \$14.25; Toronto, \$14.50; St. Catharines, \$15; Hamilton, \$14.50; Galt, \$16.50; Windsor, \$12.50; Sudbury, \$17.50; Cobalt, \$18; Timmins, \$18.75; Sault Ste. Marie, \$14.50; Port Arthur, \$17; Fort William, \$17; Winnipeg, \$19.50.

From a report published recently by the National Safety Council Inc., United States,

it is interesting to note that 29 per cent of all industrial accidents result from the handling of objects, and constitute 17 per cent of compensable industrial accidents. The report also reveals that falls are the most important type of compensated industrial accident making up 22 per cent of all cases and resulting in 28 per cent of compensation awards.

From a recent bulletin issued by the Dominion Bureau of Statistics it is noted that Canada during the calendar year 1935 occupied sixth place in total international trade which is an improvement in position from eighth place in 1934 and ninth place in 1933. Canada's position in respect to exports has remained the same as it was in 1934, retaining fifth place amongst the exporting countries of the world. The Dominion retained its 1934 position of ninth in imports for 1935.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

The following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries appeared in the April issue of the *LABOUR GAZETTE*.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number, on the base 1930=100, was 91.9 for April, an increase of 0.2 per cent for the month. In the food and tobacco group, an advance in meat, fish and eggs was offset by declines in cereals and "other food and tobacco". Industrial materials and manufactures were 0.3 per cent higher, due chiefly to higher cotton and wool prices.

The *Statist* index number, on the base 1867-1877=100, was 85.8 at the end of April, a decline of 0.7 per cent, due principally to lower prices for textiles and animal food.

**COST OF LIVING.**—The index number of the Ministry of Labour *GAZETTE*, on the base July 1914=100, was 144 at May 1, showing no change from the previous month's level. A small decrease in food prices, chiefly milk and butter and in the fuel and light group was offset by a slight advance in rent and in clothing prices.

### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base 1914=100 (gold index) was 76 for April, a decrease of one point for the month. Every group showed some decrease except miscellaneous commodities which were slightly higher.

### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base 1913=100, was 103.7 for April, an increase of 0.1 per cent for the month, the largest increase occurring in hides and leather and in rubber.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 124.3 for April, an advance of 0.1 per cent for the month due to a small advance in food prices.

### New Zealand

**WHOLESALE PRICES.**—The Census and Statistics Office index number, on the base 1909-1913=1000 was 1383 for March, an increase of 2 points for the month, the increase being due to higher prices for foodstuffs, etc., of vegetable origin.

### United States

**WHOLESALE PRICES.**—*Bradstreet's* index number, which is based on the sum total of

the prices per pound of 96 commodities of common consumption, was \$9.8191 at May 1, a decrease of 0.4 per cent for the month. Increases in the food groups, building materials and miscellaneous commodities were more than offset by declines in the other groups.

*Dun's* index number (continued by Dun and Bradstreet, Inc.) which is based on the cost *per capita* of a year's supply of commodities was \$173.485 at May 1, a fall of 0.09 per cent for the month due to lower prices for foods, clothing and metals.

**COST OF LIVING.**—The index number of the National Industrial Conference Board, on the base 1923=100, was 84.3 for April, an advance of 0.2 per cent for the month, due entirely to an increase in rents. Food and sundries were unchanged, while clothing and fuel and light were slightly lower than for March.

## International Survey of Legal Decisions on Labour Law

The tenth issue of the International Survey of Legal Decisions on Labour Law, 1934-35, published at Geneva by the International Labour Office has been recently received. As usual the survey touched on many phases of labour law in England, France, Germany, Italy and the United States. The report states that "the purpose of the 'Survey' is to indicate the legal developments of Specific Social problems," national legal systems in various conditions being dissimilar.

The legal decisions in various countries are arranged as formerly under the following general headings: International Labour Law, general principles of labour law, including contracts, scope of labour law with regard to persons, etc., occupational organization, including collective agreements, and collective labour and economic disputes.

Organization of industrial undertakings including the idea of interdependence of the parts of the undertaking. Conditions of employment and the protection of the individual worker. Under this section topics dealt with are: contracts of employment, wages and salaries, hours of work, special protection, labour inspection, protection of health and safety.

As usual there is a section dealing with social welfare and insurance in which topics referred to are: unemployment relief and insurance, compensation or insurance in case of accidents in industry, agriculture, and dockers, sickness insurance, and invalidity and old-age insurance.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### New Brunswick Court Upholds Workmen's Claim Under Compensation Act

UNDER the New Brunswick Workmen's Compensation Act, an appeal from a final decision of the Workmen's Compensation Board may be made to the New Brunswick Supreme Court if a question of law or the jurisdiction of the Board is involved. A claim for compensation disallowed by the Board was recently appealed to the Court on the ground that the Board had exceeded its powers under the Act in excluding a certain industry from Part I of the Act, that is, from the collective liability system of workmen's compensation in force in New Brunswick.

The claim was made by a man who was the sole employee of the operator of a tug-boat on the St. John River. The employer had been assessed by the Board in respect of this employee and had paid his assessment of \$7.00. The Board based its rejection of the claim partly on the fact that the tug-boat was operating on the river and was not confined to harbour work only. Therefore, the Board pointed out, the industry was not within the scope of Part I because in Regulation I, made under the Act and gazetted on September 21, 1932, the industries within its scope were classified and Class 5 included tug-boats for harbour work only. Further, Regulation 2 excluded from Part I of the Act certain industries employing not more than a specified number of persons. Among these was "any boat or vessel...engaged in carrying freight, cargo or passengers from one part of the province" to another when five or fewer persons were employed.

On this last point, that of the exclusion of tug-boats under Regulation 2, the Court held that vessels "engaged in carrying freight, cargo or passengers" could not be considered to include tugs. Therefore, the operation of the tug-boat involved in the case was not excluded from the Act by this Regulation. As regards Regulation I, the judgment was to the effect that an industry expressly stated to be within the scope of Part I, as the operation of a tug-boat was included in the definition of navigation in the Act, could be excluded by the Board only in express terms. The fact that only tugs confined to harbour work were classified in Regulation I is not sufficient to exclude from the Act other tug-boats. Moreover, it was pointed out that, since, in another section of Regulation 2, tugs engaged in business taking them outside the province are excluded if they employ

less than 500 men, it appears from the Regulations themselves that tugs employed in harbour work only are not the only ones considered to be within the scope of Part I. As the tug-boat in question was engaged in towing logs, timberwood, etc., a more dangerous operation than towing boats in the harbour, such tugs would not likely be classified for the purposes of assessment with harbour tugs but in the class covering "transportation" of logs, etc.

"The exclusion of industries from the Act should not be left to intendment nor to the hazard of an oversight. The Act, being for the benefit of the workmen, should be beneficially interpreted and not otherwise." The appeal against the Board's decision was therefore allowed. *Haslett v. Workmen's Compensation Board*, New Brunswick Supreme Court, (1936) 2 Dom. Law Reports, 110.

### Contractors Engaged in Demolition of Buildings Not Affected by Montreal Building Trades Agreement

In the Circuit Court of the district of Montreal, on February 29, 1936, Chief Justice Archambault disallowed a claim for wages at the rate fixed in the Montreal building trades agreement, which was legalized under the Collective Labour Agreements Extension Act, on the ground that the agreement had been entered into by building contractors only and not contractor solely engaged in demolishing buildings like the defendant company. Since an agreement could be made binding by order in council only on persons engaged in the same industry as the parties to the agreement, the building trades agreement was of no effect as regards the plaintiff and his employer in the case before the Court. *Quantal v. Louis Pickard & Co., Ltd.* (1936) 74 Rapports Judiciaires de Quebec, Cour Superieure, 97.

### Building in Connection with Agriculture not under Collective Labour Agreements Extension Act

An action for wages put forward by a workman employed in building a barn on a farm operated by a religious organization, was rejected with costs by Mr. Justice Guibault of the Superior Court of Montreal on April 14, 1936. The plaintiff claimed additional wages at the rate fixed in the collective agreement applying to the building trades under the Collective Labour Agreements Extension Act. It was pointed out by the Court that an amendment to that statute

in 1935 provided that the building industry should be governed by the stipulation that no collective agreement made binding under the Act could be applied to the agricultural industry. While the sisterhood owning and operating the farm was chiefly a teaching organization, yet the farm contributed materially to their support and its operation was, beyond doubt, an agricultural industry within the meaning of the Act. *Lacroix v. Collet Freres (Ltée)*, (1936) 74 Rapports Judiciaires de Québec, Cour Supérieure, 162.

### Action for Minimum Wage Rate Upheld in Quebec

By a judgment of the Quebec Court of King's Bench on April 28, it was decided that, under the Women's Minimum Wage Act, an employee may bring an action, even after the termination of her employment, for the difference between the wages actually paid to her and the amount which should have been paid in accordance with the order of the Minimum Wage Commission fixing a minimum wage for the industry in which she was employed. The prescription, under the Civil Code, of an action for wages does not begin to run until after the termination of the engagement. The Superior Court of the District of Montreal had awarded the plaintiff on November 26, 1934, the amount claimed covering the period from February 27, 1932, when the minimum wage order became effective, until she left her employment on April 14, 1934.

The defendant appealed the judgment, contending that the amount awarded should be reduced to give the plaintiff the legal minimum wage rate only for the one year prior to the institution of the action. This argument was based on Article 2262(3) of the Civil Code of Lower Canada which stipulates that certain actions are prescribed by one year, among them being actions "for wages of domestic or farm servants, merchants' clerks and other employees who are hired by the day, week or month or for less than a year."

Four of the members of the Court of King's Bench held that the prescription of one year did not apply to actions for wages under the Minimum Wage Act. Mr. Justice Bond pointed out that the weight of the authorities was in favour of the application of Article 2260(6) to "every contract for the hire of labour unless such contract falls within the purview of the two following Articles 2261 and 2262"; that the prescription for one year laid down in Article 2262(3) did not apply to persons employed in factories; and that Article 2261 applied only to persons engaged for a year or more. He was, therefore, of the opinion that the case fell within the gen-

eral rule applicable to the hire of all labour and the period of prescription was five years.

It was, however, held by Mr. Justice Bond that it was unnecessary to consider the above argument in the case before him since Section 11 of the Minimum Wage Act provides:

When an employer pays an employee wages lower than those fixed by the Commission, such employee may recover the difference by a suit before any court of competent jurisdiction either during the course of her engagement or after the same has ended.

Mr. Justice Bond stated:

It would thus appear that the intention of the legislature was that, inasmuch as the employee was entitled to demand, even after the termination of her engagement, the whole of the difference between the wages received by her and those which should have been paid to her in virtue of the Act, no prescription began to run until the termination of the engagement. This occurred on the 14th of April, 1934, and her action was taken in May, 1934—hence no prescription had been acquired.

The appellant invokes the argument *ab inconvenienti*, and alleges that chaos would result in industry from the claims of dismissed employees hanging over the heads of employers for years like the sword of Damocles.

The answer to that argument, however, I think is simple. All that the employer has to do is to comply with the terms of the Act and see that the employees receive the minimum wages provided for by the Act, in which case the apprehended confusion will not arise.

For the reasons now given I would dismiss the appeal, with costs.

Mr. Justice Dorion was of the opinion that Article 2262(3) of the Civil Code applied to such an employee as the plaintiff. Since the Minimum Wage Act, however, expressly permitted employees to bring action for the difference between the wages paid and the amount due by virtue of the Act after their employment had ceased, the prescription which would ordinarily apply had not begun to run. He agreed, therefore, in rejecting the appeal.

Mr. Justice St. Jacques, with whom Mr. Justice St. Germain concurred, while holding that the amount awarded to the plaintiff by the Superior Court should be allowed, distinguished, however, between an action for wages as fixed in a contract and an action for the amount of wages due in accordance with a regulation made under the authority of a public statute. He was of the opinion that the statute suspends or interrupts, in favour of the employee, the prescription in Article 2262 of the right of action to recover wages which the law provides and the employer illegally retains.

Mr. Justice Galipeault dissented from the judgment of the other members of the court confirming the decision of the Superior Court. He considered that the action was not to be

distinguished from one for the recovery of wages. In his opinion, it was not an action "to enforce the law" as Chief Justice Green-shields of the Superior Court had expressed it. The Minimum Wage Act had made no change in the Civil Code which governs the matter of prescription. Only a specific amendment could make such a change. He was, therefore, of the opinion that the words "either during the course of her engagement or after the same has ended" in Section 11 of the Minimum Wage Act were of little or no importance for the settlement of the case. Since there were conflicting judgments as to the applicability of Article 2262 to such employees as the plaintiff, it seemed desirable that the legislature should make the position clear but in his opinion, the Article applied and wages could not be claimed for more than one year prior to instituting the action. He was in favour of allowing the appeal.

*Grover Knitting Mills Ltd. (defendant) appellant v. Miss Tremblay (plaintiff) respondent.* (1936) Q.R. 60 C.B.R. 414.

#### **Winnipeg Pensions By-law Applies to Civic Labourer Regularly Employed at Hourly Rate**

On March 30, 1936, Mr. Justice Dysart, of the Manitoba Court of King's Bench, gave judgment for the plaintiff in an action for a

declaration that he was entitled to a pension from the City of Winnipeg in accordance with the by-law establishing a pension fund for civic employees. The questions in dispute were whether the plaintiff was a "permanent employee" within the meaning of the by-law, whether he had served for fifteen years, and whether he was "unfit for further service in the employ of the city."

On the first question, the Court held that since the by-law covered persons employed by the hour, a labourer employed in the Waterworks Department, subject to call at any time, reporting twice daily for work and working for no other employer, was a "permanent employee."

As to his years of service, the evidence showed that the officials of his department had been of the opinion that he had been employed for fifteen years, that an accurate records of hours worked had not been kept by the city, and that several different calculations had been made. The Court considered it only fair to treat the plaintiff as having completed his fifteen years of service. As to his fitness for work, it was evident that he was not fit for manual work, the only kind he had ever done, and at 62 years of age he could not be expected to take up any other occupation. The plaintiff was therefore entitled to a pension of \$60 per month. *Tawny v. City of Winnipeg* (1936) 2 W.W.R. 123.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

**I**NDUSTRIAL employment in Canada at the beginning of June showed decided expansion, according to data tabulated by the Dominion Bureau of Statistics from 9,690 firms, each employing a minimum of 15 persons, the data being representative of all industries except agriculture, fishing, hunting and highly specialized business. The re-reporting firms had 963,513 employees at June 1, as compared with 940,218 in the preceding month. This advance, however, was smaller than the average gain between May 1 and June 1 in the years since 1920. The index of employment (with the average for the calendar year 1926 as the base equal to 100) stood at 102.0 at June 1, 1936, as compared with 99.5 at May 1, 1936, and 97.6 at June 1, 1935. At the beginning of June in the preceding fourteen years, the index was as follows:—1934, 96.6; 1933, 80.7; 1932, 89.1; 1931, 103.6; 1930, 116.5; 1929, 122.2; 1928, 113.8; 1927, 107.2; 1926, 102.2; 1925, 95.6; 1924, 96.4; 1923, 98.5; 1922, 90.3 and 1921, 87.7.

At the beginning of June, 1936, reports were forwarded to the Department of Labour by 1,785 local trade unions, involving a membership of 178,453 persons. Of these, 26,442 or a percentage of 14.8 were unemployed, contrasted with 15.1 per cent at the beginning of May, 1936, and with 15.9 per cent at the beginning of June, 1935.

Reports received during May, 1936, from the offices of the Employment Service of Canada showed a gain over April, 1936, in the volume of business transacted, as indicated by the average daily placements, but a decline from that of the corresponding month a year ago, logging and services being the industrial divisions mainly responsible for the increase under the first comparison and construction and maintenance for the loss under the second. Vacancies in May, 1936, numbered 29,070, applications 50,652 and placements in regular and casual employment 26,864.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was \$16.33 at the beginning of June as compared with \$16.36 for May. Slight seasonal decreases were recorded in the cost of foods and fuel, while rent averaged somewhat higher. Comparative figures for certain previous dates are: \$15.95 for June, 1935; \$15.41 for June, 1933 (The low point in recent years); \$21.44 for June, 1930; \$20.58 for June, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.27 for June, 1914. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 advanced week by week during June and was 72.7 for the week ended June 26 as compared with 71.8 for the week ended May 29. On a monthly basis this index was 71.8 for May (the latest month for which figures are available); 71.5 for June, 1935; 72.0 for June, 1934; 63.5 for February, 1933 (the low point in recent years); 93.4 for June, 1929; 105.3 for June, 1921; 164.3 for May, 1920 (the post war peak); and 64.4 for June, 1914.

The most recent statistics available reflecting industrial conditions in Canada are given in the table on page 566. The index of the physical volume of business comprising forty-five factors in industrial production and distribution, which are corrected when necessary for seasonal variation, was slightly higher in May than in the preceding month and six per cent higher than in May, 1935. Of the principal factors included in the calculation the indexes of mineral production and of electric power output were substantially lower in May than in April. In the former group exports of copper and nickel, as well as gold shipments, showed considerable decline. As compared with May last year both of these principal groups were higher. The manufacturing group continued the advance in progress since the beginning of the year and was higher, also, than in May, 1935. Construction showed improvement in May as compared with April but was lower than in May, 1935. In distribution

**MONTHLY STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA\***

\*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

†For the week ended June 26, 1936.

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations.

(4) Figures for end of previous month.

(5) Figures for four weeks ending June 27, 1936 and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending June 13, May 16, and April 18, 1936; June 15, May 18, and April 20, 1935.

(7) MacLean's Building Review.

the indexes of carloadings and of exports were lower than in the preceding month, while trade employment and imports showed gain. Each of these four sub-groups was higher than in May last year. Information available for June shows wholesale prices at somewhat higher levels both as compared with the preceding month and with June, 1935. This statement applies also to the figures for employment, carloadings, the production of sugar and the value of construction contracts awarded.

The number of strikes and lockouts recorded for June was fourteen, involving 2,004 workers and causing time loss of 4,014 man working days, the lowest since December, 1934. None of the disputes involved large numbers of workers for many days. In May, twelve disputes involved 2,911 workers with a time loss of 28,469 days, nearly all of which was due to strikes of loggers and sawmill workers in British Columbia. In June, 1935, there were 15 disputes, involving 5,531 workers with time loss of 42,140 working days, due chiefly to strikes of longshoremen and certain classes of water transport workers at Vancouver, B.C., loggers in the Nipigon district of Ontario and salmon fishermen in the Gulf of Georgia, B.C. Of the fourteen disputes in June, twelve were recorded as terminated, five resulting in favour of the employer, four in favour of the workers, a compromise settlement being reached in one case, while the results of two disputes are recorded as indefinite. Two disputes, involving approximately thirty workers, were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

**Industrial  
Disputes  
Investigation  
Act**

During the month of June a unanimous report was received from the Board of Conciliation and Investigation established to deal with a wages dispute between the

Winnipeg Electric Company and certain of its employees being members of Locals Nos. 1037 and 435, International Brotherhood of Electrical Workers. The report was accompanied by a signed agreement which had been reached between the disputing parties through the efforts of the Board. The text of the Board report in connection with this dispute is included in the account of recent proceedings under the Act which appears on page 571 of this issue.

Two applications for the establishment of Boards of Conciliation by the Minister of Labour were received—one application, from 43 members of the Gas Workers unit of One Big Union, being employees in the gas production department of the Winnipeg Electric Company; and the other from employees engaged in the industrial branches of all departments of the Algoma Steel Corporation, Limited, affecting approximately 792 employees.

The Minister of Labour also proceeded with the establishment of one board to deal with applications: (1) from employees of the Western Stevedore Company at Fort William, Ontario; and (2) from the employees of the Canadian National Railways at Port Arthur, Ontario, these disputes being practically identical in nature.

**Supreme Court  
Judgments to  
be appealed**

Elsewhere in this issue a review is given of the judgments rendered by the Supreme Court on the Social Legislation enacted by the Dominion Parliament during the parliamentary sessions of 1934-35.

It has been announced by the Minister of Justice, the Hon. Ernest Lapointe, that the Dominion Government had decided to apply at the present sittings of the Judicial Committee of the Privy Council for leave to appeal from the judgments concerning the constitutional validity of The Employment and Social Insurance Act; the Weekly Rest in Industrial Undertakings Act; and The Minimum Wages Act and the Limitation of Hours of Work Act.

The Minister of Justice also stated that he had been advised that some of the provinces intended to ask for leave to appeal judgments made in connection with other references, particularly those concerning the constitutional validity of section 498A of the Criminal Code and the Farmers' Creditors' Arrangement Act.

**Joint federal-  
provincial works  
program**

Announcement was made on July 1, by Hon. Norman McL. Rogers, Minister of Labour, of a joint federal-provincial works program totalling \$30,000,000 which is expected to result in lessening the relief burden of municipalities. It was also announced that there would be a reduction of 10 per cent in the grants-in-aid to the provinces during the months of July, August and September. The statement of the Minister was as follows:—

"As the result of agreements which have been under negotiation during the past few weeks between the Dominion and the nine Provincial Governments, a joint works program is now assured under which a sum of

\$30,000,000 will be expended during the present year as a direct stimulus to employment. This is in addition to an amount of over \$40,000,000 which will be spent by the Dominion Government on federal projects for which provision was made in the special supplementary estimates.

"An important provision in the new agreements is a definite stipulation that at least 50 per cent of those employed on the \$30,000,000 joint works program shall be taken from relief rolls. This will have the result of reducing the relief burden of municipalities and would also make it possible to determine the direct effect of public works projects as an aid to the relief situation.

"Certain other features of the new agreements with the provinces deserve special mention. The projects covered by the agreements will consist very largely of highways but a particular effort has been made to concentrate on highway construction which will be developmental in its ultimate effects through the stimulus it will afford to two of the major industries of the country, namely, the mining industry and the tourist trade.

"National parks have long been recognized as one of the outstanding tourist attractions in Canada. This year provision has been made for two additional parks in Nova Scotia and Prince Edward Island. It is also expected that the site of a park in New Brunswick will be selected before the next session of Parliament. In provinces where national parks are now located, provision has been made in the new agreement for the construction or improvement of main highways leading to the parks from the international boundary. At the same time provision is being made for the improvement of other international gateways to Canada in order to facilitate tourist travel.

"Through the Department of Mines in Ottawa, arrangements have been made with several provinces for the construction of roads into proved gold mining areas where development has been retarded by lack of adequate communications. The Dominion Government through the Department of Mines is paying two-thirds of the cost of construction of these roads. This assistance to the mining industry is in addition to the policy announced in the Budget of relieving from income tax for three years new mines which come into production during the next four years. It is expected that mining development in Canada will benefit greatly from this policy with a resultant improvement in the employment afforded by this expanding industry.

"In provinces where Farm Settlement Schemes have been in operation and where

drought conditions have prevailed during the past few years, the Dominion Government is contributing to rehabilitation schemes through which relief settlers may be restored to economic independence and removed from relief rolls at an early date.

"In view of the improvement in general employment and in anticipation of the reduction of relief rolls through the joint works program, it has been decided to reduce by 10 per cent the grants-in-aid to the provinces during the midsummer months of July, August and September. This is in addition to the 15 per cent reduction announced on April 1. It will be recalled that the grants-in-aid were increased by 75 per cent in December last for the ensuing winter months. Even with the two subsequent reductions therefore, the Dominion grants to the provinces are substantially higher than they were a year ago.

"It is provided in the new agreements with the provinces that the grants-in-aid shall be subject to a quarterly review. Before the next revision takes place in September, it is expected that the National Employment Commission will have carried out a re-registration of those on relief and that any new readjustment of the form and amounts of grants-in-aid will be based on an analysis of the actual relief situation in each of the provinces. The recent revisions have taken the form of horizontal percentage increases or decreases as applied to the grants-in-aid which were in effect when the present Government came into office last October."

#### **Bill to amend the Combines Investigation Act**

A Bill to amend the Combines Investigation Act was passed by the House of Commons on June 12, 1936.

The Bill, No. 97, failed to become law after its principal provision was twice rejected in the Senate. The main purpose of the measure, as introduced by the Prime Minister on June 11, was to remove a provision inserted in section 24 of the Combines Investigation Act in 1935 at the instance of the Senate, which had the effect of preventing documents which any witness was required to produce in an investigation under the Act from being used against him in any prosecution which might subsequently be held. Bill No. 97, by restoring this clause to the form in which it had been in effect up to the time of the 1935 amendments, would have abolished the exempting provision made last year with regard to documents. The Combines Investigation Act Amendment Act of 1935, which became effective on October 1, 1935, was the

first law amending the Combines Investigation Act since the Act came into force in 1923.

The House of Commons amendment regarding documentary evidence was rejected in the Senate on a vote in Committee of the Whole on June 18, 1936, and the Bill was passed by the Senate on June 19, with this principal clause omitted. On motion of the Prime Minister, supported by the Leader of the Opposition and by Mr. J. S. Woodsworth, M.P., (leader of the Canadian Commonwealth Federation group) the House of Commons on June 20 refused to concur in the Senate's amendment to the Bill, and the Senate, following a vote, thereupon again insisted on its amendment. In the House of Commons on June 22, the day before prorogation of the session, the Prime Minister stated that the government would allow the matter to stand for the present and that it proposed to proceed again at an early stage next session with amendments to the Act.

### Employment of Canadian Seamen

The House of Commons Standing Committee on Industrial and International Relations on June

15 tabled its report with respect to the employment of white Canadian citizens on Canadian subsidized ships. After considering submissions from various interested organizations the Committee made its recommendations in two sections, covering ships on the Atlantic and Pacific Coasts.

In regard to conditions on the Atlantic Coast, the report referred to a statement of the Canadian National Steamships (West Indies) Limited, in which it was shown that "while no Orientals were employed, and all, with one exception, were British subjects, it is only right that it should be pointed out in this connection that, out of 793 men employed as shown on the list, 365 were not Canadian citizens. This means that 46 per cent of those employed were other than Canadians. It is also pointed out in the same statement that, while 428 British whites are domiciled in Canada, the others are not, which means a big loss financially to Canada."

The Committee also found a large number of natives from the West Indies employed in the Stewards' and Firemen's Departments of these boats. Accordingly, the Committee recommended that "in so far as the Atlantic Coast is concerned, the Canadian National Steamships Limited be advised that it is not suggested nor desirable to change the general set-up of the Officers and Engineers in so far as Canadians are concerned, but that this Company be requested to employ a greater number of Canadian citizens, particularly as

applying to positions in connection with the Steward's and Firemen's Departments, and your Committee recommends that at least 50 per cent of those employed in these two departments be Canadian citizens, domiciled in Canada."

Respecting Pacific Coast shipping, the Committee's enquiry revealed that on the Canadian-Australian line (which receives an annual subsidy from the Canadian government of \$300,000) only eight Canadians were employed in crews totalling 510 men.

Referring to Oriental shipping the report stated that this type is chiefly carried on by the Empress boats of the Canadian Pacific Railway trans-Pacific Service and added:

"The total number of men employed to man them is 2,033, of whom 265 are White British, engaged as officers and engineers. The remaining 1,768 are Chinese, comprising 277 deck-hands, 558 in the engine-room, and 933 victuallers. It is claimed by the Company that, as much of their passenger trade, namely 67 per cent, through and local, is Oriental, this type of labour is not only cheaper, but infinitely more satisfactory than white labour, since the latter could not be gotten to cater to Oriental passengers on the one hand, or mix with Oriental labour on the other. It is moreover claimed by the Company that the service is now supplied at a serious yearly loss, and that the extra cost involved in the substitution of Canadians for Orientals would make the service practically impossible of operation."

"The Committee therefore recommended that (1) the Canadian-Australian Line, in view of the small number of Canadians employed," be requested to afford Canadian seamen a reasonable degree of employment at the earliest possible convenience; and (2) "that, as up to the year 1913 the decks of the Empress boats were manned by white seamen, and in as much as the deck service is an important and responsible branch of the work of these boats, the Canadian Pacific Railway Company be requested to replace the Orientals now so employed by Canadian seamen, and that this change be made at the Company's earliest opportunity."

### Royal Commission on Anthracite Coal

Dr. H. M. Tory, whose appointment as a Royal Commissioner to investigate conditions in the marketing of anthracite coal in Canada was

reported in the June Labour Gazette, announced on June 30 that public sessions for the taking of evidence would open in Montreal on July 8. Bernard Bissonnette,

K.C., has been named by the Minister of Justice to act as Dominion Government counsel in the investigation. It is expected that hearings will follow in the cities of Quebec and Toronto.

### **Safety Awards to Quebec industries**

According to a report made to the Board of Directors of the Quebec Society for the Prevention of Industrial Accidents there was a decided increase in industrial accidents in the year 1935 as compared with 1934. It was suggested that this increase was attributable to the larger number of "green hands going to work and the loss of dexterity on the part of more experienced workers after a long lay-off." The report stated that such a situation required stricter plant supervision.

Cups were presented to the winners in the inter-plant safety competition sponsored by the Society. The Hon. C. J. Arcand trophy for outstanding performance among the firms in the contest was won by the Sherwin-Williams Company of Canada, Limited, for operating 2,772,444 man-hours in 1935 without a lost-time accident. In the garage section, Gerard Automobile Incorporated, won permanent possession of the award for that group by ranking first for the third successive year and having no accidents in 1935.

Other winners were: General section, Sherwin-Williams Company of Canada, Limited; the Dominion Glass Company, Limited, and Consolidated Optical Company of Nicolet, Quebec; metal section, Steel Company of Canada, Limited; pit and quarry section, Canadian Industries Limited of Beloeil, Quebec; bakeries section, Le Pain Moderne; and dairies section, Guaranteed Pure Milk Company Limited.

### **Review of Industrial Relations program at Trail, B.C.**

Reference has been made in the LABOUR GAZETTE from time to time concerning various phases of the extensive program of the Consolidated Mining and Smelting in the field of industrial relations. In the last session of Parliament, the industrial relations policy of this company was reviewed in a speech by Mr. W. K. Esling, M.P. for Kootenay West. Mr. Esling dealt with the outstanding features of the company's program in improving employer-employee relationships; in its apprenticeship system; in its institution of the five-day week during the depression; in its grievance plan; in its pension system; in its housing scheme and its employee stock ownership policy, etc.

### **Profit-sharing and co-partnership in Great Britain in 1935**

According to the latest available information, the total number of undertakings in Great Britain and Northern Ireland practising profit sharing at the end of 1935 was 414. Six firms had each two separate schemes in operation, so that the total number of schemes was 420, as compared with 427 at the end of 1934. About 382,000 workpeople were employed in the 414 businesses concerned, of whom about 227,000 were entitled to participate in the benefits of the schemes.

Statistics indicate that while the number of schemes in operation had increased from 495 at the end of 1926 to 515 at the end of 1929, there has been a continuous decline since the latter year, leaving the number of operative schemes considerably less at the end of 1935 than in 1926.

It was stated in the June issue of the LABOUR GAZETTE, p. 478, that the reports of the Dominion Bureau of Statistics on Construction in Canada in 1934 and on Earnings of Employees in Trade and in Theatres in 1933 would be reviewed in this issue. Owing to the large amount of other matter this is being postponed for a later issue.

The Bill introduced into the United States Congress to enact separately the price fixing provisions of the Bituminous Coal Conservation Act, following the decision of the United States Supreme Court that the Act was unconstitutional, was reported in the LABOUR GAZETTE for June, p. 480, to have been adopted by Congress. Later information is that while the Bill was passed by the House of Representatives, it was not finally voted on by the Senate, prior to adjournment.

A recent news despatch from Brussels, Belgium, states that the Belgium Chamber of Deputies has unanimously passed the minimum wage and paid vacation bills presented by the government as part of its strike arbitration program.

The *Saskatchewan Gazette* dated June 15, 1936, contains an Order in Council of May 30, 1936, declaring the Liquor Board of that Province within the scope of The Workmen's Compensation Act. The Liquor Board, by the Order is to be considered as an industry, to be placed and assessed under Class 18. The Order was to become effective "on, from and after the 18th day of June, 1936."

The *British Ministry of Labour Gazette* for June contains a survey of profit-sharing and co-partnership schemes in operation in Great Britain during 1935.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**D**URING the month of June two applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation were received in the Department of Labour as follows:—

1. From 43 employees engaged in the gas production department of the Winnipeg Electric Company, being members of the Gas Workers Unit of the One Big Union. The dispute relates to the employees' request for increased wages.

2. From employees engaged in the industrial branches of all departments of the Algoma Steel Corporation, Limited. Approximately 792 employees, members of the Algoma Steel Workers Union, are stated to be directly affected by the dispute, which grew out of the employees' request for increased wages, an eight hour day and improved working conditions.

The two applications above mentioned were under consideration at the close of June.

### Boards Established

Reference was made in the June issue of the *LABOUR GAZETTE*, page 481, to the receipt in the Department of Labour of two applications under the Industrial Disputes Investigation Act (1) from employees of the Western Stevedore Company at Port William, Ontario, and (2) from employees of the Canadian National Railways at Port Arthur, Ontario. The employees' request for increased wages and certain changes in working conditions was stated to be the cause of the dispute in each case, the men affected being stevedores, checkers, sealers, coopers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. These two disputes being practically identical in nature, the Minister proceeded during June with the establishment of one board to deal with the two cases, the personnel of which is as follows: Mr. Robert Jacob, K.C., of Winnipeg, Manitoba, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other board members, Messrs. W. C. Hamilton, K.C., of Winnipeg, and Fred Bancroft, of Oakville, Ontario, nominated by the employers and employees respectively.

The Minister of Labour established a Board of Conciliation and Investigation on June 15 to deal with a dispute between the Hamilton By-Product Coke Ovens Limited and its stationary engineers and operators, and appointed Mr. Fred Bancroft, of Oakville,

Ontario, a member of the same on the recommendation of the employees concerned. The application in this matter was received in the Department of Labour during May (see *LABOUR GAZETTE*, June, 1936, page 481). Thirty-three employees, members of Local Union No. 700, International Union of Operating Engineers, were stated to be directly affected by the dispute, which relates to the employees' request for increased wages and improved working conditions. The personnel of this board had not been completed at the time of going to press.

A Board of Conciliation and investigation was also established by the Minister of Labour during June to deal with a dispute between the Corporation of the City of Edmonton and certain employees of the Edmonton Street Railway, being members of Local Division No. 569, Amalgamated Association of Street and Electric Railway Employees of America. On the recommendation of the employees concerned Mr. Alfred Farmilo, of Edmonton, has been appointed a member of the board. The original application in this matter was received in the Department of Labour on March 9, 1936 (see *LABOUR GAZETTE*, April, 1936, page 309). That application was considered defective in certain respects and an amended application was submitted to the Department by the employees in April (see *LABOUR GAZETTE*, May, 1936, page 396). The amended application appeared to meet the requirements of the Act, and the applicants also submitted a sworn statement in support of their claim that a majority of the motormen directly affected had voted in favour of a strike in the event of a board not being established.

### Other Proceedings

It was reported in the *LABOUR GAZETTE* for January, 1936, page 6, that an application for the establishment of a Board of Conciliation and Investigation had been received from mine workers employed by the Lethbridge Collieries, Limited, at Lethbridge, Coalhurst, and Shaughnessy, in the province of Alberta. The matters in dispute included the men's request for recognition of a joint committee of the employees, payment of wages in cash instead of by cheque, and a rotation system of employment; also certain grievances in regard to alleged excessive electric light charges. The number of mine workers directly affected was stated to 684. The

Western Representative of the Department of Labour conferred in January and March with officials of the company, and with representatives of the employees, and suggested that the points in dispute should be dealt with during negotiations which were to take

place shortly in regard to renewal of the working agreements expiring on March 31. The Department was subsequently advised that agreements had been reached covering wages and working conditions at the Lethbridge and Shaughnessy mines.

### **Report of Board in Dispute between the Winnipeg Electric Company and its Employees, Members of the International Brotherhood of Electrical Workers**

A unanimous report was received by the Minister of Labour on June 13 from the Board of Conciliation and Investigation established to deal with a wages dispute between the Winnipeg Electric Company and certain of its employees, 50 in number, being members of Locals Nos. 1037 and 435, International Brotherhood of Electrical Workers. The report was accompanied by a signed agreement which had been reached between the disputing parties through the efforts of the board.

For several years the wages of the employees concerned in this dispute had been subject to a deduction of 15 per cent. During the past year or two, however, the company granted these employees two weeks' holidays with pay in lieu of a wage increase. The agreement now consummated provides for an increase in wages of 6 per cent as from May 1, 1936. While no provision is made in the agreement for holidays with pay, the company, in consideration of the agreement becoming operative as from May 1, instead of February 1, the date on which the previous agreement expired, granted to all employees of the groups affected by this dispute one week's holidays with pay for this year. Attached to the board's report is a letter addressed by the Vice-President in charge of operations of the Company to the Business Manager of the Union, covering the understanding reached in regard to holidays.

The Board of Conciliation and Investigation which dealt with this dispute was composed as follows: Mr. W. C. Hamilton, K.C., of Winnipeg, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other board members, Mr. C. A. Clendening, of Winnipeg, nominated by the company, and Mr. Fred Bancroft, of Oakville, Ontario, nominated by the employees.

Following is the text of the report of the Board of Conciliation and Investigation in this matter:—

#### **Report of Board**

The Honourable the Minister of Labour,  
Ottawa, Ontario.

*Re Industrial Disputes Investigation Act and re differences between the Winnipeg Electric Company and certain of its employees, members of Locals 1037 and 435 International Brotherhood of Electrical Workers.*

Sir,—The Board of Conciliation and investigation appointed by you to enquire into the above dispute, met in Winnipeg on May 29 and 30, and on June 1, 2, 3, 4, 5, 6, 8, 9, 10 and 11.

The Company was represented by three of its officers: Mr. C. H. Dahl, Vice-President in charge of operation; Mr. L. Palk, Vice-President in charge of executive matters; and Mr. W. E. Blodgett, Vice-President in charge of finances and accounting. The representatives of the employees were Mr. E. Ingles, Vice-President, International Brotherhood of Electrical Workers for Canada; Mr. J. L. McBride, business manager of Locals 1037 and 435, and a member of the general executive Board of the International Brotherhood of Electrical Workers; and Mr. C. W. Barrett, President of Local Union 1037.

At the first meeting the members of the Board were duly sworn and received copies of the reference. The Board first proceeded to a consideration of the matters to be dealt with in order to determine the nature of the differences. Afterwards, the Board requested the representatives to outline the disputes so that the issues between the parties and the difficulties attending them, might be made clear.

The members of the Board, after considering the reference, were unanimously of the opinion that this dispute was one of those which necessitated the application of the spirit of the Industrial Disputes Act, and accordingly proceeded to endeavour, by conciliatory methods to effect an agreement between the parties.

In addition to the frequent sittings of the Board above mentioned, many conferences were held by the parties without any of the members of the Board being present. With the consent of the Chairman, two members of the Board individually conferred with the respective parties to the end that an adjustment might be implemented. At various times when it seemed particularly difficult to reconcile the opposing views, the Board fully discussed the position with the parties and persuaded them to continue their negotiations.

As a result of the policy adopted and the steps taken in furtherance thereof, the parties concluded an agreement, which was completed before the Board, and an original of which is submitted herewith. In addition to the terms of the agreement there is an understanding as to holidays which is set forth in a letter from Mr. Dahl to Mr. McBride, a duplicate original whereof is also submitted with this report.

The agreement, as appears from article 1 thereof, is, by its terms applicable to the employees who are members of Locals 1037 and 435 of the International Brotherhood of Electrical Workers, being the employees involved in the dispute.

Although the sittings, negotiations and conferences were prolonged and attended with many difficulties, they were marked by a complete lack of rancour or anything of an acrimonious character. Throughout the entire proceeding, all representatives of each party showed unflinching courtesy to the other, as well as to the members of the Board. This, in itself, greatly assisted in achieving the end.

The Company intimated that there are a few men who claim to come within the classification who do not belong to either of the above mentioned International Unions. In view of the fact that the representatives of both of the parties to the present matter have expressed their complete satisfaction with the agreement hereby submitted, the members of the Board feel that no employee covered by the classification can possibly suffer by reason thereof during its lifetime.

All of the above is respectfully submitted.

DATED at Winnipeg this 12th day of June, A.D. 1936.

(sgd.) W. C. HAMILTON,  
*Chairman.*

(sgd.) C. H. CLENDENING,  
*Member of the Board.*

(sgd.) FRED BANCROFT,  
*Member of the Board.*

#### WINNIPEG ELECTRIC COMPANY

Winnipeg, Canada, June 9, 1936.

Mr. J. L. McBRIDE,  
Business Manager,  
Locals No. 1037 and No. 435,  
International Brotherhood of  
Electrical Workers,  
165 James Street East,  
Winnipeg, Manitoba.

DEAR SIR,—This letter will confirm our statement to members of the Board of Conciliation to-day that in consideration of the new wage agreement, the terms of which have just been concluded, being made operative as of May 1, 1936, instead of February 1, 1936, and in further consideration of the fact that the employees covered by this agreement voluntarily accepted reductions in their rates of pay in 1932 three months, or thereabouts, before the employees of other Company Departments, the Company will this year grant all employees of the groups concerned one week's holiday with pay. This letter is not to be construed as applying to any subsequent year.

Article No. 7 of the Agreement which relates to the manner in which employees may obtain holidays without pay shall in no way be interfered with by the provisions of this letter, but in actual practice the effect of the provisions of this letter will be that instead of employees taking two weeks without pay, that they will for this year receive pay for one of the weeks so taken. These holidays are confined to such employees as would in the ordinary course of events be entitled to holidays if the holiday clause in agreements with Locals No. 1037 and 435 corresponded with holiday clauses in wage agreements with employees of other Company Departments.

Yours very truly,

(sgd.) C. H. DAHL,  
Vice-President i/c Operation.

#### Provisions of Agreement

AGREEMENT BETWEEN WINNIPEG ELECTRIC COMPANY AND LOCALS NOS. 1037 AND 435 OF THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS.

WITNESSETH that the parties hereto agree as follows:

#### Article 1

THAT this agreement shall become effective as of May 1, 1936, and remain in effect until April 30, 1937. It covers those employees who are members of the above Locals in the classifications hereinafter referred to and shall be posted for information and government of such employees.

#### Article 2

THAT the Company will not discriminate against any employee covered by this Agreement for being a member or not a member of the Union.

In the employment of men by this Company, in the classifications covered hereby, members of the International Brotherhood of Electrical Workers shall have the preference.

## Article 3

SHOULD any employee subject to this Agreement believe he has been unjustly dealt with or that any provision of this Agreement has been violated, he shall make a statement of the case in writing to the Grievance Committee. If, after investigation, the Committee find the complaint justifies further action, they shall take the matter up with the proper authorities and endeavour to settle it satisfactorily to all concerned.

## Article 4

Any employee covered by this Agreement who is discharged shall, upon request, be furnished with a written statement of the cause.

## Article 5

*Section A—Day Men—Hours*

Eight hours shall constitute a day's work from 8 a.m. to 12 o'clock noon, and from 1 p.m. to 5 p.m. The hours on Saturday shall be from 8 a.m. to 12 o'clock noon. Forty-four (44) hours shall constitute a week's work.

Saturday afternoon and other time worked over the above hours shall be paid for at the rate of time and one-half except that from 12 o'clock Midnight to 8 a.m., also Sundays and Legal holidays shall be paid for at the rate of double time. Legal holidays shall be as follows: Sundays, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, New Year's Day and Civic Holiday.

*Section B—Shift Men—Hours*

All men assigned to do shift work shall work one or other of the following shifts: 8 a.m. to 4 p.m.; 4 p.m. to 12 midnight; 12 midnight to 8 a.m. Eighty-eight (88) hours shall constitute two week's work, such hours to be worked as mutually arranged between the parties to the Agreement.

Shiftmen shall be paid at the rate of double time for all hours worked outside of shift hours except for the first 4-hour period of time following the regular shift, which period if worked in shall be paid for at the rate of time and one half.

## Article 6

Any employee who has worked overtime shall not be laid off to equalize overtime.

Any employee called out in the case of emergency after 9 p.m. shall receive not less than four hours' pay at the regular day rate.

Any employee who has worked twelve (12) consecutive hours' overtime and is required to continue, shall be paid the overtime rate until released from work, but the Company may, at its option, instruct any employee to lay off after having worked twelve (12) consecutive hours' overtime whether this period should conflict with the first paragraph of this article or not.

## Article 7

Employees desiring two weeks' holidays shall notify the Superintendent in Charge at least fourteen (14) days prior to date of holidays, and when satisfactory arrangements are made they shall be allowed the time off.

## Article 8

THAT employees sent to do out of town work shall be provided with transportation

and board in advance with no loss of working time until their return. This is applicable only in the case of out of town work lasting not more than one month.

THAT all men hired to do out of town work shall be provided with transportation in advance, but shall not be provided with board, or, in the alternative, if provided with board, shall be paid twelve (12) cents an hour less than men working in the city.

THAT all such men receive expense account, on receipt of vouchers for same, within seven (7) days.

THAT any man dismissed from work when away from town shall receive transportation to town.

THAT out of town work shall be work outside of Limits of the City of Winnipeg, but shall not apply to work done in the St. Boniface, St. James or West Kildonan Sub-stations. Board will not be provided for men who return to town the same night.

## Article 9

THAT all employees shall receive their pay semi-monthly during working hours on a specified pay day. If the regular pay day falls on a Sunday or Holiday, the day preceding shall be considered pay day.

## Article 10

*Journeyman:*—No man shall be entitled to Journeyman's rating until he shall have had four year's or more experience in the branch of the trade in which his classification falls as listed in Article 18. This clause shall not be retroactive.

*Apprentice:* Shall be an employee who has not had four years' experience in one or more branches of the trade and who is serving a regular apprenticeship at the trade. An apprentice shall be required to work only under the supervision of a Journeyman, except for the last six months of his apprenticeship. An apprentice shall not be required to work overtime, except in cases of emergency. Except where Journeymen Linemen are not to be obtained, the rate of Apprentices to Journeymen shall not exceed one to four.

## Article 11

Order wagon gangs shall consist of two journeymen linemen and a driver who shall do ground work. The employee in charge shall receive sub-foreman's pay.

This article shall not apply to troublemen.

## Article 12

All trucks shall be provided with suitable covers to protect men from inclement weather.

## Article 13

That Seniority with efficiency shall prevail in all Departments. That no employee shall have any claim to seniority until he shall have been continuously employed for a period of six months. After six months' continuous employment seniority will be established dating from the time employee entered service and shall continue for twelve months after being laid off.

## Article 14

That in case of a man moved to a higher position he shall receive the rate of pay for that position.

## Article 15

When, in the opinion of the Company, it is necessary to reduce the number of employees, they shall be laid off in order of seniority, provided that efficiency shall be the governing factor.

If more employees are required, the last man laid off, if available, shall be given the preference of re-employment, provided that efficiency shall be the governing factor.

## Article 16

*Section A.*—All wires carrying a voltage of 750 volts or over to ground shall be classed as high voltage wires.

*Section B.*—When work is to be done on high voltage wires or equipment, two Journeymen must be assigned to the job and shall not be required to work on two different wires at the same time. This shall not apply to Troublemakers or Linemen on emergency trucks.

## Article 17

When necessary, badges shall be supplied free and employees will be responsible for same.

That employees covered by this Agreement shall be granted free transportation on all street car lines of Winnipeg Electric Company and all City Bus service where regular fares apply.

## Article 18

*Schedule of Wages*

The Wage Schedule for the period, May 1, 1936 to April 30, 1937, shall be on the scale set out below, subject to nine (9) per cent deduction throughout.

Linemen	Per Hour
Foremen.. . . .	.98½
Troublemakers and Linemen on Emergency Truck.. . . .	.94½
Sub-Foremen.. . . .	.94½
Linemen Journeymen.. . . .	.92½
Apprentices (Linemen)	
1st 12 months.. . . .	.63
2nd 12 months.. . . .	.71
3rd 12 months.. . . .	.79
4th 12 months.. . . .	.87
Meter Shop Foremen.. . . .	.90½
Meter Installers.. . . .	.85½
Meter Repairers.. . . .	.85½
Helper Apprentices:—	
1st 12 months.. . . .	.40
2nd 12 months.. . . .	.50
3rd 12 months.. . . .	.60
4th 12 months.. . . .	.68½
Cable Splicers (When working in this Capacity).. . . .	.98
Linemen hired to do out of town work.. . . .	.92½
Linemen hired to do out of town work, board and.. . . .	.80½
Foremen hired to do out of town work.. . . .	.98½
Foremen hired to do out of town work, board and.. . . .	.86½
Lamp Trimmers.. . . .	.73½
Station Maintenance Men (Jour- neymen).. . . .	.89
Helpers:—	
1st 12 months.. . . .	.40
2nd 12 months.. . . .	.50
3rd 12 months.. . . .	.60
4th 12 months.. . . .	.68½

IN WITNESS WHEREOF the Parties herein have duly executed these presents.

SIGNED on behalf of Locals Nos. 1037 and 435, of the International Brotherhood of Electrical Workers.

(Sgd.) C. W. Barrett.  
(Sgd.) M. W. McElrea.  
(Sgd.) A. H. Gray.  
(Sgd.) W. Anderson.  
(Sgd.) J. A. McPherson.  
(Sgd.) J. L. McBride.  
(Sgd.) E. Ingles, I.V.P.

SIGNED on behalf of the Winnipeg Electric Company.

(Sgd.) C. H. Dahl.  
(Sgd.) E. V. Caton.  
(Sgd.) Geo. T. McIntosh.

**Mother's Allowances in Manitoba**

Schedule rules and conditions under the Child Welfare Act of Manitoba were published in the Manitoba Gazette of May 30. Sections of this Act, enacted in 1924, dealing with bereaved and dependent children takes the place of the Mothers' Allowances Act repealed in 1924 (LABOUR GAZETTE, August, 1924, page 626).

The schedule of maximum monthly allowances, exclusive of winter fuel, is graded according to age and family grouping as follows: For families of 1 adult and 2 enrolled children—\$50; 1 adult and 3 children—\$60; 1 adult and 4 children—\$65; 1 adult and 5 children—\$76; 1 adult and 6 enrolled children—\$83; and 1 adult and 7 children or over—\$89. For one adult and one enrolled child the monthly allowance (including rent of \$15 for heated quarters) is \$38. The above schedule of allowances is designed to provide for: (1) food and clothing; (2) rent or interest, taxes and insurance in lieu of rent; (3) operating expenses—kitchen fuel, light, water, cleaning, recreation and equipment.

The maximum allowance for winter fuel for a family of two to three children in unheated rooms is \$10 per month, while the fuel allowance for families in houses is fixed as follows: for a family of two to three children—\$12 per month; four to five children—\$16; six or more children—\$18 per month.

Other schedules are established defining the allowances for food and clothing; rent or interest, taxes and insurance; and for operating expenses.

Provision is made for the revision of allowances within the fixed maximum, and in such revision the Board is authorized to take into account the resources and income, earned or potential, of the family.

## SUMMARY OF PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

THE tables presented below summarize proceedings under the Industrial Disputes Investigation Act for the fiscal year ending March 31, 1936, and from March 22, 1937, to March 31, 1936.

I.—TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM APRIL 1, 1935, TO MARCH 31, 1936

Industries affected	Number of applications for Boards	Number of Boards established	Number of strikes not averted or ended
I. Disputes affecting mines, transportation and communication and other public utilities—			
(1) Mining and Smelting industry—			
Coal.....	7	2	1
Metal.....	1	1	0
(2) Transportation and Communication—			
Steam railways.....	2	0	0
Street and electric railways.....	6	1	0
Motor transportation.....	1	0	0
Shipping.....	4	1	0
Telegraphs.....	1	1	0
(3) Miscellaneous—			
Light and power.....	6	1	0
II. Disputes not falling clearly within the direct scope of the Act.....	2	0	0
	30*	7	1

\*Including three cases carried over from preceding year.

The proceedings under the Act during the fiscal year 1935-36 include three cases in which proceedings had taken place during the preceding year. On March 31, 1936, results were still pending in connection with three applications.

II.—TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM MARCH 22, 1937, TO MARCH 31, 1936

Industries affected	Number of applications for Boards	Number of strikes not averted or ended

## STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1936

THE following table shows the number of disputes, workers involved and time loss for June, 1936, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*June, 1936.....	14	2,004	4,014
*May, 1936.....	12	2,911	28,469
June 1935.....	15	5,531	42,140

\*Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual

review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While the number of strikes and lockouts recorded for June was slightly more than for May and the number of workers involved was only slightly less, the time loss was greatly reduced because nearly all the time loss for May was due to strikes of loggers and sawmill workers in British Columbia which terminated before the end of May. None of the disputes during June caused much time loss or involved a large number of workers for a long period. In June last year there were several disputes which involved numbers of workers and caused considerable time loss, namely those involving loggers in the Nipigon district of Ontario,

longshoremen and certain other water transport workers at Vancouver, B.C., and salmon fishermen in the Gulf of Georgia on the coast of British Columbia.

Four disputes, involving 115 workers, were carried over from May (the dispute of garage employees at Winnipeg, Man., shown as unterminated in the June issue of the LABOUR GAZETTE, was later reported to have been settled by May 31). Ten disputes commenced during June. Of these fourteen disputes, twelve terminated during the month, five resulting in favour of the employers, four in favour of the workers, a compromise settlement being reached in one case, while the results of two disputes were recorded as indefinite. At the end of June, therefore, there were on record two disputes recorded as strikes or lockouts, namely: taxi drivers, Winnipeg, Man., and restaurant employees, Toronto, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information had been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to four such disputes, namely: photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; moulders, Peterborough, Ont., February 27, 1934, one employer; and laundry employees, Toronto, Ont., May 18, 1936, one employer.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A strike on May 18 of laundry employees in, one Toronto establishment with several branches, caused by alleged discrimination against one worker, was recorded in the LABOUR GAZETTE for June as terminated by the end of May, the strikers having been replaced. The dispute is included in the list of strikes where employment conditions are no longer affected but which have not been called off or declared terminated by the unions concerned. During June the establishment was picketed by the strikers and sympathizers. The employer secured an injunction against the canvassing of customers by the striking drivers, the terms of the contract when engaged providing that they should not do so after their employment ceased. On June 26 it is reported that a

court ruling required that the wording on the picket signs should be confined to a statement that members of the Cleaners' and Dyers' Union were on strike.

A cessation of work by eight loaders at a coal mine at East Coulee, Alberta, from May 23 to May 28, was reported too late for inclusion in the June issue of the LABOUR GAZETTE. The men claimed they had not been paid fully for loading certain cars of coal and it was agreed to refer the case to the company accountant and the provincial mine inspector. The decision was in favour of the loaders.

A dispute involving newsboys at London, Ont., on June 1, has been reported. The newspaper publishers increased the price of papers to the boys by ten per cent and also changed the method of contracting for routes. The boys refused to handle the papers under these conditions and the conditions as prior to the dispute were restored on the following day.

A dispute involving men engaged to load pulpwood on a boat at Michipicoten Harbour, Ont., on June 18 has been reported. It appears that they demanded 60 cents an hour instead of 40 cents. It has been reported that work was resumed within a short time but particulars as to the dispute have not been received.

A cessation of work by 700 coal miners in one colliery at Sydney Mines, N.S., for one day, June 24, has been reported in the press. It appears that there was a dispute as to payment for coal left over at the end of a shift and the union decided to resume work pending negotiations with the management. Particulars from the parties involved have not yet been received.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**SALMON FISHERMEN, UPPER FRASER RIVER, B.C.**—The dispute involving fishermen who demanded the same rate for fish as was paid on the lower part of the Fraser River, seven cents per pound instead of six cents, commencing May 26, continued into June but flood conditions were reported to have prevented fishing and supplies for the fresh fish market in Vancouver were received from the coast so that employment conditions were no longer affected by June 3.

**TAXI DRIVERS, WINNIPEG, MAN.**—The alleged lockout of taxi cab drivers employed by one company, which on May 4 dismissed fourteen employees who refused to give up their membership in the One Big Union, was unterminated at the end of the month. The

union's application for a Board under the Industrial Disputes Investigation Act, May 28, was still under consideration at the end of the month as certain points in the application were apparently not in accordance with the requirements of the Act and information as to these points were being secured by the Minister.

**TRUCK DRIVERS, HELPERS, WAREHOUSE EMPLOYEES, ETC., TORONTO, ONT.**—The strike of certain employees of one storage and trucking company, March 31, against the dismissal of several employees, alleged to be the result of union activity, lapsed by the end of June although eleven of the strikers had not resumed work. The others had returned on April 20, as stated in the May issue of the *LABOUR GAZETTE*, under a temporary arrangement for the moving season, under the same conditions as before the dispute, but a wage increase of five cents per hour had been made soon after the strike was declared.

**RESTAURANT EMPLOYEES, TORONTO, ONT.**—In connection with this strike, beginning on May 1, against the discharge of certain employees, alleged to be for union activity, the employer had secured an interim injunction against picketing and this had been renewed with respect to certain former employees. Some of these were later arrested for disobeying the order but were released with a warning. The employer appealed against the decision of the judge and the Court of Appeal is reported to have ruled on June 25 that ten men should be sentenced to ten days in jail for contempt of court but suspended sentence with the understanding that picketing by them or by any members of the union would cease. No settlement had been reported at the end of the month.

**GARAGE EMPLOYEES (AUTOMOBILE BODY WORKERS), WINNIPEG, MAN.**—It was stated in the *LABOUR GAZETTE* for June that the strike of certain employees in one garage was settled early in June. Information received later is that work was resumed on June 1 following negotiations between the parties which resulted in the employer agreeing to reinstate all employees without discrimination. The union officer alleged to have been discriminated against and another employee had in the meantime secured work elsewhere.

**SALMON FISHERMEN, LOWER FRASER RIVER, B.C.**—The strike of fishermen on the lower part of the Fraser River, June 1, in sympathy with the strike of fishermen on the upper part of the river, May 26, was affected by floods and by the receipt of supplies for the market from the coast so that by June 3 em-

ployment conditions were no longer affected. By June 10, the water being lower, some of the men resumed work.

**COAL MINERS, RIVER HEBERT, N.S.**—Employees in one colliery ceased work on June 15 as a result of a dispute about the right of one man to a place when the working force was reduced. Work was resumed on June 17 when it was agreed with the management that the case would be taken up with the executive board of the union.

**FUR WORKERS, TORONTO, ONT.**—Employees in one establishment ceased work from June 10 to June 16, claiming that payment for certain work was not in accordance with the agreement between the International Fur Workers' Union and the Independent Furriers' Association. The dispute was referred to arbitration under the terms of the agreement and it is reported that the decision was against the union.

**SHOE FACTORY WORKERS, TORONTO, ONT.**—Employees in one establishment ceased work from June 4 to June 8 in protest against the discharge of one employee, losing two days' work, though remaining in the factory. The union reported that the discharged employee was reinstated.

**CLOAKMAKERS, TORONTO, ONT.**—When one employer operating a children's coat shop dismissed the employees engaged in manufacturing on June 15, continuing the operation of the stockroom and office, the union claimed this was a lockout in violation of the agreement with the International Ladies' Garment Workers' Union and picketed the establishment. At the end of the month a settlement had not been reached but the employer reported that the machinery had been sold. The dispute is, therefore, recorded as terminated.

**MEN'S CLOTHING FACTORY WORKERS (WORK CLOTHING), WINNIPEG, MAN.**—Employees in one establishment ceased work on June 26 demanding recognition of the United Garment Workers of America and wages and working conditions in accordance with the union schedule. This being conceded, work was resumed on Monday, June 29.

**LUMBER MILL WORKERS, CABANO, P.Q.**—Employees in two mills operated by one company ceased work on June 22 following the refusal of the employer to pay the same wages for an eight hour day as previously paid for ten. Hourly wages had been increased by fifteen per cent to partly offset the loss in daily wages when hours were reduced. A representative of the provincial

## STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1936\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Result
<b>(a) Strikes and Lockouts in progress prior to June, 1936.</b>			
FISHING AND TRAPPING— Salmon fishermen, Upper Fraser River, B.C.....	70	200	Commenced May 26, 1936; for increase in piece rates; employment conditions no longer affected by June 3, 1936; in favour of employer.
TRANSPORTATION— <i>Local</i> — Taxi drivers, Winnipeg, Man...	14	336	Alleged lockout, May 4, 1936; re employment of union members; untermintated.
SERVICE— <i>Business, etc.</i> — Truck drivers, helpers, ware- house employees, etc., Tor- onto, Ont.....	11	125	Commenced Mar. 31, 1936; against discharge of workers; lapsed by end of June, 1936; in favour of employer.
Restaurant employees, Toron- to, Ont.....	20	480	Commenced May 1, 1936; for reinstatement of workers allegedly discharged for union activity; untermintated.
Garage employees (automobile body workers), Winnipeg, Man.....			Commenced May 5, 1936; alleged discrimination against union employee; terminated May 31, 1936; in favour of workers.
<b>(b) Strikes and Lockouts commencing during June, 1936.</b>			
FISHING AND TRAPPING— Salmon fishermen, Lower Fraser River, B.C.....	270	800	Commenced June 1, 1936; in sympathy with fisher- men on strike along Upper Fraser River, May 26, 1936; employment conditions no longer affected by June 3, 1936; in favour of employer.
MINING, ETC.— Coal miners, River Hebert, N.S.	63	126	Commenced June 15, 1936; dispute as to seniority; terminated June 16, 1936; indefinite.
MANUFACTURING— <i>Fur, Leather, etc.</i> — Fur factory workers, Toronto, Ont.....	40	200	Commenced June 10, 1936; alleged violation of agreement re wage rates; terminated June 15, 1936; in favour of employer.
<i>Boots and Shoes</i> — Shoe factory workers, Toron- to, Ont.....	75	150	Commenced June 4, 1936; against discharge of worker; terminated June 6, 1936; in favour of workers.
<i>Textiles, Clothing, etc.</i> — Cloakmakers, Toronto, Ont....	20	260	Alleged lockout; commenced June 15, 1936; re con- tinuing operations under union agreement; ter- minated by June 30, 1936; indefinite.
Men's clothing factory workers (work clothing), Winnipeg, Man.....	19	38	Commenced June 26, 1936; for union wages and working conditions; terminated June 27, 1936; in favour of workers.
<i>Other Wood Products</i> — Lumber mill workers, Cabano, P.Q.....	310	1240	Commenced June 22, 1936; against increase in hourly wages of only 15% when hours reduced from 10 to 8 per day; terminated June 25, 1936, in favour of employer.
CONSTRUCTION— <i>Buildings, etc.</i> — Carpenters, Edmonton, Alta...	40	10	Commenced June 8, 1936; against employment of "rough carpenters" below union wage rates; terminated June 8, 1936; in favour of workers.
Carpenters, Toronto, Ont.....	7	24	Commenced June 9, 1936; for employment of mem- bers of one union only; terminated June 12, 1936; in favour of workers.
TRANSPORTATION— <i>Water</i> — Longshoremen, Windsor, Ont..	45	25	Commenced June 24, 1936; for increased wages and improved working conditions; terminated June 24, 1936; compromise.

\*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

Department of Labour investigated the matter and after consultation with the representative of the workers and with the management work was resumed on June 26, without any change in conditions.

**CARPENTERS, EDMONTON, ALBERTA.**—Carpenters employed on one building ceased work on June 8 in protest against the employment of "rough carpenters" at 50 cents per hour, the union agreement providing for a rate of 75 cents per hour for all carpenters. Work was resumed in two hours when the "rough carpenters" were discharged and carpenters employed at 75 cents per hour.

Reference to this dispute in made in the article on conciliation elsewhere in this issue.

**CARPENTERS, TORONTO, ONT.**—Employees on one building job ceased work on June 9

demanding that the contractor agree to employ only members of the United Brotherhood of Carpenters and Joiners. Work was resumed on June 12 when this was conceded.

**LONGSHOREMEN, WINDSOR, ONT.**—Men employed to load freight boats at Windsor, Ont., ceased work on June 24, demanding an agreement with the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees providing for increases in wage rates and improvements in working conditions. Concessions being made as to certain working conditions, work was resumed after five hours. It was agreed that men would be paid for time used in going from one assignment to another and that time and one-half rates would be paid for work at Amherstburg.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

The latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing down to date that given in the issue of February, 1936, in the review of Strikes and Lockouts in Canada and Other Countries, 1935. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in May was 54 and 14 were still in progress from the previous month, making a total of 68 disputes in progress during the month, involving 22,400 workers with a time loss of 163,000 working days. Of the 54 disputes beginning in May, 12 arose out of demands for advances in wages and 13 out of other wage questions, 2 on questions respecting working hours, 15 on questions of employment of particular classes or persons, 3 on questions of working arrangements, and 9 on

questions of trade union principle. During the month, final settlements were reached in 42 disputes, of which 12 were settled in favour of workers, 13 in favour of employers and 17 resulted in compromises. In the cases of 9 other disputes, work was resumed pending negotiations.

The strike of 2,000 slate quarrymen and labourers at Blaenau Festiniog, which began March 16 and was mentioned in the May issue of the *LABOUR GAZETTE*, was settled May 13 by arbitration when it was agreed to increase the wage scale to the 1932 level.

### Belgium

Many strikes occurred during June in Belgium. At Antwerp, 10,000 dock workers went on strike June 2, and on June 22 reached an agreement by which wage increases were granted. On June 15, 125,000 coal miners went out, demanding wage increases and a 40 hour week. Metal workers, munition workers and textile workers were also involved in the movement. A total of 400,000 workers in various industries were reported to be on strike June 22. The miners' strike was settled June 23 through government intervention. The trade union committee controlling the majority of the strikers in the different industries ordered work to be resumed June 24, but this order was not fully obeyed in some industries.

### France

As mentioned in the last issue of the *LABOUR GAZETTE*, stoppages of work occurred

in a large number of metal and engineering establishments in the Paris area late in May. Early in June, strikes spread to a great many other trades in practically all parts of France. The principal demands of the workers were for a forty hour working week, holidays with pay, the granting of full trade union rights and the conclusion of collective agreements to regulate working conditions. Partial settlements were effected about June 8, in part by the passage of certain legislation in line with the demands of the workers, and in part by negotiations between the employers' association and the confederation of labour on points with which the government was not able to deal. Though many workers returned to work at this time, others, notably coal miners in Northern France and shipyard workers, went on strike after this partial settlement. Some of the latter disputes, which were still in progress at the end of the month, appear to be based on political as well as industrial demands. Reports vary as to the total number involved in these strikes, namely from 300,000 to 1,000,000 workers.

#### United States

Statistics for the year 1935 show 2,014 disputes beginning in the year, involving 1,117,213 workers with a time loss of 15,456,337 working days for the year. This is the largest number of disputes for any year since 1921, but the number of workers involved and the time loss is considerably less than for 1934. The industries in which the greatest time losses occurred during 1935

were: bituminous coal mining; sawmills and logging camps; the manufacture of cotton goods, women's clothing and silk and rayon goods; and water transportation.

During the year, one-half of the total number of workers involved were on strike for wage increases, the majority of these workers being bituminous coal miners in the dispute in September. Another 26 per cent of the workers involved were concerned in disputes over union organization.

Of the 2,003 disputes which terminated in 1935, 54 per cent of the number of workers involved secured substantial gains, 26.9 per cent partial gains or compromises, 14.7 per cent little or no gains, the remainder having been involved in disputes between rival unions or disputes in which the result was indeterminate or not reported.

The number of disputes beginning in April, 1936, was 169 and 122 were in effect from the previous month, making a total of 291 disputes in progress during the month, involving 74,000 workers with a time loss of 886,000 working days for the month.

A strike of 5,000 employees of a radio manufacturing company at Camden, New Jersey, began June 25 and was still in progress at the beginning of July. The strike was called for union recognition and for increased wages.

Another strike of 5,500 workers for union recognition in the steel industry at Portsmouth, Ohio, was reported June 23. Disorders and violence occurred during both of these strikes.

---

### CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM APRIL 1, 1936, TO JUNE 30, 1936

CONCILIATION proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbiter when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation Officer are at Ottawa.

These officers are also charged with certain duties arising out of the administration of the Fair Wages Policy applying to contracts let by the Dominion Government and to works aided by federal funds.

The following statement covers the more important conciliation matters dealt with dur-

ing the period from April 1 to June 30, 1936. (An article covering the period December 1, 1935, to March 31, 1936, appeared in the LABOUR GAZETTE, April, 1936, page 321).

**HAT FACTORY WORKERS, BROCKVILLE, ONT.**—Early in April, 1936, 51 employees of the backshop staff of the John B. Stetson Company (Canada), Limited, Brockville, Ontario, ceased work in protest against a new system of wage payment introduced by the management which the employees alleged would reduce their earnings. At the request of both parties involved, a conciliation officer of the Department of Labour investigated all angles of the dispute and held several conferences with representatives of the employees and with officials of the company. The officer was able to clear up a number of misunderstandings in regard to the new wage basis. In addition, the management of the company agreed to make certain concessions favourable to the employees in one or more departments, and also to make a re-study of the proposed basic rates, it being understood that in certain departments the rates would likely be increased and in no instance would they be reduced. The employees agreed to return to work on this understanding, and operations were resumed on April 20th. Approximately two weeks later the Department received word that the employees had formed a union and had made demands upon the Company for an increase in wages ranging from 19 to 200 per cent. The manager of the Company stated that if these demands were pressed to the point of a strike, as had been threatened, it was probable that the Company would either move its plant elsewhere or cease operations in Canada entirely. The conciliator of the Department again met representatives of the employees, urging upon them the advisability of continuing work under the previous arrangement, at least until such time as the new system had been given a fair test, and warning them of the danger of precipitating a strike at that time in view of the position taken by the management, of which they were made fully aware. Operations continued without interruption, it being understood that the management was prepared to discuss at any time any matters in dispute with a committee of its own employees.

**TRUCK DRIVERS, HELPERS AND WAREHOUSE EMPLOYEES, TORONTO, ONT.**—On April 14, 1936, a committee representing employees of the Rawlinson Moving and Storage Company, Toronto, Ontario, then on strike, accompanied by officers of the National Trades Council, interviewed the conciliation officer of the Department of Labour in Toronto and re-

quested his services in an effort to adjust a dispute between this company and its employees. It was stated that following the unionizing of the employees four men had been discharged, and also that the management of the company had refused to discuss the employees' request for increased wages and certain improvements in working conditions. A strike had occurred on March 31. The departmental conciliator immediately discussed the situation with an officer of the employing company. This officer stated that the men could return to work with the exception of certain ones who, he stated, were unsuitable and who had made themselves objectionable since the strike, but he would give no undertaking as to the number he would reinstate. This officer also refused to attend a conference to discuss the matter. The position of the employer was made known to the committee representing the men, and they stated that they would continue the strike.

**STEEL WORKERS, SAULT STE. MARIE, ONT.**—In the latter part of April, 1936, a committee representing the steel workers, members of the Algoma Steel Workers' Union, employed by the Algoma Steel Corporation, Limited, Sault Ste. Marie, Ontario, discussed with officials of the Department of Labour, in Ottawa, the situation existing between this Corporation and its employees. Early in the year an understanding had been reached that negotiations for a general wage increase would be opened in April, but the management had informed the men that the financial position of the Corporation would not permit this being done. The delegation requested that a conciliation officer be sent to Sault Ste. Marie to look into the matter and render whatever assistance might be possible. This request was granted, and early in June conferences with the parties involved were held. The manager of the employing company stated that it was impossible for him to consider at that time any upward adjustment in wages, and the employees took the position that the only alternative to a strike was the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. The consent of the employers to such procedure was finally obtained, and formal application for the establishment of a board was made by the employees concerned.

**OPERATING ENGINEERS, HAMILTON, ONT.**—Early in May, 1936, the Department of Labour was advised that negotiations between the management of the Hamilton By-Products Coke Ovens, Limited, and their stationary engineers and operators, members of Local

Union No. 700, International Union of Operating Engineers, had reached a deadlock, and intimation was given that application would be made for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. The conciliation services of the Department were offered and accepted, and an officer conferred with the disputing parties in Hamilton on May 21. Both parties referred to the several disputes that had arisen during the past two years and which had been settled by joint conferences brought about through the conciliation service of the Department, and stated that these settlements had been satisfactory for brief periods only. The conciliator found it impossible to bring about an adjustment in this matter, both parties expressing the view that the dispute could be dealt with more effectively by board procedure.

**TAXI DRIVERS, WINNIPEG, MAN.**—On May 4, 1936, the management of Moore's Taxi, Limited, Winnipeg, Manitoba, posted a notice in its establishment to the effect that the company was not satisfied with conditions existing between it and the One Big Union and that drivers affiliated with this organization would not be employed. On the same day 14 drivers, members of the Taxi Drivers' Unit, One Big Union, were dismissed. The matter was brought to the attention of the Department of Labour, and request was made for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. A conciliator visited Winnipeg and conferred with representatives of the men and officials of the employing company. The company's position was that lack of employment and infraction of the company's regulations were the reasons for the dismissals. After lengthy negotiations the departmental conciliator was finally successful in obtaining the company's consent to reinstate 9 of the dismissed drivers, but the union officers refused this offer and stated that they would seek the establishment of a board.

**ELECTRICAL WORKERS, GUELPH, ONT.**—On May 8, 1936, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act from employees of the Light and Heat Commission of Guelph, Ontario, members of Local Union No. 548, international Brotherhood of Electrical Workers. The dispute had arisen when the Commission reduced the working hours of the employees from 50 to 44 per week without an increase

in the hourly rate, the object being to provide employment for at least four additional workmen. A conciliation officer of the Department interviewed in Guelph representatives of the employees concerned, and the manager and chairman of the Commission. The chairman stated that the hourly rates compared favourably with those being paid at other points in Western Ontario, and was definite in his refusal to recede from the position taken or to consider any increase in wage rates. He further stated that he was agreeable to meeting the employees at any time a dispute should arise but that a conference to discuss the points then in dispute would not serve any useful purpose. In view of the position taken by the chairman the departmental officer was unable to render further assistance in the matter.

**LAUNDRY WORKERS (DRIVERS AND PRESSERS), TORONTO, ONT.**—On May 26, 1936, the conciliation service of the Department of Labour was requested in connection with a strike of certain employees of the New Method Laundry, Toronto, Ontario. It was stated that a few weeks previously the employees had formed a union, affiliated with the All-Canadian Congress of Labour, and shortly thereafter one of the older men who had been active in the organization was discharged. A strike was called on May 18. A conciliator interviewed officials of the company, who stated that the man in question had not been dismissed because of his connection with the union but for other cause entirely. They further stated that they would not re-employ him under any circumstances, and in any event such action would only lead to a walk-out of the workers who had not joined in the strike. These officers also agreed to meet a union official and discuss the matter with him. This conference was held on May 27. It was later learned that 12 of the 65 strikers had resumed work and others had been replaced.

**LONGSHOREMEN, THREE RIVERS, P.Q.**—During the latter part of May, 1936, trouble developed in the Port of Three Rivers, P.Q., involving longshoremen, members of the International Longshoremen's Association, the men objecting to the crew of a ship unloading cargo. Representatives of the Longshoremen's Association had been endeavouring for a considerable period to secure an agreement respecting wages and working conditions with the stevedoring companies at that point but without success. Early in June a departmental conciliator conferred, at Three Rivers, with the union officials, and subsequently with one or more officials of the

employing companies, advising them to re-new negotiations. It is understood that this advice was followed.

**CARPENTERS, EDMONTON, ALTA.**—On June 8, 1936, a strike occurred of carpenters employed on the construction of a building at Edmonton, Alberta, in protest against the contractor employing a number of workmen, classified as carpenters' helpers, and permitting them to use a number of the tools

of the carpentry trade. It was alleged that this was contrary to the general practice in the building industry in that city. The dispute received the prompt attention of the Labour Commissioner of the Government of Alberta and the Western Representative of the federal Department of Labour, and an amicable adjustment followed. A number of additional carpenters were taken on to replace the carpenters' helpers, the latter being absorbed as labourers.

### Annual Convention of the Ontario and Quebec Conference of Typographical Unions

The twenty-fifth convention of the Ontario and Quebec Conference of Typographical Unions was held in Ottawa, June 26-27, 1936. In addition to the delegates from the various typographical unions there were five representatives of kindred trades, attending on special invitation to discuss the question of closer affiliation among the allied crafts of the printing industry. The delegates were welcomed by His Worship Mayor Stanley Lewis, Mr. R. J. Tallon, secretary of the Trades and Labour Congress of Canada, and Mr. P. J. Tomkins, president of the Ottawa Allied Trades and Labour Association.

Addresses were delivered by Mr. W. M. Dickson, Deputy Minister of Labour, and Mr. Tom Moore, member of the National Employment Commission. Mr. Dickson, after extending greetings from the Federal Department of Labour, congratulated the delegates on the good work being accomplished among the members through the benefit features of the union, and spoke of the vast changes in the printing industry since the days of Guttenburg and the early use of wood type. He referred to the work of the Department of Labour and stated that its problems were similar to those of the unions, and that the officers of the Department were always willing to lend assistance in finding a solution to these problems.

Mr. Moore outlined the work of the National Employment Commission in regard to stabilizing the economic conditions of the workers. He claimed that unemployment and other disturbing factors in industry were national problems. In referring to the delay in bringing into force certain social laws he stated that the British North America Act should be amended to give the Federal Parliament the necessary power to enact and put into operation such enactments throughout the Dominion.

The recommendations contained in the adopted resolutions were: (1) That the

Ontario Government allow liquor advertisements in newspapers and magazines printed in Ontario; (2) Insertion of a fair wage clause in all printing contracts; Opposition to the removal of the tariff on magazines; (3) That unions of the printing industry have all their agreements commence and terminate at the same time.

The final session of the Conference was largely taken up with the report of the Montreal delegates on the collective labour agreements recently put into force in that city.

An important change is contemplated by extending the scope of the Conference to include other printing trades unions in the affiliation with the Typographical. Reports from a number of locals indicated a favourable attitude to the question and the officers were instructed to take the necessary steps to bring it about.

Officers elected were: President, J. J. Clancey, Ottawa; first vice-president, J. W. Blaquiere, Montreal; 2nd vice-president, M. Dunkley, Peterborough; secretary-treasurer, E. J. Teague, Montreal.

The invitation of Jacques-Cartier Typographical Union of Montreal to hold the 1937 convention in Montreal was accepted.

Twenty-eight factories included in the compressed gases industry in 1935 had a value of production of \$3,077,765 compared with \$2,803,840 in 1934 and \$2,490,215 in 1933. The average number of employees in these establishments was 510 with salaries and wages of \$741,631. The main products were oxygen, acetylene, carbon dioxide and hydrogen and each of these were made in greater quantities than in 1934. Acetylene output was 39,922,683 cubic feet; oxygen 136,059,706, carbon dioxide in cylinders 4,849,687 and hydrogen 40,134,386 cubic feet.

## SUPREME COURT JUDGMENTS RESPECTING VALIDITY OF SOCIAL LEGISLATION

### Decisions on References by Federal Government as to Dominion and Provincial Jurisdiction

THE Supreme Court of Canada on June 17, rendered its judgments on the constitutionality of eight statutes comprising the "social legislation" enacted during the 1934 and 1935 sessions of the Dominion Parliament. These measures were:—

Section 498a of the Criminal Code;  
Dominion Trade and Industry Commission Act;  
Employment and Social Insurance Act;  
Weekly Rest in Industrial Undertakings Act;  
Minimum Wages Act;  
Limitation of Hours of Work Act;  
Natural Products Marketing Act; and  
Farmers' Creditors Arrangement Act.

The above enactments were referred to the Supreme Court in order to secure a judicial determination as to whether the Acts in question are *ultra vires* of the Dominion Parliament. Hearings were conducted before the Supreme Court between January 15 and February 5 in respect to the validity of the eight statutes.

Factums were submitted in respect of these references on behalf of the Government of Canada and on behalf of the respective provinces. Counsel were present also on behalf of the Attorney-General of Canada and the Attorney-General of the respective provinces. (LABOUR GAZETTE, February, 1936, p. 140).

#### Appeals to Privy Council

A statement issued on July 8, by the Hon. Ernest Lapointe, Minister of Justice, indicates that appeals will be made to the Privy Council in connection with certain of the judgments. The Minister's statement is as follows:—

"The Honourable Ernest Lapointe, Minister of Justice, announced to-day that the Dominion Government had decided to apply at the present sittings of the Judicial Committee of His Majesty's Privy Council for leave to appeal to His Majesty in Council from the judgments pronounced by the

Supreme Court of Canada on the 17th of June last in the references concerning the constitutional validity of The Employment and Social Insurance Act; the Weekly Rest in Industrial Undertakings Act; The Minimum Wages Act and the Limitation of Hours of Work Act.

"In the reference concerning the Employment and Social Insurance Act, the Supreme Court of Canada held, by a majority of four to two, that the statute was *ultra vires* of the Parliament of Canada. The Chief Justice and Davis J. were of opinion that the statute was *intra vires* of the Parliament of Canada, but Rinfret, Cannon, Crocket and Kerwin JJ. were of opinion that the statute was *ultra vires*.

"In the reference concerning the Weekly Rest in Industrial Undertakings Act; The Minimum Wages Act; and The Limitation of Hours of Work Act the judges of the Supreme Court of Canada were equally divided in their opinion. The Chief Justice and Davis and Kerwin JJ. were of the opinion that, except as to section 6 of The Minimum Wages Act, the statutes were *intra vires* of the Parliament of Canada. On the other hand, Rinfret, Cannon and Crocket JJ. were of opinion that the statutes were *ultra vires*. The question in issue concerns the scope of the Dominion's treaty making power, and is considered to be of great importance.

"The Minister of Justice also stated that he had been advised by some of the provinces that they intended to ask for leave to appeal to the Judicial Committee of the Privy Council from the judgments pronounced by the Supreme Court of Canada in other references—in particular, in the references concerning the constitutional validity of section 498A of the Criminal Code and the Farmers' Creditors Arrangement Act."

A summary of the judgments respecting each of the statutes is given herewith.

### Section 498A of the Criminal Code

Section 498A of the Criminal Code of Canada declares certain types of price discrimination to be criminal offences punishable by a fine of \$5,000 in the case of a corporation and a fine of \$1,000 in the event of violation

by any other person. The section was passed together with other amendments to the Criminal Code on July 5, 1935, as chapter 56 of the 1935 statutes. It came into effect on September 1, 1935. Two months later, on

November 5, the present government referred the section to the Supreme Court of Canada for decision as to whether or not its enactment was within the legislative powers of the Dominion Parliament.

Pending this decision and the possible appeal therefrom to the Judicial Committee of the Privy Council, no prosecutions of alleged offenders have been conducted under section 498A. Section 498A was passed with the intention of giving effect to certain recommendations of the Royal Commission on Price Spreads, made in its report of April 9, 1935, on the termination of its lengthy investigations. The section is composed of three parts, the first providing against specified types of price discrimination, and the second and third against certain policies of selling goods at low prices for the purposes of destroying competition or eliminating competitors. It reads in full as follows:—

498a. Every person engaged in trade or commerce or industry is guilty of an indictable offence and liable to a penalty not exceeding one thousand dollars or to one month's imprisonment, or, if a corporation, to a penalty not exceeding five thousand dollars, who

(a) is a party or privy to, or assists in, any transaction of sale which discriminates, to his knowledge, against competitors of the purchaser in that any discount, rebate or allowance is granted to the purchaser over and above any discount, rebate or allowance available at the time of such transaction to the aforesaid competitors in respect of a sale of goods of like quality and quantity;

The provisions of this paragraph shall not, however, prevent a co-operative society returning to producers or consumers, or a co-operative wholesale society returning to its constituent retail members, the whole or any part of the net surplus made in its trading operations in proportion to purchases made from or sales to the society.

(b) engages in a policy of selling goods in any area of Canada at prices lower than those exacted by such seller elsewhere in Canada, for the purpose of destroying competition or eliminating a competitor in such part of Canada;

(c) engages in a policy of selling goods at prices unreasonably low for the purpose of destroying competition or eliminating a competitor.

The Supreme Court of Canada in its judgment on the constitutional validity of the section, delivered on June 17, 1936, held unanimously that the second and third parts of the section, i.e., its clauses (b) and (c) were validly enacted under legislative powers held by the Dominion Parliament under the British North America Act. The judgment of Sir Lyman P. Duff, Chief Justice, and Mr. Justice Rinfret, Mr. Justice Davis and Mr. Justice Kerwin, delivered by the Chief Jus-

tice, found clause (a) to be constitutionally valid. Mr. Justice Cannon and Mr. Justice Crocket in separate dissenting opinions declared that in their view the latter clause dealt with matters on which the federal Parliament had not power to legislate, but that clauses (b) and (c) were constitutionally valid.

The majority judgment found the entire section to fall within the powers of the Dominion to legislate on the subject of criminal law. While pointing out that it is "well settled that the Parliament of Canada cannot acquire jurisdiction over a subject which belongs exclusively to the provinces by attaching penal sanctions to legislation which in its pith and substance is legislation in relation to that subject in its provincial aspects alone," the judgment adheres to the view that these considerations are not applicable to the provisions of the statute in question. On the contrary it is recalled that in the judgment of the Judicial Committee in 1931 upholding the constitutional validity of the Combines Investigation Act and of section 498 of the Criminal Code it was established beyond doubt "that, in enacting laws in relation to matters falling within the subject matter of the criminal law, as these words are used in section 91 [of the British North America Act], Parliament is not restricted by any rule limiting the Acts declared to be criminal acts to such as would appear to a court of law to be 'in their own nature' criminal." The majority judgment holds that in the case of section 498A "the prohibitions seem to be aimed at the prevention of practices which Parliament conceives to be inimical to the public welfare; and each of the offences is declared in explicit terms to be an indictable offence."

Mr. Justice Crocket, after reviewing in his reasons certain earlier decisions of the Judicial Committee in constitutional cases, including those regarding the Board of Commerce Act and the Combines Investigation Act, stated:

I have concluded that (b) and (c) allege offences which might reasonably be held to be of a criminal character, inasmuch as both require a specific intent to destroy competition or to eliminate a competitor—a thing which is bound in the end to operate to the detriment or against the interest of the public.

In his remarks regarding clause (a) of the section Mr. Justice Crocket found as follows, in holding the clause to be unconstitutional:

No intention to destroy competition or to eliminate an individual competitor is required. On the contrary its apparent object is to prevent the granting of discounts, rebates or allowances to large scale purchasers of manufactured and all other goods for any reason whatever and to make the price of commodities uniform as far as

possible, and by this expedient to raise retail prices throughout the community and thus to deprive the great mass of the consuming population of the benefit of real competition in trade. Such a policy may be desirable and beneficial to a particular class of the population, but its purpose is purely economic and involves the virtual control by Parliament of such subjects as contracts of sale, which the B.N.A. Act has assigned to the exclusive jurisdiction of the Provincial Legislatures, . . . In my opinion ss. (a) describes an act which lacks every element of what is ordinarily associated with criminal law, either in the minds of lawyers or laymen. It describes a thing which is neither civilly or morally wrong in itself under the cloak of discrimination.

In arriving at the same conclusions as Mr. Justice Crocket, Mr. Justice Cannon stated that, *prima facie*, "Parliament has legislated directly in a matter of civil rights and has simply annexed to it a sanction." Characteristics of a crime, he indicated, are, first, "the danger to the community as a whole which the conduct of the offender is felt to give" and, second, the fact that "whereas the object of the law in the case of a tort is principally the compensation of the party injured, its object in the case of crime is primarily the punishment of the offender." Mr. Justice

Cannon held that clause (a) does not fill these requirements, "inasmuch as it has in view only the protection of individual competitors of the vendor, not the maintenance of public order or the promotion of the public weal. It deals exclusively with the civil law and the only logical sanction to enforce the stipulation in favour of an aggrieved competitor would be to give him against the discriminating vendor a recourse in damages for compensation of any damages resulting from a refusal to sell to him at the same price goods of like quality and quantity."

An interesting parallel to section 498A is found in the United States in the Patman-Robertson law against price discrimination, approved June 19, 1936. Section 3 of this law follows with close similarity the wording of section 498A of the Canadian Criminal Code. As both the Canadian and the United States law are designed to govern countless numbers of ordinary commercial transactions, each has been the subject of widespread discussion, particularly in trade circles, on the matter of the possible effects of their enforcement in their present forms.

### The Dominion Trade and Industry Commission Act, 1935

The unanimous judgment of the Supreme Court of Canada on the constitutional validity of the Dominion Trade and Industry Commission Act, 1935, delivered on the same date as the other judgments reviewed here, declared the Act to be in part beyond the legislative powers of the Dominion Parliament.

The Dominion Trade and Industry Commission Act was passed on July 5, 1935, to come into effect on October 1 of that year. Its preamble referred to the investigations by the Special Committee and Royal Commission on Price Spreads and declared that "the majority of the commissioners recommended that a Federal Trade and Industry Commission be established with powers to regulate commerce and industry" and that "it is expedient and in the public interest that effect be given to the aforesaid recommendations in so far as it is within the competence of Parliament to do so."

The Act established a Dominion Trade and Industry Commission, consisting of the three members of the Tariff Board, charged with the administration of the Combines Investigation Act and possessing power to recommend approval of certain price and production agreements (section 14), to investigate and obtain the assistance of the National Research

Council in inquiring into any questions relating to commodity standards and the grading of commodities (sections 15, 16 and 17), to investigate complaints regarding alleged violations of provisions of a number of laws listed in the Act, described in the Act as "laws prohibiting unfair trade practices" (section 2 (h) and section 20), to sponsor industrial conferences for the determination of unfair trade practices prevailing in any industry (section 23), and (section 25) when so required by the Governor in Council, to investigate and report upon "questions relating to the general trend of social or economic conditions or to any social or economic problem of Canada." Provisions for the establishment and use of the words "Canada Standard" as a national trade mark were made in sections 18 and 19 of the Act. Sections 21 and 22 provided for the appointment and duties of a Director of Public Prosecutions to operate under the superintendence of the Minister of Justice.

Following the general election in October 1935, and the reference of the Act to the Supreme Court, steps to administer its provisions were deferred except with regard to the Combines Investigation Act, the constitutional validity of the Combines Investi-

gation Act having been established some years earlier.

Section 14 of the Trade and Industry Commission Act, dealing with price and production agreements, and sections 19 and 20 concerning a "Canada Standard" trade mark, were declared to be unconstitutional measures in the judgment of the Supreme Court. Regarding section 20, already described, the Court found that this section "would appear to be unobjectionable as respects enactments mentioned in section 2 (h) which may be *intra vires* of Parliament. As regards the validity of these enactments we have only heard argument in respect to two of them; the Natural Products Marketing Act and Section 498A of the Criminal Code." The other sections of the Commission Act considered in the Court's judgment, namely sections 15 (1), 16 and 17, dealing with commodity standards, and sections 21 and 22, dealing with the office of Director of Public Prosecutions, were viewed as constitutionally valid. The decision regarding sections 21 and 22 is subject to the qualifications indicated above with respect to section 20.

In dealing with the section of the Commission Act regarding price and production agreements, the Court stated in part:

we cannot perceive any ground for holding that the enactments of this section are necessarily incidental to the exercise of any powers of the Dominion in relation to the

criminal law. Nor can the section, we think, be sustained as legislation in relation to the regulation of trade and commerce.... It is to be observed that this section contemplates action by the Commission and by the Governor in Council in respect of individual agreements which may relate to trade that is entirely local.

Sections 16 and 17, regarding commodity standards, were upheld "in view of the responsibilities of the Dominion Parliament in respect of the criminal law and trade and commerce" on the ground that in this connection it would appear Parliament may "exercise a wide latitude in prosecuting investigations for ascertaining the facts with regard to fraudulent commercial practices, including adulteration." Sections 18 and 19 are condemned on the ground that the so-called trade mark provided for "is not a trade mark in any proper sense of the term. . . . That subsection is really an attempt to create a civil right of a novel character and to vest it in the Crown in the right of the Dominion." The validity of sections 21 and 22, concerning a Director of Public Prosecutions, was maintained for the reason that "it would appear that authority to enact these provisions is necessarily incidental to the exercise of legislative authority in relation to the criminal offences created by the laws 'prohibiting unfair trade practices' validly enacted in such of the statutes enumerated in section 2 (h) as may be competent."

### Employment and Social Insurance Commission Act

The Employment and Social Insurance Commission Act, which received Royal Assent on June 28, 1935 (LABOUR GAZETTE, July, 1935, pages 617-20) was enacted for the purpose of "establishing an Employment and Social Insurance Commission to provide for a National Employment Service, for insurance against unemployment, for aid to unemployed persons, and for other forms of Social Insurance and Security and for purposes related thereto."

The Act provided, *inter alia*, for a system of unemployment insurance with a central fund, to which employers, workers, and the Dominion were to contribute specified weekly amounts. Benefits were payable to insured workers for a stipulated period, on satisfying certain statutory conditions most important of which was that the insured worker shall have paid into the fund not less than forty weekly contributions during the two years immediately preceding the date of claiming the benefits. A graduated scale of benefits was set up, and were payable for not more than an aggregate of 78 days of continuous

unemployment in any benefit year. Although this measure was enacted, contributions to the unemployment insurance fund were to be paid on a date to be set by the Commission. On July 20, 1935, the personnel of the Commission was announced (LABOUR GAZETTE, August, 1935, page 713). Later, this Act along with other social legislation, was referred to the Supreme Court of Canada (LABOUR GAZETTE, November, 1935, p. 976) in order to secure a judicial determination as to whether it was *ultra vires* of the Dominion Parliament. On June 17, 1936, judgment was given by the Supreme Court, declaring the Employment and Social Insurance Commission Act unconstitutional. Chief Justice Duff and Mr. Justice Davis upheld the legislation, while Rinfret, Cannon, Crocket and Kerwin, J.J. expressed contrary opinions.

It was claimed by the Dominion, that the Act was constitutional in view of Parliament's residuary power to legislate for the "peace, order and good government" of the country, and "its exclusive power (a) to regulate trade and commerce; (b) to raise money

by any mode or system of taxation; (c) to appropriate public money for any public purposes; (d) to provide for the collection of statistics and incidentally, (e) to enact criminal laws."

Chief Justice Duff and Mr. Justice Davis found that the Act did not transgress the legislative power of Parliament, particularly with regard to its power to raise money by any mode or system of taxation, for the exclusive disposition of Parliament. The written judgment of the Chief Justice on this point is as follows: "At all events, it seems to be abundantly clear that there is nothing in either section 91 or section 92 (of the B.N.A. Act) which precludes the Dominion from raising money by any mode or system of taxation to be expended in the relief of distress among inhabitants of any one or more provinces by direct application for the benefit of the inhabitants as individuals, still less for raising money to be expended for the relief of the inhabitants of the Dominion, almost all of whom are necessarily inhabitants of the provinces. The inhabitants of the provinces are taxable by the Dominion in order to raise moneys for any purpose in the furtherance of which it is competent to the Dominion to expend such moneys in exercise of its exclusive and plenary control over the public assets."

The Chief Justice maintained that subdivision 1 of Section 91 empowers Parliament with "full discretionary authority" to dispose of the public assets of the Dominion and that no other court is vested with the power to examine any purported exercise of that authority with a view to pronouncing upon its validity save only to determine whether or not any enactment of Parliament "professing to be an exercise of a given authority is not really an enactment of that character; but one relating to a subject over which Parliament has no jurisdiction."

The Chief Justice indicated that the provisions requiring compulsory contributions by employers and employees "possess the essential elements of legislation respecting taxation." Amplifying this statement the Chief Justice maintained that the provisions had this character because "first, it would not be competent to a provincial legislature to enact them in the context in which they stand, which demonstrates that the contributions are exacted for the purpose of raising moneys for exclusive disposition by Parliament; and, second, there is no adequate ground for holding that they are, either in purpose or in immediate effect, outside the ambit of the powers under subdivision 3."

The Chief Justice contended that it is similarly so regarding the enactments dealing with the disposition of the proceeds from levies made upon employers and employees and of the contribution from the Dominion Treasury. Contending that these are not enactments "in respect of property and civil rights in any one province or in all of the provinces," he held that such enactments would "not be competent as enactments by any or all of the provincial legislatures, and there is no adequate ground for affirming the ambit of the powers under subdivision 3."

Continuing, the Chief Justice referring to the enactments concerning the disposition of the proceeds of the levies upon employers and employees and of the contribution from the Dominion Treasury, declared that: "They are not enactments in respect of property and civil rights in any one province or in all of the provinces. They would not be competent as enactments by any or all of the provincial legislatures, and there is no adequate ground for affirming that these enactments are not legislation in relation to the subjects within the scope of subdivision 1."

The Chief Justice concluded his opinion with the following:

In a word, legislation for raising money for disposition by Parliament under subdivision 3 of section 91, and directing the disposition of it under subdivision 1, is necessarily excluded from the jurisdiction of the provinces by the concluding words of section 91; and there is no sufficient ground for affirming that, in the enactments of this statute, Parliament is not exercising its powers under these subdivisions, or, in other words, that under the guise of doing so it is invading a provincial field from which it is excluded, for the purpose of attaining a result which it has full power to attain by legislating within fields in which it has exclusive authority.

The statute is, therefore, *intra vires* and the answer to the interrogatory addressed to us by the Order of Reference is in the negative.

Rinfret, and Kerwin J.J., in separate judgments found the legislation unconstitutional. Mr. Justice Rinfret could not agree that the law fell within the "peace, order and good government" provision or the power to regulate trade and commerce and expressed the opinion that insurance was a provincial matter and the Federal Act invaded a provincial field, namely contracts and civil rights.

Mr. Justice Rinfret, indicating reasons why he held the validity of the legislation in question could not be supported as an exercise of the residuary power of Parliament to make laws for the peace, order and good government of Canada, or as an exercise of the power of Parliament to regulate trade and commerce, said: "Insurance of all sorts, in-

cluding insurance against unemployment, and health insurances, have always been recognized as being exclusively provincial matters under the head 'Property and Civil Rights,' or under the head 'Matters of a merely local or private nature in the Province.' By force of the British North America Act the power to make laws for the peace, order and good government of Canada is given to the Dominion Parliament only 'in relation to all matters not coming within the classes of subjects by this Act assigned exclusively to the legislatures of the provinces.'"

Dealing with the contention that the legislation was within the competence of the Parliament of Canada because of its exclusive power to regulate trade and commerce, Mr. Justice Rinfret declared that this legislation "is not trade and commerce as defined by the Privy Council in its numerous decisions upon the subject," adding that "it deals with a great many matters which are trade and commerce in no sense of the word, such as the contract of employment, employment service, unemployment insurance, and benefit and health."

Referring to the point raised in the Dominion Government's submission in support of the legislation, that the Act was within the legislative power of the Parliament to raise money by any mode or system of taxation, Mr. Justice Rinfret, having disposed of the contention that the legislation was aimed towards the regulation of trade and commerce, stated:—

There remains, therefore, in the submission made on behalf of the Dominion Government, only two heads that have to be considered in support of the legislation; and they are "the power to raise money by any mode or system of taxation" (91-3), and "the power to appropriate public moneys for any public purpose."

In truth, these powers were only faintly advanced by counsel for the Dominion in favour of the legislation. Nevertheless, they were referred to, and more particularly as I understand that they were accepted in support of the validity of the Act by my Lord the Chief Justice, I realize that my reasons for holding a different view must be explained as fully, though as concisely, as possible.

The critical question is whether or not the statute is, in its substance, an exercise of these powers to raise money by taxation and to make laws for the disposal of the public property.

In establishing the "true nature and character" of the enactment Mr. Justice Rinfret reviews the preamble to the Act and observes:—

The Parliament of Canada intended primarily to legislate with regard to employment service, to unemployment insurance, and to health matters; that it was not concerned with the public debt and property

or with the raising of money by taxation, and that the provisions for levying contributions for the creation of the national fund were nothing more than Provisions to enable the carrying out of the true and only purposes of the legislation. The Act is one dealing with and regulating employment service and unemployment insurance. The contributions (or the taxes if we are to call them so) are mere incidents of the regulation.

This contention is further amplified by Mr. Justice Rinfret thus:—

The Act does not possess the character of a taxing statute, but it is legislation intending to do precisely what the title says: to establish an employment insurance commission, to provide for a national employment service, for insurance against unemployment, for aid to unemployed persons, or other forms of social insurance and security and for purposes related thereto.

Mr. Justice Rinfret was of the opinion that these are subject-matters falling within the legislative authority of the provinces, and that "the Dominion Parliament may not, under pretext of the exercise of the power to deal with its property, or to raise money by taxation, indirectly accomplish the ends sought for in this legislation. If it were otherwise, the Dominion Parliament, under colour of the taxing power, would be permitted to invade almost any of the fields exclusively reserved by the Constitution to the legislatures in each province."

Mr. Justice Rinfret also doubted whether the contribution received from the employee could properly be termed a tax, it being, in his opinion, more in the nature of an insurance premium paid for services and individual benefits to be returned to the employee in proportion to his payments. "The benefits," the Justice states, "conferred on the employees by the Act are not gifts with conditions attached, which the employees are free to accept or not; the conditions attached to the benefits are made compulsory terms of all contracts in the specified employments." This provision is deprecated by the Justice in that the "Dominion Parliament may use its power of taxation to compel the insertion of conditions of a similar character in ordinary contracts between employers and employees."

Summing up his judgment Mr. Justice Rinfret states:—

In the premises the Act submitted to the Court is not a mere encroachment on the provincial fields through the exercise of powers allegedly ancillary or incidental to one of the enumerated powers of Section 91; in its pith and substance, it is a direct and unwarranted appropriation of the powers attributed to the legislatures by force of Section 92 of the Constitution. For these reasons, and also for the reasons given by my brother Kerwin, with whom I entirely concur, I have come to the conclusion that the Employment and Social Insurance Act

(chapter 38 of the Statutes of Canada 25-26 Geo. V) is wholly *ultra vires* of the Parliament of Canada....

Mr. Justice Kerwin in his written judgment also reviews the various sections of the Act and considered that all Parts of the Act are so closely interwoven with the Commission set up under Part I and the unemployment insurance scheme referred to in Part III "that they must stand or fall according to the validity or otherwise of sections 15 to 38 inclusive which form Part III."

Dealing with that section, Mr. Justice Kerwin could not agree with conclusions expressed by Chief Justice Duff that Part III of the Act might be justified as an exercise by Parliament of its powers under Head 1 "The Public Debt and Property" and Head 2 "The Raising of Money by any mode or system of taxation" of section 91 of the British North America Act, 1867. Disagreeing with the Chief Justice, Mr. Justice Kerwin stated that he was "unable to ascertain in what manner they may be termed an exercise of the power conferred upon Parliament to tax. It occurs to me that if it were otherwise the Parliament of Canada might in connection with any matter whatsoever, by the mere imposition of a tax, confer upon itself authority to legislate upon matters over which the legislature of each province would ordinarily have jurisdiction." Mr. Justice Kerwin is also of the same opinion as Mr. Justice Rinfret contending that Part III of the Act in dealing with contracts of employment and attaching thereto a statutory condition inter-

feres with property and civil rights. Mr. Justice Kerwin also contends that the "pith and substance of this part of the Act deals with unemployment insurance."

Citing certain legal opinion (*Re the Insurance Act of Canada*, 1932 A.C. 41, an appeal from the judgment of the Court of King's Bench, Appeal side, for the Province of Quebec) Mr. Justice Kerwin contends that "the legislation in question does not even purport to be a taxing Act."

Concluding his judgment, Mr. Justice Kerwin states:—

.... even if the object aimed at by Part III of the present Act may be praiseworthy and if the desired result might better be obtained by the Dominion than all or some of the provinces acting within their constitutional limitations might accomplish, the matter is not translated from the jurisdiction of the provincial legislature to that of Parliament. In the same way, I am unable to see how, in view of the summary of the powers of the Dominion with reference to trade and commerce, also given elsewhere by the learned Chief Justice, the matter could be considered as falling within that head of section 91.

For these reasons, and for the reasons given by my brother Rinfret which I have had the opportunity of perusing, I certify to the Governor General in Council for his information my opinion that the Act *in toto* is *ultra vires* of the Parliament of Canada.

Similarly, in the opinions of Mr. Justice Crockett and Mr. Justice Cannon the Act was held to be *ultra vires* of the Dominion Parliament

### **The Weekly Rest in Industrial Undertakings Act; the Minimum Wages Act; and the Limitation of Hours of Work Act**

The constitutional validity of three statutes enacted by the Dominion Parliament in 1935 depended chiefly on the interpretation of the treaty-making power of the Dominion as applied in the case of the international labour conventions of the International Labour Conference established by the Peace Treaty. On this point, the six members of the Supreme Court of Canada were evenly divided. The Chief Justice, Sir Lyman P. Duff, Mr. Justice Davis and Mr. Justice Kerwin held that under Section 132 of the British North America Act, the Parliament of Canada had all power necessary to give effect to such conventions when they had been ratified by the Governor-General in Council. The other members of the Court disagreed with this opinion and submitted their reasons separately.

The legislation in question comprised the Limitation of Hours of Work Act, the Weekly Rest in Industrial Undertakings Act and the

Minimum Wages Act (LABOUR GAZETTE, 1935, p. 617). These statutes were designed to give effect to draft conventions adopted by the International Labour Conference at Geneva in 1919, 1921 and 1928, respectively. By their terms, they became "conventions" on ratification by a specified number of states members of the International Labour Organization.

Prior to 1935, the only draft conventions of the Conference which had been given legislative effect by the Dominion Parliament were those, the subject matter of which appeared to fall clearly within the competence of the Dominion Parliament under the provisions of the British North America Act. In this way, legislation has been enacted to give effect to seven conventions affecting seamen. Four of these are already in force. The other three are embodied in the Canada Shipping Act, 1935, which has been proclaimed to come

into effect on August 1, 1936. Another convention for the protection of persons loading and unloading ships may be given effect to by regulations made under the Act by the Governor in Council.

### Previous Decisions

In 1925, the Dominion Government referred to the Supreme Court of Canada certain questions as to the respective competence of the Dominion and the provincial legislatures as regards the draft convention on the eight-hour day in industrial undertakings. The unanimous opinion of the Court was to the effect that the convention dealt with matters concerning which legislative jurisdiction belonged to the provinces, either under the head of Property and Civil Rights or of Local and private matters within the province in Section 92 of the British North America Act enumerating the subjects assigned to the provincial legislatures (LABOUR GAZETTE, July, 1925, p. 671). With respect to employees of the Dominion Government and workmen employed in parts of Canada outside the boundaries of any province, however, it was held that the Parliament of Canada had power to legislate on this subject.

In 1931 and 1932, two cases involving the right of the Dominion Parliament to give legislative effect to international treaties were decided by the Judicial Committee of the Privy Council. In both cases, the judgment was in favour of the Dominion and rested, at least in part, on Section 132 of the British North America Act. This section provides:—

The Parliament and Government of Canada shall have all Powers necessary or proper for performing the Obligations of Canada or of any Province thereof, as Part of the British Empire, towards Foreign Countries arising under Treaties between the Empire and such Foreign Countries.

### Aeronautics Case:

The first of the two cases involving international treaties arose out of the Aeronautics Act, passed by Parliament in 1919 with a view to carrying out the obligations of Canada as a part of the British Empire under the convention relating to the regulation of aerial navigation. The convention was drawn up at the Peace Conference and was signed by the representatives of the Allied Powers, including Canada, and was ratified by His Majesty on behalf of the British Empire on June 1, 1922. When the question was raised by the Province of Quebec "as to the legislative authority of the Parliament of Canada to sanction regulations for the control of aerial navigation generally within Canada" and in their application to flying

operations carried on within a province, it was referred to the Supreme Court of Canada. The Court upheld the claim of the provinces that some of the regulations laid down in the Act affected property and civil rights within a province and were, therefore, invalid as Dominion legislation. On appeal to the Judicial Committee of the Privy Council, the judgment was reversed and the question determined in favour of the Dominion. In the words of Lord Sankey:—

To sum up, having regard (a) to the terms of s. 132; (b) to the terms of the Convention which covers almost every conceivable matter relating to aerial navigation; and (c) to the fact that further legislative powers in relation to aerial navigation reside in the Parliament of Canada by virtue of s. 91, items 2 (trade and commerce), 5 (postal service), and 7 (defence), it would appear that substantially the whole field of legislation in regard to aerial navigation belongs to the Dominion. There may be a small portion of the field which is not by virtue of specific words in the British North America Act vested in the Dominion; but neither is it vested by specific words in the Provinces. As to that small portion it appears to the Board that it must necessarily belong to the Dominion under its power to make laws for the peace, order and good government of Canada. Further, their Lordships are influenced by the facts that the subject of aerial navigation and the fulfilment of Canadian obligations under s. 132 are matters of national interest and importance; and that aerial navigation is a class of subject which has attained such dimensions as to affect the body politic of the Dominion.

### Radio Broadcasting Case:

The second case was also an appeal from a judgment of the Supreme Court of Canada in answer to questions referred to it concerning the regulation and control of radio broadcasting in Canada. The Radiotelegraph Act of Canada was enacted to fulfil the obligations assumed by the Dominion as a party to the International Radiotelegraph Convention of 1927. This treaty was not one between the British Empire as such and foreign countries, as in the case of the aviation treaty, but one to which Canada was a signatory on its own behalf, a situation "quite unthought of in 1867." At that time,

The only class of treaty which would bind Canada was thought of as a treaty by Great Britain and that was provided for by s. 132. Being therefore not mentioned explicitly in either s. 91 or s. 92 [enumerating powers given to the Dominion and the provinces respectively], such legislation falls within the general words at the opening of s. 91 which assign to the Government of the Dominion the power to make laws "for the peace, order and good government of Canada in relation to all matters not coming within the classes of subjects by this Act assigned exclusively to the legislatures of the prov-

inces".... But the question does not end with the consideration of the convention.

Under section 92 of the British North America Act assigning the regulation of certain works and undertakings to the provinces, several exceptions are made, including steamship lines, railways, telegraphs and other works connecting one province with another or extending beyond the limits of a province.

These provisions ... have the effect of reading the excepted matters into the preferential place enjoyed by the enumerated subjects of s. 91.

It was the opinion of the Judicial Committee that radio broadcasting falls within both the word "telegraphs" and the general words, "undertakings connecting one province with any other or others of the provinces or extending beyond the limits of the province." Further,

As their Lordships' views are based on what may be called the pre-eminent claims of s. 91, it is unnecessary to discuss the question ... whether, if there had been no pre-eminent claims as such, broadcasting could have been held to fall either within "property and civil rights," or within "matters of a merely local or private nature."

As a result of the judgments in these cases, the Dominion Government in 1935 adopted the view that under section 132 of the British North America Act dealing with treaties, the Dominion Parliament could enact legislation to implement the conventions of the International Labour Conference when they had been ratified by the Government. As there was a difference of opinion on this point between the Government of the day and the Opposition, the question as to the validity of the three statutes passed in pursuance of this policy was referred to the Supreme Court after the change of Government in October, 1935.

### Judgments on 1935 Legislation

*Chief Justice, and Davis and Kerwin, J.J.* In the written opinion of the Chief Justice Sir Lyman Duff, and Davis and Kerwin, J.J., holding the legislation valid, the minimum wage convention is discussed but it is stated—

In substance, the foregoing reasoning governs the decision as to the answers to the interrogatories touching the validity of the statutes relating to Weekly Rest in Industrial Undertakings and to the Limitation of Hours of Work.

The convention providing for minimum wage fixing machinery was "confirmed and approved" by the Governor General in Council on April 12, 1935, and on April 25, the formal instrument of ratification was deposited with the Secretary of the League of Nations. The Chief Justice pointed out that

the question before the Court, put in precise form, was this:—

Is the statute ... constitutionally effective, without the consent of the provinces, to alter the law of those provinces by bringing that law into conformity with the stipulations of the convention so ratified: the matter of these stipulations being, *ex hypothesi*, normally (and saving certain specific fields of legislation with which we are not concerned) a subject matter of legislation within the exclusive competence of the respective provincial legislatures under section 92 of the B.N.A. Act?

The principal points now in controversy arise upon these contentions of the Provinces:

First, that the Governor General in Council has no authority to enter into any international engagement; second, that, since the subject matter of the convention falls within the subdivision of s. 92, which relates to property and civil rights within the Provinces, the assent of the provincial legislatures was an essential condition of a valid ratification under Art. 405 of the Labour Part of the Treaty. Third, that in view of the character of its subject matter, the Provinces alone are competent to give the force of law to the Convention.

On the first point, as to the power of the Government of Canada to enter into an international treaty on its own account without reference to His Majesty, the Chief Justice was of the opinion that this custom had grown up and had been recognized by the Judicial Committee of the Privy Council in the Radio case when such an agreement was held to be "adequate in international law to create an international obligation binding upon Canada." The ratification of a convention of the International Labour Conference is one claimed to be "effected pursuant to a treaty obligation arising under the Treaty of Versailles" which is a treaty between the British Empire and foreign countries and section 132 of the British North America Act applies to the obligations incurred under that Treaty. Moreover, the Treaties of Peace Act, 1919, enacted by the Dominion Parliament, provides that

the Governor in Council may ... make such orders in council and do such things as appear to Him to be necessary for carrying out the said Treaties.

It was held, therefore, by the Chief Justice that section 132 of the British North America Act and the Treaties of Peace Act, 1919, give the Governor in Council full power to authorize ratification of a convention of the International Labour Conference.

The two main objections raised to the above conclusion were, first, that the legislative authority created by section 132 does not include authority to legislate on matters assigned to the provinces under section 92 of

the British North America Act, and, second, that section 132 is limited to matters

which are properly the subject of international arrangement and that such matters as the regulation of the rates of wages, the hours of labour and days of rest are matters of purely domestic concern which do not fall within that category.

As to the second objection, the Chief Justice pointed out that it was scarcely tenable since the Treaty of Versailles provides that

subject to and in accordance with the provisions of international conventions existing or hereafter to be agreed upon, the members of the League:

(a) will endeavour to secure and maintain fair and humane conditions of labour for men, women and children, both in their own countries and in all countries to which their commercial and industrial relations extend, and for that purpose will establish and maintain the necessary international organizations.

Further, in Part XIII of the Treaty providing for a permanent International Labour Organization, it is set out that the failure of any nation to adopt humane conditions of labour is an obstacle in the way of other nations which desire to improve conditions in their own countries, and that such humane conditions include the regulation of hours of work, prevention of unemployment, provision of a living wage, etc. As regards the first objection,

that matters ordinarily falling, as subjects of legislation, within s. 92 of the B.N.A. Act are excluded from the Dominion authority under s. 132, it may be said at once that such a view would run counter to well established practice as well as to judicial authority. The Dominion Parliament has, in fact, exercised the powers vested in it for performing obligations arising under such treaties by legislating in relation to matters which otherwise would have fallen within the domain of property and civil rights within the several provinces, and of controlling the management and disposal of the public lands and other property of the Provincial Governments.

As instances of such legislation, the Chief Justice referred to the Dominion statutes giving effect to the International Waterways Treaty of 1909, the Japanese Treaty of 1911, the Aerial Navigation Convention of 1919 and the Radiotelegraph Convention of 1927. Of the judgments of the Judicial Committee of the Privy Council in the Aeronautics and Radio cases referred to above, the Chief Justice of Canada observes:—

It seems hardly open to dispute that their Lordships intended to lay down that international obligations, which are strictly treaty obligations within the scope of s. 132, as well as obligations under conventions between governments not falling within s. 132, are matters which, as subjects of legislation, cannot fall within s. 92 and, there-

fore, must fall within s. 91; and since they do not fall within any of the enumerated subjects of s. 91, they are within the ambit of the Dominion power to make laws for the peace, order and good government of Canada. That seems to be the effect of what is said, because, at pp. 311 and 312, their Lordships dealt with the contention, advanced on behalf of the provinces, that legislative authority to deal with and give effect to the convention is vested, as regards matters falling within the enumerated heads of s. 91, in the Dominion Parliament; but that, as regards matters which would normally fall within s. 92, such authority is vested in the provincial legislatures. The contention is rejected, and rejected for the reasons given in the passage quoted, viz., that such matters, as the subjects of an international convention, are matters which concern the Dominion as a whole and, therefore, exclusively within the competence of the Dominion Parliament.

It is, at this point, important to emphasize these two things: First, that by the combined effect of the judgments in the Aeronautics case and the Radio case, the jurisdiction of the Dominion Parliament in relation to international obligations is exclusive; and, moreover, as such matters are embraced within the authority of Parliament in relation to peace, order and good government, its power is plenary.

It has been contended in respect of Dominion jurisdiction in relation to international matters, under s. 132, as well as under the residuary clause ... that there are certain fundamental terms of the arrangement upon which the B.N.A. Act was framed which it is difficult to suppose Parliament could in any case disregard; and that it is a necessary inference to be drawn from the B.N.A. Act as a whole as regards such terms that the Dominion cannot, without, at all events, the assistance of the Provinces, legislate in contravention of them, even in the exercise of its authority over international relations. It is not necessary to deal with this contention; it is sufficient to say that the statutes under discussion do not deal with matters excluded from Dominion jurisdiction by any such principle.

In summary of the points dealt with above, it was stated:—

It may be desirable to recall what has been said with regard to the scope of legislative authority vested in the Parliament of Canada, and the legislatures of the provinces combined. Subject to the reservations mentioned, the ambit of that legislative authority would appear to embrace any action of the Government of Canada in entering into international arrangements either directly, by way of agreements between governments or otherwise without the intervention of His Majesty, or, in the case of treaties between heads of states, by plenipotentiaries appointed by His Majesty on the advice of the Canadian Government; and, generally speaking, the conduct of external affairs by that Government. As regards all such international arrangements, it is a necessary consequence of the respective positions of the Dominion executive and the provincial executives that this authority resides in the Parliament of Canada. The Lieutenant-Governors represent

the Crown for certain purposes. But, in no respect does the Lieutenant-Governor of a province represent the Crown in respect of relations with foreign governments. The Canadian executive, again, constitutionally acts under responsibility to the Parliament of Canada and it is that Parliament alone which can constitutionally control its conduct of external affairs.

As the subject of agreements with foreign countries is not one of the subjects embraced within s. 92, or within any of the enumerated heads of s. 91, it follows that the authority must rest upon the residuary clause from which Parliament derives its power to make laws for the peace, order and good government of Canada; and it follows from what has already been said that this power is plenary. It is for the Parliament of Canada to determine the conditions upon which such agreements shall be entered into as well as the manner in which they shall be performed and this may be done by antecedent legislation or by legislation taking effect *ex post facto*. These propositions are, indeed, corollaries of the proposition that the power is plenary.

The Chief Justice then continues:

The draft convention now in question was, as we have seen, brought before the House of Commons and the Senate, received the assent of both Houses in the form of resolutions, which resolutions approved the ratification of it, and the legislation now in question was passed for the purpose of giving legislative effect to the stipulations, the operative clauses of the statute being preceded by a preamble in which it was recited that the draft convention has been ratified by Canada. The propriety of this procedure is questioned on the ground that, under the special provisions of Art. 405, and especially those of paragraphs 5 and 7 of the Article, the draft convention should have been submitted to the provincial legislatures.

There can, of course, in view of what has been said, be no dispute that the procedure followed, if we put aside the provisions of Art. 405, was the usual and the proper procedure for entering into agreements with foreign governments. The Governor General in Council is exclusively invested with the executive authority to assent to an agreement, in the form of an agreement between governments, with the government of a foreign state. The Parliament of Canada is the legislative body that is exclusively invested with authority to legislate in respect of the creation of obligations through the instrumentality of such agreements. It is the legislative body exclusively invested with power to legislate for giving effect to such obligations. The course of the proceedings, prior to ratification, in which the convention was approved by resolutions of the Senate and the House of Commons respectively, was in accord with the settled general practice of the Canadian Parliament in the ratification of such agreements; and the statute which, in its preamble, declares that the convention has been ratified by Canada, in itself would constitute sanction by legislative act of that ratification. Executive and legislative authority combined, each playing its appropriate part, according to the usual procedure, in the creation of the obligation and in the enactment of legislation to give effect to it.

On behalf of the Provinces it is said that, granting all this, these proceedings are nevertheless affected with invalidity because they do not conform to the procedure prescribed in Article 405 which requires the draft convention, antecedently to ratification, to be brought before "the authority or authorities within whose competence the matter lies for enactment of legislation or other action"; and, therefore, it is argued, requires that, in the application of the article to Canada, the competent authorities to which the draft convention must be submitted include the provincial legislatures.

Beginning with paragraph 5, Article 405 of the Peace Treaty creating the International Labour Organization reads:

Each of the Members undertakes that it will, within the period of one year at most from the closing of the session of the Conference, or if it is impossible owing to exceptional circumstances to do so within the period of one year, then at the earliest practicable moment and in no case later than eighteen months from the closing of the session of the Conference, bring the recommendation or draft convention before the authority or authorities within whose competence the matter lies, for the enactment of legislation or other action.

In the case of a draft convention, the Member will, if it obtains the consent of the authority or authorities within whose competence the matter lies, communicate the formal ratification of the convention to the Secretary-General and will take such action as may be necessary to make effective the provisions of such convention.

If on a recommendation no legislative or other action is taken to make a recommendation effective, or if the draft convention fails to obtain the consent of the authority or authorities within whose competence the matter lies, no further obligation shall rest upon the Member.

In the case of a federal State, the power of which to enter into conventions on labour matters is subject to limitations, it shall be in the discretion of that Government to treat a draft convention to which such limitations apply as a recommendation only, and the provisions of this Article with respect to recommendations shall apply in such case.

On the application of this Article to Canada, the Chief Justice was of the opinion that,

the judgments of the Judicial Committee of the Privy Council in the Aeronautics case and the Radio case constrain us to hold that jurisdiction to legislate for the purpose of performing the obligation—for bringing the law of the Canadian provinces into harmony with the provisions of the convention, for example—resides exclusively in the Parliament of Canada; and, by parity of reasoning, if not indeed, as an obvious logical consequence of that proposition, jurisdiction resides, in so far as executive action is required, exclusively in the Government of Canada.

There can be no possible doubt, therefore, that the Parliament of Canada is at least one of the authorities before which the draft convention must be brought in the performance of the duty imposed upon Canada by paragraph 5 of Article 405. . . . The question remains, Are the provincial legis-

latures also comprehended under the phrase "authority or authorities within whose competence the matter lies, for the enactment of legislation or other action"?

At one time we thought that, since by s. 92 the jurisdiction, speaking generally, to legislate in relation to the subjects dealt with by the draft convention would, in the absence of an international agreement and of legislation by the Parliament of Canada under s. 132, fall within the exclusive legislative jurisdiction of the provinces, the provincial legislatures might fairly be said to be included within this description. But we have been forced to the conclusion above expressed that the "legislation or other action" contemplated by paragraph 5 is "action" concerning making "effective the provisions of the convention," and, perhaps, also, action concerning ratification. That seems to me to be the plain reading of this Article; and where you have authorities (the Parliament and Government of Canada) which are exclusively invested with the power to take legislative and executive measures for the performance of international obligations, we can see no escape from the conclusion that such are the authorities designated by these paragraphs.

We were at one time much influenced by the consideration of the importance of obtaining the assent of the provincial legislatures, which would naturally be more conversant with the conditions prevailing in their respective provinces and more capable of estimating the difficulties of giving effect to a given convention therein than the Parliament of Canada could be expected to be; but such considerations, we have been forced to conclude, cannot justify a refusal to give effect to what seems to be the true construction of this Article.

Upon the true construction, the provincial legislatures, it seems to me, after a prolonged examination of the question in all its bearings, are not authorities competent to enact legislation or to take executive action for the purposes contemplated by paragraph 5; that is to say, either for making "effective the provisions of the convention," or for ratification.

Moreover, under the Treaties of Peace Act, 1919, it is the duty of the Governor in Council to take all such measures as may seem to him necessary for the purpose of carrying out the provisions of the Treaties of Peace and, therefore, to submit the draft convention to the competent authorities and to ratify it upon the consent of the competent authorities.

Ratification by the Governor General in Council would seem to imply a representation that the conditions of the authority to ratify have been fulfilled. . . . Moreover, the statute now under consideration expressly by its preamble declares that the convention has been ratified by Canada. The Governor in Council, in authorizing the ratification, spoke as the agent of Parliament as well as the representative of His Majesty the King. The ratification was accepted by Parliament as a ratification binding upon His Majesty for Canada. It has all the force, therefore, of a ratification authorized by the King in Parliament. Considering the sweeping character of the legislative authority reposed in Parliament and the Legislatures combined, and

the scope of the powers which consequently devolve upon Parliament in respect of matters outside the Provincial sphere (which matters include the creation as well as the enforcement of international obligations), it would seem that Canada could not be more solemnly committed as to the validity of the ratification in question as a ratification under Art. 405. . . .

It is contended by the Provinces that the Dominion cannot, by reason merely of the existence of an international agreement (within s. 132 or within the residuary clause) possess legislative authority enabling the Parliament of Canada to legislate in derogation of certain fundamental terms which, it is said, were the basis of the Union of 1867, and are expressly or impliedly embodied in the B.N.A. Act. For the purposes of the present reference, it is unnecessary to make any observation upon this contention further than what has already been said, viz., that the exclusive authority of the Dominion to give the force of law to an international agreement is not affected by the circumstances alone that, in the absence of such an agreement, the exclusive legislative authority of the provinces would extend to the subject matter of it.

For these reasons, it was held by the Chief Justice and by Davis and Kerwin JJ., that the Minimum Wages Act, the Weekly Rest in Industrial Undertakings Act and the Limitation of Hours of Work Act are valid.

*Mr. Justice Rinfret:*

Mr. Justice Rinfret, in stating his opinion that these statutes were *ultra vires*, pointed out that since the subject-matter of the legislation was one which falls, under the B.N.A. Act, within the jurisdiction of the provincial legislatures, the onus was on the Attorney-General of Canada to show that the subject-matter had, for some special reason, been transferred to the jurisdiction of the Parliament of Canada. Moreover, he considered that the judgment of the Supreme Court in 1925 on the reference regarding the hours of work convention was binding on the Court except in so far as it may have been superseded by subsequent pronouncements of the Privy Council in the Aeronautics and Radio cases.

These conventions are not treaties within the meaning of s. 132 of the B.N.A. Act, more particularly as the word was understood at the time of the adoption of the Act by the Imperial Parliament. Moreover, they are not treaties between the Empire and Foreign Countries in respect of which "obligations of Canada or of "any province thereof as part of the British Empire towards foreign "countries" might have arisen. Consequently, Sec. 132 in terms does not apply to these conventions.

It was decided, however, by the Privy Council on the Radio Reference . . . that a certain class of conventions, of which Canada as a dominion was one of the signatories, not being mentioned explicitly in either Sec. 91 or Sec. 92 fell within the general words

at the opening of Sec. 91 assigning to the Parliament of the Dominion the power to make laws "for the peace, order and good government of Canada in relation to all matters not coming within the classes of subjects by this Act assigned exclusively to the legislatures of the Provinces." And their Lordships "in fine, though agreeing that the convention was not such a treaty as is defined in s. 132, thought that it comes to the same thing."

Both in the Aeronautics Reference and in the Radio Reference, however, the Privy Council, at the same time as it declared that the validity of the legislation could be supported as an exercise of the powers derived from sec. 132 or from the residuary power to make plans for the peace, order and good government of Canada, also came to the conclusion that the subject of aeronautics and the subject of radio came under one or more of the enumerated heads of sec. 91 of the B.N.A. Act, radio, moreover, belonging to such class of subjects as were expressly excepted in the enumeration of the classes of subjects by the Act assigned exclusively to the legislatures of the provinces....

It would seem to me, therefore, that these two decisions are not authorities upon the question of wherein lies, as between the Parliament of Canada and the Legislatures of the Provinces, the powers necessary or proper for performing the obligations of Canada or of any province thereof arising out of conventions adopted by the International Labour Conference.

But on the present reference, as I view it, it is not necessary for this Court to enter into the discussion of this last point.

Whether treaty or convention, the questions under consideration in the aeronautics and the radio references were concerned with the validity of legislation enacted for the purpose of performing obligations arising as a result of international agreements already made and the validity whereof was not disputed....

Now, with deference, I make a very great distinction between the power to create an international obligation and the power to perform it when once it has been created.

We may leave aside the aeronautics and radio decisions, which were concerned merely with the validity of laws enacted for the purpose of performing foreign obligations, because in the present case what we have mainly to consider is the power to create foreign obligations....

While it is, no doubt, perfectly true that "overwhelming convenience—under the circumstances amounting to necessity" ... dictates the answer that the performance of obligations, both federal and provincial, arising out of international agreements must be left exclusively to the jurisdiction of the Dominion Parliament, I fail to see the same necessity with regard to the power to create these foreign obligations. When once they have been undertaken, Canada is in honour bound to perform them; but there is no necessity, nor even obligation, to undertake them. If the effect of the undertaking is that a subject of legislation within the exclusive jurisdiction of the province will thereby be transferred from that jurisdiction to the jurisdiction of the Dominion Parliament, I consider it to be within the

clear spirit of the British North America Act that the obligation should not be created or entered into before the provinces have given their consent thereto. In the particular case that we are now considering, it is my humble view that such was the effect of the judgment of this Court in the matter of the Reference of 1925.... Such, it seems to me, with respect, was the interpretation put by this Court upon the pertinent clause of Article 405 of the Treaty of Peace....

It follows from all that I have said that, in my opinion, the draft conventions upon which is based the legislation now submitted to us have not been properly and competently ratified, that they could not be so ratified without the consent of the legislature in each province, both by force of the British North America Act and upon the proper interpretation of Article 405 of the Treaty of Versailles; and that, for that reason, the Acts now submitted are *ultra vires* of the Parliament of Canada....

*Mr. Justice Cannon:*

Mr. Justice Cannon, who was of the opinion that the legislation referred to the Court was invalid under the B.N.A. Act, observed:

The question is not what power the Federal Government ought to have, but what powers, in fact, have been given to it by the B.N.A. Act.... The only direct legislative authority expressly given to the Parliament and Government of Canada concerning foreign affairs is found in this section [132] and is limited to the performance of the obligations of Canada or any Province thereof arising under treaties between the Empire as a whole and a foreign country. The Imperial Parliament saw to it that Imperial interests would be protected by federal legislation. But to pass legislation—affecting the Provinces—to ratify a treaty or agreement by Canada alone—under an evolution which came to pass since Confederation—with a foreign power, previous consultations between the federal and provincial self-governing parts of our Confederation seem to me logical and the only way to preserve peace, order and good government in Canada and save the very roots of the tree to which our constitution has been compared ... any legislation by this Parliament attempting to legislate uniformly for the whole of Canada on any subject exclusively retained by the Provinces and within the natural and obvious meaning of section 92 must, in my opinion, be *prima facie*, considered as *ultra vires* of the Dominion....

If any changes are required to face new situations or to cope with the increased importance of Canada as a nation, they may be secured by an amendment to the Act; but neither this Court nor the Privy Council should be called upon to legislate in the matter by treating the constitution as a growing tree confided to their care. We have nothing to do with the growth or with the making of the law in constitutional matters. The Imperial Parliament alone can change what they enacted—or add to it. New branches to acquire the force of law, must be embodied in the statute, not in judgments or commentaries.

The above considerations may be applied, *mutatis mutandis*, to all the acts referred to for consideration, but I would add a few words with respect to the three acts based on the so-called Geneva Labour Conventions.

Such labour conventions binding Canada independently from the rest of the Empire do not fall under 132; they were not even contemplated as feasible in 1867 when the B.N.A. Act was passed. Radio and aeronaotics are also now matters not existing at that time and had to be dealt with by the Privy Council as outside the enumerated subjects of 91 and 92; and these two decisions must be considered as *arrêts d'espèce* and confined to the subject matters which both had, necessarily, interprovincial and international aspects.

But the payment of wages for labour, the weekly rest and the rate of wages and length of hours of work were well known subjects in 1867 and they were, by common agreement, reserved by the Imperial Parliament to the Provinces as purely local and private matters of property and civil rights.

Therefore, in the words of section 405 of the Treaty of Versailles, Canada as a federal state, has only a "power to enter into convention on labour matters *subject to limitations*" and the draft convention should have been treated as a "recommendation only." Such recommendation is to be submitted to the members for "consideration with a view to effect being given to it by national legislation or otherwise." The Versailles Treaty recognizes that in certain cases, effect can be given to a labour agreement "otherwise" than by national legislation.

In these cases, it does not appear that either the recommendations or the draft conventions were submitted to the Provinces, i.e., the "authorities within whose competence the matter lies for the enactment of legislation or other action."

To my mind, this is fatal to the validity of the ratification of these labour conventions by the Federal authorities.

As an internal matter, such changes in the respective constitutional powers of the Provinces and of the Central Government cannot be justified by invoking some clauses of the treaty of Versailles. Respect of their property and civil rights was guaranteed by the British Crown to the inhabitants of the original provinces as far back as the treaty of Paris in 1763; this was confirmed by the constitution of 1867 which cannot be changed in this essential part except by an Imperial statute, as plainly set forth in the Act of Westminster of 1931, sec. 7. It is not admissible that the Parliament and the Government of Canada could appropriate these powers, exclusively reserved to the provinces, by the simple process of ratifying a labour convention passed at Geneva with representatives of foreign countries. The framers of our constitution, and the Privy Council by their recent judgments in the Radio and Aviation cases never intended to plant in its bosom the seeds of its own destruction. If such interference with Provincial rights by way of international agreements is admitted as *intra vires* of the central government, we may as well say that we have in Canada a confederation in name, but a legislative union in fact.

*Mr. Justice Crocket:*

Mr. Justice Crocket agreed with Rinfret and Cannon JJ., that the three statutes enacted to implement the conventions of the International Labour Conference were invalid. He considered that,

none of the draft conventions of the International Labour Organization of the League of Nations, upon the ratification of which by the Government of Canada it has been sought to justify the enactment of all this legislation, fall within the terms of section 132 of the British North America Act. . .

The powers granted by this section are strictly limited to the performance of obligations towards foreign countries arising under treaties between the Empire and such foreign countries. Unquestionably the section does not embrace obligations arising under any form of convention or agreement entered into by the Government of Canada with the Government of any other country within the Empire, nor does it contemplate or suggest any form of convention or agreement with the Government of any foreign country other than a treaty in the true sense of the term. As Lord Dunedin pointed out in the Radio case, the idea of Canada as a Dominion being bound by a convention equivalent to a treaty with foreign powers was unthought of in 1867, when the British North America Act was enacted, and the only class of treaty, which would bind Canada, was thought of as a treaty by Great Britain. . . For my part I am unable to comprehend how any international convention, to which Canada in its new status, whatever that status may actually be, purports to become a party as a separate government, or any obligation resulting therefrom, can possibly be brought within the terms of section 132—much less a mere draft convention, such as those of the International Labour Organization of the League of Nations. To my mind there is nothing which the judgment of the Judicial Committee in the Radio case has more decisively settled than this: that if the Government of Canada by its own plenipotentiaries enters into an international convention with the Government of any other country, whether British or foreign, section 132 cannot be relied upon as empowering the Parliament of Canada to enact legislation for the carrying out of any obligation arising under such a convention, and that, if such legislative power exists at all, it must be found, either under the enumerated heads of section 91 or the introductory words of that section, the so-called residuary clause.

In his opinion, it could not be said that there is an obligation imposed by the Peace Treaty on Canada or on any province,

for the performance of which the Parliament of Canada was empowered within the terms of section 132 to enact legislation. . . The obligation arose directly from a so-called international convention, purporting to have been ratified by Canada as a separate and distinct Government—an idea which is wholly incompatible with the conception of the Dominion of Canada as constituted by the British North America Act.

As regards the residuary clause of section 91.

It will be seen at once that this provision can only be invoked where the real subject matter of the legislation does not fall within the classes of subjects which are exclusively assigned to the Provinces by section 92. To meet this obvious and formidable difficulty the learned counsel for the Dominion brought forward the much canvassed double aspect principle, by which, as I understand it, a matter, though it relates in one aspect and in some circumstances to a class of subjects, which is exclusively assigned by section 92 to the legislative jurisdiction of the Provinces, may nevertheless in another aspect and in other circumstances assume such nationwide importance as to completely lose its original and normal identity within the purview of section 92, and thus become at any time a matter falling within the general residuary clause of section 91.

It was strongly argued that hours of work and the standard of wages and of living had attained such importance as subjects of legislation in Canada as to affect the body politic of the Dominion as a whole and thus to justify the Parliament of Canada in dealing with them in that aspect as matters demanding the intervention of Dominion legislation "for the peace, order and good government of Canada," notwithstanding that the general authority to make laws so plainly excludes all subject matters coming within the scope of section 92.

There is certainly no authoritative decision to the effect that, once it is seen that the real subject matter of a legislative enactment pertains in all its predominant characteristics to the regulation and control of civil rights in the Provinces, it can rightfully be transferred to the legislative jurisdiction of the Parliament of Canada in virtue of the introductory words of section 91 as a matter of legislation "for the peace, order and good government of Canada" in disregard of the plain and all important proviso that such jurisdiction may be exercised only in relation to matters "not coming within the classes of subjects assigned exclusively to the Legislatures of the Provinces".

This brings me to a consideration of the further question as to whether the ratification by the Government of Canada of such draft international labour conventions as those of the General Conference of the International Labour Organization of the League of Nations, which themselves imposed no obligation of any kind upon the Government of Canada or any other government represented in that organization to give legislative effect or even to assent to any of them, can itself have the effect of vesting in the Parliament of Canada legislative jurisdiction which otherwise it would not possess under the British North America Act.

It is said that we must now take it as settled by the decisions in the Aeronautics and Radio cases that international conventions and all obligations arising therefrom are matters which fall within the general authority of Parliament to make laws for the peace, order and good government of Canada in relation to matters not coming within the classes of subjects exclusively assigned to the Legislatures of the Provinces.

If this means that, once the Government of Canada has concluded a convention with the Government of any other country, whether within or without the British Empire, that fact itself operates to exclude the subject matter of the convention from section 92, regardless of the fact that that subject matter admittedly up to the time of the conclusion of the convention came within one or more of the classes of subjects exclusively assigned by that section to the legislative jurisdiction of the Provinces, I do not think that either of these cases, upon which counsel for the Dominion have so much relied, can properly be said to have laid down any such principle....

While I agree with the learned Chief Justice that the Government of Canada must now be held to be the proper medium for the formal conclusion of international conventions, whether they affect the Dominion as a whole or any of the Provinces separately, I do not think that this fact can be relied on as altering in any way the provisions of the British North America Act as regards the distribution of legislative power as between the Dominion Parliament and the Provincial Legislatures or as necessarily giving to any matter, which may be made the subject of legislation in Canada, any other meaning or aspect than that which it bears in our original constitution. Whether such a matter is one which falls under the terms of either section 91 or of section 92 or of section 132, must depend upon the real intentment of the British North America Act itself, as gathered from the terms of those sections and the Act as a whole. The original division of legislative power as between the two fields, Dominion and Provincial, has remained inviolate to this day, so far as the Imperial Parliament is concerned.

The legislation embodied in these three statutes is admittedly legislation which the Parliament of Canada would never have ventured to enact but for the draft conventions of the International Labour Organization of the League of Nations. These conventions are admittedly conventions, to which the Government of Canada were in no manner bound to assent or to formally ratify. They were submitted to the Government of this country as mere draft conventions, and stood as such until 1935, when the Government of Canada chose to approve them, several years after the expiration of the period fixed by article 405 of the Treaty of Versailles for their submission "to the authority or authorities within whose competence the matter lies for the enactment of legislation or other action." It was argued that this provision of article 405 was merely directory. I think its language is clearly mandatory, and that the ratification of the conventions, upon which these three statutes purport to be founded is null and void under the terms of article 405 of the Treaty of Versailles itself. It is, however, to the provisions of the British North America Act, not to the terms of the Treaty of Versailles, that we must look for the answers to the questions submitted to us on this reference concerning the constitutionality of these three statutes. In my opinion they are all wholly *ultra vires* of the Parliament of Canada, for the reasons above stated.

## Natural Products Marketing Act

The Natural Products Marketing Act, 1934, and its amending measure (the Natural Products Marketing Act Amendment Act) in the unanimous opinion of the Court was declared *ultra vires*. After enumerating the main provisions of this statute (outlined in the LABOUR GAZETTE, April, 1934, p. 304) the Chief Justice in a written judgment reviewed several decisions bearing on the interpretation and application of the Act.

The Chief Justice, summarizing the unanimous decision of the Court in declaring the Act *ultra vires*, stated:

In effect, this statute attempts and, indeed, professes, to regulate in the provinces of Canada, by the instrumentality of a Commission or Commissions appointed under the authority of the statute, trade in individual commodities and classes of commodities. The powers of regulation vested in the Commis-

sions extend to external trade and matters connected therewith and to trade in matters of interprovincial concern; but also to trade which is entirely local and of purely local concern.

Regulation of individual trades, or trades in individual commodities in this sweeping fashion, is not competent to the Parliament of Canada and such a scheme of regulation is not practicable

in view of the distribution of legislative powers enacted by the Constitution Act, without the co-operation of the provincial legislatures

to quote from the judgment of the Judicial Committee in the Board of Commerce case (1922) 1 A.C. at p. 201.)

The legislation, for the reasons given, is not valid as an exercise of the general authority of the Parliament of Canada under the introductory words of section 91 to make laws "for the peace, order and good government of Canada."

## The Farmers' Creditors Arrangement Act Amendment Act

The Farmer's Creditors Arrangement Bill was introduced into the House of Commons on June 4, 1934 (LABOUR GAZETTE, June, 1934, p. 492) and subsequently became law.

Under the provisions of the Act, official receivers were appointed in each district whose duty it was to formulate schemes by which debtors would be in a position to reduce their indebtedness to something approximating their ability of paying. Should the scheme be unsatisfactory in the opinion of the Creditor, provision was made for

appeals, to provincial boards whose decisions, once approved by a county court judge, were binding upon both parties.

In giving a decision on the constitutionality of this Act, the Chief Justice, Mr. Justice Rinfret, Mr. Justice Crocket, Mr. Justice Davis and Mr. Justice Kerwin held that the statute was *intra vires*; while Mr. Justice Cannon was of the opinion that the statute, except for Section 17, was *ultra vires* and that that section was *intra vires*.

## Deaths from Automobile Accidents

There were 1,224 deaths from automobile accidents in Canada during 1935, the highest since 1931 when there were 1,316. The highest death rate from motor vehicle accidents over the period 1926—1935 was 13.0 in 1929. All provinces with the exception of Prince Edward Island, New Brunswick and Alberta showed a larger number of fatalities than in 1934. The figures follow by provinces, with those for 1934 in brackets: Prince Edward Island, 2 (5); Nova Scotia, 58 (41); New Brunswick, 40 (52); Quebec, 314 (275); Ontario, 569 (528); Manitoba, 53 (41); Saskatchewan, 40 (30); British Columbia, 103 (82); Alberta, 45 (61).

The City of Montreal led the larger cities in deaths from automobile accidents with 109, Toronto 74, Vancouver 43, Windsor 28, Ottawa 25, Winnipeg 24, Quebec 17, Hamilton 16, Halifax 13, London 13, Calgary 10, Edmonton 7, Verdun 6, Regina 5, Saint John 5, and Saskatoon 1.

## Union Wage Rates in United States in 1935

Approximately one-third of the workers covered by union agreements in six principal trades studied by the United States Bureau of Labour Statistics in 70 cities received wage increases in 1935. Nearly all union longshoremen and about two-thirds of the organized workers employed on street railways and in newspaper printing plants reported higher wage rates in effect on May 15, 1935, than on May 15, 1934. In the other trades—bakeries, truck driving, book and job printing, and building—a smaller proportion of union workers obtained wage increases. About 2 per cent of all the organized workers in the six trades combined received wage reductions. All of the six trade groups reported slightly lower weekly hours of work. The stipulated weekly hours in 1935 averaged around 40 in the building and printing trades, 43 in bakeries, and 48 among truck drivers. Longshoremen on the Pacific Coast had their basic hours reduced from 48 to 30 per week. In the other ports the basic weekly hours of work remained unchanged.

## LABOUR LEGISLATION ENACTED BY THE PARLIAMENT OF CANADA AND BY THE LEGISLATURES OF NOVA SCOTIA AND QUEBEC IN 1936

The Parliament of Canada, which met on February 6 and was prorogued on June 23, 1936, enacted several laws of special interest to labour. Among them were an Act providing for the establishment of a National Employment Commission, an Act to aid in the relief of unemployment, in the promotion of agricultural settlement and in the conservation and development of natural and other resources and an Act to assist in the employment of veterans of the Great War. Section 98 of the Criminal Code dealing with unlawful associations was repealed and also the Economic Council of Canada Act passed in 1935. Amendments were made to the Canada Shipping Act and to the section of the Criminal Code on seditious offences. A Bill to amend the Combines Investigation Act which was introduced but failed to pass is dealt with elsewhere in this issue.

### Unemployment

The National Employment Commission Act, which received Royal Assent on April 8, 1936, provides for a Commission of not more than seven members appointed by the Governor General in Council and having its headquarters in the City of Ottawa. A Commission of seven members was appointed on May 14 (The LABOUR GAZETTE, May, 1936, p. 391). The duties of the Commission are to carry out, in co-operation with provinces, municipalities and private and public bodies, a national registration and classification of persons on relief and to investigate, report upon, and make recommendations concerning the following:—the conditions to be complied with by provinces obtaining grants for relief purposes from the Dominion Government; means of mobilizing public and voluntary relief agencies and so co-ordinating their work as to avoid overlapping and abuses and to secure, when necessary, effective supervision and auditing of expenditures; measures respecting proposals for public works programs and projects of the Dominion, the provinces, municipalities and other agencies to provide employment so as to mobilize and co-ordinate their activities; measures of co-operation with commercial and industrial groups in devising means to maintain and increase employment; plans for the establishment of an apprenticeship system in industry; means of providing employment for disabled persons and efforts to secure suitable employment for ex-soldiers in co-operation with the Veterans' Assistance Commission to be set up under the Act to assist in the

employment of war veterans; comprehensive measures constituting long-range plans of national development which may be proceeded with or discontinued from time to time as conditions may determine. Finally, the Commission is to take such steps to ensure such publicity as it may deem necessary to enable it to discharge its duties effectively. It is required to supervise, under the direction of the Minister of Labour, the expenditure of funds voted by Parliament for the purpose of affording relief and providing employment and to perform such administrative duties with respect to relief and employment as may be assigned to it by the Governor in Council.

The Governor in Council is authorized to name a National Advisory Commission, its members to include representatives of industrial, occupational, philanthropic and social welfare organizations who will give their services free but who will be paid the necessary travelling expenses and living allowances. Special committees on the employment of women and young persons may be appointed by the Minister of Labour from among the member of the National Advisory Commission. Local advisory committees may be appointed by the National Employment Commission with the approval of the Minister.

The Act provides that the Governor in Council, on the recommendation of the Minister, may make regulations to carry out the objects of the statute. The latter must be submitted to the House of Commons immediately, if Parliament is in session and if it is not in session, then, within fifteen days of the opening of the next session of Parliament.

The Unemployment Relief and Assistance Act, assented to on May 7, 1936, provides that the Governor General in Council may, out of moneys appropriated by Parliament, authorize the execution of such works and undertakings as the Governor in Council may deem to be in the general interest of Canada, giving employment thereon as far as practicable to relief recipients in the province where the work is being performed. Where any such undertaking to which the Dominion Government is contributing is under provincial jurisdiction, all contracts must be approved by the Minister of Labour and the work supervised by an engineer in the service of the Dominion Government.

As passed by Parliament the Act empowered the Governor General in Council to make agreements with the provinces respecting relief measures and provided for financial assistance to any province, by way of loan, advance or

guarantee, not exceeding the total amount payable by the Dominion to such province under any agreement entered into under authority of the Act. Later in the session, however, this section of the Act was amended to empower the Dominion to grant additional assistance, where necessary, to any province for its share of the cost of relief and relief undertakings during the months of February and March, 1936. The Minister of Labour in introducing the amending Bill explained that the change was being made because "in the case of one or two of the Western provinces, no arrangements had been made at the expiring date of the Relief Act, 1935, for financing their relief requirements for February and March and applications to the Dominion for assistance for those months, arrived too late to be dealt with under that authority. . . . In addition, representations have been made that the provincial share of relief outlays in some cases exceeded the total amount payable by the Dominion under agreements entered into under authority of the Act."

The new statute provides further that the Governor General in Council may make agreements with corporations, partnerships or individuals engaged in industry respecting the expansion of industrial employment, renew or consolidate advances, loans or guarantees made under previous Relief Acts, and make regulations which are to have the force of law for carrying out the Unemployment Relief and Assistance Act. The Act will expire on March 31, 1937, except as regards the clause authorizing the renewal or consolidation of loans, advances or guarantees under previous Relief Acts and the further provision that obligations or liabilities incurred or created under authority of the present Act may be discharged.

A report on the moneys expended or loaned and the obligations contracted under the Act is to be laid before Parliament within thirty days after the expiration of the Act or, if Parliament is not in session, it is to be published and made available for distribution by the Department of Labour.

The Veterans' Assistance Commission Act, which received the Royal Assent on June 23, 1936, makes provision for the appointment by the Governor in Council of a Commission which is to be attached to the Department of Pensions and National Health and to consist of three members who are to hold office for one year but whose term may, on recommendation of the Minister, be extended for a period of six months. The Commission is to ascertain the extent of unemployment among persons in Canada who served in the naval, military, or air forces of Canada or in any other of His Majesty's

Forces or in any of the Forces of His Majesty's allies during the Great War and to classify those who are unemployed according to their physical and mental capacity to undertake gainful employment in restricted and unrestricted occupations and in any other categories which the Commission may consider applicable. The Commission is also to investigate and report on present methods of providing employment for veterans, particularly those who are handicapped and disabled, on proposals for further schemes and agencies to provide for their speedy absorption into employment, on the possibility of re-establishing in gainful occupations handicapped and disabled veterans who are incapable of being absorbed into industrial employment by the development of small holdings, community centres and such other methods as may be deemed practicable and on existing facilities for the care and maintenance of veterans while unemployed. The Commission is to co-operate with the National Employment Commission in efforts towards the registration, classification and employment of veterans.

It may, with the approval of the Minister, appoint honorary local committee to assist in obtaining information which may be required for classification of unemployed veterans, to investigate and report upon measures respecting the employment of veterans, to assist the Commission in enlisting the co-operation of employers' and employees' associations and such other public and private agencies as may be in a position to provide employment and to aid the Commission in any other way in carrying out the provisions of the Act. The Commission may recommend the manner of putting into effect projects of assistance and, with the approval of the Governor in Council, may supervise the carrying out of such projects. After its term of office expires, its powers are to be vested in the Minister who is authorized to carry out schemes commenced by the Commission.

The Commission is also to investigate and report upon means of co-operation between the Commission and any other commission or department of the Government, Provincial Government or agency, veterans' association, or commercial, agricultural or industrial group or organization. The Governor in Council may make orders and regulations for carrying out the provisions of the Act which when published in the *Canada Gazette* are to have the force of law. The Minister may from time to time require the Commission to submit a report on the progress of projects and on other matters arising out of the Act and before the expiry of its term of office, the Commission is to make a final re-

port to the Minister to be laid before Parliament.

### Unlawful Associations

Amendments to the Criminal Code, which received the Royal Assent on June 23 and which will come into effect on September 1, 1936, included the repeal of Section 98, which was enacted in 1919. This section declared unlawful any association whose professed purpose was to bring about governmental, industrial or economic change within Canada by force or violence or by threats of force. Property belonging or suspected to belong to an unlawful association was made seizable without warrant by any person authorized by the Commissioner of the Royal Canadian Mounted Police. The section further declared any person guilty of an offence and liable to imprisonment for not more than twenty years who acted as an officer of an unlawful association and who sold, wrote, spoke or published anything as representative of it, who became and continued to be a member of it, wore or displayed a badge or other device indicating membership of or association with it or contributed to or solicited dues for it. Any person who had attended a meeting of an unlawful association, spoken publicly in advocacy of it or distributed literature of it was presumed to be a member of it in the absence of proof to the contrary. The owner of a hall who knowingly permitted therein a meeting of an unlawful association or subsidiary or of any group of persons who taught or defended the use of force was liable to a fine not exceeding \$5,000 or to imprisonment for five years or to both. If a judge, magistrate or justice of the peace was satisfied by information or oath that there was reasonable ground for suspecting that a contravention of this section had been or was about to be committed he might issue a warrant for search of premises and persons and seizure of literature. Any person who published, circulated, sold or offered for sale or distribution any literature which taught or defended the use, without lawful authority, of force or violence to effect any governmental, economic, or industrial change was declared guilty of an offence and liable to imprisonment for not more than twenty years. A similar penalty might be imposed upon any person mailing such literature or importing it into Canada.

Section 133 of the Code which deals with sedition was amended to provide that, without limiting the generality of the meaning of the expression "seditious intention," everyone shall be presumed to have a seditious intention who publishes or circulates any writing, printing or document in which is advo-

cated, or who teaches or advocates, the use, without the authority of law, of force, as a means of accomplishing any governmental change within Canada.

### Seamen

The Canada Shipping Act, 1934, was the subject of a number of amendments, many of which are designed to make clear the power of pilotage authorities to make regulations and impose penalties. The section providing that the amount of damage caused by a pilot to a ship may be deducted from his pilotage dues was amended to limit his financial liability for loss due to his neglect or want of skill to \$300.

The section relating to inspection of small steamships was amended and now provides that steamships not over 15 tons gross which are not passenger steamships shall be exempt from inspection. Subject to the above provision, steamships of over 5 tons and under 150 tons gross which are not passenger ships are subject to quadrennial inspection. In both cases, however, such steamships if propelled by steam are subject to annual inspection of boilers and life-saving equipment. In the case of steamships of over 40 tons gross these provisions do not become effective for two years after the coming into force of Part VII of the Act which deals with safety; in the case of steamships from 25 to 40 tons gross the period is three years and for steamships of 25 tons and under, four years. The above amendments will come into effect on Proclamation.

### Economic Council

The Economic Council of Canada Act passed in 1935 was repealed. This Act, which provided for an Economic Council of fifteen members serving without remuneration under the chairmanship of the Prime Minister, was summarized in THE LABOUR GAZETTE for July, 1935, at p. 623.

### Resolutions

On March 9, 1936, the following Resolution was agreed to:—

Whereas, a trained youth is indispensable to the future welfare of Canada;

And whereas, the unemployment of parents and heads of families, because of conditions for which they are in no way responsible, means that boys and girls, and young men sary training to properly and adequately equip them for a life's vocation;

And whereas, prolonged enforced inactivity upon the youth of our country;

And whereas, it is not enough merely to provide employment for youth who have suffered from the lack of training and preparation for vocational work;

And whereas, provincial schools which have reached a high standard of excellency and which yearly are increasing the sphere of their usefulness, do not provide adequate facilities for technical training;

Therefore be it resolved, that the Government consider the desirability of investigating the broad question of the re-establishment of the young men and young women of Canada;

And be it further resolved, that, in the conduct of such investigation, attention be given to the possibility of making available to

those of our youth who are adapted for such training and who would otherwise be denied it, technical training in various branches;

And be it further resolved, that, in the conduct of such investigation, consideration should be given to the feasibility of setting up and maintaining a National Youth Re-establishment Commission.

A Resolution for extension of pensions to blind persons which was agreed to on the same date was given in THE LABOUR GAZETTE for March at p. 220.

## Nova Scotia

During its recent session, which opened on March 10 and closed on May 2, 1936, the Nova Scotia Legislature enacted an Industrial Standards Act and amended statutes relating to workmen's compensation, unemployment relief, regulation of motor vehicles, employment of non-resident labour and early closing of shops.

### Industrial Standards

The Industrial Standards Act is similar, in the main, to the Industrial Standards Act of Ontario as enacted in 1935, except that, instead of being general in its application to industry, it applies only to building and construction in Halifax and Dartmouth. The Act does not apply to persons employed by the provincial Government or any of its departments or by a municipal corporation or by a board or commission created by any Act of the Legislature. An "employee" as defined in the Act excludes any person who performs temporary work or service the total amount of which does not exceed in value \$100.

The Minister of Labour, on petition of employers or employees in any industry covered by the Act, may convene a conference or a series of conferences of employers and employees engaged in such industry for the purpose of investigating and considering labour conditions and practices and negotiating standard or uniform rates of wages and hours and days of labour in such industry. Where a schedule of wages and hours is agreed upon the parties to the agreement are to assist in maintaining the standards provided for in such schedule. The Minister may approve any schedule of wages and hours if he deems it to have been agreed upon in writing by a proper and sufficient representation of employers and employees in the industry concerned and, upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force during the same period of time as the agreement, and to be binding upon all employers and employees in the industry. Schedules are not to become effective until ten days after publication of the Order in Council in the *Royal Gazette*.

The Lieutenant-Governor in Council may appoint one or more inspectors to assist in carrying out the provisions of the schedules and of the Act and any regulations made under its authority. The inspector may require any employer affected by a schedule to furnish the name, address and age of all employees together with information respecting wages, hours and days and conditions of labour, and to produce records, payrolls, contracts of employment and other documents for inspection. Employers must also keep schedules affecting them posted in a conspicuous place.

The Minister may enquire into any partnership or association and if he considers such to be used to defeat the Act he may declare every member of such partnership to be an employee for purposes of the Act and regulations. The Lieutenant-Governor in Council may make regulations for carrying out the provisions of the Act which when published in the *Royal Gazette* are to have the force of law. Employers and employees in an industry to which a schedule applies may establish a board of not more than five members to hear complaints and assist in enforcing the schedule.

An employer paying a lower wage or requiring an employee to work for longer hours than those prescribed by a schedule applying to the industry in which employer or employee is engaged, is liable to a fine of from \$25 to \$100 and in default of payment to a term of imprisonment not exceeding three months. In addition he must pay to the Inspector on behalf of the Provincial Treasurer or the employee in the discretion of the magistrate, the full amount of wages found to be unpaid which amount is recoverable by distress at the instance of the Inspector. An employee violating a schedule by consenting to be employed for less wages or longer hours is liable to a fine of from \$1 to \$10 and in default of payment to ten days' imprisonment. No schedule may prescribe lower wages or longer hours for women and girls than those prescribed by the

regulations under the Minimum Wages for Women Act. Any person guilty of a violation of the Act for which no other penalty is provided is liable to a fine ranging from \$1 to \$100 and in default of payment to imprisonment for not more than thirty days.

### **Workmen's Compensation**

The Workmen's Compensation Act was the subject of a number of amendments. The definition of "employer" was widened to include a contractor and a sub-contractor as well as the principal. A new clause provides that notwithstanding that an application for compensation has not been made within twelve months from the date of the accident or that the right to compensation has not been established within fifteen months from such date, the Board, if satisfied that there has been good reason for the delay, may extend the time. The section setting forth circumstances in which a claim or decision may be reviewed by the Board was amended to provide for such a review when new evidence relating to such claim or decision has been presented. In 1935 an amendment was made in the section under which an employer neglecting or refusing to make returns or pay assessments was liable for the capitalized value of compensation for accidents to workmen happening during the period of default. The amendment rendered an employer similarly liable if he refused or neglected to report his estimate of payroll and extended liability in all cases to include medical aid payable in respect of such accidents. A proviso is now added that the amount payable under the above provisions shall not exceed an amount which the Board considers just or reasonable in the circumstances. The proviso is retroactive to May 12, 1935, the day following that on which the 1935 amendment came into force.

The section was redrawn which fixes liability for assessments in the case of work done under contract or sub-contract. Where work is done under a sub-contract the principal is now liable as well as the contractor and the sub-contractor. A contractor or sub-contractor who has not been assessed with respect to work carried on by him as such contractor or sub-contractor may be deemed by the Board to be workmen of the principal, or, at the option of the Board, the workmen of a sub-contractor may be deemed to be workmen of the contractor with respect to any industry within the scope of Part I of the Act.

### **Unemployment Relief**

The statute passed by the Legislature in 1932 under the title "An Act to enable

advantage to be taken of the Act of the Parliament of Canada entitled 'The Unemployment and Farm Relief Act'" was amended with regard to the provision to be made for a sinking fund with respect to debentures issued for relief purposes. The amendment provides that in the case of borrowings under the Act by the City of Halifax the sections of the Halifax City Charter which relate to sinking funds shall apply instead of the provisions of the Act.

### **Chauffeurs**

An amendment to the Motor Vehicle Act, 1932, provides that, subject to the approval of the Lieutenant-Governor in Council, the Minister of Highways may make regulations governing the hours of labour for drivers or operators of commercial motor vehicles.

### **Electrical Workers**

The Towns' Incorporation Act was amended to enable town councils to pass by-laws for the licensing of persons engaged in the business of electric wiring and regulating the manner in which such work shall be done, the character of material to be employed, and the appointment of inspectors to carry out the provisions of the amendment.

### **Employment of Non-Residents**

The Nova Scotia Labour Act was continued in force until May 1, 1937. This statute, which was enacted in 1933 to expire on May 1, 1934 and has been continued in effect from year to year, forbids any person or corporation employing twenty-five or more workers to hire any person who has not been a resident of Nova Scotia for at least one year unless the person hired produces a certificate from the Government Employment Agent or the Municipal Clerk in the place where he is to be employed stating that there are no unemployed persons in such place capable of doing and willing to do the work.

An amendment to the Halifax Charter requires any person not a resident of Nova Scotia to pay a tax of \$10 on commencing employment in the city and a like tax in each civic year thereafter.

### **Early Closing of Shops**

The Halifax Early Closing Act was amended to correct certain clerical errors. One of these corrections makes it clear that a petition for an early closing by-law must be signed by seventy-five per cent of the persons to be affected by such by-law.

### **Coal Mines**

A Bill to amend the Coal Mines Regulation Act, which was introduced but failed to pass, would have permitted a person holding a

degree of mining engineer to be a candidate for a certificate as underground manager or overman if he had had three years' experience in a coal mine part of which must have been spent underground. The Act as it stands requires all such candidates to have four years' experience underground part of which must have been at the working face.

The Bill provided that no person should be employed to cut, shear, mine, bore, loosen or extract coal by hand, machinery or otherwise in any mine who was not in possession of a first-class certificate as a coal miner

under the Act or who, while so employed, was not constantly accompanied by and under the control of a holder of a first-class certificate. The Act at present requires a person employed to cut, shear, mine, etc., to hold a second-class certificate and to be accompanied by and under control of a holder of a first-class certificate. The Bill would also have required a candidate for a first-class certificate to have had two years' experience underground, one year of which must have been spent at the working face. At present the Act requires one year at the working face.

## Quebec

The Quebec Legislature, which met on March 24 and was dissolved on June 11, 1936, enacted a law providing for old age pensions and amended statutes dealing with the extension of collective agreements and with Sunday observance. A number of Bills of labour interest were before the Legislature at the time of dissolution. These included Bills to amend the laws relating to factories and shops, minimum wages, workmen's compensation, unemployment relief and workmen's dwellings.

### Old Age Pensions

The Quebec Old Age Pensions Act enables the Lieutenant-Governor in Council to make an agreement with the Governor-General in Council pursuant to any Act of the Parliament of Canada relating to old age pensions and providing for the payment by the Government of Canada to the province of an amount equal to seventy-five per cent of the net sum expended by the Province for pensions under the provincial Act, the remaining twenty-five per cent being paid from provincial funds. The Lieutenant-Governor in Council may appoint a Quebec Old Age Pensions Commission of three members. He may also appoint an official for each county municipality or other defined territory. The Minister of Municipal Affairs, Trade and Commerce is charged with the administration of the Act.

Application for a pension is to be made in the first instance to the council of the municipality in which the applicant resides. It is then to be sent to the county official appointed under the Act who, after investigation, will forward it with his recommendation to the Commission. In parts of the province without county organization, application is to be made in the first instance to

the official appointed under the Act for that district.

Pensions are exempt from provincial and municipal taxes and may be seized or assigned. Where a pensioner owns an interest in a dwelling-house which he uses as a residence and the Minister accepts a transfer to him of such interest, the pension is not to be reduced on that account but on the death of the pensioner or on his ceasing to reside in such house, the Minister may sell such interest and retain out of the proceeds the amount paid to the pensioner with interest at 5 per cent. No claim may be made by the Minister for the recovery of such debt out of any part of the pensioner's estate which passes by will or intestacy to another pensioner or to any person who, for the last three years during which the pension was paid, made a reasonable contribution to the support of the pensioner. Notice of the granting of a pension may be registered against the immoveable property of a pensioner and, after such registration, no transfer of, or document constituting a charge against such property may be registered without the consent of the Minister.

The Minister may take such steps and make such regulations as he may deem advisable for carrying out the provisions of the Act, provided these are not inconsistent with the Dominion Old Age Pensions Act or with this Act. Persons entrusted under the Civil Code with the registration of births, marriages and deaths must notify the Minister of the death of any person over seventy years of age. The Lieutenant-Governor in Council may extend the benefits of the Act to blind persons over 40 years of age in the event of the Dominion Parliament amending the Old Age Pensions Act to bring such persons within its scope.

### Sunday Labour

An amendment to the Sunday Observance Act repeals the section which provided that persons observing Saturday as the Sabbath and abstaining from work on that day should not be liable for working on Sunday if such work did not disturb other persons and the working places were not open for trade.

### Collective Agreements

The Collective Labour Agreements Extension Act was amended to provide that, notwithstanding any law or judicial decision, Order in Council 1729, June 27, 1935, ratifying the collective labour agreement respecting the bakery industry, as amended by Orders in Council 2595, 3501 and 769 of September 11, 1935, December 18, 1935 and March 11, 1936, respectively, has been, and shall be, binding upon all employers and employees in such industry until December 31, 1936, unless the Lieutenant-Governor in Council under authority of the Act decides otherwise.

### Bills

A Bill to amend the Industrial and Commercial Establishments Act would have extended the definition of "employer" or "head of establishment" to any person in charge of a commercial establishment and defined "commercial establishment" to include premises where services are sold. The Lieutenant-Governor in Council was to be given power to make regulations determining which of such premises were commercial establishments within the meaning of the Act and also requiring employers in an industry, business or special occupation to supply employees with uniforms or waterproof cloaks required in their work, the washing and mending to be done at the employer's expense. The Bill would have raised the minimum age for employment of boys in establishments classified as dangerous or unwholesome from 16 years to 18 years, the latter being the minimum now fixed for girls in such establishments. The minimum age for employment would have been raised from 14 to 16 years in the case of both girls and boys employed in other establishments, in places of amusement, hotels, restaurants, or as telegraph or department store messengers, or as distributors of hand-bills or advertisements. If such children were unable to write fluently the prohibition of employment would have been continued up to 18 years instead of 16 as at present and school certificates required up to the former age, those who were attending night school being permitted to continue their

occupation. Upon orders from an inspector, an employer was to allow one hour for an evening meal between 5 p.m. and 8 p.m. to every employee working after 6 p.m., especially messengers and business employees.

A Bill to amend the Minimum Wage Act would have forbidden any employer in an industry or business subject to an order of the Commission to pay male employees at a rate lower than that paid to the female employees for work of the same nature, the Commission being empowered to fix such remuneration. At present the restriction in such cases is limited to work which, in the opinion of the Commission, is ordinarily and by custom performed by women. The clause giving the Commission jurisdiction over commercial establishments would have been amended to conform to the definition of "commercial establishment" in the proposed amendment to the Industrial and Commercial Establishments Act.

A Bill to amend the Workmen's Compensation Act would have provided that, for purposes of homologation, a decision of the Commission might be deposited in the office of the prothonotary of the Superior Court of the judicial district wherein the employer or workman had his domicile instead of in the District of Quebec as at present.

A Bill to amend the Act to Grant Certain Powers to Municipal Corporations to Aid the Unemployed would have maintained that Act in force indefinitely. The Act, which expired on June 1, 1936, empowered a municipal corporation to contribute out of its funds or to borrow money, as authorized by by-law, to assist the unemployed. Such by-laws had to be approved by the Lieutenant-Governor in Council and by the Quebec Municipal Commission.

A Bill to amend the Workmen's Dwelling Act, which was passed to enable municipalities to take advantage of the Dominion housing appropriation of 1919, was designed to enable obligations incurred under the Act to be cleared off. The Bill would have provided that a city or town municipality, authorized under any general or special Act to repay in anticipation a loan from the Provincial Government contracted under the Act, might effect new loans for the purpose by by-law approved by the Lieutenant-Governor in Council and the Quebec Municipal Commission, but without submitting it to the approval of the elector-proprietors. Such loans were to be for not more than thirty years and were not to affect the borrowing powers of the municipalities. The amendment would have been retroactive to December 1, 1935.

## CLOSING OF RELIEF CAMPS

### Transference of Single Unemployed in Camps to Deferred Railway Maintenance and Other Gainful Employment

IN pursuance of the Dominion Government's policy, announcement was made on June 30, by the Hon. Norman McL. Rogers, Minister of Labour, that relief camps throughout Canada had been closed. This action has resulted from progressive steps taken since November 28, 1935, when the government appointed a special committee to investigate and report on the situation regarding the camps (LABOUR GAZETTE, December, 1935, page 1086).

This committee made an interim report on January 31, 1936 (LABOUR GAZETTE, February, 1936, page 141) and in submitting its findings declared that "the idea should not be entertained that relief camps are a permanent governmental activity, but rather they should be regarded as a temporary expedient for meeting an emergency situation."

The committee also detailed the advantages of a work and wages policy, and in line with this recommendation the Minister of Labour announced on February 26 that as the result of negotiations with the railways arrangements had been made whereby approximately 10,000 men would be employed on deferred maintenance work during the summer.

The carrying out of this program to completion is reviewed in the following official statement:

The policy of the Government to close the relief camps across Canada has been brought to a successful conclusion, carrying out the recommendations of the Special Committee appointed to report on conditions in the camps.

On March 1, 1936, on the commencement of demobilization, there were on camp strength 20,376 men distributed throughout Canada in 163 projects. Since that date there has been a progressive decrease in strength. Many of the men left voluntarily and returned to farms and general seasonal occupations.

To facilitate the movement of the men, transportation was provided at the Government's expense to enable each man to reach the place of his employment, and in addition an ample supply of clothing was provided, together with the deferred pay accruing from the increased camp allowance of twenty cents per day to that of fifteen dollars a month, which was put into effect on March 1, 1936.

In addition, to assist the placement of the men in gainful occupation, an organization was created, in co-operation with the Employment Service of Canada and the Soldier Settlement Board of the Department of Immigration and Colonization, for the purpose of farm placement. Six hundred and eighty men were provided with employment through this agency.

An agreement was entered into with the railways of Canada to absorb approximately 10,000 men in special extra gang labour on deferred track maintenance work, this work being in addition to that normally carried out by the Railways during the summer months, and in this regard the Government has been assured the Railways have more men actually engaged at work on their normal summer program than at this time last year.

MEN SUPPLIED FROM THE CAMPS TO RAILWAYS—TO JUNE 30TH, 1936.

Preliminary arrangements necessary for the movement of such a large body of men in groups not exceeding 50, and the provision of necessary equipment in addition to the normal summer work carried on by the Railways was in itself a difficult undertaking, and much of the success for the orderly manner in which the work has progressed is due to the splendid co-operation that existed between the Railways and the Governmental agencies charged with the work.

In addition to the 10,000 trackmen, it is estimated that approximately 2,000 more men have been engaged by the Railways in various supervisory capacities and in train service in connection with the work, making a total of 12,000 men being placed in gainful employment.

In the agreement with the Railways, prevailing rates of wages and conditions for this type of labour are provided for. Provision has also been made in the case of injury for the payment of workmen's compensation in

conformity with the practice in the various Provinces.

Arrangements have been made with the Frontier College to supply labour teachers in the large gangs and upwards of 100 young men from our leading universities will work in the gangs during the day and hold instructional classes during the evening for those who desire to avail themselves of the opportunity to study.

Every man resident in the camps was offered employment if he so desired it, and no compulsion was used. The closing of the camps has been carried out without causing confusion to the men or to industry.

It has been found that the requirements of the Railways for men have exhausted the supply available on camp strength, and men are now being drawn from the localities in which the work is being carried out.

The accompanying tabular summaries indicate the transference of the men from the camps.

## HOURS OF WORK IN THE BUILDING INDUSTRY IN THE PROVINCE OF QUEBEC

THE *Quebec Gazette*, of June 13, contains an Order in Council establishing the working hours in the building industry throughout the Province under the provisions of the Hours of Work Act. This order replaces Order in Council No. 1496 of July 12, 1933. (LABOUR GAZETTE, August, 1933, page 776)

The building industry is defined as comprising "the building, repairing or demolishing of buildings of every kind and cover especially the men employed in the following trades:

Brick-layers, asbestos-layers, carpenters, joiners, cement finishers, roofers, electricians, tinsmiths, blacksmiths (if employed on the job), crane-men, stationary enginemen and firemen, labourers and excavators, lathmen, masons, reinforced concrete workmen, bridge-men, elevator builders, tile-layers, painters, plasterers, plumbers and pipe-fitters, marble-polishers, stone cutters and joint pointers, the helpers and apprentices.

The order further defines the judicial districts comprised in each division of the Province to which the regulations apply, there being two divisions namely the "Quebec" Division and the "Eastern Townships" division.

The word "contractor" is designated as being any person, association or corporation:

- a. Contracting or sub-contracting for works by the job for percentage or by the day;
- b. Building on his own account.

Regulations governing working hours in the two divisions are as follows:—

Article 1. From and after the 1st of June, 1936, the duration of effective labour in the building industry, and within the limits of the Quebec Eastern Townships Divisions, must not exceed eight hours per day; the total hours of effective labour, in the course of one single week, must not in any case, exceed forty-eight hours.

Any contractor, may, however, at his option, adopt the two or the three shift system, pursuant to the provisions of article 2.

Article 2. Notwithstanding the provisions of article 1, any contractor undertaking works for a municipal or school corporation, fabrique or parish trustees, the Government of this Province, must establish on his job the two or the three shift system, with a maximum duration for each shift of eight hours of effective labour for the six working days of the week.

The contractor of works for an institution, association or corporation, the costs whereof are paid or guaranteed in a proportion of at least 50 per cent by the Government of this province or by a municipal corporation, or by both shall also be obliged to maintain the two or the three shift system.

Article 3. The provisions of article 2, shall be applicable only from the 1st of May to the 1st of October of any one year, and if the cost of the work exceeds \$20,000.

Article 4. The present Order does not apply:

- (a) If the costs of the whole works to be executed on a particular job, including salaries and material, does not exceed \$300 for the Quebec Division and \$200 for the Eastern Townships Division. The different jobs constituting the whole works shall only be considered as separate jobs when the different contracts and sub-contracts constituting same are separ-

ated one from the other by a period of at least three months;

(b) If a person performs work with his own hands on his property;

Article 5. The Minister of Labour may, after an investigation held by the Inspectors

of industrial establishments, grant permits of derogation from Article 1 of the present Order for preparatory, complementary or urgent work, or from Article 2 in the case of serious troubles arising from the establishing of the two or three shift system.

## MINIMUM WAGES IN MANITOBA

### New Order Governing Employment in Factories

ORDER in Council 524-36, April 26, 1936, approves revised Order No. 1 (Manufacturing and General) of the Minimum Wage Board of Manitoba governing employment in all sections of the Province in occupations in which articles are manufactured, altered, dyed, washed, cleaned, repaired, printed, packed and adapted for sale, including the sale and delivery of such articles. The new Order, which came into effect on June 2, 1936, rescinds the earlier Orders governing factories, viz., Orders Nos. 1, 3, 6, 7, 8, and 10 and the regulations for paint and seed packing and factories and for printing, lithography, etc.\* The regulations are now uniform for all classes of factories.

The Manitoba Act applies both to female and male workers. The effect of the new Order is to limit working hours for women and boys under eighteen in all factories to 48 a week and eight a day, except with a permit for restricted overtime from the Bureau of Labour in the case of women and boys over 18, instead of 48 a week and nine a day as under most of the repealed factory orders. For males over 18, a minimum overtime rate of 30 cents an hour must be paid for hours in excess of 8 a day and 48 a week in Greater Winnipeg. In other parts of the province in the case of males over 18 and in all parts of the province for women and young persons, overtime beyond nine hours a day must be paid for at a minimum rate of 30 cents an hour "unless the wages paid equals at least 30 cents an hour for the hours actually worked."

A new provision is the prohibition of employment in factories of children under 15. Under the Manitoba Factories Act, the minimum age for factory work is 14 for boys and 15 for girls, and maximum hours for women and young persons are 9 a day and 54 a week. The Minimum Wage Act, however, stipulates that orders made under that Act shall supersede the provisions of any conflicting Act or regulation.

\* The LABOUR GAZETTE, December, 1921, page 1487; December, 1932, page 1263; August, 1926, page 740 and July, 1927, page 722; September, 1933, page 917; May, 1927, page 515; January, 1919, page 62.

Provisions of the new Order relating to wages and hours are as follows:

#### WAGES (MINIMUM RATES):

(A) City and Urban.

(A) Every employer in any incorporated City or in the area comprised within the Greater Winnipeg Water District at any time; or at any summer resort during the months of June, July, August or September shall pay wages to each employee at not less than the following rates based upon a week of forty-eight hours:—

For employees of the ages of eighteen years or over, if experienced or if engaged in an occupation not requiring skill or training at a rate of not less than twelve dollars per week;

For inexperienced employees of the age of eighteen years or over engaged in an occupation which requires skill or training at a rate of not less than:—

(i) Nine dollars per week for the first four month period of employment in the occupation; and

(ii) Ten dollars per week during the second four month period; and

(iii) Eleven dollars per week during the third four month period; and

(iv) Twelve dollars per week thereafter;

For employees under the age of eighteen years, at a rate of not less than:—

(i) Eight dollars per week during the first six month period of employment in the occupation; and

(ii) Nine dollars per week during the second six month period; and

(iii) Ten dollars per week until any such employee becomes of the age of eighteen years; and thereafter.

(iv) The rates prescribed for employees of the age of 18 years or over;

(B) Rural Rates.

(B) Every employer in any other part of Manitoba shall pay wages to each employee at a minimum rate of not more than two dollars per week less than the rates set forth in 1 (a) hereof.

#### TERMS OF EMPLOYMENT AND WAGE PAYMENT:

(a) Employees shall be paid at the above rates for not less than two consecutive hours on each occasion on which any such employee is required to report for duty.

(b) The number of inexperienced employees and employees under the age of eighteen years combined shall not at any time exceed twenty-five per cent of the total number of all employees.

(c) An employee waiting on the premises as required by the employer shall be paid for the time thus spent.

(d) No reduction below the minimum wage herein provided shall be made in the wages

paid any employee by reason of the intervention of any statutory holiday. Attention is called to the provisions of "The Manitoba Factories Act" which provides that no employee shall be required to work on a statutory holiday without a permit issued by the Bureau of Labour.

(e) In addition to other wages every employer shall pay any employee working overtime for the hours so worked at a rate not less than thirty cents per hour unless the wages paid equals at least thirty cents per hour for the actual hours worked. Time worked in any week in excess of 48 hours, or in any one day in excess of 9 hours shall be overtime.

(f) Every employer shall pay wages in full once a week in cash and within (3) days after they have been earned.

(g) Except where inconsistent herewith the provisions of Board Order number eighteen, in so far as it prescribes minimum rates of wages for male adult employees doing boys work, apprentices, piece workers or employees on a part time basis shall apply hereto and form part hereof.

#### HOURS OF LABOUR:

(a) No person under the age of fifteen years shall be employed at any time and no person under the age of seventeen years shall be required to work overtime.

(b) No employer in the area comprised within the Greater Winnipeg Water District shall employ a male person of the age of 18 years or over more than 48 hours in any one week unless hours worked in excess of 48 hours in any one week are paid for at a rate not less than 30 cents per hour.

(c) No employer unless he is the holder of an overtime permit issued by the Bureau of

Labour, shall employ a male under the age of eighteen years or a female for more than,

(i) Eight hours in any one day or if a half holiday is granted in any week for more than nine hours in any one day during such week; and

(ii) Forty-eight hours in all in any one week.

(d) Not less than eleven hours shall elapse between the termination of any one day's work and the commencement of the next.

(e) Not less than one hour shall be allowed by an employer to each employee for lunch.

(f) No employer shall require or compel any male employee under the age of eighteen years nor any female employee to work overtime more frequently than thirty-six days in any one year and such overtime shall not exceed three hours in any one day nor six hours in any one week.

#### MISCELLANEOUS:

(a) Subject to such terms and conditions as may be imposed, the Bureau of Labour may grant a permit authorizing overtime to be worked. The Board where it considers it necessary may authorize modification of or exemption from any of the provisions of this Order.

(b) Every employer shall keep an accurate record of all hours worked by and wages paid to each employee showing the overtime record separately in a manner convenient for examination by inspectors and shall keep the same available for inspection at any time.

A few minor changes have been made in the provisions relating to conditions of labour but these and the rules governing posting of Orders and making complaints are generally similar to those of former Order No. 7.

### WORKMEN'S COMPENSATION IN MANITOBA, 1935

THE annual report of the Manitoba Workmen's Compensation Board which has just been received reviews the operations and administration of the Act during the calendar year 1935. The report indicates that "the number of accidents reported to the Board during 1935 continued to show a marked increase and are undoubtedly indicative of steadily increasing employment and corresponding improvement in business."

During 1935 there were 9,907 accidents of which 28 proved fatal. This figure compared with 7,879 accidents including 18 fatalities in 1934 represents an increase of 25.7 per cent.

Details showing the accidents as reported by the various industrial groups for the last two years are as follows:—

Group	1934	1935
Steam Railways.....	1,053	1,081
Province of Manitoba.....	204	282
City of Winnipeg.....	315	331
General Body of Employers.....	5,761	7,628
Winnipeg Electric Company.....	172	163
Dominion Government.....	374	422
	7,879	9,907

The report also refers to final returns for 1934 which show that 7,956 accidents were reported to the Board as having occurred during that year. Of these accidents 82.7 per cent necessitated the payment of compensation either for medical aid only or for compensation for time loss and medical aid, while in 17.3 per cent of cases no expense was incurred.

On December 31, 1935, the Board had on its books 510 dependents of workmen killed in industry during the period March 1, 1917, to December 31, 1935.

The total actual payroll for all classes of employees for 1934 was \$53,345,189.50. Of this total, the returns for the largest group, known as the general body of employers, showed a payroll of \$26,903,967.00.

In 1935 the actual cash disbursement by the Board amounted to \$867,229.50 as compared with \$797,996.90 expended during 1934.

The report shows that the value of Board Orders passed during 1935 for the payment of compensation, including orders respecting Dominion Government employees and amounts transferred to General Unclassified Reserve to provide for the future payments in fatal and

permanent disability cases was \$798,103.38 as compared with \$666,854.85 for the year 1934.

As in former years, the report also contains an interesting statistical analysis of the accidents occurring in 1934, showing the number of compensable accidents in 1934 by classes; time loss per accident and average age and

average wage; causes of accidents; month of occurrence of accidents; nature of injuries; permanent disability cases; death cases; sex and marital conditions of claimants in time loss accidents; nativity of claimants in time loss accidents; industries in which fatal accidents occurred, etc.

## FAIR WAGE SCHEDULE FOR PUBLIC AND CERTAIN PRIVATE CONSTRUCTION WORKS IN MANITOBA

**U**NDER the authority of section 11 of the Fair Wage Act of Manitoba, 1916 (Consolidated Amendments, 1924, chapter 99—as amended, 1934, chapter 13, and 1935, chapter 17) the provincial Minister of Public Works has approved a schedule effective June 15, 1936, establishing the minimum rate per hour and the maximum working hours applicable on public works for building construction under contract and on private works as described in the Act.

“Private Works,” as defined by the Act “means the building, construction, remodelling, demolition, or the repairing at a cost of all work done irrespective of the number of contracts made exceeding one hundred dollars, of any building or construction work within the Greater Winnipeg Water District or any city or town which has a population exceeding two thousand, or any other portion of the Province to which the provisions of this Act are extended by the Lieutenant-Governor in Council, but shall not include work which is done on property by or under the immediate direction and control of the owner, tenant or occupant thereof if no more than three men are employed in addition to the regular maintenance staff, if any, and if such work be not undertaken with a view to sale or rental of the property and shall not include work which is done by a maintenance man, or men, employed by the mouth.”

The public work to which this schedule applies is that authorized by the Minister for the execution of which a contract has, or contracts have been entered into between the Minister and an employer, consisting of construction, remodelling, demolition or the repairing or painting of buildings in Manitoba.

### Fair Wage Schedule

The following schedule shall apply from and after June 15, 1936, on “Public Works” and on “Private Work.”

“Winnipeg and Radius” means Winnipeg and within a radius of thirty miles.

“Other than Winnipeg” means all portions of the province outside said radius of thirty miles.

Occupation	Winnipeg and radius of 30 miles	Other than Winnipeg and radius of 30 miles	Maximum hours per week
	Minimum rates per hour		
	\$	\$	
Asbestos workers—			
(a) Journeymen.....	.75	.75	44
(b) Improvers.....	.60	.60	44
Asphalters—			
(a) Finishers.....	.52½	.52½	44
(b) Men engaged preparing, mixing, heating material.	.45	.45	48
Blacksmiths.....	.65	.60	44
Bricklayers.....	1.00	.90	44
Helpers—			
(a) Continuously employed at mixing and tempering mortar.....	.47½	.42½	48
(b) Attending on or at scaffold.....	.42½	.37½	48
Bridge and structural steel and iron workers.....	.80	.80	44
Carpenters.....	.75	.70	44
Cement finishers (in warehouse or large floor area jobs)...	.60	.55	48
Electrical workers (inside wiremen, licensed journeymen)...	.85	.75	44
Apprentices indentured for a four-year period shall be paid in accordance with the following classification:			
First year.....	.25	Nil	44
Second year.....	.30	Nil	44
Third year.....	.40	Nil	44
Fourth year.....	.75	Nil	44
Labourers—			
(a) Skilled.....	.42½	.37½	48
(b) Unskilled.....	.37½	.32½	48
Rule—That at least 25% of the men employed on any contract be paid the rate for skilled men.			
Lathers (Metal, Wood)—			
(a) Metal lathers.....	.75	.70	44
(b) Wood lathers.....	.70	.65	44
(Wood lathers—work may be paid for on a square yard basis at not less than .06c. per square yard.)			
Linoleum floor layers.....	.60	.55	48
Marble setters.....	.95	.95	44
(a) Helpers (all men assigned to help tradesmen).....	.47½	.42½	48
Mastic floor spreaders and layers.....	.85	.85	48
Mastic floor rubbers and finishers.....	.55	.55	48
Mastic floor kettlemen.....	.45	.45	48
Mosaic and tile setters.....	.90	.90	44
(b) Helpers (all men assigned to help tradesmen).....	.47½	.42½	48
Operating engineers and firemen on construction:—			
Class A (operating three or more drums).....	.85	.75	48
Class B (operating double or single drums).....	.80	.70	48
Class C (in charge of any steam operated machine not specified in “A” or “B”).....	.75	.65	48

Occupation	Winnipeg and radius of 30 miles	Other than Winnipeg and radius of 30 miles	Maxi- mum hours per week	Occupation	Winnipeg and radius of 30 miles	Other than Winnipeg and radius of 30 miles	Maxi- mum hours per week
Minimum rates per hour				Minimum rates per hour			
	\$	\$			\$	\$	
Operating engineers and firemen on construction— <i>Concluded</i> . Class D (gas or electric en- gines not specified in "A" "B" "C").....	-.50	-.45	48	Teamsters.....	.40	.....	54

Steamfitters.....	.90	.80	44	Over one ton to two ton capacity.....	1.40	1.25	48
(b) Helpers (all men assign- ed to help tradesmen).....	-.47½	-.42½	48	Over two ton to three ton.....	1.90	1.75	48
Stonecutters.....	.90	.80	44	Over three ton to four ton.....	2.40	2.25	48
Stonemasons.....	1.00	.90	44				
(b) Helpers—							
(1) Continuously employed at mixing and tempering mortar.....	-.47½	-.42½	48				
(2) Attending on or at scaffold.....	-.42½	-.37½	48				

RULE:—All men hired in Winnipeg to go into the country to work on buildings shall be paid the City Schedule rate, excepting where other definite agreements are made.

RULE:—All men hired in Winnipeg to go into the country to work on buildings shall be paid the City Schedule rate, excepting where other definite agreements are made.

### Annual Report on Mining in Alberta in 1935

ACCORDING to the annual report of the Mines Branch of the Alberta Department of Lands and Mines, for the calendar year 1935, the output of coal produced from mines in the Province was 5,462,973 tons valued at \$13,946,338.15, an increase of \$714,125 over the output for 1934. In addition to the above tonnage there were 395 tons produced by farmers under permit.

The report shows that the coal produced during the year was disposed of as follows: 1,246,959 tons were sold for consumption in the Province of Alberta; 1,843,046 tons were sold for consumption in other provinces; 24,712 tons for consumption in the United States; 1,960,555 tons were sold to railroad companies; 17,490 tons were used to make briquettes; 98,233 tons were utilized in the manufacture of coke; 163,197 tons were used under colliery boilers; 7,847 tons used by colliery railroads; 68,868 tons put to stock; 90,014 tons put to waste.

During the year there were in operation 4 shale pits producing 20,258 tons of clay and shale from which 7,349,300 bricks were made. There were 307 mines in operation during the year, of which 17 were opened, 10 re-opened, and 33 abandoned. In addition to the mines abandoned, there were 13 mines temporarily closed, leaving 271 mines in operation as at December 31, 1935.

**Labour and Employment.**—During the year 383 persons were examined for certificates of competency as coal-miners, of whom 332 were successful, making a total of 13,945 certificates

issued to coal-miners to December 31, 1935.

On December 31, 1935, the total number employed in all coal-fields—domestic, sub-bituminous and bituminous—was 9,691, of which 7,240 were underground workers. Of the total number employed, 5,681 were in domestic fields, 830 in sub-bituminous and 3,180 in bituminous coal mining. The per capita production in all mines of the Province, based on the total average number of men employed (7,800) was 700 per man employed, while 844 tons was the average for each man employed underground.

**Accidents.**—The report discloses that during the year there were in all 214 accidents. Of these 35 were fatal accidents, 66 were listed as serious accidents and 113 classed as slight accidents. Thirty-one of the total number of accidents occurred above ground and 183 underground. The figure for fatal accidents includes 16 deaths caused by an explosion at Lethbridge Collieries Limited, Coalhurst.

In 1935, the ratio of accidents per 1,000,000 tons of coal mined was 39.17 and the ratio of accidents per 1,000 men employed was 27.35 "Haulage" was the greatest single factor in the cause of accidents, 49 accidents being attributed to this cause.

During the year accident prevention activities were continued, as in other years, analysis of mine air, and tests of rock-dust for silica content, being carried out, as well as tests of mine air with gas detectors. It is reported that some of the mines have also introduced firedamp alarms.

## MINING IN BRITISH COLUMBIA IN 1935

THE annual report of the Minister of Mines, British Columbia, reviewing the position of the mining industry in that province during the calendar year 1935 indicates a further appreciable increase in the value of production compared with the previous year. The value of mine production in 1935 was \$48,821,239, an increase of \$6,515,942 over the value for 1934. This increase approximates the value of production to the mean of the peak production of \$68,245,443 in 1929 and the low of \$28,798,406 in 1932. The report attributes the increase for the year to the higher price for silver and lead and a greater volume of production for gold. The report indicates that the total capital employed in all classes of mining amounted to \$143,239,953 and salaries and wages paid to employees during the year totalled \$16,753,367.

As in the previous year, gold production accounted for the greatest increase in value for any one metal or material in 1935, followed closely by lead, silver, cadmium, zinc and structural materials. Coal and copper showed substantial losses.

Gold production for the year again established an all-time high in both volume and value, exceeding the 1934 record by 25.4 per cent in value. Likewise zinc established an all-time high in volume production and lead just fell short of the all-time high volume production of 1934.

During the year the larger operations maintained their production at capacity and several new milling plants were brought into production.

The number of shipping metalliferous mines increased from 145 in 1934 to 177 in 1935 and those shipping over 100 tons increased from 69 to 72.

*Labour and Employment.*—The report estimates that during the year under review, 13,737 men were employed in all branches of the mining industry in the province, representing an increase of 752 over the number employed in 1934. Of this number, there were 4,237 persons employed under and above ground in the metalliferous lode mines in 1935, while "during the year twenty coal companies operated twenty-two collieries, with thirty mines employing 2,145 men underground. In the supervision of underground employees there were nine managers, one safety engineer, fifteen overmen, seventy-nine firebosses and shotlighters, a total of 114, or one official for every nineteen persons employed underground."

*Accidents.*—Five fatal accidents occurred during the year in coal mining, compared with

six for 1934. The ratio of fatal accidents per 1,000 persons employed was 1.67 as compared with 2.07 in 1934. In 1933 the ratio was 0.97; in 1932, 2.21; in 1931, 1.22; in 1930, 11.62; in 1929, 2.38; in 1928, 2.64; in 1927, 2.10; and in 1926, 1.88; the average for the ten year period being 3.03.

The number of fatal accidents per 1,000,000 tons produced during 1935 was 4.21; during 1934 the figure was 4.45; in 1933, 2.37; in 1932, 5.21; in 1931, 2.81; in 1930, 2.86; in 1929, 5.33; in 1928, 5.54; in 1927, 4.48 and in 1926, 4.3; the average for the ten-year period being 6.92 per 1,000,000 tons of coal mined.

In the metalliferous mining group there were fifteen fatal accidents in and about such mines during 1935, representing a decrease of seven from the figures for 1934. However, these figures do not include the seven men who lost their lives in a snowslide at the Taseko-Motherlode bunk-house. The ratio of fatal accidents per 1,000 persons employed was 3.54 compared with 4.86 in 1934. The ratio for the last ten-year period was 3.27. The tonnage mined per fatal accident was 327,743, compared with 231,242 tons during 1934, while the tonnage mined per fatal accident for the last ten-year period was 420,291 tons.

The report also outlines safety and first-aid activities in mining operations during the year. The work of the four Provincial Government mine rescue stations—at Nanaimo, Cumberland, Princeton and Fernie—is also summarized.

An indication of improved industrial conditions was reflected in the annual report of Mr. Ross H. McMaster, President of the Steel Company of Canada Limited, who stated in part: "The steady improvement in business conditions was reflected in a higher rate of operation and larger sales. Forward buying was stimulated by a widespread anticipation of higher prices. A bonus of 5 per cent on the wages earned during the last six months of the year was paid to employees on the payroll at all plants of the company."

In a quarterly report issued by the Dominion Bureau of Statistics for January, February and March, 1936, statistics show that Canadian coal mines employed 27,128 men in January, 27,010 men in February and 25,664 men in March. Each of these men produced on an average 147 tons of coal during the period, or an average output per man-day of 2.8 tons.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Twentieth Session of the International Labour Conference

THE Twentieth Session\* of the International Labour Conference (League of Nations) was held at Geneva from June 4 to June 24, 1936.

Each Member State is entitled, under the terms of the Treaties of Peace, to send four delegates to the Conference, two of whom must be government delegates and the two others are to represent, respectively, employers and workpeople. These representatives must be chosen in agreement with the industrial organizations, if such organizations exist, which are most representative of employers or workpeople. Each delegate may be accompanied by advisers not exceeding two in number for each item on the agenda of the meeting.

The decisions of the Conference may take the form of Recommendations or Draft Conventions. A two-thirds majority of the votes cast by the delegates is required for the adoption of any Recommendation or Draft Convention by the Conference. The Recommendations and Draft Conventions are afterwards communicated by the Secretary-General of the League of Nations to the countries represented in the International Labour Organization. Each country is obliged under the Treaties, within the period of one year at most from the closing of the Conference, or if it is impossible owing to exceptional circumstances to do so within one year, then at the earliest practicable moment and in no case later than eighteen months from the closing of the Conference, to bring the Recommendations or Draft Conventions before the authority or authorities within whose competence the matters lie, for the enactment of legislation or other action.

In Canada, the Draft Conventions and Recommendations adopted at each session of the Conference have been examined by the Law Officers of the Crown to determine whether the subject-matters were within federal or provincial jurisdiction, and they, together with the law officers' reports on the question of jurisdiction, have thereupon been brought before the Dominion Parliament and the respective Provincial authorities.

#### Countries Represented

The Conference was one of the largest in the history of the Organization. Of the sixty-one member countries, fifty sent dele-

gations, comprising 159 representatives of whom 90 were Government delegates, 35 Employers' and 34 Workers' delegates. There were also 240 advisers in attendance.

The following countries were represented: Afghanistan, Argentina, Australia, Austria, Belgium, Brazil, Bulgaria, Canada, Chili, China, Colombia, Cuba, Czechoslovakia, Denmark, Ecuador, Esthonia, Finland, France, Egypt, Great Britain, Greece, Hungary, India, Iraq, Iran, Irish Free State, Japan, Latvia, Lithuania, Luxembourg, Mexico, New Zealand, Netherlands, Norway, Panama, Peru, Poland, Portugal, Rumania, Siam, Spain, Sweden, Switzerland, Turkey, Union of South Africa, Union of Soviet Socialist Republics, United States of America, Uruguay, Venezuela and Yugoslavia. Egypt sent an observer as in past years and accepted the invitation to become a member of the International Labour Organization although not a member of the League of Nations. The Italian delegation were unable to attend.

#### Canadian Delegates

The Canadian delegation to the Conference was made up as follows:—

*Delegates representing the Government of Canada.*—Dr. W. A. Riddell, Canadian Advisory Officer accredited to the League of Nations; and Mr. Gerald H. Brown, Assistant Deputy Minister of Labour, Ottawa.

*Technical Advisers to the Government Delegates.*—Mr. Edouard C. St. Pere, M.P., Montreal; Mr. Gerard Picard, General Secretary, Confederation des Travailleurs Catholiques du Canada, Inc., Quebec; and Mr. W. T. Burford, Secretary-Treasurer, All-Canadian Congress of Labour, Ottawa.

*Delegate representing the Employers of Canada.*—Mr. A. R. Goldie, President of Goldie & McCulloch Co., Ltd., Galt, Ontario and Chairman of the Industrial Relations Committee of the Canadian Manufacturers' Association.

*Technical Adviser to Employers' Delegate.*—Mr. R. N. McCormick, Assistant Manager of the Tariff Department of the Canadian Manufacturers' Association, Toronto.

*Delegate representing the Workpeople of Canada.*—Mr. P. M. Draper, President of the Trades and Labour Congress of Canada, Ottawa.

*Technical Adviser to the Workpeople's Delegate.*—Mr. James Simpson, Vice-President of

\*A session of the Conference has been held annually since the first session in 1919. Two sessions were held in 1926 and in 1929. A report of each session was given in the LABOUR GAZETTE for the year.

the Trades and Labour Congress of Canada, Toronto.

The Canadian Government delegates acted on the following committees: Selection Committee; Committee on the Application of Conventions (Article 408); Committee on Resolutions; Committee on Holidays with Pay; and Committee on Safety in the Building Industry. The Canadian employers and workers were also represented on the two last-mentioned committees and on the following: Hours of Work in Public Works and in the Building and Civil Engineering Industry; Hours of Work in Coal Mines; Hours of Work in Iron and Steel Works; and Hours of Work in the Textile Industry.

### Officers of the Conference

The following officers were elected:

President—Dr. C. V. Bramsnaes, Danish Government delegate, who has been associated with the work of the Organization from the beginning and was Chairman of the Governing Body in 1933 and 1934.

Vice-Presidents—Mr. Winant, Government delegate of the United States; Mr. Vanek, Employers' delegate, Czechoslovakia; and Mr. Mertens, Workers' delegate, Belgium.

Secretary-General—Mr. Harold Butler, Director of the International Labour Office.

### Agenda

The agenda of the Conference comprised eight items, namely:—

1. The regulation of certain special systems of recruiting workers;
2. Holidays with pay;
3. Reduction of hours of work on public works undertaken or subsidized by Governments;
4. Reduction of hours of work in the building and civil engineering industry;
5. Reduction of hours of work in iron and steel works;
6. Reduction of hours of work in coal mines;
7. Reduction of hours of work in the textile industry.
8. Safety provisions for workers in building construction with reference to scaffolding and hoisting machinery.

The first six of these subjects were to be discussed for the second time at the 1936 session but the last two items were new subjects to be discussed for the first time. In addition, the Conference dealt with the following matters: the Annual Report of the Director of the International Labour Office, annual reports by Governments on the measures taken to give effect to Conventions ratified, report on the working of the Equality

of Treatment (Accident Compensation) Convention, publications of the International Labour Office on Collective Agreements, Recruiting and Placing of Migrant Workers, Opium and Labour, and on Workers' Nutrition and Social Policy; and certain proposed amendments to the Standing Orders of the Conference.

### Decisions of the Conference

The decisions of the Conference were as follows:—

*Regulation of certain special Systems of Recruiting Workers*—By 123 votes to 0 a Draft Convention was adopted for the regulation of the recruiting of indigenous workers in territories in which such recruiting exists or may hereafter exist.

By 119 votes to 0 a Recommendation was adopted embodying principles whereby the recruiting of labour may be progressively eliminated and the spontaneous offer of labour developed.

*Holidays with Pay*—By 99 votes to 15, the Conference adopted a Draft Convention providing for at least six days' annual holidays with pay after one year's continuous service for persons employed in industrial and commercial establishments, including hospitals, theatres and hotels. Persons under sixteen years of age, including apprentices, are entitled to twelve days' annual holiday with pay after one year's service.

By 98 votes to 15, the Conference adopted a Recommendation embodying suggestions for consideration in applying the systems of holidays with pay.

*Reduction of Hours of Work on Public Works undertaken or subsidized by Governments*—By 79 votes to 38, the Conference adopted a Draft Convention providing for a forty-hour week on such public works.

*Reduction of Hours of Work in the Building and Civil Engineering Industry*—A proposed Draft Convention for the application of the forty-hour week to this industry failed to obtain the necessary two-thirds majority (71-42). It was decided by 60 votes to 26 to request the Governing Body to consider the convening of a tripartite technical conference of governments and of employers' and workers' representatives in the industry with a view to reaching an understanding as to hours of work, account being taken of the report of the Committee on hours of work in building and public works of the present session of the Conference.

*Reduction of Hours of Work in Iron and Steel Works*—A proposed Draft Convention for the application of the forty-hour week

to this industry did not receive the necessary two-thirds majority (67-40). By 65 votes to 21, it was decided to request the Governing Body to consider the convening of a tripartite technical conference on this subject also with a view to reaching an understanding as to equitable standards based on adequate information concerning wages, hours and working conditions in this industry throughout the world.

*Reduction of Hours of Work in Coal Mines*

—A proposed Draft Convention for the application of a thirty-eight and three-quarter hour week to the coal-mining industry failed to obtain a two-thirds majority (66-37). By 60 votes to 25, a resolution was adopted to request the Governing Body to consider the convening of a tripartite technical conference on this industry with a view to reaching an understanding as to hours of work in this industry, account being taken of the report of the Committee on hours of work in coal mines of the present session of the Conference.

*Reduction of Hours of Work in the Textile Industry*

—By a vote of 54 to 47, the Conference rejected a proposal of the Committee on the textile industry to suspend the Standing Orders in order to permit the consideration of a Draft Convention after a single discussion, instead of following the usual double discussion procedure. It was decided by 71 to 29, to place the question of the reduction of hours in the textile industry on the agenda of the 1937 session of the Conference.

*Safety Provisions for Workers in the Building Industry*—The Conference decided by 109 votes to 0 to place this question on the agenda of the 1937 session.

*Application of Conventions*—The Conference adopted the report of the committee on the application of conventions as shown by the annual reports of Governments which had ratified them. Of 630 reports due, all but 10 were sent in. The importance of complete reports and the binding character of ratification were stressed in the report.

*Migration of Workers*—Based on the report of this committee, a resolution was adopted approving study of the problems arising from migration and proposing that the Governing Body should consider placing this subject on the agenda for the 1938 Conference, if possible, with special reference to the question of equality of treatment of foreign and national workers.

*Standing Orders*—Amendments were made to the Standing Orders relating to the quorum and to the allocation of seats on committees.

## Resolutions

Resolutions were adopted to the following effect:—

*Freedom of Association*.—Requesting the Governing Body to consider placing on the agenda of an early session of the Conference the subject of the safeguarding of workers in the exercise of their freedom of association from pressure by private employers on account of their joint participation in labour activities which are lawful for individuals acting singly.

*Opium*.—Requesting the Governing Body to recommend methods of improving labour conditions and of drafting and applying laws to bring about the cessation of the licensed use of opium for smoking within five years in those countries where such use is authorized.

*Economic Conferences*.—Requesting the Governing Body to consider steps to facilitate the calling, under the auspices of the League of Nations, of one or more conferences, in which workers' organizations shall participate, to discuss problems of currency, production, trade, and settlement and colonization.

*Nutrition*.—Requesting the Governing Body to enable the International Labour Office to continue its studies of nutrition in collaboration with other organizations giving attention to the needs and present standards of workers, the regulation of wages and of insurance benefits, and to consider placing on the agenda certain questions relating to nutrition.

*Calendar Reform*.—Requesting the Governing Body to ask the Committee of the League of Nations on Communications and Transit to continue the study of this question at its 1936 meeting.

*Emigration from Germany*.—That the International Labour Office watch closely problems arising from the emigration from Germany for racial and political reasons and that attention of the League of Nations be called to this resolution.

*Technological Unemployment*.—Requesting the Governing Body to direct the International Labour Office to inquire especially into effects of technological unemployment and to propose measures to ensure participation of the working classes in the benefits of technological progress.

*Public Works*.—Requesting a report by the International Labour Office on public works in relation to unemployment for the 1937 Conference with a view to a final decision at that session.

*Industrial Development.*—Requesting the Governing Body to investigate the problems arising from the importation of large quantities of manufactured goods at low prices regardless of the effect on wages and employment and to study methods for promoting the normal industrial development of all countries.

*Asiatic Countries.*—Requesting the Governing Body to give effect to the resolution of the 1931 Conference for the calling of an advisory tripartite conference of Asiatic countries and to consider the advisability of establishing an Asiatic Committee within the International Labour Organization to hold biennial meetings in an Asiatic country.

*Textile Industry.*—Requesting the Governing Body to take the necessary action to give effect to the resolution of the 1928 Conference requesting the Governing Body to consider undertaking an inquiry into working conditions in the textile industry.

*Dusty Trades.*—Requesting the Governing Body to consider calling an international meeting of experts with a view to drafting a program of action to achieve early diagnosis of diseases due to dust, adequate compensation for such diseases and prevention of dust hazards.

*Labour Inspection.*—Requesting the Governing Body to consider placing question of labour inspection on the agenda of the 1938 session.

### Opening Proceedings

The following account of the proceedings has been taken from *Industrial and Labour Information*, June 15-29, 1936.

Dr. W. A. Riddell (Government delegate, Canada), as Chairman of the Governing Body opened the Conference and welcomed the delegates expressing satisfaction at the large attendance.

Referring to the activity of the Organization during the past twelve months, he mentioned the Preparatory Maritime Meeting of last November and the Conference of American States held in Santiago de Chile last January. The latter meeting, he thought, had strengthened the ties between the Organization and the Governments and peoples of the New World and revealed new possibilities for extending social justice throughout the world.

Outlining the agenda before the Conference, he stressed the importance of the discussion on the Report of the Director, citing some of its main points and endorsing the conclusion that only through the settlement of political difficulties and closer international

relations could social justice be secured. He pointed out that the Conference provides an important forum for the discussion of fundamental social problems which represents practically all States and because of its tripartite composition represents the greater part of the population of those States. The Conference, therefore, afforded a great opportunity to create sound opinion on the vital issues brought out in the Director's report.

Dr. C. V. Bramsnaes (Government delegate, Denmark), on taking the chair as President of the Conference, recalled the fact that he was one of the "veterans" of the Washington Conference of 1919 and said that perhaps at that time they were somewhat enthusiastic as to the future of the Organization. Since 1919 they had come to realize the difficulties in its path. However, there was reason to be content with what had been accomplished. Besides what had been achieved through ratifications of Conventions, there had been a general growth of social interest all over the world, and States which never before had had an opportunity to deal with social questions had taken up these problems. There was no doubt that this could be attributed largely to the encouragement and guidance given by the International Labour Organization.

"If" he continued, "we look upon the whole social political development during the years expired, there have been times of rich and vigorous development and periods almost of a standstill. . . . The years of the strongest general economic development seem to have afforded the greatest possibilities for the carrying through of social political measures. This is very natural, but on this occasion I will take the liberty to warn against the mistake which it would be to conclude from this that social legislation cannot be in harmony with good and sound economic principles . . . . Nevertheless, even if we take it for granted that social policy and sound economy in reality are closely connected, it will be understood that this view must be taken as a long-run aspect. This is necessary for the very reason that the good and helpful effects of social measures on general economic conditions ordinarily do not appear until some time after they have been introduced. It is no surprise to anybody that the practical development during the last few years has disclosed the fact that difficult economic conditions in almost every country seem to have brought social legislation almost to a standstill. . . .

"Up to the present we have in no way come out of the crisis. Its effects are still felt in most countries. But, after all, the bottom

of the depression seems to have been passed . . . I think I may be allowed to express the belief that this trend in economic life may be taken as a signal for improved possibilities of carrying through a more extensive social legislation and of arriving at the solution of social problems."

### Reduction of Hours of Work

The application of the principle of the 40-hour week to special industries was brought before the Conference through five items on the agenda. It will be recalled that a general forty-hour week Convention was adopted by the International Labour Conference in June, 1935. Each country ratifying this draft convention declares its approval of the principle of the 40-hour week without reduction of the workers' standard of living and agrees to apply this principle to various classes of employment in accordance with the provisions of such separate Conventions as are ratified by it. The Convention of last year for the glass-bottle manufacturing industry was the first to be adopted under this general 40-hour week Convention.

In a statement made on behalf of all the employers' delegates except those from the United States, the Danish employers' delegate declared that though they were ready to discuss the technical and economic aspects of the question, they had not changed their attitude towards the principle of the forty-hour week. They were still of the opinion that the measure was inopportune on economic grounds and would be ineffective as a means of curing unemployment, that it would not be universally applied, and they therefore were not prepared to take part in the drafting of regulations.

A general discussion took place on the question of the reduction of hours of work in the textile industry, during which the Minister of Labour of Great Britain said that when the British Government was asked to undertake an obligation to make compulsory provision for the reduction of hours, it desired to be satisfied that other countries would undertake the same obligation with the same results, and that the form of compulsion would be such as the workpeople could accept and the employers operate. As he understood the meaning of the draft convention last year, it gave sanction to compulsory work-sharing and it did not safeguard wages. Compulsory action of that kind would not be acceptable in the iron and steel or any other industry in Great Britain. He referred to the importance of voluntary collective agreements in relation to hours of work and to the in-

terdependence of hours and wages. He expressed the opinion that the handling by the Conference of the question of hours and wages in the textile industries would be a supreme test of the Organization. He considered that no real progress would be made by trying to separate the question of hours from wages and other related matters.

The view of the United States Government was that a maximum week of forty hours was good for the textile industry, so far as that country is concerned, and the Government delegates were prepared to vote for a draft convention on the subject at this session. The United States Government was of the opinion that it had power to ratify conventions of the conference.

The French Government delegate announced that his Government intended to introduce the forty-hour week into the French Labour Code and he had every confidence that it would be adopted speedily by Parliament. He hoped that the Conference would follow this example and give effect this year to the principle which had been established at the 1935 session.

Mr. Gerald H. Brown, Canadian Government delegate, stated that the representatives of his government would have to abstain from voting on questions affecting hours of labour in view of the fact that a decision had not been reached by the Supreme Court of Canada on the question of the constitutional validity of The Limitation of Hours of Work Act, 1935, which had been passed to make effective the eight-hour day convention of the International Labour Conference.\*

The textile employers' group, through the British delegate, expressed opposition to an international convention in that industry. He emphasized the complexity of the industry with eight divisions—cotton, wool, silk, rayon, linen, hemp, jute and hosiery—with different technical and labour conditions. In some countries, the proposed convention would undermine the principle of collective bargaining. Japan did not consider the introduction of a forty-hour week opportune, Germany was not a member of the International Labour Organization and the United States, because of its federal constitution, could not ratify a convention. The employers considered that a forty-hour week would increase unemployment in the textile industry.

On behalf of the workers, a British representative contended that the textile industry was the most international, highly competitive and world-wide and, therefore, most suited to an international convention. He pointed out that there was heavy unemployment among

\*Judgment was delivered on June 17, 1936.

the eleven million workers of whom about nine million were estimated to be women and juveniles. In Great Britain the agreements as to hours in all but the cotton industry had broken down.

### Discussion of Director's Report

Discussion on the Director's report (summarized in the June issue of the *LABOUR GAZETTE*) continued through five days. No fewer than sixty-five delegates participated in this discussion in which practically every phase of the Director's survey of world-economic-social conditions was reviewed.

Mr. Gerald H. Brown, Government delegate for Canada, in the course of this debate, referred to the fact that an important section of the Director's report to this Conference is properly devoted to an examination of the methods which are being followed in various countries to combat unemployment and to measure the results which have followed, for unemployment still remains the crucial test of economic and social policy. He went on to say:—

"In connection with the policies which have been formulated to promote industrial and commercial recovery, I may be permitted, on behalf of the Government delegation from Canada, to refer to a declaration which was made quite recently by the Hon. Norman Rogers, Minister of Labour of my country, on the introduction in Parliament of legislation providing for the establishment of a National Employment Commission to supplement the normal machinery of government in attacking this stubborn problem which has now afflicted the world for a period longer than the duration of the World War.

"The question," he said, "of unemployment in Canada and other countries is a challenge to the political intelligence of our generation. No one can have daily contact with this subject without realizing that upon our ability to deal with it effectively may depend the maintenance of institutions which have long been established in our country. I quote the following from the Minister's statement: 'The experience of the past five years has proved beyond question that it is not within the power of governments to end unemployment by their own unaided efforts. There is a growing recognition that victory over the depression and unemployment cannot be won by a pitched battle but only by a sustained campaign along the entire front of our economic life, upon the basis of a maximum national effort, giving to the problem for a period of years that kind of effort which obtained and dominated during the period

of the War. It does seem to me,' the Minister said, 'that it ought not to be impossible for a Government to ask the people in the existing circumstances for that same degree of co-operation that was secured in the War for destructive purposes. This, after all, is a great task of national rehabilitation. It is a task to which we are justified in calling not only the governmental agencies, but all corporations or individuals who are affected by a social obligation or who might be expected to respond to an appeal for assistance in time of national need.'

"May I, on behalf of the Canadian delegation in attendance at this Conference, express the hope that the International Labour Office will continue and extend its study of unemployment with a view to its ultimate solution?

"My colleague, Dr. Riddell, at the last Session of the Conference, referred to the legislative action which had been taken by the Canadian Parliament in 1935 to give effect to the Washington Hours Convention. Mention was also made by him of the separate measures which had been taken in some of the provinces of Canada for the limitation of working hours. Since the enactment in Canada last year of the federal laws regarding the eight-hour day in industrial establishments, minimum wages and weekly rest, these respective statutes were referred by the Government to the Supreme Court of Canada, in order to determine questions which had arisen as to the jurisdiction of the Federal Parliament in labour matters of this nature. Let me say here that the Canadian Government takes a very strict view of whatever obligations it assumes. The Supreme Court decision has not yet been delivered, and pending the decision of the courts of last resort on the whole question of federal jurisdiction in labour matters generally, the Canadian Government delegates will be compelled to abstain from voting on certain of the questions coming before the present Session of the Conference."

### Director's Reply

Replying to the discussion on his report, the Director referred to the salient features brought out. After dealing with a number of suggestions and questions concerning various sections of his survey, the Director again concentrated on the problem of unemployment which had dominated the entire debate on his report.

*Unemployment and Hours.*—He reiterated his belief in the inevitability of shorter hours and their economic soundness. Drawing

particular attention to the testimony of Mr. Folsom (employers' delegate, United States) as an employer who had had practical experience of the forty-hour week, the Director declared:

"Most of the discussion which has taken place up to now has been purely theoretical. A great many surmises, prophecies, anticipations—most of them gloomy—have come from the employers' side as to the probable effects of shorter hours. Mr. Folsom for the first time has given us some actual facts, and his conclusions seem to me to be particularly significant. He confirmed the view, which has always been maintained by the advocates of shorter hours, that they had produced more employment, or at any rate that they had prevented more unemployment; and, secondly, he stated that it will probably be found that costs will not increase as much as theoretical calculations would indicate owing to offsetting factors. That is the really important point. It is usually assumed by those who oppose shorter hours that they will be applied to a static industrial situation. In point of fact, industry is always dynamic. There are always offsetting factors, there always have been in the past, and there will be in the future; and for that reason I think the testimony as to the actual experience which is being gained in the United States is of particular value."

*Public Works.*—Proceeding, the Director said he did not think the criticisms of his views on public works were really effective. Mr. Molin (Government delegate, Sweden) had given a complete answer to the claim of Mr. Wistrand (employers' delegate, Sweden) that public works contributed little to Swedish recovery. He himself had never claimed that public works alone provided a remedy for unemployment. They were only one part of a general policy. Nor could they be carried out indefinitely on borrowed money. There

were times, he observed, when it might be good policy to unbalance a budget, as had been shown in Sweden and elsewhere; but a time must come when a balanced budget became an essential element of confidence. On the whole, he was still of the opinion that expansionist technique which comprised a public works policy had made a very important contribution to the struggle against the depression. It was, however, not a complete remedy in itself, and more harm than good was done by the advocates of public works who claimed greater results for them than they could possibly show.

*Technological Unemployment.*—The Director referred to the attention which had been given during the discussion to the question of technological unemployment. It could hardly be doubted, he considered, that the discrepancy between the recovery of production and the recovery of employment was largely due to the introduction of further labour-saving machinery and other devices. It might be true, as Colonel Harrison (Government delegate, Australia) had said, that no method had yet been devised of calculating with precision the proportionate part of technological progress in promoting unemployment; but no one could doubt that it was one of the most serious factors in the unemployment problem. Hitherto, people had been inclined to worship the machine as the source of innumerable benefits. Now, as Mr. Hedges (workers' delegate, United States) has said, it was necessary to learn how to master and control the machine. The Office was constantly engaged on this problem, and hoped to publish before the end of this year a fresh attempt by a well-known economist to analyze the problem.

The full texts of the Draft Conventions and Recommendations which were adopted by the Conference follow:—

## DRAFT CONVENTION CONCERNING THE REGULATION OF CERTAIN SPECIAL SYSTEMS OF RECRUITING WORKERS

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twentieth Session on June 4, 1936, and

Having decided upon the adoption of certain proposals with regard to the regulation of certain special systems of recruiting workers, which is the first item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,

adopts, this 20th day of June of the year one thousand nine hundred and thirty-six the following Draft Convention which may be cited as the Recruiting of Indigenous Workers Convention, 1936:

### Article 1

Each Member of the International Labour Organization which ratifies this Convention undertakes to regulate in accordance with the following provisions the recruiting of indigenous workers in each of its territories in which such recruiting exists or may hereafter exist.

### Article 2

For the purposes of this Convention:

(a) the term "recruiting" includes all operations undertaken with the object of obtaining or supplying the labour of persons who do not spontaneously offer their services at the place of employment or at a public emigration or employment office or at an office conducted by an employers' organization and supervised by the competent authority;

- (b) the term "indigenous workers" includes workers belonging to or assimilated to the indigenous populations of the dependent territories of Members of the Organization and workers belonging to or assimilated to the dependent indigenous populations of the home territories of Members of the Organization.

#### Article 3

Where the circumstances make the adoption of such a policy desirable, the following classes of recruiting operations may, except when undertaken by persons or associations engaged in professional recruiting, be exempted from the application of the Convention by the competent authority:

- (a) operations undertaken by or on behalf of employers who do not employ more than a prescribed limited number of workers;
- (b) operations undertaken within a prescribed limited radius from the place of employment; and
- (c) operations for the engagement of personal and domestic servants and of non-manual workers.

#### Article 4

Before approving for any area any scheme of economic development which is likely to involve the recruiting of labour, the competent authority shall take such measures as may be practicable and necessary:

- (a) to avoid the risk of pressure being brought to bear on the populations concerned by or on behalf of the employers in order to obtain the labour required;
- (b) to ensure that, as far as possible, the political and social organization of the populations concerned and their powers of adjustment to the changed economic conditions will not be endangered by the demand for labour; and
- (c) to deal with any other possible untoward effects of such development on the populations concerned.

#### Article 5

1. Before granting permission to recruit labour in any area, the competent authority shall take into consideration the possible effects of the withdrawal of adult males on the social life of the population concerned, and in particular shall consider:

- (a) the density of the population, its tendency to increase or decrease, and the probable effect upon the birth-rate of the withdrawal of adult males;
- (b) the possible effects of the withdrawal of adult males on the health, welfare and development of the population concerned, particularly in connection with the food supply;
- (c) the dangers to the family and morality arising from the withdrawal of adult males; and
- (d) the possible effects of the withdrawal of adult males on the social organization of the population concerned.

2. Where the circumstances make the adoption of such a policy practicable and necessary, the competent authority shall, in order to safeguard the populations concerned against any untoward consequences of the withdrawal of adult males, fix the maximum number of adult males who may be recruited in any given social unit in such manner that the number of adult

males remaining in the said unit does not fall below a prescribed percentage of the normal proportion of adult males to women and children.

#### Article 6

Non-adult persons shall not be recruited: Provided that the competent authority may permit non-adults above a prescribed age to be recruited with the consent of their parents for employment upon light work subject to prescribed safeguards for their welfare.

#### Article 7

1. The recruiting of the head of a family shall not be deemed to involve the recruiting of any member of his family.

2. Where the circumstances make the adoption of such a policy practicable and desirable, the competent authority shall encourage recruited workers to be accompanied by their families, more particularly in the case of workers recruited for agricultural or similar employment at a long distance from their homes and for periods exceeding a specified duration.

3. Except at the express request of the persons concerned, recruited workers shall not be separated from wives and minor children who have been authorized to accompany them to, and to remain with them at, the place of employment.

4. In default of agreement to the contrary before the departure of the worker from the place of recruiting, an authorization to accompany a worker shall be deemed to be an authorization to remain with him for the full duration of his term of service.

#### Article 8

Where the circumstances make the adoption of such a policy practicable and desirable, the competent authority may make it a condition of permitting recruiting that the recruited workers shall be grouped at the place of employment under suitable ethnical conditions.

#### Article 9

Public officers shall not recruit for private undertakings either directly or indirectly, except when the recruited workers are to be employed on works of public utility for the execution of which private undertakings are acting as contractors for a public authority.

#### Article 10

Chiefs or other indigenous authorities shall not:

- (a) act as recruiting agents;
- (b) exercise pressure upon possible recruits; or
- (c) receive from any source whatsoever any special remuneration or other special inducement for assistance in recruiting.

#### Article 11

No person or association shall engage in professional recruiting unless the said person or association has been licensed by the competent authority and is recruiting workers for a public department or for one or more specific employers or organizations of employers.

#### Article 12

Employers, employers' agents, organizations of employers' organizations subsidized by employers, and the agents of organizations of employers and of organizations subsidized by employers, shall only engage in recruiting if licensed by the competent authority.

*Article 13*

1. Before issuing any licence for recruiting the competent authority shall:

- (a) satisfy itself that the applicant for a licence, if an individual, is a fit and proper person;
- (b) require the applicant for a licence, except when the said applicant is an employers' organization or an organization subsidized by employers, to furnish financial or other security for proper conduct as a licensee;
- (c) require the applicant for a licence, if an employer, to furnish financial or other security for the payment of wages due; and
- (d) satisfy itself that adequate provision has been made for safeguarding the health and welfare of the workers to be recruited.

2. Licensees shall keep, in such form as the competent authority may prescribe, records from which the regularity of every recruiting operation can be verified and every recruited worker can be identified.

3. A licensee who is the agent of another licensee shall wherever possible receive a fixed salary, and in any case in which he receives remuneration calculated at a rate per head of workers recruited such remuneration shall not exceed a maximum to be prescribed by the competent authority.

4. The validity of licences shall be limited to a fixed period not exceeding one year to be prescribed by the competent authority.

5. The renewal of licences shall be conditional upon the manner in which the licensee has respected the conditions subject to which the licence was issued.

6. The competent authority shall be entitled:

- (a) to withdraw any licence if the licensee has been guilty of any offence or misconduct unfitting him to conduct recruiting operations; and
- (b) to suspend any licence pending the result of any inquiry into the conduct of the licensee.

*Article 14*

1. No person shall assist a licensee in a subordinate capacity in the actual recruiting operations unless he has been approved by a public officer and has been furnished with a permit by the licensee.

2. Licensees shall be responsible for the proper conduct of such assistants.

*Article 15*

1. Where the circumstances make the adoption of such a policy necessary or desirable, the competent authority may exempt from the obligation to hold a licence worker-recruiters who:

- (a) are employed as workers by the undertaking for which they recruit other workers;
- (b) are formally commissioned in writing by the employer to recruit other workers; and
- (c) do not receive any remuneration or other advantage for recruiting.

2. Worker-recruiters shall not make advances of wages to recruits.

3. Worker-recruiters may recruit only within an area to be prescribed by the competent authority.

4. The operations of worker-recruiters shall be supervised in a manner to be prescribed by the competent authority.

*Article 16*

1. Recruited workers shall be brought before a public officer, who shall satisfy himself that the law and regulations concerning recruiting have been observed and, in particular, that the workers have not been subjected to illegal pressure or recruited by misrepresentation or mistake.

2. Recruited workers shall be brought before such an officer as near as may be convenient to the place of recruiting or, in the case of workers recruited in one territory for employment in a territory under a different administration, at latest at the place of departure from the territory of recruiting.

*Article 17*

Where the circumstances make the adoption of such a provision practicable and necessary, the competent authority shall require the issue to each recruited worker who is not engaged at or near the place of recruiting of a document in writing such as a memorandum of information, a work book or a provisional contract containing such particulars as the authority may prescribe, as for example particulars of the identity of the workers, the prospective conditions of employment, and any advances of wages made to the workers.

*Article 18*

1. Every recruited worker shall be medically examined.

2. Where the worker has been recruited for employment at a distance from the place of recruiting or has been recruited in one territory for employment in a territory under a different administration the medical examination shall take place as near as may be convenient to the place of recruiting or, in the case of workers recruited in one territory for employment in a territory under a different administration, at latest at the place of departure from the territory of recruiting.

3. The competent authority may empower public officers before whom workers are brought in pursuance of Article 16 to authorize the departure prior to medical examination of workers in whose case they are satisfied:

- (a) that it was and is impossible for the medical examination to take place near to the place of recruiting or at the place of departure;
- (b) that the worker is fit for the journey and the prospective employment; and
- (c) that the worker will be medically examined on arrival at the place of employment or as soon as possible thereafter.

4. The competent authority may, particularly when the journey of the recruited workers is of such duration and takes place under such conditions that the health of the workers is likely to be affected, require recruited workers to be examined both before departure and after arrival at the place of employment.

5. The competent authority shall ensure that all necessary measures are taken for the acclimatization and adaptation of recruited workers and for their immunization against disease.

*Article 19*

1. The recruiter or employer shall whenever possible provide transport to the place of employment for recruited workers.

2. The competent authority shall take all necessary measures to ensure:

- (a) that the vehicles or vessels used for the transport of workers are suitable for

- such transport, are in good sanitary condition and are not over-crowded;
- (b) that when it is necessary to break the journey for the night suitable accommodation is provided for the workers; and
  - (c) that in the case of long journeys all necessary arrangements are made for medical assistance and for the welfare of the workers.
3. When recruited workers have to make long journeys on foot to the place of employment, the competent authority shall take all necessary measures to ensure:
- (a) that the length of the daily journey is compatible with the maintenance of the health and strength of the workers; and
  - (b) that, where the extent of the movement of labour makes this necessary, rest camps or rest houses are provided at suitable points on main routes and are kept in proper sanitary condition and have the necessary facilities for medical attention.
4. When recruited workers have to make long journeys in groups to the place of employment, they shall be conveyed by a responsible person.

#### Article 20

1. The expenses of the journeys of recruited workers to the place of employment, including all expenses incurred for their protection during the journey, shall be borne by the recruiter or employer.
2. The recruiter or employer shall furnish recruited workers with everything necessary for their welfare during the journey to the place of employment, including particularly, as local circumstances may require, adequate and suitable supplies of food, drinking water, fuel and cooking utensils, clothing and blankets.
3. This Article applies to workers recruited by worker-recruiters only to the extent to which its application is considered possible by the competent authority.

#### Article 21

- Any recruited worker who:
- (a) becomes incapacitated by sickness or accident during the journey to the place of employment;
  - (b) is found on medical examination to be unfit for employment;
  - (c) is not engaged after recruiting for a reason for which he is not responsible; or
  - (d) is found by the competent authority to have been recruited by misrepresentation or mistake;
- shall be repatriated at the expense of the recruiter or employer.

#### Article 22

The competent authority shall limit the amount which may be paid to recruited workers in respect of advances of wages and shall regulate the conditions under which such advances may be made.

#### Article 23

Where the families of recruited workers have been authorized to accompany the workers to the place of employment the competent authority shall take all necessary measures for safeguarding their health and welfare during the journey and more particularly:

- (a) Articles 19 and 20 of this Convention shall apply to such families;
- (b) in the event of the worker being repatriated in virtue of Article 21, his family shall also be repatriated; and

- (c) in the event of the death of the worker during the journey to the place of employment, his family shall be repatriated.

#### Article 24

1. Before permitting the recruiting of workers for employment in a territory under a different administration, the competent authority of the territory of recruiting shall satisfy itself that all necessary measures have been taken for the protection of the recruited workers in accordance with the provisions of this Convention when the workers have travelled beyond its jurisdiction.

2. Where workers are recruited in one territory for employment in a territory under a different administration and the circumstances and amount of recruiting appear to the competent authorities concerned to necessitate such action, the said authorities shall enter into agreements defining the extent to which such recruiting is to be permitted and providing for co-operation between them in supervising the execution of the conditions of recruiting and employment.

3. The recruiting of workers in one territory for employment in a territory under a different administration shall be undertaken only under licence issued by the competent authority of the territory of recruiting: Provided that the said authority may accept as equivalent to a licence issued by it a licence issued by the competent authority of the territory of employment.

4. Where the circumstances and the amount of recruiting for employment in a territory under a different administration appear to the competent authority of the territory of recruiting to necessitate such action, the said authority shall provide that such recruiting may only be undertaken by organizations approved by it.

#### Article 25

1. In respect of the territories referred to in Article 35 of the Constitution of the International Labour Organization, each Member of the Organization which ratifies this Convention shall append to its ratification a declaration stating:

- (a) the territories to which it undertakes to apply the provisions of the Convention without modification;
- (b) the territories to which it undertakes to apply the provisions of the Convention subject to modifications, together with details of the said modifications;
- (c) the territories to which the Convention is inapplicable and in such cases the grounds on which it is inapplicable;
- (d) the territories in respect of which it reserves its decision.

2. The undertakings referred to in subparagraphs (a) and (b) of paragraph 1 of this Article shall be deemed to be an integral part of the ratification and shall have the force of ratification.

3. Any Member may by a subsequent declaration cancel in whole or in part any reservations made in its original declaration in virtue of subparagraphs (b), (c) or (d) of paragraph 1 of this Article.

#### Article 26

The formal ratifications of this Convention shall be communicated to the Secretary-General of the League of Nations for registration.

*Article 27*

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Secretary-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Secretary-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

*Article 28*

As soon as the ratifications of two Members of the International Labour Organization have been registered, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organization.

*Article 29*

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

*Article 30*

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

*Article 31*

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provis-

ions of Article 29 above, if and when the new revising Convention shall have come into force;

- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

*Article 32*

The French and English texts of this Convention shall both be authentic.

## RECOMMENDATION CONCERNING THE PROGRESSIVE ELIMINATION OF RECRUITING

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twentieth Session on June 4, 1936, and

Having decided upon the adoption of certain proposals with regard to the progressive elimination of recruiting, which is included in the first item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation, adopts, this 20th day of June, of the year, one thousand nine hundred and thirty-six, the following Recommendation which may be cited as the Elimination of Recruiting Recommendation, 1936:

The Conference,

Having adopted a Draft Convention concerning the regulation of certain special system of recruiting workers,

Considering that in addition to the regulation of recruiting of labour it should be a cardinal principle to be followed by the Members of the International Labour Organization to direct their policy where necessary and desirable towards the progressive elimination of the recruiting of labour and the development of the spontaneous offer of labour.

Recommends that each Member of the International Labour Organization should take steps to hasten such elimination by:

- (a) improvement of the conditions of labour;
- (b) development of the means of transport;
- (c) promotion of the settlement of workers and their families in the area of employment, where such settlement is the policy of the competent authority;
- (d) facilitating the voluntary movement of labour under administrative supervision and control; and
- (e) the educational development of indigenous peoples and the improvement of their standard of living.

## DRAFT CONVENTION CONCERNING ANNUAL HOLIDAYS WITH PAY

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twentieth Session on June 4, 1936, and

Having decided upon the adoption of certain proposals with regard to annual holidays

with pay which is the second item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,

adopts, this 24th day of June, of the year one thousand nine hundred and thirty-six, the following Draft Convention which may be cited as the Holidays with Pay Convention, 1936:

*Article 1*

1. This Convention applies to all persons employed in any of the following undertakings or establishments, whether public or private:

- (a) undertakings in which articles are manufactured, altered, cleaned, repaired, ornamented, finished, adapted for sale, broken up or demolished, or in which materials are transformed, including undertakings engaged in shipbuilding or in the generation, transformation or transmission of electricity or motive power of any kind;
- (b) undertakings engaged wholly or mainly in the construction, reconstruction, maintenance, repair, alteration or demolition of any one or more of the following: buildings, railways, tramways, airports, harbours, docks, piers, works of protection against floods or coast erosion, canals, works for the purpose of inland, maritime or aerial navigation, roads, tunnels, bridges, viaducts, sewers, drains, wells, irrigation or drainage works, telecommunication installations, works for the production or distribution of electricity or gas, pipe-lines, waterworks, and undertakings engaged in other similar work or in the preparation for or laying the foundation of any such work or structure;
- (c) undertakings engaged in the transport of passengers or goods by road, rail, inland waterway or air, including the handling of goods at docks, quays, wharves, warehouses or airports;
- (d) mines, quarries and other works for the extraction of minerals from the earth;
- (e) commercial or trading establishments, including postal and telecommunication services;
- (f) establishments and administrative services in which the persons employed are mainly engaged in clerical work;
- (g) newspaper undertakings;
- (h) establishments for the treatment and care of the sick, infirm, destitute or mentally unfit;
- (i) hotels, restaurants, boarding-houses, clubs, cafés and other refreshment houses;
- (j) theatres and places of public amusement;
- (k) mixed commercial and industrial establishments not falling wholly within any of the foregoing categories.

2. The competent authority in each country shall, after consultation with the principal organizations of employers and workers concerned where such exist, define the line which separates the undertakings and establishments specified in the preceding paragraph from those to which this Convention does not apply.

3. The competent authority in each country may exempt from the application of this Convention:

- (a) persons employed in undertakings or establishments in which only members of the employer's family are employed;
- (b) persons employed in public services whose conditions of service entitle them to an annual holiday with pay at least equal in duration to that prescribed by this Convention.

*Article 2*

1. Every person to whom this Convention applies shall be entitled after one year of continuous service to an annual holiday with pay of at least six working days.

2. Persons, including apprentices, under sixteen years of age, shall be entitled after one year of continuous service to an annual holiday with pay of at least twelve working days.

3. The following shall not be included in the annual holiday with pay:

- (a) public and customary holidays; and
- (b) interruptions of attendance at work due to sickness.

4. National laws or regulations may authorize in special circumstances the division into parts of any part of the annual holiday with pay which exceeds the minimum duration, prescribed by this Article.

5. The duration of the annual holiday with pay shall increase with the length of service under conditions to be prescribed by national laws or regulations.

*Article 3*

Every person taking a holiday in virtue of Article 2 of this Convention shall receive in respect of the full period of the holiday either:

- (a) his usual remuneration, calculated in a manner which shall be prescribed by national laws or regulations, including the cash equivalent of his remuneration in kind, if any; or
- (b) the remuneration determined by collective agreement.

*Article 4*

Any agreement to relinquish the right to an annual holiday with pay, or to forego such a holiday, shall be void.

*Article 5*

National laws or regulations may provide that a person who engages in paid employment during the course of his annual holiday may be deprived of his right to payment in respect of the period of the holiday.

*Article 6*

A person dismissed for a reason imputable to the employer before he has taken a holiday due to him shall receive in respect of every day of holiday due to him in virtue of this Convention the remuneration provided for in Article 3.

*Article 7*

In order to facilitate the effective enforcement of the provisions of this Convention, every employer shall be required to keep, in a form approved by the competent authority, a record showing:

- (a) the date of entry into his service of each person employed by him and the duration of the annual holiday with pay to which each such person is entitled;
- (b) the dates at which the annual holiday with pay is taken by each person;
- (c) the remuneration received by each person in respect of the period of his annual holiday with pay.

*Article 8*

Each Member which ratifies this Convention shall establish a system of sanctions to ensure the application of its provisions.

*Article 9*

Nothing in this Convention shall affect any law, award, custom or agreement between employers and workers which ensures more favourable conditions than those provided by this Convention.

(The provisions respecting ratification of this Convention are identical with those detailed above in the Draft Convention concerning the regulation of certain special systems of recruiting workers—Articles 26 to 32 inclusive.)

#### RECOMMENDATION CONCERNING ANNUAL HOLIDAYS WITH PAY

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twentieth Session on June 4, 1936, and

Having decided upon the adoption of certain proposals with regard to annual holidays with pay which is the second item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation, adopts, this 24th day of June of the year one thousand nine hundred and thirty-six, the following Recommendation which may be cited as the Holidays with Pay Recommendation, 1936:

The Conference,

Having adopted a Draft Convention concerning annual holidays with pay for employed persons,

Considering that the purpose of such holidays is to secure to employed persons opportunities for rest, recreation and the development of their faculties.

Considering that the conditions laid down by the Draft Convention constitute the minimum standard to which any system of holidays with pay should conform.

Considering that it is desirable to deal in greater detail with the methods of applying the system.

Recommends that each Member should take the following suggestions into consideration:

1. (1) The continuity of service required in order to become entitled to a holiday should not be affected by interruptions occasioned by sickness or accident, family events, military service, the exercise of civic rights, changes in the management of the undertaking in which the employed person is employed, or

intermittent involuntary unemployment if the duration of the unemployment does not exceed a prescribed limit and if the person concerned resumes employment.

(2) In employments in which work is not carried on regularly throughout the year the condition of continuity of employment should be regarded as satisfied by the working of a prescribed number of days during a prescribed period.

(3) The holiday should be earned after one year's work, regardless whether this period has been spent in the employment of the same or of several employers. Each Government should take effective steps to ensure that the cost arising from the granting of the holidays shall not fall entirely upon the last employer.

2. Although it may be desirable that provision should be made in special cases for holidays to be divided, care should be exercised to ensure that such special arrangements do not run counter to the purpose of the holiday, which is to enable the employed person to make good the loss of physical and mental forces during the course of the year. In other cases division of the holiday should be restricted save in quite exceptional circumstances, to division into not more than two parts, one of which should not be less than the prescribed minimum.

3. It would be desirable that the increase in the length of the holiday with the duration of service should begin to operate as soon as possible and should be effected by regular stages so that a prescribed minimum will be attained after a prescribed number of years, for example, twelve working days after seven years of service.

4. The fairest method of calculating the remuneration of a person paid in whole or in part on an output or piece-work basis would be to calculate the average earnings over a fairly long period so as to nullify as far as possible the effect of fluctuations in earnings.

5. It would be desirable that the Members should consider whether a more advantageous system should not be established for young persons and apprentices under 18 years of age in order to ease the transition from school to industrial life during a period of physical development.

#### DRAFT CONVENTION CONCERNING THE REDUCTION OF HOURS OF WORK ON PUBLIC WORKS

The General Conference of the International Labour Organization,

Having met at Geneva in its Twentieth Session on June 4, 1936;

Considering that the question of the reduction of hours of work on public works undertaken or subsidized by Governments is the third item on the Agenda of the Session;

Confirming the principle laid down in the Forty-Hour Week Convention, 1935, including the maintenance of the standard of living;

Considering it to be desirable that this principle should be applied by international agreement to public works;

adopts this 23rd day of June, one thousand nine hundred and thirty-six the following Draft Convention which may be cited as the Reduction of Hours of Work (Public Works) Convention, 1936:

##### Article 1

1. This Convention applies to persons directly employed on building or civil engineering works financed or subsidized by central Governments.

2. For the purpose of this Convention the precise scope of the terms "building or civil engineering," "financed" and "subsidized" shall be delimited by the competent authority after consultation with the organizations of employers and workers concerned where such exist.

3. The competent authority may, after consultation with the organizations of employers and workers concerned where such exist, exempt from the application of this Convention:

- (a) persons employed in undertakings in which only members of the employers' family are employed;
- (b) persons occupying positions of management who do not ordinarily perform manual work.

*Article 2*

1. The hours of work of persons to whom this Convention applies shall not exceed an average of forty per week.

2. In the case of persons who work in successive shifts on processes required by reason of the nature of the process to be carried on without a break at any time of the day, night or week, weekly hours of work may average forty-two.

3. The competent authority shall, after consultation with the organizations of employers and workers concerned where such exist, determine the processes to which paragraph 2 of this Article applies.

4. Where hours of work are calculated as an average the competent authority shall, after consultation with the organizations of employers and workers concerned where such exist, determine the number of weeks over which this average may be calculated and the maximum number of hours that may be worked in any week.

5. For the purpose of this Convention, the term "hours of work" means the time during which the persons employed are at the disposal of the employer and does not include rest periods during which they are not at his disposal.

*Article 3*

1. The competent authority may, by regulations made after consultation with the organizations of employers and workers concerned where such exist, provide that the limits of hours prescribed in the preceding Articles may be exceeded in the case of:

- (a) persons employed on preparatory or complementary work which must necessarily be carried on outside the limits laid down for the general working of the undertaking or branch thereof or of the shift; and
- (b) persons employed in occupations which by their nature involve long periods of inaction during which the said persons have to display neither physical activity nor sustained attention or remain at their posts only to reply to possible calls.

2. The regulations referred to in paragraph 1 shall determine the maximum number of hours which may be worked in virtue of this Article.

3. The competent authority may permit the limits of hours prescribed in the preceding Article to be exceeded to a prescribed extent in cases in which this is necessary, if serious hindrance to the execution of a particular public work is to be avoided, on account of abnormal circumstances such as the inaccessibility of the site or the impossibility of engaging sufficient qualified labour.

*Article 4*

The limits of hours prescribed in the preceding Articles may be exceeded, but only so far as may be necessary to avoid serious interference with the ordinary working of the undertaking,

- (a) in case of accident, actual or threatened, or in case of urgent work to be done to machinery or plant, or in case of *force majeure*; or
- (b) in order to make good the unforeseen absence of one or more members of a shift.

*Article 5*

1. The limits of hours prescribed in Articles 2 and 3 may be exceeded in cases where the continued presence of particular persons is necessary for the completion of an operation which for technical reasons cannot be interrupted.

2. The competent authority shall, after consultation with the organizations of employers

and workers concerned where such exist, determine the operations to which this Article applies and the maximum number of hours in excess of the prescribed limits which may be worked by the persons concerned.

3. Overtime worked in virtue of this Article shall be remunerated at not less than one-and-a-quarter times the normal rate.

*Article 6*

1. The competent authority may grant an allowance of overtime for exceptional cases of pressure of work. Such an allowance shall only be granted under regulations made after consultation as to the necessity of such overtime and the number of hours to be worked with the organizations of employers and workers concerned where such exist, and no such allowance shall permit of any person being employed for more than one hundred hours of such overtime in any year.

2. Overtime worked in virtue of this Article shall be remunerated at not less than one-and-a-quarter times the normal rate.

*Article 7*

In order to facilitate the effective enforcement of the provisions of this Convention, every employer shall be required:

- (a) to notify, by the posting of notices in conspicuous positions in the works or other suitable place or by such other method as may be approved by the competent authority,
- (i) the hours at which work begins and ends;
- (ii) where work is carried on by shifts, the hours at which each shift begins and ends;
- (iii) where a rotation system is applied, a description of the system, including a time-table for each person or group of persons;
- (iv) the arrangements made in cases where the average duration of the working week is calculated over a number of weeks; and
- (v) rest periods in so far as these are not reckoned as part of the working hours;
- (b) to keep a record in the form prescribed by the competent authority of all additional hours worked in virtue of Articles 3 (paragraph 3), 5 and 6 and of the payments made in respect thereof.

*Article 8*

The annual reports submitted by Members upon the application of this Convention shall include more particularly full information concerning:

- (a) the definitions adopted in virtue of Article 1, paragraph 2;
- (b) processes which the competent authority has recognized as necessarily continuous in character in virtue of Article 2, paragraph 2;
- (c) determinations made in virtue of Article 2, paragraph 4;
- (d) decisions taken in virtue of Article 8; and
- (e) allowances of overtime granted in virtue of Article 6.

*Article 9*

Nothing in this Convention shall affect any law, award, custom or agreement between employers and workers which ensures more favourable conditions than those provided by this Convention.

(The provisions respecting ratification of this Convention are identical with those detailed above in the Draft Convention concerning the regulation of certain special systems of recruiting workers—Articles 26 to 32 inclusive).

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF JUNE, 1936

### Reports of the Superintendents of the Employment Service

**T**HE employment situation at the end of June was reported by the Superintendents of the Employment Service to be as follows:—

Favourable weather throughout the greater part of the Maritime Provinces was conducive to the growth of the crops and produce at the city markets was plentiful. Considerable pulpwood cutting was being done, with mills fairly busy. Lobster fishing was about completed, but a fair catch of salmon was reported from the west coast. Shad, mackerel and haddock were also caught. Coal mines in the New Glasgow area operated from two to four days per week, while those in Cape Breton and vicinity worked from two to five days, with one mine idle all week. The iron and steel group, except at Saint John where quietness prevailed, was busy, with no idleness reported. Sawmills were cutting long lumber, cedar shingles and spruce laths. Other industries were about normal, with produce up to the average. A certain amount of overhaul and repair work was underway, but no large new projects were reported. Railway and highway construction continued, though in some cases the work was at such a distance from the cities, that it did little to reduce the number of unemployed in them. Passenger and freight traffic by railways, auto and water was heavy and longshoremen were well employed at the various ports. Trade was fair. In the women's department the usual number of placements of charworkers and domestics was made.

In the Province of Quebec the demand for farm workers was good at Hull and Montreal, but quiet elsewhere. Logging was quite active, though log driving in some sections was about completed. Manufacturing was reported by the various centres as follows: Chicoutimi and Hull, active; Montreal, shoes and metallurgy fairly busy, but tobacco, rubber and clothing quiet; Quebec and Three Rivers, all factories operating steadily on shorter hours; Sherbrooke, increased staffs recorded. Although building construction had declined in several localities, still, a fair amount of activity prevailed, but mostly for repairs and alterations. Highway construction had also absorbed a number of men. Transportation was fair and trade improved. Many orders were received for domestics, particularly for hotels and restaurants, and all requests for casual help were easily filled.

An active demand for farm workers continued in Ontario, with a scarcity of experienced workers reported. Strawberry picking was practically finished, but cherries were ready for the market. Very little labour turnover was registered by the sawmills or in logging and such orders, as were received were easily filled. Slightly increased activity was noted in mining, particularly in the prospecting line, many men applying directly to the mines for employment. Although some slackness had occurred in manufacturing, especially in the auto industry, with consequent staff reductions, the situation on the whole continued better than at the corresponding period a year ago. Textiles showed little change, but foundries and rubber concerns were busier and canning factories were preparing for a good season. The berry crop, however, had proved disappointing and had not provided the employment expected. Building construction showed improvement, although the value of building permits was not high, there appeared to be enough alterations and renovations under way to keep many skilled, semi-skilled and unskilled men employed, nevertheless, there was a surplus of labour to meet all such requirements. Highway and railway construction were also being carried on and absorbed a number of men. Windsor reported that transportation on the Great Lakes was heavier recently than during any corresponding period for many years past. Experienced domestic help in the Women's Division continued scarce and unfilled vacancies remained on file. Casual work for women was slightly less.

Rains in Manitoba afforded additional benefit to growing crops in that province, but in Saskatchewan and Alberta, the weather had been extremely hot and dry and crops were showing deterioration due to lack of moisture. The grasshopper plague, however, was fairly well checked, as a large amount of poison had been used. Very few orders were received in logging, and mining was also quiet. Manufacturing was somewhat slack. Building construction was slow, for while the value of building permits in Greater Winnipeg for the first six months of 1936 showed a larger total than last year's, construction was much less than in the years previous to 1934. Several drilling crews had commenced operations in the oil fields adjacent to Calgary and highway construction and extra gang labour on railways afforded

employment for a number of men, there being many applicants for railway work. Trade, both wholesale and retail, was dull, except at Winnipeg, where improvement was noted. A fair demand existed for country domestics, but fewer orders were received from city employers, while there was still a scarcity of skilled household workers.

With hay making in full swing in British Columbia, numerous requests were received for farm hands, plenty of whom were available. Owing to the light cherry crop only a few extra men were needed for orchard work or in the packing houses. Logging was active, but no demand for help, except for shingle bolt cutters who were not easy to obtain, as experienced men, who had their own tools, were required. All saw and shingle mills were busy. Mining remained unchanged. Sockeye fishing had just started and there were calls

from some of the fisheries for extra help. Manufacturing concerns at Nelson were running full time. Building construction showed improvement and preparations for July celebrations at Vancouver created employment for many men. In spite of this, however, several hundred unemployed building tradesmen and labourers in that city were on relief. Extra gang work on railways absorbed a number of workers, but many applicants were available for this kind of work. Drydocks and shipyards were quiet at Prince Rupert; waterfronts were busy there and at New Westminster and Victoria, though somewhat less active at Vancouver. Trade was fair. Numerous orders for hotel help were filled, but experienced help in this, as well as other lines of domestic service, was scarce.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN MAY, 1936

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on June 1 was 9,690, the employees on their payrolls numbering 963,513 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for June was 1,785, having an aggregate membership of 178,453 persons, 14·8 per cent

of whom were without employment on June 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 officers of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) The Employment Situation at the Beginning of June, 1936, as Reported by Employers

According to data tabulated by the Dominion Bureau of Statistics from 9,690 firms throughout Canada, there was a considerable expansion in employment at the beginning of June, in which most industrial groups shared. The payrolls of these employers were enlarged from 940,218 at May 1 to 963,513 at the beginning of June, or by 23,295 persons. The index at the latest date stood at 102·0, as compared with 99·5 in the preceding month, and 97·6 at June 1, 1935. At the same date in the fourteen preceding years, the index (average 1926=100) was as follows: 1934, 96·6; 1933,

80·7; 1932, 89·1; 1931, 103·6; 1930, 116·5; 1929, 122·2; 1928, 113·8; 1927, 107·2; 1926, 102·2; 1925, 95·6; 1924, 96·4; 1923, 98·5; 1922, 90·3 and 1921, 87·7. Although the increase at June 1, 1936, was substantial, and exceeded the gain noted at the same date of last year, it was smaller than the average advance indicated between May and June in the experience of the years since 1920. The index after adjustment for seasonal variation therefore declined, falling from 102·4 at May 1 to 100·5 at the latest date.

Improvement was reported in manufacturing particularly in the food and lumber divisions. In the non-manufacturing industries, there were important increases in logging, mining, communications, transportation, highway and railway construction and maintenance, services and trade. On the other hand, building construction was not so active.

For June 1, 1935, statements had been received from 9,270 employers of 915,792 persons, compared with 893,088 in the preceding month. The index, at 97.6, was then 4.4 points lower than at June 1 of the present year. As at the date under review, improvement had been indicated in both manufacturing and non-manufacturing industries.

heightened activity, particularly in the lumber and animal food divisions, while iron and steel and some other branches released employees. Construction, trade and mining also afforded greater employment, but transportation and logging were seasonally slacker. The 661 firms reporting for June 1, 1935, had employed 72,427 workers, compared with 69,437 at the beginning of May of last year; however, the index then was lower by nearly two points than at the latest date, when it stood at 103.4.

*Quebec.*—Transportation, construction and manufacturing recorded substantial increases in personnel in Quebec, and there were also important gains in logging, mining, services

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

**NOTE.**—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

### Employment by Economic Areas

The trend was favourable in four of the five economic areas, while in the Maritime Provinces the general situation was unchanged; firms in Quebec and the Prairie Provinces employed the greatest number of extra workers.

*Maritime Provinces.*—No general change in employment occurred in the Maritime Provinces, according to statistics received from 689 employers with a combined working force of 74,124 persons, as compared with 74,068 at May 1. Manufacturing registered moderately

and trade. Within the manufacturing division, pulp and paper, lumber, clay, glass and stone, mineral product, non-ferrous metal and food factories reported the greatest improvement, while textile and leather establishments showed a falling-off in personnel. Statements were tabulated from 2,280 firms employing 276,235 workers at June 1, 1936, or 9,541 more than in their last monthly report. The general gain indicated by the employers making returns did not provide work for so many persons as were added to the payrolls at the same date of last year, when the co-operating establishments, numbering 2,209, had reported

257,837 employees, as compared with 246,672 in the preceding month.

*Ontario.*—There were considerable increases in logging, mining, communications, transportation, railway construction, services and trade at June 1, 1936, while manufacturing as a whole and building and highway construction released help. Within the group of factory employment, the lumber and food divisions showed large increases in personnel, and there were smaller gains in rubber, clay, glass and stone, electrical apparatus, non-ferrous metal and other groups; on the other hand, leather, textile, tobacco and iron and steel works were slacker, the losses in the last-named being substantial. The payrolls of the 4,260 co-operating establishments aggregated 402,874 employees at the latest date; as compared with 398,053 at May 1, this was an increase of 4,821 persons. The general index of employment stood at 104.7 at June 1, as compared with 103.4 at May 1, 1936, and 101.6 at the beginning of June in 1935, when a small reduction had been indicated. An aggregate working force of 388,720 persons was reported by the 4,094 firms then furnishing data.

*Prairie Provinces.*—Construction (especially railroad construction and maintenance), transportation, manufacturing and trade showed improvement in the Prairie Provinces; the food, lumber and iron steel industries recorded the greatest advances in the factory employment group. On the other hand, logging and coal-mining were seasonally slacker. The 1,420 firms whose statistics were tabulated employed 123,347 persons, as against 117,081 in the preceding month. Smaller increases had been indicated at June 1, 1935, and the index then was lower by between five and six points. The 1,337 employers furnishing returns at June 1, 1935, had reported 116,247 workers, compared with 110,869 at May 1.

*British Columbia.*—An aggregate payroll of 86,933 was reported by the 1,041 co-operating firms, who had 84,322 employees at the beginning of May. Although this increase exceeded the average gain at June 1 in the years since 1920, it was smaller than that noted at the same date in 1935. The index of employment then, however, was lower than at the first of June of the present year, when it stood at 102.2. Manufacturing recorded the most note-

Relative Weight of Employment by Economic Areas as at June 1, 1936.....	100.0	7.7	28.7	41.8	12.8	9.0

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

worthy expansion at the date under review; within this group, the improvement was most pronounced in non-ferrous metal, lumber and food factories. Among the non-manufacturing groups, logging, mining, transportation, railway construction and trade showed heightened activity, but building and highway construction were slacker. For June 1, 1935, statements were received from 969 employers of 80,561 persons.

Table 1 gives index numbers by economic areas.

### Employment by Cities

The trend was upward in six of the eight cities for which separate compilations are made; Montreal, Quebec City, Toronto, Ottawa, Winnipeg and Vancouver showed improvement, while declines were noted in Hamilton and Windsor. Employment in all these centres, except Windsor, was in greater volume that at the same date of last year.

*Montreal.*—Further improvement was recorded in Montreal, where the 1,328 co-operating firms employed 140,577 persons, an increase of 1,389 over their May 1 staffs.

Manufacturing, especially of food, non-ferrous metal and non-metallic mineral products reported increases and construction and trade were also busier. On the other hand, transportation was slacker. The index, at 93.7, was several points higher than in June, 1935, when a similar gain had been recorded.

*Quebec.*—On the whole, there was an increase in Quebec City, chiefly in transportation and trade, while manufacturing was rather slacker. Statements were tabulated from 169 establishments having 12,865 workers, as against 12,758 in the preceding month. Curtailment had been indicated at the beginning of June of a year ago, when the index was one point lower.

*Toronto.*—Returns were furnished by 1,459 employers in Toronto with 124,173 persons on their payrolls, compared with 123,054 at May 1. Manufacturing as a whole was brisker; there were reductions in iron and steel and textile factories, but the trend was upward in food, fur, tobacco and beverage, electrical apparatus, clay, glass and stone, mineral product and some other industries. Transportation, construction and trade also afforded more

June 1.....	93.7	96.8	101.1	108.2	97.6	123.2	90.9	103.8
Relative Weight of Employment by Cities as at June 1, 1936.....	14.6	1.3	12.9	1.5	3.3	1.7	4.1	3.5

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

employment. The general index was higher than at June 1, 1935, when the indicated expansion had been on a rather larger scale.

*Ottawa.*—Manufacturing reported moderately heightened activity of a general character, while transportation and trade also showed improvement. The gain was smaller than that noted at the beginning of June of last year, but the index was then a few points lower. A combined working force of 14,137 employees was recorded at June 1, 1936, by the 184 co-operating firms, who had had 14,043 on their staffs in the preceding month.

*Hamilton.*—A decrease was noted in Hamilton, where 275 employers reported 31,345 workers on their paylists, as compared with 31,516 at the beginning of May. This decline compared unfavourably with the advance recorded at June 1, 1935, but the index was then lower. Moderate increases took place in trade and construction, but manufacturing was slacker, particularly in the iron and steel division.

*Windsor.*—Employment in Windsor showed a seasonal decrease at June 1, for which data

were received from 170 firms with 16,742 employees, or 1,763 fewer than at the beginning of May. Most of the loss took place in automobile factories, while there were only slight general changes in the other groups. A decline had also been registered at June 1, 1935; employment was then in practically the same volume.

*Winnipeg.*—An aggregate working force of 39,071 persons was indicated by the 475 employers whose statistics were received, and who had 37,543 employees at May 1. This increase was decidedly larger than that noted at the beginning of June of last year, when the index was rather lower. Most of the gain recorded at the date under review was in manufacturing, particularly of iron and steel products, and in trade and construction; the changes in the remaining industrial groups, on the whole, were moderate.

*Vancouver.*—Manufacturing, transportation and construction reported gains in Vancouver; statements were tabulated from 427 employers with 33,291 workers in their employ, as compared with 32,635 at May 1. A rather greater

Relative Weight of Employ- ment by Industries as at June 1, 1936.....	100.0	54.2	2.7	6.3	2.2	10.7	10.6	2.8	10.5

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

increase had been indicated at June 1 of a year ago, but the index was then lower by over seven points.

Index numbers for cities are given in table 2.

### Employment by Manufacturing Industries

There was an upward movement in manufacturing, continuing the advances indicated uninterruptedly since the opening of the year; the gain, however, was smaller than the average increase recorded from May 1 to June 1 in the years since 1921. Statements were tabulated from 5,736 manufacturers employing 522,055 operatives, as compared with 518,679 in the preceding month. The crude index rose from 102.7 at May 1 to 103.4 at the latest date; except for the Nov. 1 index of 103.5, this was higher than in any other month since Nov. 1, 1930, being five points higher than at June 1, 1935. Since the increase from May 1 to June 1 of the present

year was less than average, the seasonally-corrected index showed a decline, falling from 102.2 in the preceding month to 100.6 at the latest date.

The unadjusted indexes at June 1 in the years for which statistics are available are as follows: 1936, 103.4; 1935, 98.4; 1934, 93.2; 1933, 80.0; 1932, 86.0; 1931, 99.4; 1930, 113.6; 1929, 121.2; 1928, 112.6; 1927, 106.9; 1926, 101.6; 1925, 95.6; 1924, 95.7; 1923, 101.2; 1922, 91.1 and 1921, 87.8.

Gains were registered at June 1, 1936, in the lumber, pulp and paper, fish-preserving, vegetable food, non-ferrous metal, clay, glass and stone, electrical apparatus and mineral product industries. On the other hand, leather, textile, tobacco and beverage and iron and steel works were slacker, the losses being mainly seasonal in character.

A brief review of the situation at June 1, 1935, shows that the 5,523 co-operating manufacturers had employed 494,194 persons, as

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	June 1, 1936	May 1, 1936	June 1, 1935	June 1, 1934	June 1, 1933	June 1, 1932	June 1, 1931

<sup>1</sup> The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

compared with 480,145 in the preceding month. General improvement had then been noted.

*Animal Products, Edible.*—There were further and more pronounced increases in the numbers employed in this group, particularly in the fish-preserving division in the Maritime Provinces and British Columbia. Statistics were tabulated from 321 firms employing 24,587 persons, as compared with 22,341 in the preceding month. This advance was much larger than that reported at June 1, 1935, when the index was between six and seven points lower.

*Fur and Fur Products.*—There was an upward trend in employment in fur factories, 58 of which enlarged their payrolls from 1,895 persons at the beginning of May to 2,010 at June 1. A larger gain had been indicated at the same date last summer, and activity was then at a rather higher level.

*Leather and Products.*—Employment in this group showed falling-off in the latest month, which exceeded that indicated in the same month last year; however, the index then stood at 108.1, compared with 109.5 at the date under review. The working forces of the 299 co-operating employers totalled 22,397 persons, as against 23,087 in the preceding month. There were losses in footwear factories in Quebec and Ontario.

*Lumber and Products.*—Continued, seasonal improvement took place in lumber mills, and there were also gains in container, furniture and other wood-using factories. Returns were compiled from 828 manufacturers in the lumber group having 42,833 workers on their staffs, compared with 38,631 at the beginning of May. All provinces shared in the upward movement at June 1, but Quebec and Ontario showed the largest increases. Additions to staffs on a rather greater scale were made at the same date last year, but the index then was several points lower.

*Plant Products, Edible.*—Expansion was noted in this group at the beginning of June, when 1,431 persons were added to the forces of the 458 co-operating manufacturers, who had 31,093 employees. Fruit and vegetable canning, flour and cereal, bakery and other vegetable food establishments reported improvement. A larger increase had been registered at June 1, 1935, when the employment index was considerably lower than at the date under review.

*Pulp and Paper Products.*—Pulp and paper mills and printing and publishing houses showed heightened activity; the index number in the group as a whole stood at 100.6, compared with 96.7 at the beginning of June of last year, when the gains recorded were rather larger. An aggregate payroll of 61,159 workers was reported by the 599 establishments whose

statistics were compiled; these had employed 60,337 in the preceding month.

*Rubber Products.*—Fifty-two rubber factories recorded a combined working force of 12,298 persons, or 60 more than in their last return. Employment was in greater volume than at the beginning of June a year ago, when little general change had been indicated over the preceding month.

*Textile Products.*—There was a seasonal decline in employment in the textile industries at the date under review, chiefly in thread, yarn and cloth, hosiery and garment factories. Most of the loss occurred in Quebec and Ontario, although the movement was generally unfavourable. Data were received from 1,009 firms employing 99,840 persons, as against 101,781 in the preceding month. A contra-seasonal increase had been reported at June 1, 1935; the index was then four points lower than at the date under review.

*Tobacco, Distilled and Malt Liquors.*—Activity in this group showed a decline, according to 178 employers whose staffs were reduced from 16,317 in the preceding month to 14,996 at the beginning of June in the present year. Tobacco manufacturing reported most of the falling-off. An upward movement had been indicated at June 1, 1935, when the index was nearly five points higher.

*Clay, Glass and Stone Products.*—Further improvement was noted in building material plants, 205 of which employed an aggregate working force of 9,542 persons, or 698 more than at May 1. The index stood at 86.0; this was some eight points higher than that recorded at June 1, 1935, when a rather greater increase had been made. Quebec and Ontario reported the bulk of the gain, in which factories producing all kinds of building materials in this category shared.

*Electric Current.*—A slight advance as compared with May was shown in electric current plants, in which activity was higher than at the same date in 1935. The 99 co-operating companies increased their staffs by 39 workers to 14,375 at the beginning of June, 1936.

*Electrical Apparatus.*—Greater activity was shown in electrical appliance factories, 121 of which enlarged their payrolls by 654 employees to 13,642 at the date under review. A smaller gain had been recorded at June 1, 1935, when employment was at a much lower level.

*Iron and Steel Products.*—For the first time since the opening of the year, there was a decrease in the iron and steel group, mainly in the crude, rolled and forged and automobile divisions, although the agricultural implement, foundry and machine shop and other branches were also slacker. The contraction was of a seasonal character. Returns were tabulated

from 851 manufacturers employing 120,097 persons, compared with 124,300 at May 1. Losses were noted in all but the Prairie Provinces, those in Ontario being greatest. A contra-seasonal gain had been made at June 1, 1935, but the index was then several points lower.

*Non-ferrous Metal Products.*—These industries reported heightened activity, according to 170 firms employing 20,730 persons, compared with 20,212 in the preceding month. The increase took place mainly in Quebec, Ontario and British Columbia. Less extensive improvement had been recorded at the beginning of June of a year ago, and employment was then in smaller volume.

*Mineral Products.*—Continued seasonal advances were noted generally in this group; these were rather smaller than those indicated at June 1, 1935, when the index number was a few points lower. An aggregate payroll of 13,970 persons was reported for June 1, 1936, by the 138 co-operating employers, who had 13,499 workers at May 1.

*Miscellaneous Manufacturing Industries.*—Production in the manufacturing establishments listed under this heading showed an increase, 140 workers having been added to the forces of the 108 firms whose returns were tabulated and who employed 5,751 at the beginning of June.

### Logging

Employment in logging camps increased, largely as a result of river-driving operations. Returns were received from 311 firms employing 26,637 persons, or 1,487 more than at May 1. A smaller advance had been indicated at June 1, 1935, but the index, at 96.0, was then slightly higher than at the beginning of June in the present year, when it stood at 94.1.

### Mining

*Coal-Mining.*—Employment in the Prairie coal-fields showed moderate curtailment, while there were small advances in the Maritime Provinces and British Columbia. Statements were compiled from a total of 101 operators with 22,725 employees, or 43 fewer than at the beginning of May. The index was fractionally higher than at June 1, 1935, when a general increase had been recorded.

*Metallic Ores.*—A further gain was shown in metallic ore mines, mainly in Ontario and British Columbia; 185 employers enlarged their staffs from 29,581 workers at May 1, to 30,602 at the date under review. A smaller increase had taken place at the beginning of June of last year, but the index was then nearly 36 points lower than at June 1, 1936.

*Non-Metallic Minerals (other than coal).*—According to data received from 80 firms in this group, they employed 7,526 persons, or 1,201 more than in the preceding month. Employment was more active than at the same date of last year, when much smaller additions to staffs had been reported by the co-operating firms.

### Transportation

*Street Railways and Cartage.*—An increase was registered in local transportation at June 1, when 224 companies added 225 employees to their payrolls, bringing them to 26,003. Additions to staffs had also been noted at the beginning of June, 1935, but the index was then lower than at the date under review.

*Steam Railways.*—Improvement was indicated in steam railway operation, in which the 101 co-operating employers enlarged their personnel from 57,464 in the preceding month to 59,234 at June 1. The Maritime Provinces reported seasonal reductions, while there were increases in the remaining provinces. Employment was at a higher level than at June 1 of last year, when less extensive gains had been recorded.

*Shipping and Stevedoring.*—There were pronounced seasonal losses in employment in the Maritime Provinces, partly offsetting large increases in the other provinces. Statistics were received from 110 firms with 17,492 employees, as compared with 16,357 in the preceding month. A reduction had been noted at June 1, 1935; the index then, at 83.6, was 12.2 points lower than at the date under review.

### Communications

Improvement was indicated on telegraphs and telephones. The 85 companies and branches reporting had 21,180 persons on their paylists at the beginning of June, or 418 more than at May 1. Employment was at a very slightly higher level than at the same date a year ago, when a similar gain had been indicated.

### Construction and Maintenance

*Building.*—An aggregate staff of 21,073 was reported by the 679 contractors furnishing statistics, who had 22,489 workers at May 1. Activity decreased in all provinces except Quebec, the largest decline being in Ontario. The general loss compared unfavourably with the gain usually indicated at June 1 in earlier years of the record. Building generally was not quite so active as at the same date of a year ago.

*Highway.*—The 348 highway and road contractors furnishing returns had 48,116 persons in their employ, or 2,243 more than at the

beginning of May. There was a decline in Ontario and British Columbia, while increases took place in the Maritime and Prairie Provinces and Quebec. Activity was not so great as at June 1, 1935, although a large decrease had then been indicated.

*Railway.*—Continued important advances were registered by the track departments of the railways, whose employment was brisker than at the beginning of June in any of the last four years. The working forces of the 33 co-operating employers totalled 32,986 persons, as against 24,777 in the preceding month. This increase exceeded that noted in any other month since May 1, 1930. The most noteworthy gains were in the Prairie Provinces, but all provinces reported improvement.

### Services

Hotels and restaurants showed a seasonal increase, and laundries and dry-cleaning establishments also recorded improved conditions. Statements were compiled from 467 firms em-

ploying 26,758 workers, as compared with 26,197 at May 1. The index, at 123.0, was several points higher than at the same date in 1935, when similar advances had been made.

### Trade

Marked improvement was indicated in retail and wholesale trade; 1,230 establishments employed 101,126 persons, or 3,108 more than in their last return. A smaller increase had been noted at June 1, 1935, when the index was over seven points lower. Most of the advance at the date under review took place in retail establishments.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada at the date under review.

## (2) Unemployment in Trade Unions at the Close of May, 1936.

The term unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle owing to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Little variation was apparent in conditions affecting local trade union members at the close of May from the previous month, though the trend was favourable as evident from the reports forwarded by 1,785 labour organizations, embracing a membership of 178,453 persons. Of these, 26,442 or a percentage of 14.8 were idle at the end of the month as compared with a percentage of 15.1 in April. A slight employment rise was noted from May a year ago when 15.9 per cent of the members reported were out of work. Saskatchewan, Alberta, Manitoba, Quebec, British Columbia and Nova Scotia unions all registered increases in activity on a rather small scale, the improvement in the first two provinces named being over 2 per cent while the gains in the other provinces were of lesser proportions. Employment for Ontario members, however, eased off slightly, and in New

Brunswick there was but a nominal, adverse change. When a comparison is made with the returns for May, 1935, Alberta and British Columbia members were afforded a considerably greater volume of work during the month reviewed, the coal mines in the former province particularly showing an improved situation, while in the latter the building trades were chiefly responsible for the better movement. In Manitoba, Saskatchewan and Quebec also moderate expansion was noted. Some slowing up in available employment was reflected, however, by Ontario, Nova Scotia, and New Brunswick members.

Each month the records of unemployment among local trade unions in the largest city in each province, with the exception of Prince Edward Island, are tabulated separately. Of these, Edmonton members were much better engaged during May than in the previous month, and improvement on a small scale, was manifest by Montreal, Winnipeg, Regina and Vancouver unions. In Toronto, on the contrary, noteworthy recessions occurred, while Halifax and Saint John members recorded losses in activity of lesser degree. In contrasting with the returns for May of last year, Halifax and Edmonton members were much busier during the period surveyed, and in Vancouver and Winnipeg also the advancement recorded was substantial. Moderate gains in employment were indicated by Montreal and Regina unions. Conditions for Toronto members, however, were considerably

quieter than in May of last year, and in Saint John also activity was somewhat retarded.

Accompanying this article is a chart which records the trend of unemployment by months from January, 1930, to date. The level of the curve showed but little change during May from the previous month, though the tendency was downward in a favourable direction. The point attained by the curve at the close of May was also slightly below that of the corresponding month of last year, indicative of an increased employment volume during the month reviewed.

In the manufacturing industries during May some falling off in activity was apparent from

tered substantial increases in work available from April, and among general labourers and glass workers also noteworthy improvement was shown. Cigar and tobacco workers and printing tradesmen indicated more moderate expansion, while the tendency for iron and steel workers and meat cutters and butchers was favourable, though the change from April was less than one per cent. The situation in the manufacturing industries, as a whole, remained much the same as in May a year ago when 15.9 per cent of the members were unemployed, though fluctuations were apparent in the various groups of trades. Textile and carpet, glass and fur workers, general labourers

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

the previous month, an outstanding feature in this adverse situation being the unemployment recorded in the garment trades, particularly in Quebec and Ontario. Reports for May were furnished by 490 organizations, combining a membership of 58,159 persons, 9,005 of whom were idle at the end of the month, a percentage of 15.5 in contrast with 11.4 per cent in April. In addition to the unemployment reported in the garment trades from April extensive losses were noted among hat, cap and glove, and leather workers. Curtailment in activity, on a much smaller scale, was evident among bakers and confectioners, brewery workers, and paper makers. On the other hand, textile and carpet, wood and fur workers, and metal polishers all regis-

tered substantial increases in work available from April, and among general labourers and glass workers also noteworthy improvement was shown. Cigar and tobacco workers and printing tradesmen indicated more moderate expansion, while the tendency for iron and steel workers, paper-makers and cigar and tobacco workers. The trend of employment for bakers and confectioners, printing tradesmen, and jewellery workers was also upward. Of the recessions, which were of a largely offsetting nature, the most important were registered by hat, cap and glove, garment, leather and wood workers. Losses in activity, of much lesser degree, occurred among brewery workers, and meat cutters and butchers.

Employment in coal mining was slightly better maintained during May than in either the previous month or May of last year, as

TABLE II—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

shown by the reports tabulated from 49 unions with a total of 15,184 members. Of these, 2,153 or a percentage of 14.2 were idle at the end of the month in contrast with percentages of 16.6 at the close of April, and 15.5 in May a year ago. Moderate employment advancement was noted in the Alberta mining areas from April, and in Nova Scotia also the trend was favourable though the change was quite small. British Columbia miners, however, indicated a moderate drop in work afforded. Considerably better conditions prevailed in both the Alberta and British Columbia coal

fields than in May of last year, while Nova Scotia miners showed some slowing up in activity. In addition to the total unemployment registered during May a number of members were reported as working on reduced time.

The 195 associations of building and construction tradesmen making returns at the close of May and involving a membership of 21,292 persons, indicated that 8,621 or a percentage of 40.5 were unemployed at the end of the month in contrast with percentages of 44.8 in April and 45.5 in May a year ago. All trades participated in the better movement shown from April, painters, decorators and paperhangers, bridge and structural iron workers, and steam shovelmen especially showing large increases in available employment. Among hod carriers and building labourers, tile layers, lathers and roofers, granite and stonecutters, and plumbers and steamfitters also the improvement recorded was noteworthy. Bricklayers, masons and plasterers, carpenters and joiners, and electrical workers, however, indicated but a very slight upward tendency. In contrasting with the returns for May of last year, substantial employment recovery was shown by bricklayers, masons and plasterers, granite and stonecutters, and steam shovelmen during the month reviewed, while expansion of somewhat lesser degree was apparent among electrical workers. Plumbers and steamfitters also recorded a slightly improved situation. On the other hand, hod carriers and building labourers sustained pronounced losses in available work, and among tile layers, lathers and roofers considerably slacker conditions prevailed. Decreases in activity, on a much smaller scale, were registered by carpenters and joiners, and employment for bridge and structural iron workers, and painters, decorators and paperhangers declined slightly.

In the transportation industries during May the same measure of improvement was shown in comparison with April as over the corresponding month of last year, the 800 associations from which reports were tabulated embracing 57,971 members indicating an unemployment percentage of 7.1 in contrast with 9.0 per cent in both the previous month and May a year ago. In the steam railway division, which included nearly 78 per cent of the entire group membership reporting, slight advancement was noted in each comparison as was also the case among street and electric railway employees. The gains recorded by navigation workers, however, were rather substantial, both when compared with the previous month and with May of last year. Teamsters and chauffeurs indicated a moderately better

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

situation than in April though activity was slightly retarded from May, 1935.

Employment for retail shop clerks tended less favourably during May than in the preceding month, though conditions were notably improved from May last year. This was apparent from the reports tabulated from 4 associations with a membership numbering 1,219 persons, 5.1 per cent of whom were idle at the end of the month in contrast with percentages of 4.4 in April and 13.3 in May a year ago.

The 77 unions of civic employees furnishing reports during May, with 8,421 members showed that 192 or a percentage of 2.3 were idle at the end of the month in contrast with 3.2 per cent at the close of April and 1.9 per cent in May last year.

The miscellaneous group of trades reflected appreciable betterment in the situation during May than in either the previous month or May a year ago, according to the returns compiled from 132 unions with a total of 6,217 members. Of these, 591 or a percentage of 9.5 were out of work on the last day of the month contrasted with 16.9 per cent in April and 15.1 per cent in May, 1935. The determining factor in the more favourable trend from April was the decided improvement noted by barbers. The tendency for stationary engineers and firemen and unclassified workers was also upward though the changes were but nominal. Theatre and stage, and hotel and restaurant employees, however, showed some falling off in activity.

Compared with the reports for May last year in the miscellaneous group of trades, stationary engineers and firemen, hotel and restaurant, and theatre and stage employees, and unclassified workers all shared in the advancement recorded during the month under survey. Among barbers the volume of employment afforded remained substantially the same, with a slight tendency toward retarded activity.

In the fishing industry reports were tabulated from 3 associations during May, comprising a membership of 625 persons, 0.8 per cent of whom were unemployed at the end of the month in contrast with a percentage of 0.7 in April and with 3.4 per cent in May a year ago.

Lumber workers and loggers were considerably better engaged during May than in the preceding month, the 3 unions furnishing reports with a membership aggregate of 604 persons showing an unemployment percentage of 8.4 as compared with 16.1 per cent in April. Slight gains only were apparent from May of last year when 9.2 per cent of inactivity was recorded.

Table I shows by provinces the percentage of members who were on an average unemployed, each year, from 1919 to 1935 inclusive, and also the percentages of unemployment by provinces for May of each year from 1919 to 1933 inclusive, and for each month from May, 1934, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for May, 1936

The volume of business transacted by the offices of the Employment Service of Canada during May, 1936, as indicated by the average daily placements effected, showed a gain of 7 per cent over that of the previous month, but a loss of over 6 per cent from that of the corresponding period a year ago. When the month under review was compared with April, 1936, all industrial divisions, except farming and construction and maintenance, recorded increased placements, the highest being in services and logging, but when a comparison was made with May, 1935, a heavy loss in construction and maintenance, augmented by minor declines in trade and transportation, more than counterbalanced the gains registered in farming, services, logging, manufacturing and mining, the most noteworthy of which were in the first three groups.

The accompanying chart shows the trend of employment from January, 1934, to date, as represented by the ratio of vacancies offered and of placements effected for each 100 appli-

cations for work registered at the offices of the Service throughout Canada, computations being made semi-monthly. It will be seen from the graph that the trend of the curves of vacancies and placements in relation to applications was decidedly upward during the first half of May, but during the latter half of the month followed a sharp downward trend, falling to a level about 4 points below that recorded at the close of the corresponding period a year ago. The ratio of vacancies to each 100 applications was 59.6 and 54.9 during the first and the second half of May, 1936, respectively, in contrast with ratios of 59.0 and 59.1 during the same periods of 1935. The ratios of placements to each 100 applications during the month under review were 55.0 and 50.9, as compared with 54.4 and 55.3 during May a year ago.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during May, 1936, was 1,163, as compared with a daily average

of 1,106 in the previous month and with 1,234 in May, 1935.

The average number of applications for employment received daily by the offices during the month under review was 2,027, in comparison with 2,119 in April, and with 2,091 in May last year.

The average number of placements made daily by the offices of the Service during

50,836 applications made and 24,102 placements effected, while in May, 1935, there were reported 30,847 vacancies, 52,251 applications for work and 28,672 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1926, to date:

# POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o-o-o-o-o

May, 1936, was 1,075, of which 612 were in regular employment and 463 in work of one week's duration or less, as compared with a total daily average of 1,005 in the previous month. Placements during May last year averaged 1,147 daily, consisting of 681 placements in regular and 466 in casual employment.

During the month of May, 1936, the offices of the Service referred 28,281 persons to vacancies and effected a total of 26,864 placements. Of these, the placements in regular employment were 15,298, of which 10,922 were of men and 4,376 of women, while placements in casual work numbered 11,566. The number of vacancies reported by employers was 18,026 for men and 11,044 for women, a total of 29,070, while applications for work numbered 50,652, of which 37,245 were from men and 13,407 from women workers. Reports for April, 1936, showed 26,521 positions available.

Year	Placements		Totals

## NOVA SCOTIA

Opportunities for employment, as indicated by orders received at employment offices in Nova Scotia during May, were over 8 per cent less favourable than in the preceding month and 33 per cent below the corresponding month of last year. There was a decrease also in placements of over 7 per cent when

compared with April and 34 per cent in comparison with May, 1935. Construction and maintenance was the only industrial division in which any marked change in placements was shown from May of last year and the decline in this group accounted for the reduction under this comparison for the province as a whole. Small gains were reported in logging, manufacturing and trade, and a minor loss in services. Industrial divisions in which most of the placements were effected during the month were manufacturing 22; logging 46; farming 23; construction and maintenance 250; and services 428, of which 258 were of household workers. Regular placements numbered 187 of men and 82 of women.

#### NEW BRUNSWICK

During the month of May, positions offered through employment offices in New Brunswick were over 39 per cent higher than in the preceding month, but over 13 per cent less than during the corresponding month of last year. There was a gain of nearly 36 per cent in placements when compared with April, but a loss of nearly 16 per cent in comparison with May, 1935. The reduction in placements from May of last year was due to a decline under construction and maintenance, as small gains in logging and trade were offset by losses in services, transportation and farming. Placements by industrial divisions included manufacturing 41; logging 76; construction and maintenance 22; and services 678, of which 477 were of household workers. During the month 101 men and 62 women were placed in regular employment.

#### QUEBEC

There was an increase of over 9 per cent in the number of positions offered through employment offices in the Province of Quebec during May when compared with the preceding month and of 14 per cent in comparison with the corresponding month of last year. Placements also were 16 per cent higher than in April and nearly 20 per cent above May, 1935. Except for minor declines in farming, transportation and mining, all industrial divisions showed increased placements over May of last year, the most important gains being in logging, services, manufacturing, and construction and maintenance. Placements by industrial divisions included manufacturing 174; logging 716; construction and maintenance 1,233; trade 99; and services 2,557, of which 2,159 were of household workers. Placements in regular employment numbered 2,272 of men and 1,408 of women.

#### ONTARIO

Employment opportunities, as indicated by orders received at employment offices in

Ontario during May, were nearly 23 per cent better than in the preceding month, but over 9 per cent less favourable than during the corresponding month of last year. There was an increase in placements of over 24 per cent in comparison with April, but a loss of 10 per cent in comparison with May, 1935. The decrease in placements from May of last year was due to a large reduction in relief placements under construction and maintenance, supplemented by small declines in trade and logging. These losses were partly offset by large gains in farming and services and increases of lesser importance in mining and manufacturing. Placements by industrial divisions included manufacturing 538; logging 1,104; farming 1,324; construction and maintenance, 3,007; trade 307; and services 5,134, of which 2,770 were of household workers. There were 4,073 men and 1,524 women placed in regular employment during the month.

#### MANITOBA

Employment offices in Manitoba were notified of 17 per cent fewer vacancies during May than in both the preceding month and in the corresponding month of last year. Placements also were nearly 16 per cent less than in April and nearly 17 per cent below May, 1935. A decrease in placements under construction and maintenance, when compared with May of last year, accounted for the loss for the province as a whole under this comparison, as, although none of the changes in other groups were important, the majority showed improvement. Industrial divisions in which most of the placements were effected during the month were logging 67; farming 296; construction and maintenance 480; and services 811, of which 657 were of household workers. Regular placements numbered 781 of men and 301 of women.

#### SASKATCHEWAN

The demand for workers, as indicated by orders received at employment offices in Saskatchewan during May, was over 8 per cent less favourable than in the preceding month, but over 9 per cent higher than during the corresponding month of last year. There was a decrease in placements of 9 per cent when compared with April, but an increase of over 7 per cent in comparison with May, 1935. All industrial divisions, except trade, participated in the increase in placements over May of last year, the largest gains being in logging, manufacturing and services. Placements by industrial divisions included manufacturing 96; logging 77; farming 849; construction and maintenance 313; and services 886, of which 582 were of household workers. There were 1,156 men and 396 women placed in regular employment during the month.

\*70 Placements effected by offices since closed.

## ALBERTA

During the month of May, orders received at employment offices in Alberta were 10 per cent higher than in the preceding month, but nearly 14 per cent below the corresponding month of last year. Placements also were over 13 per cent in excess of April, but over 15 per cent less than during May, 1935. The large reduction in relief placements under construction and maintenance accounted for the decline from May of last year, but this decrease was partly offset by a substantial increase in farm placements. The changes in other groups were unimportant, with losses slightly in excess of gains. Placements by industrial divisions included manufacturing 68; farming 1,273; transportation 53; construction and maintenance 310; and services 610, of which 433 were of household workers. Placements in regular employment numbered 1,640 of men and 360 of women.

## BRITISH COLUMBIA

Orders received at employment offices in British Columbia during May called for 3 per cent less workers than in the preceding month and over 5 per cent less than during the corresponding month of last year. Similar percentages of loss were reported in placements under both comparisons. The decline in placements from May, 1935, was due to a reduction in relief work provided under construction and maintenance, supplemented by small losses in mining and farming. These decreases were largely offset by gains in all other groups, of which the largest were in services, manufacturing and trade. Placements by industrial divisions included manufacturing 61; farming 152; construction and maintenance 1,359; trade 51; and services 731, of which 455 were of household workers. During the month 712 men and 243 women were placed in regular employment.

## Movement of Labour

During the month of May, 1936, the offices of the Employment Service of Canada made 15,298 placements in regular employment, 7,576 of which were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter, 1,032 were granted the Employment Service reduced transportation rate, 975 going to centres within the same province as the despatching office and 57 to other provinces. The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at the Employment Service who may wish to travel to distant employment for which no workers are available locally.

In Quebec during May the Hull office assisted in the despatch of 35 river drivers to employment in the Pembroke zone. The labour movement in Ontario during May was to provincial situations and included the transfer of 810 workers. On certificates received at Port Arthur, 601 bushmen, 41 cookees, 25 mine workers, 3 waitresses, 3 cooks, one carpenter, one blacksmith's helper and one chambermaid journeyed to various centres within the Port Arthur zone. From Fort William 81 bush workers, 5 mine workers, 4 painters, one labourer, one rigger and one night watchman, and from Sudbury, 24 bush workers and 3 mine workers were bound for points within their respective zones. The Timmins office was instrumental in transporting 7 mine workers to Fort William and one mine worker to Sault Ste. Marie. Travelling from Windsor 4 farm hands proceeded to Stratford, while from North Bay one sawmill worker and one farm hand went to Timmins. The Winnipeg office was responsible for all transfers at the reduced rate in Manitoba during May, 67 in number. Of these 45 were to centres within the province and 25 to points outside. Provincially, 39 farm hands, 4 mine workers and one carpenter travelled to employment at centres within the Winnipeg zone, while of the workers going to other provinces the Regina zone was the destination of one farm hand and the Port Arthur zone of 11 mine workers, 3 bushmen, 3 labourers, one shoemaker, one farm hand, one domestic, one hotel clerk and one restaurant chef. In Saskatchewan one worker only benefited by the Employment Service reduced transportation rate during May, a farm hand conveyed to the Yorkton zone on a certificate secured at Saskatoon. Offices in Alberta issued 107 reduced rate certificates during May, all provincial. The majority of these were granted at Edmonton, 32 steamship company employees, 20 farm hands, 2 farm domestics, 11 fishermen, 9 sawmill workers, 6 building construction workers, 6 hotel employees, 3 mine workers, 3 bushmen, one dental mechanic, one truck driver, one blacksmith, one forest ranger, one mechanic and one labourer receiving certificates for various points within the Edmonton zone. In addition, the Edmonton office transferred one farm hand to Drumheller and one hotel cook to Calgary. The Calgary office shipped 6 farm hands within its own zone and one farm hand to Drumheller. British Columbia transfers at the reduced rate during May numbered 12, and were entirely to provincial centres. Proceeding from Vancouver 4 miners and 2 housekeepers went to Kamloops, one hotel cook to Penticton and 2 farm hands and 2 cooks within the Vancouver

zone. For a point within its own zone the Prince Rupert office despatched one farm hand.

Of the 1,032 persons who were carried at the Employment Service reduced transportation rate during May, 283 travelled by the

Canadian National Railways, 730 by the Canadian Pacific Railway, 9 by the Temiskaming and Northern Ontario Railway, 7 by the Northern Alberta Railway and 3 by the Pacific Great Eastern Railway.

#### (4) Building Permits Issued in Canada During May, 1936

The value of the building permits issued by 58 cities during May, 1936, was higher by 30.2 per cent than in April, 1936, but was lower by 12.0 per cent than in May, 1935. According to statements tabulated by the Dominion Bureau of Statistics, the authorizations amounted to \$4,160,988, as compared with \$3,196,471 in the preceding month, and \$4,728,340 in May of last year.

The value of the building authorized in the first five months of the present year was \$12,914,830; this was considerably lower than the aggregate of \$19,535,656 reported in the period January-May, 1935, although it was decidedly higher than in the first five months of either 1934 or 1933. The cumulative total for the same period in each of the last five years has been very much lower than in any other year on record; the wholesale prices of building materials have also been decidedly lower since 1931 than in any preceding year since 1920.

Some 50 cities furnished detailed statistics for May, 1936, showing that they had issued almost 400 permits for dwellings valued at approximately \$1,600,000, and for more than 2,000 other buildings, estimated to cost almost \$2,200,000, while an engineering project valued at some \$500 was also reported. In April, authority was given for the erection of about 300 dwellings and 2,000 other buildings, valued at approximately \$1,300,000 and \$1,800,000, respectively.

Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan and British Columbia recorded increases in the value of the building represented by the permits issued during May as compared with the preceding month, the greatest gain of \$809,652 or 60.9 per cent taking place in Ontario. In Alberta, the May total was lower by \$514,308 or 78.6 per cent than that for April.

As compared with May, 1935, Nova Scotia, New Brunswick, Manitoba and British Columbia registered increases, of which that of \$239,135 or 76.3 per cent in British Columbia was most noteworthy. The greatest decline was that of \$991,334 or 58.7 per cent in Quebec.

Of the four largest cities, Winnipeg and Vancouver showed improvement as compared with last month and also with the same

month of 1935; Montreal and Toronto recorded increases over April, 1936, but decreases as compared with May of last year. Of the other centres, Halifax, Sydney, Fredericton, Saint John, Shawinigan Falls, Belleville, London, Niagara Falls, Ottawa, Stratford, St. Catharines, Sault Ste. Marie, York and East York Townships, Welland, Windsor, St. Boniface, Medicine Hat, Kamloops, Nanaimo, New Westminster and Prince Rupert showed increases in the value of the building authorized as compared with either the preceding month or the same month of 1935.

*Cumulative Record for First Five Months, 1936.*—The following table gives the value of the building authorized by 58 cities in May and in the first five months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first five months of the same years are also given (1926=100).

Year	Value of permits issued in May	Value of permits issued in first five months	Indexes of value of permits issued in first five months (1926=100)	Average indexes of wholesale prices of building materials in first five months (Average 1926=100)
	\$	\$		
1936.....	4,160,988	12,914,830	21.5	84.3
1935.....	4,728,340	19,535,656	32.5	81.7
1934.....	3,019,761	7,999,917	13.3	83.0
1933.....	2,065,372	6,726,695	11.2	75.2
1932.....	5,488,845	19,312,720	32.1	78.8
1931.....	12,115,291	50,356,550	83.9	83.6
1930.....	20,321,160	66,792,498	111.2	95.5
1929.....	24,185,738	96,792,675	161.2	99.4
1928.....	27,515,522	79,285,027	132.0	95.8
1927.....	20,138,057	62,479,480	104.1	96.1
1926.....	18,504,296	60,042,369	100.0	101.3
1925.....	15,520,435	50,953,853	84.9	103.1
1924.....	14,807,589	46,544,689	77.5	111.3
1923.....	18,937,638	57,946,608	96.5	111.1
1922.....	19,527,061	54,040,922	90.0	107.9
1921.....	14,460,878	41,530,750	69.2	134.4
1920.....	13,082,015	47,640,916	79.3	144.7

As already mentioned, the aggregate for the first five months of 1936 was smaller than in the same period in 1935, although it was higher than the months January-May of either 1934 or 1933. The average index numbers of wholesale prices of building materials in the last few years have been considerably below the average for the years since 1920.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

The *British Ministry of Labour Gazette*, June, 1936, summarized the employment situation as follows:—

There was a further expansion of employment between April 27 and May 25 in nearly all the principal industries. Those showing the greatest improvement included building and public works contracting, engineering, iron and steel manufacture, the motor vehicle industry, metal goods manufacture, the cotton and hosiery industries, textile bleaching, dyeing, etc., tailoring, printing and bookbinding, the distributive and transport trades, hotel and boarding house service, and the fishing industry. In none of the principal industries was there a marked decline in employment.

It is estimated that, at May 25, 1936, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of agricultural workers, was approximately 10,831,000. This was 119,000 more than at April 27, 1936, and 472,000 more than at May 20, 1935. Agricultural workers became insured at the beginning of May, but statistics of the number of such workers in employment are not yet available.

Among workpeople, aged 16-64, insured against unemployment (excluding agricultural workers) the percentage unemployed in Great Britain and Northern Ireland, at May 25, 1936 (including those temporarily stopped as well as those wholly unemployed), was 13.0, as compared with 13.8 at April 27, 1936, and with 15.5 at May 20, 1935. In Great Britain the percentage at May 25 was 12.8, compared with 13.7 at April 27, and with 15.3 at May 20, 1935.

At May 25, 1936, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,397,755 wholly unemployed, 225,285 temporarily stopped, and 82,002 normally in casual employment, making a total of 1,705,042. This was 126,188 less than a month before and 339,710 less than a year before. The total of 1,705,042 included 1,348,886 men, 52,214 boys, 255,509 women, and 48,433 girls.

The persons on the Registers included 729,947 insured persons with claims for insurance benefit; 667,091 insured persons with applications for unemployment allowances; 184,646 insured persons (including insured juveniles under sixteen years of age and insured agricultural workers) not in receipt of insurance benefit or unemployment allowances and 123,358 uninsured persons.

In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at May 25, 1936, was 1,768,246, as compared with 1,895,122 at April 27, 1936, and 2,113,996 at May 20, 1935.

### United States

Further gains in employment and payrolls were shown in May in the combined manufacturing and non-manufacturing industries surveyed monthly by the United States Bureau of Labour Statistics. On the basis of reports received from more than 135,000 establishments, it is estimated that over 88,000 workers were returned to employment over the month interval in these industries and that total weekly payrolls were approximately \$6,700,000 greater.

#### MANUFACTURING INDUSTRIES

Factory employment and payrolls continued to rise in May, 1936. Employment increased 0.6 per cent over the month interval and payrolls rose 1.7 per cent. These gains are particularly significant as employment has increased in May in only 5 of the preceding 17 years and payrolls in only 8. The May, 1936, employment index (85.6) is 5.4 per cent above the level of the May, 1935, index (81.2) and marks the highest point recorded in any month since October, 1930. The May payroll index (79.2) is 15.6 per cent above the level of May, 1935 (68.5), and is also higher than the index of any month since October, 1930.

Fifty-one of the 90 manufacturing industries surveyed showed gains in employment over the month interval and 65 reported increased payrolls. The gains in employment in May brought the level of employment in a number of industries above the maximum recorded in any month during recent years. Employment in blast furnaces, steel works, and rolling mills reached the highest level since September, 1930, foundries and machine shops employed more workers than in any month since September, 1930, engine-turbine-tractor factories employed more workers than in any month since March, 1930, and the electrical machinery, steam fitting, sawmill, brick, and steam railroad repair shop industries had more employees than in any month since the latter part of 1931.

Seasonal activity was a primary factor in the employment gains of 19.2 per cent in ice cream, 13.7 per cent in radios and phonographs, 9.2 per cent in beverages, 9.0 per cent in beet sugar, and 5.5 per cent in butter. Employment increased sharply in a number

of the industries manufacturing building construction materials and supplies. The cement industry showed a gain of 11.6 per cent; brick, tile, and terra cotta, 8.7 per cent; structural and ornamental metalwork, 7.3 per cent; lighting equipment, 5.6 per cent; marble-slate-granite, 5.1 per cent; sawmills, 3 per cent; and steam fittings, millwork, paint and varnish, and plumbers' supplies, less than 3 per cent. The locomotive industry reported a gain of 10.7 per cent, and employment in the blast furnace-steel works-rolling mill industry rose 2.9 per cent. Other industries of major importance reporting increases were foundry and machine shops, 2.8 per cent; electrical machinery, apparatus and supplies, 2.3 per cent; furniture, 1.2 per cent; baking, 1.2 per cent, and automobiles, 0.8 per cent. Gains ranging from 2.1 per cent to 3.1 per cent were shown in men's furnishings, slaughtering, rubber tires and tubes, cigars and cigarettes, and rayon and allied products. Employment in the machine tool industry continued the upward movement which has been shown consistently each month since October, 1934. The gain of 1.7 per cent in employment from April to May raised the May index (107.8) to the maximum recorded in any month since October, 1930.

The most pronounced declines in employment from April to May were seasonal. The fertilizer industry reported a decrease of 19.7 per cent; cottonseed oil-cake-meal, 14.8 per cent; millinery, 6.6 per cent; and men's clothing, 5.1 per cent.

Employment in the silk and rayon goods industry decreased 6.6 per cent and in dyeing and finishing textiles, 4.0 per cent. Boot and shoe factories reported a seasonal decrease of 3.4 per cent and the shirt and collar industry showed a decline of 3.1 per cent. Declines ranging from 2.0 per cent to 2.8 per cent were shown in the rubber boot and shoe, confectionery, explosive, flour, women's clothing, corset, and cotton small ware industries. Nine industries showed declines ranging from 1 per cent to 1.8 per cent, and the remaining 14 industries which registered declines showed losses ranging from 0.1 per cent to 0.8 per cent.

The indexes of factory employment and payrolls are computed from returns supplied by representative establishments in 90 manufacturing industries. The base used in computing these indexes is the 3-year average, 1923-25, taken as 100. They have not been adjusted for seasonal variation. In May, 1936, reports were received from 24,478 establishments employing 4,096,028 workers, whose weekly earnings were \$93,471,507.

## NON-MANUFACTURING INDUSTRIES

Gains in employment between April and May were shown in 12 of the 16 non-manufacturing industries surveyed, and increased payrolls were shown in all of the industries, except one (bituminous coal mining).

*Wholesale and Retail Trade.*—Reports received from 16,197 wholesale trade establishments employing 307,903 workers in May showed a net decline of 1.3 per cent in employment over the month interval. Gains were reported in a number of important lines of wholesale trade, including food products, furniture, hardware, machinery, chemicals, paper and paper products, automotive, and lumber. These increases, however, were not of sufficient volume to offset the decreases reported in the wholesale dry goods and apparel, groceries, petroleum and petroleum products, farm supplies, and other lines of wholesale trade.

The level of employment in retail trade in May was 0.1 per cent below that of the preceding month, according to information supplied by 54,959 retail establishments employing 896,533 workers in May. The general merchandising group, which is composed of department, variety, and general merchandising stores and mail-order houses, showed a recession of 1.7 per cent in employment over the month interval. This decline is seasonal and indicates the release of workers hired temporarily to handle the Easter trade in the preceding month. The group of retail apparel establishments also showed a seasonal decline of 2.4 per cent, and declines were reported in the retail food stores, farmers' supply stores, jewelry, and coal and ice firms. Increased employment was reported in many lines of retail trade. The retail lumber and building materials group reported an increase of 4.9 per cent in employment and gains ranging from 2.2 per cent to 4.0 per cent were shown in hardware, automobile, furniture and drug stores.

*Public Utilities.*—Employment in the power and light and manufactured gas industry showed a further gain in May. The increase of 1.0 per cent in this industry raised the level of employment in May to the maximum shown in any month since January, 1932. Employment in the telephone and telegraph group increased 1.1 per cent over the month interval, and electric-railroad and motor-bus operation and maintenance companies reported a gain of 0.4 per cent in number of workers between April and May.

*Mining Industries.*—Increases in employment in 4 of the 5 mining industries surveyed were recorded over the month interval. Em-

ployment in anthracite mines increased 10.3 per cent, coupled with a large payroll gain of 96.5 per cent, following the unsettled labour situation in this industry in the preceding month. Metalliferous mining gained 5.7 per cent, reaching the highest point in employment recorded since May, 1931. Seasonal expansion continued in the quarrying and non-metallic mining industry with a gain of 7.5 per cent in employment. Employment in crude-petroleum production increased by 1.9 per cent. Bituminous coal mining showed a decrease of 1.6 per cent in employment from April to May.

*Service Industries.*—Four of the five non-manufacturing industries classified as service industries showed gains in employment from April to May. Substantial seasonal gains were shown in dyeing and cleaning establishments (6.7 per cent) while laundries also reported a seasonal increase of 2.7 per cent. Employment in year-round hotels continued to expand, the gain of 1.2 per cent in May raising the index to the highest level reached since September, 1931. Insurance companies added workers to their payrolls, employment showing a rise of 0.2 per cent over the month interval. The successive gains which have been shown in the brokerage industry for the last 12 months were interrupted by a slight decline (0.2 per cent) over the month interval.

*Private Building Construction.*—Based on reports received from 9,144 contractors engaged in private building construction, employment increased 14.8 per cent from April to May and payrolls rose 20 per cent. The increases in May, 1936, are more pronounced than the gains shown in May of any of the 4 preceding years for which information is available and indicate the added volume of building operations now under way. Employment in the private building construction industry in May, 1936, was 23.7 per cent above the level of May, 1935, and payrolls were 39.8 per cent higher than in the corresponding month of last year. The information furnished by reporting contractors relates to employees engaged in erecting, altering, and repairing private buildings and does not include projects financed by the Public Works Administration, Reconstruction Finance Corporation funds or regular appropriations of the Federal, State, and local governments.

*Public Employment.*—More than 3,150,000 workers were employed on The Works Program financed from the Emergency Relief Act of 1935 during the month ending May 15. This is a decrease of about 70,000 compared with the previous month. Of the number em-

ployed in May, 2,563,000 were working on projects operated by the Works Progress Administration. Total payroll disbursements for all persons engaged on The Works Program in May amounted to \$160,000,000. Orders were placed during the month for construction materials valued at \$53,000,000.

#### Annual Meeting of Manitoba Employers' Association

Featuring the Sixteenth Annual meeting of the Employers' Association of Manitoba held recently were various reports dealing with social and economic conditions.

In his annual address President R. H. Hamlin reviewed the legislative enactments of the Dominion and Provincial Governments emphasizing the need for national co-ordination of the relief program. The report of the Secretary-treasurer dealt with such topics as picketing, communist activities, safety in plants; and the shorter working day.

The report of the Legislation Committee after referring to the Fair Wage Act dealt at length with proposed amendments to the Workmen's Compensation Act, discussed the special committee of the Legislature (LABOUR GAZETTE, April, 1936, page 306). The attitude of the Committee in regard to the workmen's compensation levy was expressed in the following paragraph: "Employers contend that economic conditions at the present time make it absolutely necessary that the Workmen's Compensation Tax be lightened in the public interest and in order to assist the general movement toward the industrial development of the Province of Manitoba."

In addition the Committee recommended "that the government contribute annually towards the administration of the Workmen's Compensation Act, in accordance with Section 54 of the Act, the sum of \$15,000, to apply to the cost of rent and part salaries of the Chairman and Members of the Board."

It is reported that "effective July 15, between 600 and 800 workers in Winnipeg cloak industry will start on a five-day, 42 hour week, under an agreement announced." It was also stated that wage increases of from \$1.50 to \$2.00 weekly had also been granted.

Regulations and Rules under the "Amusements Act" have been published in the Manitoba Gazette of May 23, 1936. These rules and regulations govern the licensing of projectionists and apprentices; and safety appliances in theatres. A separate set of rules applying only to theatres erected or reconstructed after May 1, 1936 is also gazetted.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates than fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by The Fair Wages and Hours of Labour Act, 1935, which came into force on

May 1, 1936. The clause relating to wages and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, sub-contractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or

frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contract for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month, statements were received in the Department of Labour showing

that the following contracts, containing fair wages conditions, have recently been executed by the Government of Canada:—

#### DEPARTMENT OF INDIAN AFFAIRS

##### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

Contracts governed by the "B" labour conditions were awarded by the Department of Indian Affairs during the months of May and June, 1936, to (a) The Cosmos Imperial Mills Ltd., Hamilton, Ont., for the manufacture of Army Duck; (b) The Horn Bros. Woollen Co., Ltd., Lindsay, Ont., for Blankets; (c) Bates & Innes, Carleton Place, for Knitting Yarn; (d) to Tabah Cousins Ltd., Montreal, P.Q., for Flannel Shirts; and (e) Yamaska Garments Ltd., Montreal and St. Hyacinthe, P.Q., for Trousers.

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contracts in Group "A" (Construction, Remodelling, Repair, etc.)*

Construction of Married Quarters at the Dominion Arsenal, Valcartier, P.Q. Name of contractors, A. Deslauriers et Fils Ltée., Quebec, P.Q. Date of contract, June 4, 1936. Amount of contract, \$45,912.88. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Concrete mixer operator.....	\$0 50	8	44
Cement finishers.....	0 55	8	44
Stone masons.....	0 80	8	44
Stone cutters.....	0 65	8	44
Brick and hollow tile layers.....	0 80	8	44
Structural steel workers.....	0 65	8	44
Ornamental iron workers.....	0 55	8	44
Carpenters and joiners.....	0 60	8	44
Sheet metal workers.....	0 65	8	44
Roofers, felt and gravel.....	0 45	8	44
Lathers, metal.....	0 60	8	44
Plasterers.....	0 70	8	44

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A summary is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Fishing

**BRITISH COLUMBIA.—MEAL, OIL AND SALT FISH SECTION, B.C. DIVISION, CANADIAN MANUFACTURERS' ASSOCIATION AND THE UNITED FISHERMEN'S FEDERAL UNION OF B.C.**

Agreement made June 3, 1936, to cover the 1936 season.

The pilchard reduction operators agree to pay to the fishermen and the fishermen agree to fish for the season at a price of \$2.60 per ton of green pilchards, a ton meaning 2,000 pounds, measurement to be based on 55 pounds per cubic foot.

### Manufacturing: Pulp, Paper and Paper Products

**IROQUOIS FALLS, STURGEON FALLS, ESPANOLA, SAULT STE. MARIE AND FORT WILLIAM, ONTARIO.—ABITIBI POWER AND PAPER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS AND OTHER UNIONS.**

The agreement which was summarized in the *LABOUR GAZETTE*, July, 1934, page 701, with changes as noted in the *LABOUR GAZETTE*, December, 1934, page 1148 and July, 1935, page 692 has been renewed without change from May 1, 1936 to May 1, 1937.

**PORT ARTHUR, ONTARIO.—THUNDER BAY PAPER COMPANY AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 249), THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 134), THE INTERNATIONAL UNION OF OPERATING ENGINEERS (LOCAL 865).**

The agreements which were summarized in the *LABOUR GAZETTE*, April, 1930, page 453, with amendments noted with amendments to other agreements in other mills operated by the Abitibi Power and Paper Company in the *LABOUR GAZETTE*, November, 1932, page 1222 and October, 1933, page 1034, and with further wage changes in 1934, were renewed from May 1, 1936 to May 1, 1937.

Minimum wage rates per hour now effective for pulp, sulphite and paper mill workers are: grindersmen 45 cents, groundwood screens 47 cents, coreman and rewinderman 52 cents, painter 56 cents, paper mill millwright 76 cents, millwright helper 56 cents, cooks' helpers 64 cents, fourth hands 60 cents, fifth hands 55 cents.

### Construction—Buildings and Structures

**WINNIPEG, MANITOBA.—GENERAL CONTRACTORS' SECTION OF THE WINNIPEG BUILDERS EXCHANGE AND THE BRICKLAYERS AND MASONS INTERNATIONAL UNION No. 1 OF MANITOBA.**

Agreement to be in effect from March 18, 1936 to April 30, 1937. The parties to the agreement are to meet in March, 1937 for the purpose of drawing up a new agreement.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one-half until 10 p.m.; after 10 p.m. or after 12 noon Saturday or on Sunday or on any of four specified holidays, double time. When consecutive shifts are worked, 7½ hours shall constitute a day's work.

Wages for bricklayers and masons: \$1 per hour. In cases where three or more members are employed, the foreman, who shall be a union member, shall receive 10 cents per hour above the journeyman's wage.

No strike is to be called until the matter under dispute has been brought before the joint arbitration committee whose decision shall be binding on both parties.

**EDMONTON, ALBERTA.—EDMONTON GENERAL CONTRACTORS' ASSOCIATION AND THE BRICKLAYERS, MASONS AND PLASTERERS' INTERNATIONAL UNION LOCAL No. 1.**

Agreement to be in effect from May 1, 1936 to April 30, 1937. A new agreement is to be negotiated in February, 1937.

Hours: 8 per day for 5 days a week. Notwithstanding the recognition of the five day week, work may be carried on, if considered necessary by the contractor for 4 hours on Saturday at the regular rate. On work outside Edmonton a shift of not more than 9 hours may be worked at regular rates.

Overtime: time and one half. Work on Sundays or specified legal holidays, double time.

Wages for journeymen bricklayers: \$1 per hour. Foreman to be paid at least 10 cents per hour extra.

Any contractor who employs at least five bricklayers for the greater part of the season may employ one apprentice for each five journeymen. Wages for apprentices to range from 25 per cent of the regular rate during the first year to 70 per cent during the fourth year.

No member of the union shall contract to do work where the amount involved for labour is in excess of \$200 nor shall he enter into direct employment on any work in excess of this amount except through a contractor recognized by the contractors' association.

Should any dispute arise between the two parties, there shall be appointed a committee of three members for each of the parties who shall investigate and try to settle the dispute. Any such settlement shall be binding on both parties.

### Transportation and Public Utilities— Local Transportation

WINNIPEG, MANITOBA—CERTAIN DAIRY COMPANIES AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS OF AMERICA, MILK WAGON DRIVERS AND DAIRY EMPLOYEES, LOCAL UNION No. 119.

Agreements apply to all employees of the companies' dairy departments who belong to the crafts included in the union.

Agreements to be in effect from November 1, 1934 to October 31, 1935 and thereafter until superseded by a new agreement. Upon thirty days' notice by either party prior to November first of any year, any clause in the agreement may be brought up for reconsideration.

The companies shall employ only union members or those willing to join the union. Temporary help may be employed at specified rates but after six weeks such employees shall be recognized as permanent and shall receive the regular pay of the positions held.

Only six days per week may be worked by sales employees, except in cases of emergency. After three full years of service, sales employees to be entitled to a week's vacation with pay during the holiday season of the following year.

In one company, factory employees to work 6 days per week and to be entitled to 12 days' holidays with pay annually after one year's service. In the other company, factory employees to receive 52 days off yearly, that is one day off in eight and seven days off during the holiday season.

Minimum wage for sales employees: \$28 per week on a load of 1,500 units per week and under. On all units sold over 1,500 units per week the driver to receive a commission of one-half cent per unit except where the driver's unit load is over 1,500 units per week retail, when the driver to receive one cent on retail units sold over 1,500.

Minimum weekly wage for factory employees is \$24 in one company and \$25 in the other.

EDMONTON, ALBERTA—A CERTAIN DAIRY COMPANY AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, LOCAL No. 514.

Agreement to be in effect from March 1, 1936, to February 28, 1937, and from year to year until one party give notice 30 days prior to February 28 of any year that they wish to reconsider any clause.

The company agrees to employ members of the union or those who will become members within thirty days of accepting employment.

The principle of four days off in each calendar month to be observed for eleven months in each year, plus seven days annual holidays, making a total of fifty-one days off each year. In cases of sickness the first four days off will count as monthly holidays, but seven days in any one year, if off sick, will be allowed with guaranteed pay.

Wages: retail drivers, \$16 per week for the first year to \$19 per week for the fourth and succeeding years, plus a commission of  $\frac{1}{2}$  cent per unit sold; truck drivers, \$85 per month with a 9 hour day, routemen, \$30 per week.

The agreement sets forth conditions covering loading facilities, harnessing, credits to customers, etc.

The union states that its members are not in favour of sympathetic strikes.

### Transportation and Public Utilities Street and Electric Railways

WINNIPEG, MANITOBA — WINNIPEG ELECTRIC COMPANY AND THE MOTORMEN, CONDUCTORS AND BUSMEN IN THEIR EMPLOY.

This agreement, which is similar to the one in effect from May 1, 1934, to May 1, 1936, and which was summarized in the LABOUR GAZETTE, May, 1934, page 472, is to be in effect from May 1, 1936 to April 30, 1937 and from year to year thereafter until thirty days' notice by either party prior to April 30 of any year. The following changes have been made:

All wage rates have been increased by one cent per hour.

With a few minor changes the working conditions are unchanged. Employees who have had at least five years' service in the company are granted holidays with pay, the number of days off varying from 8 to 12 in accordance with the number of days worked in the twelve month period previous to May 1 of the year in which the holidays are to be granted. To receive such holidays they must have worked at least 193 days in the twelve month period.

WINNIPEG, MANITOBA — WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES OF THE MECHANICAL DEPARTMENT.

This agreement, which is similar to the one in effect from May 1, 1934, to May 1, 1936, and which was summarized in the LABOUR GAZETTE, May, 1934, page 472, is to be in effect from May 1, 1936 to April 30, 1937 and from year to year thereafter until thirty days' notice by either party prior to April 30 of any year. The following changes have been made:

All wage rates have been increased by one cent per hour.

With a few minor changes the working conditions are unchanged. Employees who have had at least five years' service in the company are granted holidays with pay, the number of days off varying from 8 to 12 in accordance with the number of days worked in the twelve month period previous to May 1 of the year in which the holidays are to be granted. To receive such holidays they must have worked at least 193 days in the twelve month period.

WINNIPEG, MANITOBA — WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES OF THE TRACK DEPARTMENT.

This agreement, which is similar to the one in effect from May 1, 1934, to May 1, 1936, and which was summarized in the LABOUR GAZETTE, May, 1934, page 472, is to be in effect from May 1, 1936 to April 30, 1937 and from year to year thereafter until thirty days' notice by either party prior to April 30 of any year. The following changes have been made:

All wage rates have been increased by one cent per hour.

With a few minor changes the working conditions are unchanged. To receive such holidays they must have worked at least 193 days in the twelve month period.

### Transportation and Public Utilities Electricity and Gas

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCALS NOS. 1037 AND 435.

This agreement, reached during proceedings under the Industrial Disputes Investigation Act, is printed on page 573 of this issue.

### Transportation and Public Utilities Water Transportation

MONTREAL, QUEBEC—HARBOUR COMMISSIONERS OF MONTREAL AND THE INDEPENDENT ASSOCIATION OF HARBOUR EMPLOYEES OF THE PORT OF MONTREAL.

Agreement in effect for one year from May 1, 1936, to April 30, 1937, for employees of grain elevator system, machine shop, guard pier repair shop, shipyard, general maintenance forces, electrical branch, cold storage warehouse and power house, and fleet.

The rates of pay are the same as those set forth in the previous agreement which was summarized in the LABOUR GAZETTE, June, 1935, page 584.

With certain minor exceptions the working conditions are also similar to those in the previous agreement.

TORONTO, ONTARIO.—A CERTAIN TERMINAL COMPANY, CERTAIN WATER TRANSPORTATION COMPANIES AND THE LONGSHOREMEN'S UNION OF TORONTO.

Agreements to be in effect from May 18, 1936, until the end of the navigation season of 1936. Negotiations for a schedule of wages and other working conditions for the shipping season of 1937 to be commenced by the parties to agreement, not later than January 31, 1937.

No union member is to be discriminated against on account of any union activity. Workers may be discharged immediately by the Stevedore or Foreman where such action is considered necessary, and the matter is to be discussed as soon as possible by the representative of the employers and the union. The employers agree to recognize as union representatives during loading or unloading the dock stewards who must be working longshoremen whose names shall be supplied them by the union.

The employers have the right to employ non-union members when satisfactory members are not available.

Wage rates: 42 cents per hour day time (6 a.m. to 6 p.m.); 45 cents per hour night time (6 p.m. to 6 a.m.); 45 cents per hour for Sundays and holidays (days and nights).

Conditions regarding posting of arrival of ships, waiting time, time of calling workers, etc., are set forth in the agreement.

### Service—Business and Personal

CALGARY, ALBERTA.—CERTAIN HOTELS AND THE BEVERAGE DISPENSERS INTERNATIONAL ALLIANCE LOCAL NO. 265.

The agreements are in effect for three years after signing of agreements on various dates in 1935 and 1936.

All men taken on by the hotels which are parties to the agreement must be members of the union or willing to become such. Those

hotel employees who are not members at the time of the signing of the agreement shall not be forced to become members but should they resign or be discharged, the agreement regarding men taken on shall be in effect.

The union shall have the right to choose a shop steward from among their members in each establishment.

Hours: 8 per day. At periods of exceptionally heavy business the regular staff may work overtime and shall receive payment for such overtime at the basis of actual wages. Under no conditions shall a beverage dispenser work more than fifty-four hours per week.

Minimum wages: tapmen \$5 per day; floor-men 50 cents per hour; extra men 50 cents per hour; combination men \$27.50 per week.

Disputes shall be settled by a committee consisting of two representatives of each of the parties to the agreement, who shall have a right to choose a fifth member in case of deadlock and the finding of the committee shall be final and conclusive.

### Collective Labour Agreements Extension Act of Quebec

The following agreement and amendments to agreements in Province of Quebec have recently been made obligatory by Orders in Council and the terms so made obligatory are summarized in the next article of this issue:

Ornamental Iron Workers, Montreal.

Building Trades, Quebec (Amendment).

Men's Clothing Workers, Province of Quebec (Amendment).

Building Trades, Three Rivers (Amendment).

Longshoremen (Inland and Coastal Navigation), Montreal (Amendment).

### Industrial Standards Act of Alberta

The following schedules have been made binding by Order in Council and the terms summarized in this issue in the article beginning on page 661.

Bakers, Edmonton.

Carpenters, Edmonton.

Painters, Calgary.

Plasterers, Calgary.

Plasterers' Labourers, Calgary.

Lathers, Calgary.

There were 20 establishments included in the blue printing industry in 1935, with a value of products of \$178,468 compared with \$160,640 in 1934. Employment was furnished to 90 persons who were paid a total of \$78,876 in salaries and wages.

With a total of 541 official exhibits filed and several hundred witnesses heard the Royal Commission investigating the Dominion's textile industry, which first convened last March, adjourned on June 22, 1936 *sine die*. It is expected to resume its sittings late in August.

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include the extension to all employees and employers in the same industry or business and in the same district, by Order in Council, of an agreement affecting ornamental iron workers at Montreal, which is summarized below, and of amendments to four other Orders in Council and a correction to a fifth, which amendments and correction are also noted below. Requests were published for the modification of the Orders in Council affecting the building trades in the Lake St. John District in the *Quebec Official Gazette* of June 6, of that affecting the furniture industry throughout the Province in the issue of June 20, and of that affecting building trades at Quebec in the issue of June 27. A request for the extension of a new agreement affecting dressmakers throughout the Province was published in the issue of June 13.

The text of the Collective Labour Agreements Extension Act, Quebec, was printed in the *LABOUR GAZETTE*, May, 1934, page 417, and amendments to the Act were summarized in the issue of June, 1935, page 526. Under this Act applications may be made to the provincial Minister of Labour by either party to a collective agreement made between, on the one hand, one or more associations of *bona fide* employees, and, on the other hand, employers or one or more associations of employers, to have those terms of such agreement which concern rates of wages, hours of labour and apprenticeship made obligatory on all employees and employers in the same trade, industry or business within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade, industry or business in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* for the duration of the agreement. The provisions of an agreement thus made obligatory govern all individual labour contracts in the trade, industry or business and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreements have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934. Beginning with the issue of the *LABOUR*

*GAZETTE* for July, 1935, the terms of agreements have been summarized instead of being printed in full.

**ORNAMENTAL IRON WORKERS, MONTREAL.**—An Order in Council, approved June 5, and published in the *Quebec Official Gazette*, June 13, makes obligatory the terms of an agreement between certain manufacturers and contracting firms and the Canadian Ornamental Iron and Bronze Workers' Union of Montreal.

The territorial jurisdiction includes the Island of Montreal, Ile Bizard and the counties of l'Assomption, Terrebonne, Laval, Two Mountains, Argenteuil, Vaudreuil, Soulanges, Beauharnois, Chateauguay, Laprairie, Chambly and Verchères.

The agreement is in effect from April 1, 1936, to March 31, 1937.

The agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, September, 1935, page 869. In that agreement it was provided that wage rates be increased by 5 cents per hour from April 1, 1936, and this increase is incorporated into the present agreement, making the minimum rates 60 cents per hour for mechanics, 50 cents for fitters, 40 cents for helpers.

Hours continue at 44 per week, with time and one half for overtime until midnight, double time from midnight to 8 a.m.; double time also for work on Sundays and holidays.

**BUILDING TRADES, QUEBEC.**—An Order in Council, approved May 29 and published in the *Quebec Official Gazette*, June 6, amends the Order in Council for these trades (*LABOUR GAZETTE*, June, page 545) with minor changes in the definitions of trades which does not affect the summary as given in the *LABOUR GAZETTE*.

**MEN'S CLOTHING WORKERS, PROVINCE OF QUEBEC.**—An Order in Council, approved June 5 and published in the *Quebec Official Gazette*, June 13, amends the Orders in Council for this industry (*LABOUR GAZETTE*, March, 1935, page 238, with amendments in the April issue, page 323, August, page 733, November, page 1064, February, 1936, page 200, and March, page 275) by adding to the parties to the agreement: The Quebec Association of Garment Manufacturers, Inc., and La Confédération des Travailleurs Catholiques du Canada, Incorporée (The Confederation of Catholic Workers of Canada, Incorporated).

It is now provided that the agreement be automatically renewed each year unless the contracting parties present a request to the Lieutenant Governor in Council to have it revoked; "the contracting parties shall mutually give a written notice of 90 days of their

desire to amend or to revoke the agreement." One or the other of the parties to the agreement may individually present to the other contracting parties this notice; however the Minister of Labour shall see if he deem it wise to consider this notice of amendment or revocation.

**BUILDING TRADES, THREE RIVERS.**—An Order in Council, approved June 5 and published in the *Quebec Official Gazette*, June 13, amends the Orders in Council for these trades (LABOUR GAZETTE, May, 1935, page 421 and August, pages 732 and 733) by providing that in case of non-application or derogation, granted by competent authority, of the limiting of working hours, time and one-half to be paid for all overtime.

The clauses relating to maintenance men are made to apply also to maintenance men employed in manufacturing establishments. It is also provided that while the agreement is in force, employers may not reduce the wages of maintenance men already in their employ if such wages are higher than the minimum rates provided in the agreement.

**LONGSHOREMEN (INLAND AND COASTAL NAVIGATION), MONTREAL.**—A correction is published in the *Quebec Official Gazette*, June 6, of the wording of one clause in this agreement, which does not affect the summary as given in the LABOUR GAZETTE, May, page 460. An Order in Council, approved June 5 and published in the *Quebec Official Gazette*, June 13, provides that men required to work on Sundays and holidays are to receive a minimum of one hour's pay for each call.

## INDUSTRIAL STANDARDS ACT OF ALBERTA

### Schedule of Wages and Hours Recently Approved by Order in Council

THE Industrial Standards Act of Alberta, 1935, is similar to the Industrial Standards Act of Ontario, the text of which was printed in the LABOUR GAZETTE, June, 1935, page 534, where are also noted the minor differences between the Ontario and Alberta Acts. The Act provides that the Minister of Labour for Alberta, may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees or employers in the industry in any zone or zones, to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If in the opinion of the Minister, a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant Governor in Council may declare such schedule to be in force for a period not exceeding twelve months, and thereupon such schedule shall be binding upon every employee and employer in such industry in such zone or zones to which the

schedule applies, the schedule not coming into effect until ten days after publication of the Order in Council in *The Alberta Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Previous schedules under this Act have been summarized in the LABOUR GAZETTE, September, 1935, and April, 1936.

**BAKERS, EDMONTON.**—An Order in Council, dated March 17 and published in *The Alberta Gazette*, March 31, makes obligatory a schedule of wages and hours for all employees in the baking industry in a zone which includes the city of Edmonton and the neighbouring district.

The schedule is in effect from April 10, 1936 to April 9, 1937.

No employee to be employed more than 54 hours per week on inside work.

Overtime: over 54 hours, time and one-half. Extra time worked up to four hours on shifts immediately preceding statutory holidays shall not be considered as overtime and no deductions shall be made from the weekly rate of any statutory holidays.

Minimum weekly wage rates:—

	After April 10, 1936 per week	After July 10, 1936 per week	After January 8, 1937 per week
Foreman.. . . .	\$22 50	\$24 00	\$25 50
Doughmen.. . . .	20 00	21 50	23 00
Ovenmen.. . . .	20 00	21 50	23 00
Bench hands.. . . .	20 00	21 50	23 00
Helpers.. . . .	15 00	16 50	18 00
Shippers.. . . .	15 00	16 50	18 00
Packers.. . . .	15 00	16 50	18 00
Wrappers (hand or machine).. . .	12 50	.....	.....
Apprentice (for first year).. . .	12 50	.....	.....
Apprentice (for second year).. . .	14 00	.....	.....
Apprentice (for third year).. . .	16 00	.....	.....
Salesmen or Deliverymen.. . . .	18 00	19 50	21 00

The minimum rate of wages of temporary employees to be *pro rata* the above schedule. No salesman or deliveryman to be paid on a commission basis only.

All employers paying a higher rate of wages than the above schedules are prohibited from reducing them and shall maintain the present higher rates during the existence of this agreement even though the present staff be increased or any employee replaced and all employers presently working their employees less than 54 hours per week are prohibited from increasing them during the existence of this agreement.

In all shops where the master baker works as a doughman, ovenman or bench hand, he shall be considered as foreman.

One helper or apprentice allowed for every three journeymen except in the small shops where one helper or apprentice allowed. All apprentices to be at least 16 and not more than 21 years of age and must be indentured.

All employees having two or more years' continuous service with their employer on or after April 1, 1937, to receive one week's holiday with pay. Employees commencing work after the coming into force of this agreement to receive one week's holiday with pay after two years' continuous service with the employer, said continuous service to be computed from April 1, of each year.

No person engaged in the baking industry shall be exempt from the provisions of this agreement on account of relationship by blood or marriage.

**CARPENTERS, EDMONTON.**—An Order in Council, dated June 2 and published in *The Alberta Gazette*, June 15, makes obligatory the terms of a schedule governing carpenters in a zone which includes the city of Edmonton and surrounding district.

Hours: 8 per day, 4 on Saturday, a 44 hour week. In case of night shift,  $7\frac{1}{2}$  hours' work to be equivalent to 8 hours.

Overtime: time and one half. Work on Sundays and four holidays, double time. No work on Labour Day.

Minimum wage rate for carpenters: 75 cents per hour.

For out of town work, transportation to be paid both ways by the employer when the employee makes definite arrangements with the employer before leaving for the job.

**PAINTERS, CALGARY.**—An Order in Council, dated June 16, and published in *The Alberta Gazette*, June 30, makes obligatory a schedule of wages and hours of labour for all employees in the painting, decorating, glazing and paperhanging industry within a zone which includes the city of Calgary and surrounding district.

The schedule to be in effect from July 10, 1936 to July 9, 1937.

Hours: 8 per day, 5 days per week, a 40 hour week. When weather conditions do not permit continuous operations during any period between Monday and Friday inclusive, work may be continued on Saturday at the regular straight time rate if the employee has not obtained more than 24 hours work in that

week. Except for this reason, only emergency work permitted on Saturday morning at straight time when job already started can be completed in four hours or less. When work cannot be done during the day, it may be done as a night shift of not more than 8 hours at straight time, but if such work continues for more than three nights, rate to be 8 hours' pay for 7 hours' work.

Overtime to be paid at time and one-half but not more than four hours overtime to be worked in any one day; work on Sundays and holidays, double time.

Wages: 75 cents for four months after the schedule is in operation; thereafter 80 cents per hour. Aged or handicapped workers may petition the Board for permission to work at a reduced wage rate, such rate to be determined by the Board appointed under the Act. Work contracted for and accepted prior to this schedule coming into effect shall be completed at the rate prevailing at the time tenders were submitted. Employees who furnish brushes, scaffolding or equipment of any kind with the exception of regular tool kits to be paid \$1 per hour.

No piece work on any account to be permitted.

Every contractor allowed one apprentice to every four journeymen in the shop, such apprentice to serve at least three years, which period may be extended one year if the employer deems it necessary. The employment of improvers is not permitted.

**PLASTERERS, CALGARY.**—An Order in Council, dated June 16 and published in *The Alberta Gazette* June 30, makes obligatory a schedule of wages and hours of labour for all employees in the plastering industry within a zone including the city of Calgary and surrounding district.

The schedule to be in effect from July 10, 1936 to July 9, 1937.

Hours: 8 per day from Monday to Friday, 40 hours per week. Emergency work that can only be done at night to be paid at the rate of 8 hours' pay for 7 hours' work.

Overtime: no employee permitted to work overtime while competent men are available and there is room on the job to employ such men. Overtime to be paid at time and one-half. Work on Sundays and five specified holidays, double time.

Wages: 90 cents per hour. Aged or handicapped employees may petition the Board for permission to work at a reduced wage rate, such rate to be determined by the Board appointed under the Act. Work contracted for and accepted prior to this schedule coming into effect to be completed at a rate set by the Board.

Transportation to be furnished to all points outside the city limits, travelling time outside the five mile radius to and from the job to be paid at the regular straight time rate.

No employer to employ more than one junior apprentice, that is one in his first or second year of apprenticeship, and one senior apprentice, that is one in his third or fourth year of apprenticeship. The rates of wages for apprentices to be 30 per cent of journeyman's rate during the first year, 40 per cent during the second year, 50 per cent during the third year and 70 per cent during the fourth year.

**PLASTERERS' LABOURERS, CALGARY.**—An Order in Council dated June 16 and published in *The Alberta Gazette* June 30, makes obligatory a schedule of wages and hours of labour for all employees in the plastering labourers' industry within a zone which includes the city of Calgary and surrounding district.

The schedule is in effect from July 10, 1936 to July 9, 1937.

Hours: 9 per day the first 5 days of the week, a 45 hour week.

Overtime: no employee to be permitted to work overtime while competent men available and there is room on the job to employ such men. Overtime to be paid at time and one-half. Work on Sundays and five specified holidays, double time. Emergency work that can only be done at night to be paid at the rate of 9 hours' pay for 8 hours' work.

Wages: 60 cents per hour except for beginners who shall be paid 45 cents per hour for the first two weeks. Work contracted for and accepted prior to this schedule coming into effect to be completed at a rate set by the Board.

Transportation to be furnished to all points outside the city limits, travelling time outside the five mile radius to and from the job to be paid at the regular straight time rate.

**LATHERS, CALGARY.**—An Order in Council, approved June 16 and published in *The Alberta Gazette* June 30, makes obligatory a schedule of wages and hours of labour for all employees in the lathing (wood and metal) industry within a zone which includes the city of Calgary and surrounding district.

The schedule to be in effect from July 10, 1936 to July 9, 1937.

Hours: 8 per day from Monday to Friday inclusive, a 40 hour week. Employees required to set hangers in connection with the pouring of concrete on Saturdays to be permitted to work, being paid straight time for morning and time and one-half for Saturday afternoon and evening. Emergency work that can only be done at night to be paid at the rate of 8 hours' pay for 7 hours' work.

Overtime: no employee to be permitted to work overtime while competent men are available and there is room on the job to employ such men. Overtime to be paid at time and one-half. Work on Sundays and statutory holidays, double time.

Wages for lathers: 90 cents per hour for all metal furring and tied on lath work and attached ceilings; 75 cents per hour for all classes of work which are nailed on wood furring, such as wood lath, all plaster and insulating boards, metal lath corner beads, corner strippings, etc. Work contracted for and accepted prior to this schedule coming into force to be completed at a rate set by the Board.

No piece work to be permitted on any job. Transportation to be furnished to all points outside the city limits, travelling time outside the five mile radius to and from the job to be paid at the regular straight time rate.

## Regulations

On June 9, regulations were made under the Act and were published in *The Alberta Gazette*, June 15, as follows:—

"1. Without in any way limiting the interpretations contained in the Act, the Minister may, for the purpose of carrying out the provisions of any Schedule, define any term used in such Schedule.

"2. Every Advisory Board established under the Act shall have authority to:

"(a) Determine and define: journeyman, helper, improver, apprentice and year of apprenticeship, day and night shift, large and small shop, emergency work, handicapped employee.

"(b) Fix a special minimum rate of wages for any employee who is handicapped by reason of age or physical or other disability.

"(c) Subject to the approval of the Commissioner of Labour, indenture any apprentices coming within the scope of any Schedule on proper indenture papers approved by the Commissioner.

"(d) Make such other decisions as may be deemed advisable for carrying out the provisions of a Schedule.

"3. Any employer or employee aggrieved by the decision of an Advisory Board shall have the right to appeal from such decision to the Commissioner of Labour who shall have jurisdiction to hear and determine such appeal and whose decision shall be final."

The regulations also provide that every employer affected by any Schedule shall, at the request of the Commissioner of Labour, furnish statements as to the names, ages, occupations of his employees, with such information as to wages, hours, overtime, conditions of labour as may be required, and to produce for inspection his books, registers, pay-rolls and all such records as may be deemed necessary.

There were 5,334 accidents reported to The Workmen's Compensation Board during June, an increase of 760 over the month of May, and 1,009 more than the number reported during June a year ago. The benefits awarded during June amounted to \$445,407.62, of which \$363,629.48 was for compensation and \$81,778.14 for medical aid. This brings the total benefits awarded during the half year ending June 30 to \$2,722,211.90, as compared with \$2,724,875.91 during the corresponding period of 1935. The accidents reported during the first six months numbered 27,845, as compared with 27,429 during the same period last year.

The fatal accidents for the six months' period were 1936, 152; 1935, 130.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, JUNE, 1936

### Cost of Living, Prices of Staple Articles and Index Numbers

THERE was little movement in prices during the month. The cost of the weekly budget in terms of retail prices showed a small decline, slight seasonal decreases being recorded in the cost of foods and fuel, while in wholesale prices the Dominion Bureau of Statistics index number on a weekly basis advanced week by week since the end of May.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices was \$7.79 at the beginning of June as compared with \$7.82 for May; \$7.54 for June, 1935; \$6.67 for March, 1933 (the low point in recent years); \$11.10 for June, 1930; \$10.18 for June, 1922; \$16.92 for June, 1920 (the post war peak); and \$7.49 for June, 1914. Of the list of foods included in the budget seven were higher in price in June than in May, thirteen lower and nine unchanged. Most of the changes were fractional, the exceptions being a decrease of nearly five cents in the cost of butter and an advance of about three cents in the cost of potatoes. In fuel a seasonal decrease occurred in the cost of anthracite coal, while rent averaged slightly higher. Including the cost of fuel and rent with that of foods the total budget averaged \$16.33 at the beginning of June as compared with \$16.36 for May; \$15.95 for June, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.44 for June, 1930; \$20.58 for June, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.27 for June, 1914.

The index number of wholesale prices calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 reversed the downward tendency of the preceding month and toward the end of June was nearly a full point higher than for the last week in May. Comparative figures for certain weeks are: 72.7 for the week ended June 26; 71.8 for the week ended May 29; 72.1 for that of May 1; and 71.5 for that of June 21, 1935. On a monthly basis the latest figures available are for May, when the index was 71.8 as compared with 71.5 for June, 1935; 72.0 for June, 1934; 63.5 for February, 1933 (the low point in recent years); 93.4 for June, 1929; 105.3 for June, 1921; 164.3 for May, 1920 (the post war peak); and 64.4 for June, 1914. During the month under review recovery in the price of wheat contributed substantially to the advance in the general index number, No. 1 Manitoba northern cash

wheat advancing from 75½ cents per bushel on June 1 to 84 cents on June 25. In the subsequent reaction the price fell to 80 cents per bushel by the end of the month. The price of flour also advanced. In live stock prices, hogs were higher, while cattle showed little change. The price of raw cotton, influenced by the unfavourable weather conditions in the United States, advanced to the highest levels of the year. Raw silk also was substantially higher, following the decline of the previous two months. The price of tin moved downward to the lowest point of the last two years.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of June of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing

(Continued on page 672)

**COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL, AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA**

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

Price per cord from price quoted. f. Petroleum coke. g. Natural gas used extensively. h. Lignite. i. Including birch. r. Mining company houses in district \$5-10 per month; others, five and six rooms, \$10-\$35. s. Delivered from mines.

(Continued from page 664)

to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

#### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

#### Retail Prices

Meat prices showed little change during the month. In beef, round steak rose from an average of 19 cents per pound in May to 19.2 cents in June, while shoulder roast fell from 12.9 cents per pound to 12.7 cents. Veal was at the lowest point reached this year, shoulder roast averaging 13.2 cents per pound as compared with 13.8 cents in May. Fresh leg roast of pork was fractionally lower at 21.1 cents per pound, while breakfast bacon advanced in the average from 28.8 cents per pound to 29.1 cents.

The price of fresh eggs was higher in most localities, the Dominion average being 24.2 cents per dozen in June as compared with 23.6 cents in May. Few changes were reported in milk and the average price was unchanged at 10.2 cents per quart. The decline in the price of butter, in progress since the beginning of the year, continued in most cities in June, the Dominion average being 25.2 cents per pound as compared with 26.8 cents in May and 30.6 cents in January. The price of bread has been unchanged in the average since the beginning of the year at 6.2 cents per pound. Onions were one cent per pound higher, averaging 5.7 cents. The price of potatoes continued to reflect the prevailing scarcity, the Dominion average being up from \$1.62 per ninety pounds to \$1.70. Seasonal decreases in the price of United

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

†For the week ended June 26, 1936; monthly figures not yet available.

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

States anthracite coal were reported from several cities and the average fell from \$14.72 per ton in May to \$14.43 in June. Coke averaged 5 cents per ton lower at \$12.11 per ton.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$15.50; Windsor, Nova Scotia, \$16.50; Charlottetown, \$13.40; Moncton, \$16; Saint John, \$13; Quebec, 13.50;

Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$13; Montreal, \$14.25; Ottawa, \$15.50; Kingston, \$14.50; Belleville, \$15.25; Peterborough, \$15.75; Oshawa, \$14.25; Toronto, \$14.50; St. Catharines, \$15; Hamilton, \$14.50; Galt, \$16; Windsor, \$12.50; Sudbury, \$17.50; Cobalt, \$19; Timmins, \$18.75; Sault Ste. Marie, \$14.50; Port Arthur, \$17; Fort William, \$17; Winnipeg, \$19.50.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables, which appear quarterly, give the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries. The following notes afford information as to recent changes in prices according to groups of commodities in several of these countries.

## Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 91.9 for May, showing no change from the April level. An increase in the food and tobacco group was offset by a decrease in industrial materials and manufactures. The greatest change in any one group was a decrease of 3.9 per cent in coal prices.

(a) Average for year. (b) First of month. (c) Middle of month until August, 1933; thereafter this index number is calculated fortnightly and the figure given in this table is for the date nearest to the middle of the month. (d) Cost of weekly family food budget. (e) Figure for previous month. (f) Figure for following month. (g) Quarter beginning in specified month. (h) Highest category workmen's household. (i) December. (j) To end of 1931, 13 articles; from 1932, 34 articles. (k) Revised index number.

TABLE II.—INDEX NUMBERS OF WHOLESALE PRICES IN CANADA AND CERTAIN OTHER COUNTRIES

(a) Average for year. (b) First of month. (c) 15th of month. (d) End of month. (e) New series. (f) Sums total of the prices per pound of 96 articles of common consumption. (g) Until end of 1927, "Dr. Lorenz." (h) Prior to 1926, the number of commodities was 238, from January 1926 to December 1933, 502 and since January, 1934, the number is 567. (i) Continued by Dun and Bradstreet, Incorporated.

The *Statist* index number, on the base 1867-1877=100, was 85.2 at the end of May, a decline of 0.7 per cent for the month. Of the six groups forming part of this index number, five were lower, the sixth, animal food, rising 6.2 per cent.

**COST OF LIVING.**—The index number of the Ministry of Labour, on the base July, 1914=100, was 144 at the beginning of June, showing no change from the previous month's level. Food prices were slightly higher due chiefly to increases in the price of tea, following the recent increase in the duty, together with slight increases in the average prices of butter and of eggs. On the other hand, there were seasonal reductions in the price of milk in a number of towns. Rent, clothing and sundries were unchanged, while there was a slight decrease in the fuel and light group.

### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base 1914=100 (gold index), was 77 for May, an increase of one point for the month. Food-stuffs increased while manufactured products declined.

### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base 1913=100, was 103.8 for May, an increase of 0.1 per cent for the month. As in the previous month, the largest increase was in the hides and leather group.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 124.3 for May, the same as for the previous month. A slight decrease in the cost of heat and light was offset by an increase in the cost of clothing.

### United States

**WHOLESALE PRICES.**—*Bradstreet's* index number, which is based on the sum total of the prices per pound of 96 commodities of common consumption was \$9.7374 at

June 1, a decrease of 0.8 per cent for the month. All but three groups, textiles and building materials which increased slightly and chemicals and drugs which were unchanged, declined.

*Dun's* index number (continued by Dun and Bradstreet, Inc.) which is based on the cost *per capita* of a year's supply of commodities was \$172.136 at June 1, a fall of 0.8 per cent for the month, the decline being due to decreases in the prices of grain and meat.

**COST OF LIVING.**—The index number of the National Industrial Conference Board, on the base 1923=100, was 84.6 for May, an advance of 0.4 per cent for the month. There were advances in food prices and rents and declines in clothing, coal and sundries.

### Manufacturing Statistics of Quebec in 1934

The value of manufactured products which totalled \$766,498,000 in 1934 was an increase of 17 per cent over the previous year. Reports were received from 8,168 manufacturing establishments with a capital investment of \$1,678,000,000. There were 181,546 persons employed and the salaries and wages paid amounted to \$161,198,000.

Quebec, with about 30 per cent of the Dominion output, is the second largest manufacturing province. The production of pulp and paper is the dominant industry. In addition to supplying about 10 per cent of the gross value of Quebec manufactures, it furnishes about 49 per cent of the Dominion total for this industry. From the point of view of gross value of production in Quebec the textile industries, with an output valued at \$169,968,000, again heads the list.

In a recent news despatch from Copenhagen, Denmark, it is reported that extension of Denmark's Strike and Lockout Law of February, 1933, prohibiting such action as injurious to the welfare of the country has been passed by the Danish Social Democrat parliament. The law will prevent lockouts or strikes for two years from March 29, last.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

INDUSTRIAL employment in Canada at the beginning of July showed further improvement, according to the Dominion Bureau of Statistics, which tabulated returns from 9,774 firms (each employing a minimum of 15 persons) in all industries except agriculture, fishing, hunting and highly specialized business. The staffs of these firms aggregated 987,955 workers, or 24,554 more than they employed at June 1. The index (based upon the average for the calendar year 1926 as 100), stood at 104.6, compared with 102.0 in the preceding month and 99.5 at July 1 of last year. At the same date in the fourteen preceding years, the index was as follows: 1934, 101.0; 1933, 84.5; 1932, 88.7; 1931, 103.8; 1930, 118.9; 1929, 124.7; 1928, 117.7; 1927, 109.7; 1926, 105.0; 1925, 98.0; 1924, 97.1; 1923, 100.7; 1922, 92.2 and 1921, 88.6. The increase at July 1, 1936, was larger than that recorded at July 1, 1935, and was also greater than the average gain between June and July in the experience of the last fifteen years.

At the beginning of July, 1936, the percentage of idleness reported to the Department of Labour by local trade unions throughout Canada was 13.9, as contrasted with 14.8 per cent at the beginning of June, 1936, and 15.4 per cent at the beginning of July, 1935. The July percentage was based on the reports tabulated from 1,790 labour organizations, covering a membership of 179,815 persons.

Reports received by the Department of Labour from the Offices of the Employment Service of Canada indicated a decline in the volume of business transacted in June, 1936, from that of the previous month and likewise from June last year, these computations being based on the average daily placements effected during the periods under review. Total placements for the month under review were slightly higher, however, than during the corresponding period of 1935, due to the fact that there was one more working day in June, 1936. The deciding factor in the changes shown when compared with the preceding month, was the

loss in services, while that under the second comparison was the gain recorded in farming, services, logging and manufacturing, although these were largely counterbalanced by a heavy decline in construction and maintenance. Vacancies in June, 1936, numbered 28,164, applications 51,674 and placements in regular and casual employment 25,958.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting and rent was \$16.51 at the beginning of July as compared with \$16.33 for the previous month. The increase was due to an advance in the cost of foods. Fuel and rent were unchanged. Comparative figures for certain earlier dates are \$15.94 for July, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.26 for July, 1930; \$21.53 for July, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.17 for July, 1914. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 continued to advance during July and was 75.4 for the week ended July 31 as compared with 72.6 for the week ended June 26. On a monthly basis this index number was 72.3 for June; 71.5 for July, 1935; 72.0 for July, 1934; 63.5 for February, 1933 (the low point in recent years); 97.2 for July, 1929; 104.8 for July, 1921; 164.3 for May, 1920 (the post war peak); and 64.4 for July, 1914.

The table on page 678 gives the most recent statistics available reflecting industrial conditions in Canada. The index of the physical volume of business was slightly higher in June than in the previous month and eleven per cent higher than in June, 1935. Of the principal factors included, the indexes for manufacturing, construction and electric power output were higher than in May while those indicating mineral production and distribution were lower. Comparing June, 1936, with June, 1935, all of the above-mentioned factors were considerably higher, mineral production mainly because of the increased shipments of nickel, zinc, gold and silver; manufacturing because of increases in the production of food-

\*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

†For the week ended July 31, 1936.

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations.

(4) Figures for end of previous month.

(5) Figures for four weeks ending August 1, 1936 and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending July 11, June 13, and May 16, 1936; July 13, June 15, and May 18, 1935.

(7) MacLean's Building Review.

stuffs, rubber imports, textiles, forestry products and iron and steel products. Information available for July shows advance in wholesale prices both as compared with June of this year and with July, 1935. There was further improvement in employment and car loadings in both these comparisons, while contracts awarded were somewhat lower.

The number of strikes and lockouts recorded for July was seven, involving 3,776 workers and causing a time loss of 44,342 man working days. Most of the time loss was due to a strike of salmon fishermen at River's Inlet, B.C., involving about 2,500 men for nearly a month and indirectly affecting about 1,000 cannery workers. A strike of men's clothing factory workers in several establishments at Winnipeg, Man., also caused considerable time loss. In June, 14 disputes involved 1,004 workers and caused a time loss of 4,014 days, the lowest recorded since December, 1934. In July, 1935, there were 26 disputes involving 6,339 workers, with time loss of 52,118 days. Most of this was due to strikes of loggers in the Nipigon district in Ontario, longshoremen and certain other water transport workers at Vancouver, B.C., and nearby ports, and coal miners at New Waterford, N.S. Of the seven disputes in July, two were recorded as terminated, one resulting in favour of the employer and one in favour of the workers. Five disputes, involving approximately 430 workers, were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

#### **Industrial Disputes Investigation Act**

During the past month the Department received the report of the Board of Conciliation and Investigation established in connection with a dispute between the Western Stevedore Company, the Canadian National Railways and certain of their employees.

Five applications were received for the establishment of Boards, and the personnel of Boards was completed in the case of three other disputes. Recent proceedings under the Act are reviewed on page 682 on this issue.

#### **Dominion social legislation to be appealed**

The Judicial Committee of the Privy Council, on July 29, granted petitions of the Dominion Government and the Legislatures of Ontario and British Columbia to appeal certain judgments of the Supreme Court of Canada on the references submitted to that body respecting the validity of the

social legislation enacted at the 1934 and 1935 sessions of Parliament (a review of these judgments appeared in the last issue of the LABOUR GAZETTE, pages 585-600).

The Dominion is appealing the decisions of the Supreme Court on the Weekly Rest in Industrial Undertakings Act; the Minimum Wages Act; the Limitation of Hours of Work Act; and the Employment and Social Insurance Act. In the first three measures, the Supreme Court were equally divided. The Chief Justice and Davis and Kerwin JJ. were of the opinion that, except as to section 6 of the Minimum Wages Act, these statutes were *intra vires* of the Parliament of Canada. On the other hand, Rinfret, Cannon and Crocket JJ. were of opinion that the statutes were *ultra vires*. The question in issue concerns the scope of the Dominion's treaty-making power, and is considered to be of great importance.

In the reference concerning the Employment and Social Insurance Act, the Supreme Court of Canada held, by a majority of four to two, that the statute was *ultra vires* of the Parliament of Canada.

The Province of British Columbia is appealing the decisions of the Supreme Court on the references concerning the Natural Products Marketing Act (unanimously declared *ultra vires*); the Farmers' Creditors Arrangement Act Amendment Act (declared *intra vires*) and Section 498A of the Criminal Code (declared constitutionally valid).

The Province of Ontario is appealing the judgment of the Supreme Court on the section of the Dominion Trade and Industry Commission Act held to be *intra vires*, and the Dominion Government has entered a cross appeal on certain of the sections of this Act held to be *ultra vires*.

#### **Relief census planned by National Employment Commission**

The Hon. Norman McL. Rogers, Minister of Labour, and Mr. A. Purvis, chairman of the Employment Commission in a press interview on July 18, announced that another registration of the unemployed on relief would be undertaken during the month of August. The registration will be conducted through the Provincial authorities and at the various relief offices in the municipalities in the Dominion.

A questionnaire to be completed with respect to each relief recipient will supply information as to the number of employables in each family and the class of work they might be expected to perform, as well as their past employment record. In this manner, the Government and Commission expect to obtain detailed information indicating the re-employability of

persons now on relief; also the number of skilled workers among the unemployed and the desirability of establishing training schools in anticipation of any scarcity of skilled workmen.

It has been arranged that the National Employment Commission maintain an index of those on relief, and it may be necessary for this purpose, to conduct a follow-up plan in order to keep the information current.

Referring to the relief camps, which were recently closed, the Hon. Mr. Rogers stated that the relief camp scheme had been abandoned completely as far as the Government was concerned. However, the Minister intimated that there was a possibility of establishing training camps to better equip certain classes of unemployed for re-employment.

### **Conventions of labour organizations**

Convention calls of two labour organizations have been issued during the past month. On September 8, the fifty-second annual convention of the Trades and Labour Congress of Canada, headed by its President, Mr. P. M. Draper, commences at Montreal, while on September 28, the sixth annual convention of the All-Canadian Congress of Labour, under the presidency of Mr. A. R. Mosher, starts its sessions in Toronto.

### **Royal Commission on anthracite coal**

Hearings in Montreal in the investigation by Dr. H. M. Tory, Royal Commissioner, into the marketing of anthracite coal occupied fourteen days in the month of July. Examination was made into conditions prevailing in the importation and distribution of British and other anthracite coal. The Commission took evidence in Quebec City in the first week of August and in Toronto the following week.

### **Executive of A. F. of L. acts against twelve unions**

On charges of having established a dual organization and "fomenting insurrection" the Executive Council of the American Federation of Labor voted on August 5 to suspend ten unions now represented in the Committee for Industrial Organization unless they withdraw from that body within thirty days. The Committee for Industrial Organization was formed in November, 1935, following the resignation of Mr. John L. Lewis, President of the United Mine Workers, from the vice-presidency of the American Federation of Labor (LABOUR GAZETTE, December, 1935, page 1088).

The Committee—at first composed of the chief officers of eight international unions—announced as its objective "the organization of the unorganized workers in the mass production and other industries upon an industrial basis."

The issue was debated at length at the 1935 (Atlantic City) convention of the American Federation of Labor where the move to establish industrial unions in specific industries, or to set up industrial unions to replace existing national and international unions, was defeated on a roll call vote.

The most recent development in the situation occurred on August 3-5 at the meeting of the Executive Council of the American Federation of Labor to consider charges formally laid before that body by Mr. John P. Frey, president of the Federation's Metal Trades Department, citing twelve unions for participating in the formation of the Committee for Industrial Organization and thereby "engaged in fostering, maintaining and supporting this dual movement and of fomenting insurrection within the American Federation of Labor."

The twelve unions cited in the charges were: United Mine Workers of America; Amalgamated Clothing Workers of America; Oil Field, Gas Well and Refinery Workers of America; International Union of Mine, Mill and Smelter Workers; International Ladies' Garment Workers' Union; United Textile Workers of America; Hatters, Cap and Millinery Workers' International Union; Federation of Flat Glass Workers of America; Amalgamated Association of Iron, Steel and Tin Workers; International Union United Automobile Workers of America; United Rubber Workers of America, and the International Typographical Union.

After a three-day session (in which representatives of the cited unions refused to participate) the Executive Council by a vote of thirteen to one decided to suspend ten of the unions involved unless such severed their identity with the Committee for Industrial Organization. Action was deferred in the case of two unions—the International Typographical Union and the Hatters' Cap and Millinery Workers International Union.

### **U. S. Steel Corporation establishes 48-hour week**

Effective August 1, the United States Steel Corporation has announced a uniform arrangement for overtime payment in conjunction with the virtual establishment of a forty-eight hour week.

The plan, which will involve approximately 150,000 employees, provides in general for payment at the rate of time and one half for

all work in excess of eight hours a day or forty-eight per week. In effect, the new arrangement means the establishment of a basic forty-eight hour week in computing the remuneration of hourly, piece work, or tonnage employees.

It is reported that during the period that the steel industry's NRA code was in operation, the maximum number of hours of work permitted in a week was 40, and because of the low rate of operations the weekly hours of work dropped for a time to less than 30 hours a week. With the steady improvement in steel operations this year, the average number of hours worked each week were reported to have increased to 40 or slightly more.

The statement issued by the United States Steel Corporation was as follows:

"After conferences with employee representatives, a uniform arrangement for the payment of overtime, effective August 1, 1936, has been approved by the United States Steel Corporation and its subsidiary companies. The whole question has been under consideration for some time.

"The schedule covers overtime payment for hourly, piece-work or tonnage employees.

"The regular schedule of daily and weekly hours is established on a basis not to exceed eight hours a day, or more than six regular turns, without at least a 24-hour intermission, thus providing for one day of rest in seven.

"When employees are requested by the companies to work beyond the above schedule to meet emergencies, the following bases of payment for overtime shall apply:

"Daily overtime—Time and one-half time will be paid for time worked in excess of eight hours per day. This provision will only apply when the overtime in any one day exceeds fifteen minutes.

"Weekly overtime—Time and one-half time will be paid for time worked in excess of the regular six-day or six-turn weekly working schedule, provided the employee has worked six consecutive days or turns."

Adoption of similar plans was announced by the Inland Steel Company at Chicago, and the Republic Steel Corporation at Cleveland.

#### **Proposed uniform regulation of wage payment in U.S.**

A Bill regarding the payment of wages has been approved by a joint committee of State Labour Commissioners as a suggested measure for the various States. According to the Survey of Labour Law Administration for August 1, 1936, issued by the Division of Labour Standards of the United States De-

partment of Labour, the committee's draft does not propose any new or untried practices, for all of its provisions are found in existing State laws. However, no law at the present time contains all of the features that are included in the draft. The committee very carefully canvassed existing laws and administrative practices in order to select those that seemed best adapted to achieving the desired objective.

The bill requires all employers to observe at least semi-monthly pay-days, to pay wages in full and in cash, to post pay-days or notify employees of the time and place of payment in writing, and to pay discharged employees at once and those who quit of their own accord within 72 hours of the time of quitting or of notice of intention to quit. It provides that the State department of labour shall enforce the mandatory sections of the law and shall hear cases involving wage complaints, and that the labour commissioner may accept assignments of wage claims and sue for their collection through the civil courts, without cost to the claimants.

#### **Maritime sessions of the International Labour Conference**

A session of the International Labour Conference dealing exclusively with maritime matters will open in Geneva on October 6. The agenda of this session is as follows: (I-A) Regulation of hours of work on board ship; (I-B) Manning in conjunction with hours of work on board ship; (II) Protection of seamen in case of sickness (including the treatment of seamen injured on board ship), i.e. (a) the individual liability of the shipowner towards sick or injured seamen; (b) sickness insurance for seamen; (III) Promotion of seamen's welfare in ports; (IV) Establishment by each maritime country of a minimum requirement of professional capacity in the case of captains, navigating and engineer officers in charge of watches on board merchant ships; and (V) Holidays with pay for seamen.

Following the close of this conference, a special session is to be convened on October 22 to consider proposals for the revision of a Convention which was adopted in 1921 fixing a minimum age of fourteen years for employment at sea. The proposal is that the age limit should be raised to fifteen years.

#### **Canada Year Book, 1936.**

The 1936 edition of the Canada Year Book has been issued by the Dominion Bureau of Statistics, as an official work of reference on factual information concerning the economic and social progress of the Dominion.

The 1936 Canada Year Book contains over 1,150 pages, dealing with every phase of national life and especially those which can be reflected in statistical data. The introduction to the External Trade Chapter (XVI) has been revised by the inclusion of an abstract of the value of quantum of work trade abridged from the League of Nations "Review of World Trade, 1934" entirely revised and rewritten to cover the estimates of retail trade made since the 1931 Census. A new series of monthly indexes of retail sales, 1929-35, is also included as well as principal

statistics of chain stores, and the motion picture industry. Some revision has been considered necessary in chapter XXI dealing with municipal taxation, etc., and the estimate of national wealth, 1933, with revised comparable figures for 1929. The latter estimate gives a picture at the peak of domestic prosperity while the 1933 figures reflect the writing down of values resulting from the depression.

The Canada Year Book can be obtained from the King's Printer, Ottawa, at the usual nominal charge of \$1.50 per copy.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**D**URING the month of July five applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour as follows:—

1. From employees of J. C. Malone & Company, at Three Rivers, Quebec, being members of Local 1412, International Longshoremen's Association. The cause of the dispute is stated to be the employees' desire to negotiate an agreement with the company covering wages, hours, and general working conditions. The employees also request permission to belong to the association of their own choice. Three hundred employees are stated to be directly affected by the dispute, and 800 indirectly.

2. From certain employees of the Canadian National Railways' Express Department, being clerks, messengers, shed employees, drivers, teamsters, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. For the purpose of determining whether Mr. E. M. Young, who is General Chairman, Canadian Brotherhood of Railway Employees, or Mr. N. L. Preston, who is General Chairman, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, should be accorded official recognition by the company in matters pertaining to wages and working conditions of employees of the Express Department, a secret ballot was taken during the months of May and June amongst employees covered by the existing schedule of rules and rates of pay. This ballot was taken in accordance with arrangements agreed upon between the representatives of the parties concerned. Of 1,932 employees entitled to vote, 1,930 exercised their franchise, 1,075 voting for the Committee of which Mr. Young is General Chairman, and 852 for the Committee of which Mr. Preston is General

Chairman, while three ballots were spoiled. This showed a majority of 223 in favour of Mr. Young's Committee. The present dispute arises out of the request of the minority group to have Mr. Preston and his General Committee continue to receive recognition. However, as the application is not supported by a majority of the employees of the Canadian National Railways' Express Department, there does not appear to be any good ground for the establishment of a Conciliation Board.

3. From freight handlers employed by the Canadian Pacific Railway Company at St. Andrews, New Brunswick, being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The dispute relates to the matter of wages and working conditions, twelve employees being directly affected.

4. From certain employees of the Winnipeg Electric Company, being trackmen, members of the Winnipeg Electric Trackmen's Unit, One Big Union. The dispute is stated to relate to the alleged violation of the agreement at present in force. Seventy-five employees are stated to be directly affected and 915 indirectly.

5. From certain employees of the Canadian National Railways, being sleeping car conductors, members of the Order of Railway Conductors. The cause of the dispute is stated to be the employees' desire to be represented by the organization of their choice. Forty-seven employees are stated to be directly affected by the dispute and forty-five indirectly.

Reference was made in the July issue of the LABOUR GAZETTE, page 571, to the receipt in the Department of Labour of an application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Algoma Steel Corporation, Limited, and approximately 1,792 employees,

members of the Algoma Steel Workers' Union. A Board of Conciliation and Investigation was established by the Minister of Labour on July 10 in this matter, and members thereof were appointed as follows: Mr. A. H. Dowler, K.C., of Fort William, Ontario, chairman, appointed by the Minister in the absence of a joint recommendation from the other board members, Mr. Lynn B. Spencer, K.C., of Welland, Ontario, nominated by the company, and Mr. W. F. O'Connor, K.C., of Ottawa, Ontario, nominated by the men. The dispute relates to the employees' request for increased wages, an eight hour day, and improved working conditions.

A Board of Conciliation and Investigation was also established by the Minister of Labour during July to deal with a dispute between the Winnipeg Electric Company and its employees in the Gas Production Department, being members of the Gas Workers' Unit, one Big Union, and members thereof were appointed as follows: Honourable Mr. Justice A. K. Dysart, of Winnipeg, Manitoba, appointed by the Minister in the absence of a joint recom-

mendation from the other board members, Mr. Hugh B. Lyall, of Winnipeg, nominated by the company, and Mr. Allan Meikle, of Winnipeg, nominated by the employees. The application in this matter was received in the Department of Labour during June (see July LABOUR GAZETTE, page 571).

The personnel of the Board of Conciliation and Investigation established on June 6 to deal with a dispute between the Corporation of the City of Edmonton and certain employees of the Edmonton Street Railway, being members of Local Division 569, Amalgamated Association of Street and Electric Railway Employees of America, was completed during July. The civic authorities refrained from nominating a person for appointment as board member, and the Minister appointed Colonel P. C. H. Primrose, of Edmonton, board member on the city's behalf. On the joint recommendation of Colonel Primrose and Mr. Farmilo, the board member nominated by the employees, the Minister appointed Mr. William Rea, K.C., of Edmonton, third member and chairman of the board.

## **Report of Board in Dispute Between the Western Stevedore Company and the Canadian National Railways and Certain of Their Employees**

The findings of the Board of Conciliation and Investigation in the matter of a dispute between the Western Stevedore Company and the Canadian National Railways and certain of their employees being stevedores, checkers, sealers, assistant stevedores, coopers, porters and crane operators, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, were received in the Department of Labour at the close of July. The dispute related to the employees' request for increased wages and certain changes in working conditions.

Following is the text of the various reports received in this matter. The majority findings, it will be noted, are signed by Mr. Robert Jacob, K.C., chairman, and Mr. Fred Bancroft, the board member nominated by the employees. The companies' nominee on the board, Mr. W. C. Hamilton, K.C., signed a minority report.

### **Report of Board**

*Re Industrial Disputes Investigation Act and in the matter of a dispute between the Western Stevedore Company and the Canadian National Railways, employers, and certain of their employees being stevedores, checkers, sealers, assistant stevedores, coopers, porters, and crane operators, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, employees.*

To the Honourable Norman McL. Rogers,  
Minister of Labour,

Ottawa,

Sir,

The Board of Conciliation and Investigation appointed by you under the provisions of the Industrial Disputes Investigation Act, Revised Statutes of Canada, Chapter 112, and amendments thereto, to enquire into the dispute between the Western Stevedore Com-

pany and the Canadian National Railways and their employees arising out of a request for the payment of higher wages than now are received, and certain changes in the working conditions, beg leave to report, advise and recommend as hereinafter set forth.

The location of the parties involved in the dispute is at Port Arthur and Fort William in the Province of Ontario.

The members of the Board assembled at Port Arthur on the morning of July 14th, 1936, and proceeded, after first taking their oaths of office, to familiarize themselves from the documents received from the Registrar under the Act with the nature of the dispute, the limitations of their duties, and the methods to be employed to have each of the parties concerned present their case to the Board.

On the following day, July 15th, after due notice to all the parties concerned, representatives of all the parties appeared before the Board and each named its representatives. Those named by the Western Stevedore Company were H. Murphy, President, T. L. O'Donnell, Vice-President, and W. Fairbridge, General Timekeeper; for the Canadian National Railway, H. G. O'Leary, Superintendent of Terminals, and S. McElmoyle, of the Vice-President's staff at Winnipeg. The employees named Frank H. Hall, Canadian Vice-President of the Brotherhood of Railway and Steamship Clerks, J. L. Pateman, General Chairman for employees of C.P.R. Western Lines, and J. J. Ratcliff, Assistant to Vice-President Frank H. Hall. In addition a number of the local officers of the union at Port Arthur and Fort William were called as witnesses.

Meetings of the Board were held at Port Arthur on each of the following days, namely:—July 14th, July 15th, July 16th, July 17th, July 18th, July 20th, July 21st, and at the City of Winnipeg on July 28th, 29th and 30th. At all these meetings all the members of the Board were present.

The presentation of the case by the various representatives occupied the sittings at Port Arthur, and on several occasions the Board directed the parties to meet in conference and try and reach a settlement of the items in dispute. On other occasions members of the Board endeavoured to assist the parties in reaching a settlement. However, finally the parties arrived at the stage when they agreed it was impossible to straighten out the matters in dispute. One or two of the minor differences relating to working conditions seemed to be agreed upon but the main items were left to the Board. The members of the Board when in Winnipeg made another

effort to find a formula upon which the parties might agree but were not successful. Strong efforts were made to have the members of the Board reach a unanimous decision but this could not be done as the absence of the signature of one member of the Board to this report attests. As a result nothing remained for the members of the Board except to study the facts and make recommendations, and the remaining sittings of the Board were held for that purpose.

The items of dispute between the parties were those set forth in the application for the appointment of a Board and in a general way are as follows:—A request by the employees that their rates of wages be increased to conform with that of railway workers similarly employed elsewhere, and changes in the working conditions which include recognition of the union. The changes in the working conditions are outlined in suggested amendments to the agreements at present in existence between the two companies and the employees, and these amendments are set out in the reference to the Board. It was upon this reference that the Board proceeded to conduct its enquiry.

Obviously the main item in the dispute is the rate of wages. The representatives of all the parties involved presented their case with keenness, emphasis and without any unfriendliness. All seemed to recognize the seriousness of the situation where so many men are employed.

A great number of written statements in the form of exhibits were filed with the Board. Several of these showed comparative rates under agreements with the railways for similar classifications. The history of the relations of the employees on the waterfront at Port Arthur and Fort William since 1921 was presented and comparative rates at various lake ports in Ontario filed as exhibits. All these documents have been carefully studied by the members of the Board.

It seems that the following facts are not in dispute. In 1921 the employees on the waterfront at Port Arthur and Fort William enjoyed what representatives of the employees called "standard rates." Indeed, they were three cents per hour above the standard for similar classifications elsewhere. From 1921 onward, due to various changes such as the post-war slump in business, the work being let to contractors, and the employees not being articulate, having no organization, and later the present depression, the wages were reduced by ten cents per hour, and an additional twenty per cent deduction. In 1934 a restoration of ten per cent of the twenty per cent

deduction took place, placing the employees in the same position as other workers on the railways, namely: Subject to a ten per cent reduction on the rate. The ten cent an hour reduction still remained on the basic rate. Last year in 1935, following an award by a Board of Conciliation and the threat of a strike by the employees when the award was rejected by the company, a three cent per hour increase was agreed upon by the companies and the employees, and agreements covering working conditions and wages entered into. These agreements were dated August 1st, 1935. The present requests are in the nature of a revision of these agreements.

The employees strongly urged, and they presented their case first, that they are eminently entitled to the standard rates in existence from Halifax to Vancouver on the various railways and included in signed agreements for these classifications, and these rates they presented in evidence. They strongly claim that they are not asking for increased wages at all but are merely asking for the restoration of reductions which should never have been imposed.

The representatives of the employers just as strongly urged that an agreement was entered into last August which was signed by both parties and that it is too early for any revision. The Western Stevedore Company declares that it is paying as much or higher in wages for these classifications as is being paid at other lake ports in Ontario. The company claims that there is no justification for a further increase in wages at the present time and that the requests of the employees should be refused. The Western Stevedore Company point out that it is engaged in a general contracting business and the C.P.R. business is only a part of their work and its employees should not be classed as railway employees.

The Canadian National representatives strongly object to any increase in wages being granted at this time. The representatives of the company declare "It is obvious that in view of the position taken with other classes of employees the Railway is not in a position to grant special or differential treatment to this group which most recently obtained an adjustment." The employees' proposals are considered by the company to be unreasonable.

The representatives of both companies fairly well agreed in their opposition to the requests of the employees.

Following a careful study of all the evidence submitted, including the rates of pay for these classifications in agreements existing between Canadian railways and their em-

ployees from Halifax to Vancouver, covering both inland and waterfront employees, and taking into consideration the rates of pay for this work at lake ports in Ontario, and considering the seasonable nature of the work and incidentally the amount of money these employees earned in a season of navigation, and also the wages of other employees in comparable work in Port Arthur and Fort William, the undersigned are of the opinion that the wages now being paid to the employees involved in this dispute are too low. We arrive at this conclusion without expressing any opinion as to whether the employees concerned, or any of them, are railway workers who should properly come within the standard of rates of pay by railways for such work.

The Board recommends that the rate of wages for all the classifications involved in this dispute be increased by three cents per hour.

#### WORKING CONDITIONS

In existence at the present time are two agreements, one between the Western Stevedore Company and its employees and another between the Canadian National Railways and its employees, covering the workers involved in this dispute. These agreements became effective on August 1st, 1935, and subject to the usual thirty days' notice when either of the parties seek a revision.

These two agreements consist of twenty clauses in each case. The employees of the Western Stevedore Company submitted amendments to clauses 1, 2, 3, 4, 10, 13, 14 and 17. The employees of the Canadian National Railways submitted amendments to clauses 1, 2, 3, 10, 13, 14 and 17. The remainder of the two agreements are not in dispute. Both companies expressed their willingness to renew the present agreements, including the wage rates for another period.

A great deal of evidence was presented in connection with the proposed changes in the working conditions. The members of the Board endeavoured to induce the parties to agree upon the changes suggested, so that the working conditions would be taken out of the area of the dispute. Conferences were held between the parties, but, with the exception of one or two minor matters, no agreement was reached.

In view of the evidence presented and information gathered by members of the Board during a view of the employees at work and a survey of the location of the various buildings where the men are employed:—

The Board recommends:—

1. That Clause 1 in the agreements be amended to provide a minimum of two hours at prevailing rates for men starting to work,

and that men working more than ten hours shall be paid time and one half the prevailing rate until relieved.

2. That Clause 2 in the agreements be amended to prevent men from working more than six hours without a meal period.

3. That Clause 4 in the agreement between the Western Stevedore Company and its employees be amended to conform with the clause in the agreement between the Canadian National Railway and its employees by providing that "employees temporarily assigned to lower rated positions shall not have their rates reduced."

4. That Clause 10 in the agreements be amended in such a manner as to provide against any discrimination under the leave of absence arrangement.

5. That Clause 13 be amended in the agreements, to provide that when committee-men are called into consultation at the company's request, they shall be paid their wages for the time so occupied.

6. That Clause 14 be amended in the agreements to provide, that when an employee is disciplined and it results in suspension or dismissal; should such employee be found not guilty at the resultant hearings, the charge should be stricken from the record, the employee reinstated and the employee paid for the time he has lost.

7. With regard to Clause 17, the Board feels that the companies should eliminate the complaint of the men regarding having to pay their own transportation from one place to another during working hours.

The question of recognition of the union to which the employees belong is brought up in several parts of the proposed amendments. The representatives of the Western Stevedore Company and the Canadian National Railway declared their willingness to meet with a committee of their own employees, but objected to meeting with the representatives of the International Union as such. In fact, the representatives of both the companies filed a formal protest to the representatives of the International Union appearing for the employees before the Board. However, with this technical objection filed and the ruling of the chairman, that the representatives were properly before the Board, hearings and negotiations were carried on between all the parties in the friendliest manner.

The Board feels, that in view of the fact that contractual relations exist between the

employees involved in this dispute and the two companies; the employees should have the assistance of representatives of their labour organization, who may represent them in the negotiations leading up to a contract and afterwards in the carrying out of the details of the contract.

Another item upon which the Board makes special mention, is the question of work between midnight and seven a.m. A great deal of evidence was heard upon this point. During the fall of last year it almost precipitated a real row between the Western Stevedore Company and its employees. Last year, the situation was much relieved by this work being almost eliminated. However, the C.N.R. and the W.S.C. claim, that the steamship companies insist on unloading at certain times and this work occasionally becomes necessary.

The Board feels, that the two companies should use every endeavour to eliminate the work between 12 midnight and 7 a.m. If this work is absolutely necessary, then the companies should pay a much higher differential rate of wages for work performed between these hours than is paid at the present time.

The two agreements in existence, copies of which are attached to this report, should be changed by the parties to conform with this report when the award becomes operative. The two companies appeared before the Board together, and there is no reason for dealing with the agreements separately.

The Board recommends further that these changes be made effective from and after August 1st, 1936 and to continue without change until March 1st, 1937.

We feel that nothing further requires to be said, and so we find, report, recommend and award as above set forth.

Mr. Bancroft is of the opinion, that full standard rates of pay should be inserted in this report, and that the employees are entitled to an eight hour day and also that the International Union should have recognition, but concurs in the above recommendations in order to make a majority report effective.

All of which is respectfully submitted.

(Sgd.) Robert Jacob,  
Chairman.

(Sgd.) Fred Bancroft,  
Member.

Member.

Dated, Winnipeg, July 30th, 1936.

### Provision of Agreement

#### WESTERN STEVEDORE CO. LIMITED

Stevedores & Contractors,

Fort William, August 16, 1935.

#### AGREEMENT BETWEEN THE WESTERN STEVEDORE COMPANY AND THEIR EMPLOYEES

*Rules and rates of pay governing the services of certain classes of employees engaged in handling all rail and lake and rail and rail freight, effective August 1, 1935.*

Clause 1. Employees shall be paid the specified rates of pay for actual time worked, with an extra differential for work at night between the hours of 7 p.m. and 7 a.m.

2. A meal period shall be allowed between 6 a.m. and 8 a.m.; 12 noon and 2 p.m.; 6 p.m. and 8 p.m.; 12 midnight and 2 a.m. At the termination of an assignment employees will be paid on a basis of either the half hour or the full hour.

3. When men are required to work on Sundays, or New Year's Day, Good Friday, Victoria Day, Dominion Day, Thanksgiving Day, Labour Day or Christmas Day, they shall be paid for all work performed at the rate of time and one-half.

4. Employees, temporarily or permanently assigned to higher rated positions, shall receive the higher rates when occupying such positions. Temporary assignment contemplates the fulfilment of duties and responsibility of the position during the time occupied, whether the regular occupant of the position is absent or whether the temporary assignee does the work irrespective of the presence of the regular employee.

5. New positions or vacancies will be promptly bulletined for a period of five days. Employees desiring such positions will file their applications with the designated officer of the employer within that time, and an appointment will be made within five days thereafter. Copies of bulletins and names of applicants for new positions or vacancies will be furnished the employees' committee upon request.

6. Promotions shall be based on ability, merit and seniority, ability and merit being sufficient, seniority shall prevail. The officer of the employer shall be the judge subject to appeal.

7. Employees declining promotion shall not lose their seniority of service. Employees accepting promotion will be allowed from ten to thirty days in which to qualify, and failing will be returned to former position without loss of seniority.

8. In reducing the number of positions for which a higher rate than that of trucker has been established, such reductions will be made in accordance with seniority. Employees thus reduced may revert to former classifications. When such positions are re-established, they shall be filled according to seniority as checker or other classification.

9. In reducing forces, seniority or service shall count, and when forces are increased employees will be returned to the service in order of their seniority. At the close of navigation, when employees occupying positions rated higher than a trucker revert to their former classification through reduction in forces, such employees shall

be considered as senior in the classification to which they revert.

10. A seniority roster will be posted immediately this agreement comes into effect, and will be revised and posted within thirty days of commencement of navigation each year. The roster will show the name and date of entry into the service of each employee, together with the date when last promoted. It will remain open subject to correction for a period of sixty days from date of posting; the employees' committee shall be given a copy on request. An employee must have six months continuous service before being placed on the seniority list. An employee on the seniority list absent without proper leave for more than thirty days will lose his seniority.

11. The employees on the seniority roster will be those who have been continuously in the service as from May 16, 1921, together with those employees who have since that date entered the company's service, and have completed six months continuous service, and have been employed steadily since their date of entry into the service.

12. The seniority roster shall be established for the purpose of securing to the senior employee, preference of employment as from season to season, and will not be considered as permitting displacement of men on a seniority basis during the day's work or assignment.

13. Necessary meetings shall be arranged between a committee composed of employees and the Officers of the Employer to discuss matters affecting this agreement and its application at suitable times mutually agreed upon. Such employees' committee shall be given leave of absence from work for this purpose.

14. An employee on the seniority list, dismissed, disciplined or who considers himself unjustly treated, shall have a fair and impartial hearing within five days of request for same. At such hearing he may be represented by one or two employees. The decision will be rendered within fifteen days thereafter. If an appeal is taken from the decision an employee may be represented at the hearing by one or two employees.

15. An employee will be advised as to cause of discipline in writing.

16. A bulletin board shall be maintained on the property on which will be shown for the information of the employees the expected arrival time of steamers, as secured from the steamship companies.

17. The time occupied in going from one shed or ship to another shed or ship, occurring in the course of an employee's assignment shall be considered as continuous duty and paid accordingly this to apply at railway sheds, Ogilvie Flour Mill and the International Companies Warehouse (Harvester).

18. Rates of Pay	Day	Night
Stevedores. . . . .	50c	50c per hr.
Checkers, Sealers and Asst. Stevedores. . . . .	45c	47c " "
Coopers. . . . .	41c	43c " "
Porters. . . . .	39c	41c " "
Crane Operators. . . . .	61½c	63½c " "

19. All employees in supervisory positions and rated higher than a checker shall continue to accumulate seniority in their

respective ranks, and upon reduction of forces shall be governed by Clause 9.

20. The working conditions and rates of pay as set forth in this agreement shall remain in effect prior to March the first of any year, and shall continue in effect from year to year, either party having the right to terminate this agreement by giving thirty (30) days' notice.

CANADIAN NATIONAL RAILWAYS  
LAKEHEAD TERMINAL DIVISION

Rules and rates of pay governing the services of certain classes of employees engaged in handling rail and/or water freight, effective August 1st, 1935.

1. Employees shall be paid the specified rates of pay for actual time worked, with an extra differential for work at night between the hours of 7 p.m. and 7 a.m.

2. A meal period shall be allowed between 6 a.m. and 8 a.m.; 12 noon and 2 p.m.; 6 p.m. and 8 p.m.; 12 midnight and 2 a.m.

3. When the men are required to work on Sundays, or New Year's Day, Good Friday, Victoria Day, Dominion Day, Thanksgiving Day, Labour Day or Christmas Day, they shall be paid for all work performed at the rate of time and one half.

4. Employees temporarily or permanently assigned to higher rated positions shall receive the higher rates when occupying such positions; employees temporarily assigned to lower rated positions shall not have their rates reduced. A temporary assignment contemplates the fulfillment of the duties and responsibilities of the position during the time occupied, whether the regular occupant of the position is absent or whether the temporary assignee does the work irrespective of the presence of the regular employee.

5. New positions or vacancies will be promptly bulletined for a period of five days. Employees desiring such positions will file their applications with the designated officer of the employer within that time, and an appointment will be made within five days after that time. Copies of bulletins and names of applicants for new positions will be furnished the Employees' Committee upon request.

6. Promotions shall be based on ability, merit and seniority; ability and merit being sufficient, seniority shall prevail. The Officer of the employer shall be the judge subject to appeal.

7. Employees declining promotion shall not lose their seniority of service. Employees accepting promotion will be allowed from ten to thirty days in which to qualify, and failing will be returned to former position without loss of seniority.

8. In reducing the number of positions for which a higher rate than that of the trucker has been established, such reductions will be made in accordance with seniority. Employees thus reduced may revert to former classification. When such positions are re-established, they shall be filled according to seniority as checker or other classification.

9. In reducing forces seniority of service shall count, and when forces are increased employees will be returned to the service in the order of their seniority. At the close of navigation, when employees occupying positions rated at higher than a trucker revert to their former classification through a reduction in forces, such employees shall be considered as senior in the classification to which they revert.

10. A seniority roster will be posted immediately this agreement comes into effect, and will be revised and posted within thirty days of the commencement of navigation each year. The roster will show the name and date of entry into the service of each employee, together with the date when last promoted. It will remain open subject to correction for a period of sixty days from date of posting; the employees' committee shall be given a copy upon request. An employee must have six months' continuous service before being placed on the seniority list. An employee on the seniority list absent for more than thirty days, without leave of absence, will lose his seniority.

11. The employees on the seniority roster shall be shown as either permanent or temporary. Those on the permanent list will be those employees who have been continuously in the service as from June 1, 1931, together with those employees who have since that date completed six months' continuous service in each year during the last two consecutive years. Additions to the permanent list will be made in the future on this basis. Other employees, who have not completed service as above, will be shown on the temporary list.

12. The seniority roster shall be established for the purpose of securing to the senior permanent employees preference of employment as from season to season and will not be considered as permitting displacement of men on a seniority basis during the day's work or assignment.

13. Necessary meetings shall be arranged between a committee composed of employees and the officers of the employer to discuss matters affecting this agreement and its application at suitable times mutually agreed upon. Such employees' committee shall be given leave of absence for this purpose.

14. An employee, on the permanent list, dismissed, disciplined, or who considers himself unjustly treated, shall have a fair and impartial hearing within five days of the request for same. At such hearing he may be represented by one or two employees. The decision will be rendered within fifteen days thereafter. If an appeal is taken from the decision, an employee may be represented at the hearing.

15. An employee will be advised cause of discipline.

16. A bulletin board shall be maintained on the property on which will be shown, for the information of the employees, the expected arrival times of boats as secured from the Steamship Companies.

17. The time occupied in going from one shed or ship to another shed or ship, occurring in the course of an employee's assignment, shall be considered as continuous duty, and paid accordingly.

18. Rates of Pay	Day per hour	Night per hour
Checkers and Assistant		
Stevedores.. . . .	47c.	49c.
Sealers and Coopers.. . . .	42c.	44c.
Porters.. . . .	40c.	42c.
Crane Operators.. . . .	65c.	67c.

The above rates will be subject to a deduction of ten per cent as from August 1, 1935, and thereto a bonus of three (3) cents per hour will be then added.

19. All employees in supervisory positions, and rated higher than a checker, shall continue to accumulate seniority in their respective ranks, and upon reduction of forces shall be governed by clause 9.

20. The working conditions and rates of pay, as set forth in this agreement, shall remain in effect until December 31, 1935, and thereafter, from year to year, subject to thirty days' notice from either party to be given prior to March 1 in any year.

### Minority Report

To the Honourable the Minister of Labour,  
Ottawa, Ontario.

Sir:

*In the Matter of the Industrial Disputes Investigation Act and of a dispute between the Western Stevedore Company and the Canadian National Railways, and certain of their employees, being stevedores, checkers, sealers, assistant stevedores, coopers, porters and crane operators, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.*

Realizing as I do the desirability of agreement between members of Boards constituted under this Act, it is with very great regret that I find myself unable to concur in the conclusions reached by the majority of the present Board. It accordingly seems to me proper that I should state the reasons for my position.

The Board was established following two applications from the respective employees of the two employers. The applications disclose a number of grounds of complaint, but after hearing the parties it is clear that the real dispute concerns the wages which the employees may be entitled to receive, and that the other items relate to matters of relative unimportance, capable of adjustment between the parties without intervention or assistance.

In the month of August, 1935, each of the employers entered into a written agreement with its employees fixing the rates of pay and rules of service. Apart from certain unimportant provisions necessitated by some slight differences in the requirements of the works of the two employers, the agreements are for all practical purposes, identical. In the month of February, 1936, the employees gave notice of their desire to terminate these agreements.

The employees seek an increase in the rates provided by the said agreements. The following tables show the wages per hour now paid by the employers to the various classes of employees as well as the figures to which the employees desire to have such rates increased:

Western Stevedore Company Limited				
Class	Now paid		In'd fig. asked	
	Day	Night	Day	Night
Stevedores . . . .	.50	.50	.62	.67
Checkers, Sealers & Asst. Stevedores..	.45	.47	.57	.62
Coopers . . . . .	.41	.43	.53	.58
Porters . . . . .	.39	.41	.50	.55
Crane Operators . .	.61½	.63½	.72	.77
Canadian National Railways				
Checkers and Asst. Stevedores . . . .	.47	.49	.57	.62
Sealers and Coopers	.42	.44	.53	.58
Porters . . . . .	.40	.42	.50	.55
Crane Operators . .	.65	.67	.72	.77

The employers point out that these increases involve advances in the wages paid under the agreements of August, 1935, of from 28.2 per cent to 34.8 per cent. Having in mind that such increases were demanded within approximately six months of the making of the agreements, the percentages are peculiarly striking, and call for a clear explanation on the part of those making the demand.

As I understand the case presented to the Board on behalf of the employees, it was not seriously suggested that the rates now in effect are inadequate for the services performed when considered alone. In view of the fact that the parties, as recently as August, 1935, entered into solemn agreements establishing such rates, it seems to me it would in any event be extremely difficult at this early date to argue that the rates are inadequate unless it could be shown that there has been a material change in conditions in the meantime. I did not hear any such argument or suggestion advanced before the Board.

A comparison of the wages paid at Fort William and Port Arthur with those paid at other ports on the Great Lakes shows no inadequacy. On the contrary, it indicates that rates and conditions at these two places are above the average prevailing at the other ports. The great majority of the employees interested in this investigation are classed as porters. The following sets forth the rates paid to men of that class at the principal ports on the Great Lakes:

*Toronto*—42c days—45c nights, no overtime paid for Sundays or holidays.

*Windsor, Hamilton and Sarnia*—40c for day and night work. No overtime paid for Sundays or holidays.

*Port McNicoll*—37c for day and night work. No overtime paid for Sundays or holidays.

*Fort William*—39c days—41c nights. Time and one half paid for work performed on Sundays and holidays.

*Port Arthur*—40c days—42c nights. Time and one half paid for work performed on Sundays or holidays.

The employees in the present matter are chiefly of foreign extraction. They can only be classed as unskilled labour—in fact it would be difficult to suggest any class of labour giving employment to men with less skill. No training or experience of any kind as a preliminary to employment is necessary. With this in mind it is interesting to compare the rates received by these men with what are earned by men engaged in the maintenance of way on Canadian Railroads. The net rates paid to such men are as follows:

First three months, 25c per hour  
First year thereafter, 34.2c per hour  
Second year, 36.9c per hour  
Third year, 38.7c. per hour.

There are over 40,000 men so employed on maintenance of way work, and I think it must be conceded that the nature of their employment requires a somewhat greater degree of skill than that of the employees on the lake docks.

Apparently those in charge of the cases of the employees recognized that their complaints must be based on some ground other than inadequacy of remuneration for the value of the services performed. Both applications complain that the employees are not receiving the rate of wages paid to "*railway workers similarly employed elsewhere*." That is the sole ground so far as the question of wages is concerned. At the hearing this ground was developed to show that truck handlers engaged exclusively in railway work at railway stations receive a basic wage of 50 cents per hour, and it was contended that the employees on the docks should receive the same wages as such freight handlers in stations. To effect such a result the employees claim they should be classified as "*railway workers*," and be placed in the same category as the freight handlers at railway stations. The dispute therefore involves purely and simply, a question of classification of employees.

Difficulties in the way of the employees contention are readily apparent. The Western Stevedore Co. Limited is not a railway company in any sense and I can think of no reason, nor have I heard one advanced, why its employees should be classed as railway workers. In order that the contention might prevail against Canadian National Railways, it would be necessary to assume that all persons paid by a railway are of necessity railway workers. It must be remembered that the work in which its employees are engaged arises not out of the requirements of the rail-

way as such, but out of the existence of docks and shipping. The work is not primarily a matter of railway operation at all, but so far as Canadian National Railways is concerned, becomes necessary for the purpose of handling the freight carried by Canada Steamship Liners. Suppose the position were altered so that the transfer of freight between boats and trains should be undertaken by Canada Steamship Lines instead of by Canadian National Railways, could it possibly be said that persons engaged in performance of such work would be railway workers?

In my humble opinion the recommendations contained in the report of the majority of the Board will be of little if any assistance in disposing of the existing disputes. In presenting the case for the employees, Mr. Hall, Canadian Vice-President of the Brotherhood of Railway Clerks, stated with the utmost candour and frankness that the employees will never abandon their position until the question of classification is determined in their favour. The accuracy of this statement is confirmed by the fact that the agreements of August, 1935, were abrogated by the employees at the earliest possible date after their completion. The attitude of the representatives of the employees before the Board as well as the procedure with regard to the last agreements compel me to the view that the adoption of the recommendations, would result at best in a very temporary lull in the present disturbance.

Notwithstanding my opinion as to the adequacy of the present rates of pay, I would be only too willing to suggest to the employers that they should consider paying somewhat higher rates than what they feel to be justifiable if they could by so doing be assured of a disposition of the dispute with at least some degree of finality. In the present instance there is no ground upon which any such assurance can be held out to the employers, and there is the definite statement of the employees' representative to the contrary.

Having in mind the decidedly poor crop prospect in Western Canada this year with its certain lowering effect on the volume of commodities to be carried, and also the fact that an increase in wages was granted last year, I do not think that the present is the proper time at which to consider further increases.

The material before the Board shows that the volume of business conducted by the employers at the lakehead is less than one-half of what it was between the years 1922 and 1929, while the number of employees is almost as large as in the more active years. The unfortunate result is that there remains

available only one-half of the original gross earnings to be divided among practically the same number of men as formerly. Undoubtedly this feature aggravates the whole situation. But it is something which is utterly beyond the control of the employers, and their losses from the shrinkage of business are at least fully as serious as those of the men.

I can think of no substantial reason to support a recommendation for any increase in the present rates of pay, and with all deference to the views of the majority of the Board, I find nothing in their report to assist in this regard. Much as I sympathize with these employees, and much as I would like to find some method of improving their position, I would not feel justified in basing a recommendation solely on sympathetic or sentimental grounds.

Underlying the applications is an attempt to compel the employers to deal with the International Unions. In fact, at times it would almost appear that this matter was initiated fully as much for the benefit of the International Organization as for the benefit of the men actually employed. So far as I am concerned, I would require something more than a mere request before making a recommendation on this phase. At present, all negotiations between the employers and the employees are carried on on behalf of the latter by their duly appointed committees. Such committees are recognized by the employees for all purposes. It is manifest that the employees have the full benefit of the advice and guidance of the larger organization, without being any way hindered by the employers, and to ask the employers to go further would seem to me to be a species of unwarrantable dictation.

As mentioned above, it is with extreme regret that I am obliged to differ with my colleagues on the Board, particularly as I know that throughout they have both been most earnest and sincere in their efforts to dispose of the existing disputes. However, as I am certain that their recommendations do not in any way solve the difficulties, I feel it my duty to express my opinion as set forth in this report.

Dated this 31st day of July, A.D. 1936.  
All of which is respectfully submitted.

(Sgd.) W. C. HAMILTON,  
A Member of the Board.

The Alberta Gazette of July 31, contained notice of the transference of the administration of the Industrial Standards Act from the provincial secretary to the Minister of Trade and Industry.

In 1935 there were eight plants operating in the linseed and soybean oil industry. These plants made products to the factory value of \$3,068,776 as compared with \$2,644,074 in 1934 and \$2,086,557 in 1933. Linseed oil is the principal item of production, the output in 1935 amounting to 3,213,279 gallons valued at \$2,169,923. This is followed by oilcake meal with an output of 24,635 tons and a value of \$721,804. There were 194 employees engaged with salaries and wages amounting to \$235,347.

The Addressograph-Multigraph Company of Canada Limited, has announced that all office and factory employees will receive a two-weeks vacation with full pay. In order to carry out this policy, a staggered holiday system has been adopted thereby making possible continuous office and factory operation.

#### **Regulations governing employment of motor carriers—Highway Traffic Act, Manitoba**

In accordance with the provisions of the Highway Traffic Act, the Municipal and Public Utility Board of Manitoba has issued an order, gazetted on June 27, 1936, regulating the hours of employment and rates of wages of employees of motor carriers engaged in public service. The provisions, effective July, 1936, of the order are as follows:

1. That no owner of a public service vehicle, certificated for the transportation of passengers, shall require or permit any driver employed by him to be on duty in driving such vehicle, more than nine hours, nor in any capacity more than twelve hours, in any twenty-four consecutive hours, nor on duty more than six days in any one week, emergencies due to breakdowns excepted.

2. That no owner of a public service vehicle certificated for the transportation of passengers, who himself drives any such vehicle, shall be on duty in driving such vehicle more than nine hours, nor in any capacity more than twelve hours in any twenty-four consecutive hours, nor more than six days in any one week, emergencies due to breakdown excepted.

3. That no owner of a public service vehicle certificated for the transportation of passengers, shall pay any driver in his employ less than the following minimum wages:

- (a) To a driver employed by the month, eighty dollars per month; by the week, twenty dollars per week for a week of six days;

- (b) To a driver employed otherwise than by the month or week, not less than at the rate prescribed in paragraph (a) above;

- (c) Where a basis not herein provided for is proposed the scale of wages shall be first approved by the Board.

## STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1936

THE following table shows the number of disputes, workers involved and time loss for July, 1936, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*July, 1936 .....	7	3,776	44,342
*June, 1936 .....	14	1,004†	4,014
July, 1935 .....	26	6,339	52,118

\* Preliminary figures. † Corrected figure.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported, are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Although the number of strikes and lockouts during July was less than during June, the number of workers involved and the time loss were considerably increased owing to the occurrence of two strikes involving relatively large numbers of employees, namely that of salmon fishermen on the coast of British Columbia and that of men's clothing factory workers at Winnipeg. In June none of the disputes involved large numbers of employees or caused much time loss. In July, 1935, four disputes of importance were in progress, those involving loggers in the Nipigon district in Ontario, longshoremen and other water transport workers in Vancouver and certain other ports in British Columbia (two disputes) and a strike of coal miners at New Waterford, N.S.

Two disputes, involving 64 workers were carried over from June and five disputes commenced during the month. Of these seven disputes, two terminated during the month, one resulting in favour of the employers involved and one in favour of the workers concerned. At the end of July, therefore, there were on record five disputes recorded as strikes or lockouts, namely: men's work clothing factory employees, Winnipeg, Man.; truck drivers, labourers and machine operators, James River, N.S.; taxi drivers, Winnipeg, Man.; restaurant employees, Toronto, Ont.; and automobile mechanics, Toronto, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information had been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to four such disputes, namely: photo-engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; moulders, Peterborough, Ont., February 27, 1934, one employer; and laundry employees, Toronto, Ont., May 18, 1936, one employer.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A minor dispute involving about fifty employees in a matting factory at Cobourg, Ont., on May 11 was reported too late for inclusion in the June issue of the LABOUR GAZETTE. It appears that a reduction in piece rates for certain employees was proposed and the employees ceased work for a short time pending negotiations with the employer. This resulted in the withdrawal of the proposal.

A minor dispute on July 9 involving ten boys employed in a box factory at Penetanguishene, Ont., has been reported. It appears that the boys were paid 7½ cents per hour, ten hours per day, and when hours were reduced to eight per day, owing to lack of orders, they requested 10 cents per hour. This being refused they ceased work, but some of them resumed work later.

A stoppage of work by thirty employees in a leather garment factory in Toronto from July 2 to July 22 has been reported. The employer had refused to negotiate a new agreement with the United Garment Workers of America. The employees attended at their working places each day but did no work during this period. On July 22 they notified the employer that unless their demands were conceded they would strike, and as a result of negotiations an agreement was reached, providing for wage increases and union shop conditions.

A cessation of work about July 1 by men in extra gangs on railway track maintenance work near the Skeena River in B.C., has been reported but particulars have not been received. It appears that the men demanded an increase

in wages from 25 cents per hour, the extra gang rate, to 40 cents, the sectionmen's rate, and improved camp conditions. Work was reported to have been resumed when the officials agreed to improve camp conditions.

A lockout of seventeen workers in a scrap iron establishment in Toronto, on July 25, has been reported but particulars have not been received. It was stated that the employees had joined a union on the day before they were dismissed.

A cessation of work by a small number of gold miners at Atlin, B.C., about the middle of July has been reported but particulars have not yet been received. It is reported that the men demanded an increase in wages to \$6 per day.

A cessation of work about July 20 by 120 men employed on road construction near The Pas, Man., was reported in the press. Particulars have not been received but it appears that the strikers demanded increases in wages and reduced rates for board. A settlement at 25 cents per hour and \$5 per week for board was reported and work was resumed after two days.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**TAXI DRIVERS, WINNIPEG, MAN.**—This dispute involving a number of taxi drivers dismissed by one company on May 4, 1936, on account of membership in the One Big Union, was unsettled at the end of the month. Several of the men affected had secured work elsewhere and the employer offered to engage several of the others when required.

**RESTAURANT EMPLOYEES, TORONTO, ONT.**—On July 10, it has been reported, thirty additional employees ceased work, objecting to signing an undertaking not to join a union as requested by the proprietor. An injunction against picketing by certain members of the Hotel and Restaurant Employees' International Alliance being in force, picketing was undertaken by other persons not members of a union and an injunction against this was reported to have been applied for on July 24, but decision was reserved.

**SALMON FISHERMEN, RIVER'S INLET, ETC., B.C.**—A number of fishermen at River's Inlet (approximately 1,400), ceased work on July 5, demanding an increase in the minimum price of fish from 40 cents each to 50 cents. An agreement as to the scale of prices for the season had not been reached before the season opened and the cannery owners issued a scale. The provincial Minister of Labour and Commissioner of Fisheries proposed that

the dispute be referred to arbitration under the Fisheries Act so that fishing might proceed in the meantime, but the fishermen's committee insisted on collective bargaining with the cannery operators. Meetings were held on July 14 and July 15 and they offered to accept 45 cents per fish but the operators preferred to have arbitration. Numbers of fishermen in neighboring districts also ceased work later, in some cases resuming work in a short time. At Alert Bay, 315 fishermen were out from July 5 to July 15. At Smith's Inlet, 370 went out on July 12 and small numbers were reported to be out for short periods at Butedale and Prince Rupert. Several canneries were closed, fish not being available, and about 1,000 employees were thus indirectly involved in the dispute. On July 22 and July 23 about one hundred fishermen resumed work under police protection at River's Inlet. Other fishermen left for southern districts where the fishing season was opening. By the end of the month the sockeye run in the district being over, the dispute lapsed.

**MEN'S WORK CLOTHING FACTORY EMPLOYEES, WINNIPEG, MAN.**—Employees in sixteen establishments, manufacturing men's overalls, work shirts, etc., ceased work on July 21 demanding an agreement with the United Garment Workers of America. As a result of negotiations an agreement had been drawn up but it was signed by only two firms. Several other firms agreed to accept it if signed by the large firms, but these refused. On July 22 and July 23 the agreement was accepted by all but three firms and work resumed on the following day in the establishments of all but these where about 200 workers were employed. One picket was arrested on charges of assault and intimidation and remanded for trial. At the end of the month the dispute was untermiated.

**FURNITURE FACTORY WORKERS, LISTOWEL, ONT.**—A number of employees in one establishment ceased work for one day, July 21, in protest against alleged improper classification of certain employees as skilled, semi-skilled and unskilled under the wage scale in the agreement for furniture factories in Ontario under the Industrial Standards Act of Ontario (LABOUR GAZETTE, August, 1935, p. 736). At a conference of the management and officials of the United Brotherhood of Carpenters and Joiners of America, attended by officials of the Ontario Department of Labour, a satisfactory classification was drawn up and work was resumed on the following day. The terms of settlement are to be in effect until August 4 when the provincial agreement expires and a new agreement is expected to come into force.

TRUCK DRIVERS, LABOURERS, MACHINE OPERATORS, ETC., JAMES RIVER (ANTIGONISH), N.S.—Truck drivers, thirty in number, employed by a contractor on road construction, ceased work on July 27, demanding an increase in wages. On the following day during negotiations the strikers offered to accept \$1.70 per hour if ten hours work per day were guaranteed, but the employer would not do this and a settlement was not reached. On July 29, labourers, road machine operators, etc., also demanded wage increases and ceased work. A settlement had not been reported by the end of the month.

AUTOMOBILE MECHANICS, TORONTO, ONT.—Employees in two garages ceased work on July 28 and were joined by those in five other garages on July 31 demanding an agreement with the International Association of Machinists with wage increases, eight-hour day and forty-four hour week, time and one-half rates for overtime, double time for Sundays and holidays, etc. Negotiations between the representatives of the union and of the Automobile Trade Association were carried on prior to the strike as a result of conciliation by the Toronto representative of the Department of Labour, but a settlement was not reached. Early in August employees in several other garages also ceased work.

### STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1936\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>(a) Strikes and Lockouts in progress prior to July, 1936.</b>			
TRANSPORTATION— Local— Taxi drivers, Winnipeg, Man...	14	250	Alleged lockout, May 4, 1936; <i>re</i> employment of union members; untermiinated.
SERVICE— Business, etc.— Restaurant employees, Toronto, Ont.....	50	1,000	Commenced May 1, 1936; for reinstatement of workers allegedly discharged for union activity; untermiinated.
<b>(b) Strikes and Lockouts commencing during July, 1936.</b>			
FISHING, ETC.— Salmon fishermen, River's Inlet, etc., B.C.....	2,500	40,000	Commenced July 5, 1936; for increase in price for fish; lapsed on closing of local fishing season July 31, 1936; in favour of employers.
MANUFACTURING— Textiles, Clothing, etc.— Men's work clothing factory employees, Winnipeg, Man...	950	2,500	Commenced July 21, 1936; for union recognition and union agreements; untermiinated.
Other Wood Products— Furniture factory workers, Listowel, Ont.....	90	90	Commenced July 21, 1936; <i>re</i> classification of employees affecting wage rates; terminated July 21, 1936; in favour of workers.
CONSTRUCTION— Highway— Truck drivers, labourers, machine operators, etc., James River (Antigonish), N.S....	110	390	Commenced July 27, 1936; for increased wages; untermiinated.
SERVICE— Business, etc.— Automobile mechanics, Toronto, Ont.....	62	112	Commenced July 28, 1936; for union agreement with increased wages and reduced hours; untermiinated.

\*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

The latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing down to date that given in the issue of February, 1936, in the review of Strikes and Lockouts in Canada and Other Countries, 1935. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in June was 67, and 17 were still in progress from the previous month, making a total of 84 disputes in progress during the month, involving 32,500 workers with a time loss of 191,000 working days for the month.

Of the 67 disputes beginning in the month, 14 were over demands for increases in wages, 9 over other wage questions, 2 over questions of working hours, 22 over questions respecting the employment of particular classes or persons, 12 over other questions respecting working arrangements, 6 over questions of trade union principle and 2 over demands for the withdrawal of summonses against certain workers for breach of contract. During the month, settlements were reached in 60 disputes, of which 24 were settled in favour of workers, 23 in favour of employers and 13 ended in a compromise. In 7 other disputes work was resumed pending negotiations.

About 3,000 coal miners near Rotherham were on strike from June 24 to July 4 "for the withdrawal of summonses for breach of contract issued against certain workpeople who had been involved in a previous stoppage of work at the colliery." Work was resumed July 4 following the hearing of the summonses.

Two thousand furniture workers at Glasgow and various towns in Scotland went on strike May 25 for increases in wages. No settlement had been reported at the beginning of July.

### Australia

The number of disputes reported for the year 1935 was 182, involving 260 establish-

ments and directly involving 45,242 workers, with a total time loss of 497,014 working days for the year and an estimated loss in wages of £383,645.

### Belgium

The widespread strikes which occurred during June and were noted in the last issue of the *LABOUR GAZETTE* were settled through a conference of employers' and workers' organizations called by the Prime Minister June 17 at which a general agreement was drawn up. Later, joint committees in the several industries met to draw up agreements for these industries and by the end of June agreements had been reached in most of the industries.

Gains secured by the workers which were later ratified by legislation included recognition and protection of the free right of association, annual holidays with pay in industry and commerce, the progressive reduction of working hours to 40 per week for work of a dangerous or unhealthy nature. The general agreement also provided for minimum wage rates for adult male workers and a suitable adjustment of family allowances.

### France

The strike movement in France mentioned in the last issue of the *LABOUR GAZETTE* continued to a lesser extent in July. Many of these strikes were "stay-in" strikes in which the strikers took possession of the factories and other establishments but refused to work. By the middle of the month, following appeals from the Government and trade union officials, a large proportion of the strikers had resumed work. Further outbreaks occurred about July 22 in the agriculture and metal industries, a total of 82,000 workers in all industries being reported out on strike at that time. A few days later, however, this number was greatly reduced. Social legislation enacted since the beginning of these strikes include the compulsory enforcement of labour agreements, the 40-hour week and annual vacations with pay for workers.

### Mexico

A ten-day strike of 3,000 electrical workers at Mexico City and surrounding district caused the shut down of all electrical power except for limited emergency purposes for this period. Many thousands of workers were thus thrown out of work. A settlement was reached July 27 which granted wage increases, but in which the other demands of the strikers were to be discussed after the resumption of work.

### United States

The strike of employees of a radio manufacturing company at Camden, New Jersey, noted in the last issue of the *LABOUR GAZETTE* continued until July 22 when strikers voted to return to work. The Company had previously agreed to an election sponsored by

the National Labour Relations Board to determine the collective bargaining agency of the majority of the employees, providing work was resumed and the other demands dropped.

The strike of steel workers at Portsmouth, Ohio, also mentioned in the last issue of the *LABOUR GAZETTE*, was settled July 11 through government intervention.

## CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

### Summary of Recent Decisions

**R**EPORTS have been received of four cases recently settled by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the *Labour Gazette*, December 1935, page 1100 and in previous issues; and the fifth report of the proceedings of the Board, covering the period from October 1, 1930 to September 30, 1933, was issued as a supplement to the issue of December, 1933.

The Board was established under a voluntary agreement concluded in 1918, between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods, "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railway companies and six representatives of labour one for each of the following railway brotherhoods: the Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

#### Case No. 451—Canadian National Railways (Western Region) and the Brotherhood of Railroad Trainmen.

This case concerned the discipline placed against the record of a brakeman at Saskatoon and the claim for loss of one trip on his assignment while attending investigation.

The Railway contended that the brakeman in question was required, as part of his regular assignment, to accompany the engine from the Saskatoon Depot to Nutana Yard; that the latter point being the terminus of the brake-

man's assignment, he was in reality deserting his assignment in leaving his engine without notice at the Saskatoon Depot. The employees' contention was based on Rule 30 of the Schedule of Rates and Rules, which provides that trainmen on arrival at terminals will not be called again for immediate duty if they want rest, the trainman to be judge of his own condition; and that in the case in question, due to the fact that the trainman was on duty in excess of twelve hours he was entitled to a rest of eight hours as provided for in Rule 31.

Representatives of both parties appeared before the Board and presented additional evidence in support of their respective contentions.

The decision of the Board was that under the existing circumstances in this particular case, the claim of the employees would not be sustained.

#### Case No. 452—Canadian National Railways (Western Region) and the Order of Railway Conductors.

On August 20 1935, a conductor was ordered at Fort Rouge for work train service for the purpose of distributing ties on the Letellier and Ridgeville subdivisions. The conductor left Fort Rouge at 8.15K and arrived at Sprague at 23.00K, submitting a wage ticket claiming through freight miles and, in addition, work train rates for the time in excess of 12½ miles per hour between the points where ties were distributed, in accordance with Clause D, Article 3, Conductors Schedule including ruling and the examples. For a trip on August 21, 1935, for a like purpose on the Ridgeville subdivision the same conductor submitted a wage ticket setting forth the claims similar to those made in respect of his trip on the previous day. The railway declined to allow payment for these trips in accordance with Article 3 of the Conductors' Schedule, but paid for the trips, in accordance with Article 4 of that Schedule.

The contention of the company was that "it has been regular practice for many years

to apply the ruling following Clause D, Article 3, to through freight trains handling other business, but which may distribute ties over a portion of the trip; whereas if a crew is called exclusively for such work as distributing ties, it is called for work train service and paid accordingly."

The employees contended that the conductor should be paid for the trips in question in accordance with Clause D, Article 3 of the Conductors schedule which provides that "where trains other than regularly assigned work trains perform work train service in motion between certain points between terminals that the time occupied between such points in excess of an average speed of twelve and one-half (12½) miles per hour will be paid for at work train rates in addition to pay for trip."

Representatives of both parties appeared before the Board and presented additional argument in support of their respective contentions. From evidence submitted the Board was given to understand that on the days in question the conductor was engaged in work train service only. Under these circumstances the claim of the employee was denied.

#### **Case No. 453—Canadian National Railways (Central Region) and the Order of Railroad Telegraphers.**

This case concerned the temporary abolition of the operator's position at Depot Harbour during the closed season of navigation.

The employees contended that just prior to the abolition of this position certain of the operators' duties were transferred to a clerk in the office and immediately the position was abolished the balance of the duties performed by the operator was done by the clerical staff at the place in question. The employees maintained that while there was still work at Depot Harbour rightfully belonging to the Telegraphers it should not be taken from them to provide work for employees in other branches of the service.

The Railways' contention was that no new facts could be consistently submitted by the employees in this case which had not already been given to the Board in Case No. 441 (LABOUR GAZETTE July 1935, p. 614).

Parties to the dispute appeared before the Board giving additional oral evidence and the decision of the Board was that "if upon seasonal reductions of staff at Depot Harbour, under conditions such as have prevailed there during the past two winter seasons, telegraph and telephone service continues to be required as ordinarily performed by the operator when that position is occupied the telegraphers under the terms of the preamble of their agreement

are entitled to maintenance of the operator's position," thereby sustaining the employees contention.

#### **Case No. 454—Canadian National Railways (Central Region) and the Order of Railroad Telegraphers.**

The agent at La Tuque, Quebec, having reached the normal retiring age of sixty-five years on May 17, 1935, was removed from actual service of the railway on May 25 and was allowed the balance of his 1935 vacation from May 27, to the end of the month and placed on pension as from June 1, 1935, and was not allowed five days' vacation in 1935 for service performed in that year.

Clauses "F" and "G," Article 14, of the Telegraphers Schedule Agreement a telegrapher who is in the service at the beginning of the calendar year will receive certain vacation allowances, the telegraphers contending that as they did agree some years ago to continue their vacations in lieu of the additional two cents per hour increase provided by Supplement No. 13 to General Order No. 27 of the McAdoo Award they are paying for their vacation at the rate of two cents per hour and therefore when the agent in question was not permitted to continue work until the beginning of the calendar year 1936 through no fault of his own and that therefore he should have been allowed five days' vacation pay which he had earned and paid for during the year 1935.

The railway contended that the agent had received twelve days with pay and that under the rules he was not entitled to any further vacation until January 1, 1936, and that therefore there was no justification for the claim.

Representatives of both parties appeared before the Board, presenting additional argument. It developed at the hearing that there was no schedule to support the employees contention and therefore their claim was not sustained.

At its recent session, the United States Congress enacted a measure by which, "whoever shall knowingly transport or cause to be transported, or aid or abet in transporting, in interstate or foreign commerce, any person with intent to employ such person to obstruct or interfere, in any manner, with the right of peaceful picketing during any labour controversy affecting wages, hours, or conditions of labour, or the right of organization for the purpose of collective bargaining, shall be deemed guilty of a felony and shall be punishable by a fine not exceeding \$5,000, or by imprisonment not exceeding two years, or both, in the discretion of the court."

# MINIMUM WAGES IN BRITISH COLUMBIA, SASKATCHEWAN, ONTARIO AND QUEBEC

## Orders and Regulations of Provincial Boards

### British Columbia

THE Board of Industrial Relations of British Columbia, administering the Male Minimum Wage Act, the Female Minimum Wage Act, and the Hours of Work Act, has recently issued new Orders under the first enactment, establishing minimum wages in the mercantile industry and for first aid attendants.

ORDER No. 38.—*establishing a minimum wage in the mercantile industry.*

The above order rescinds Order No. 10 (LABOUR GAZETTE, August, 1934, page 752), and is effective from July 20, 1936. In the new order the minimum rate (subject to certain exemptions for inexperienced workers) for male employees twenty-one years of age or over is established at \$15 for a week of 37½ hours or more. Formerly, the rate of \$15 prevailed for a 40-hour week. The hourly rate is now established at 40 cents for those working less than 37½ hours per week whereas it was formerly 40 cents for those whose week consisted of less than 40 hours. As in the former Order, the minimum wage in any one day is fixed at not less than \$1.60 for employees on the hourly rate.

In the new order, also, minimum rates are established for specific age groups and for those in casual employment as follows:—

#### *Rates for Beginners under 18 years of age*

(1) (a) Male persons under 18 years of age whose week consists of thirty-seven and one-half (37½) hours or more:—

- \$6 per week under 17 years of age;
- \$7.50 per week, 17 years of age and under 18 years;
- \$9 per week, 18 years of age and under 19 years;
- \$11 per week, 19 years of age and under 20 years;
- \$13 per week, 20 years of age and under 21 years.

(b) Male persons commencing under 18 years of age whose week consists of less than thirty-seven and one-half (37½) hours:—

- 16 cents per hour under 17 years of age;
- 20 cents per hour, 17 years of age and under 18 years;
- 24 cents per hour, 18 years of age and under 19 years;
- 29 cents per hour, 19 years of age and under 20 years;
- 35 cents per hour, 20 years of age and under 21:

Provided, however, that the minimum wage for any such person in any one day shall be not less than the following:—

- 65 cents under 17 years of age;
- 80 cents, 17 years of age and under 18 years;

95 cents, 18 years of age and under 19 years;

\$1.15, 19 years of age and under 20 years;

\$1.40, 20 years of age and under 21 years;  
Thereafter the minimum wage shall be according to the rates set forth in section 2 or 3 hereof.

*Rates for Beginners and those recommencing, 18 years of age and under 21.*

(2) *Permits must be obtained from the Board for inexperienced or partly experienced male persons 18 years of age and under 21 to be employed at the following rates:—*

(a) Male persons 18 years of age and under 21, inexperienced or partly experienced in the mercantile industry, to whom permits have been issued by the Board under section 6 of the Act, whose week consists of thirty-seven and one-half (37½) hours or more:—

\$8 per week during the first twelve months' employment in the said industry;

\$10 per week during the second twelve months' employment in the said industry;

\$13 per week during the third twelve months' employment in the said industry;

(b) Male persons 18 years of age and under 21, inexperienced or partly experienced in the mercantile industry, to whom permits have been issued by the Board under section 6 of the said Act, whose week consists of less than thirty-seven and one-half (37½) hours:—

21 cents per hour during the first twelve months' employment in the said industry;

27 cents per hour during the second twelve months' employment in the said industry;

35 cents per hour during the third twelve months' employment in the said industry;

Provided, however, that the minimum wage for any such person in any one day shall be not less than the following:—

85 cents during the first twelve months' employment in the said industry;

\$1.10 during the second twelve months' employment in the said industry;

\$1.40 during the third twelve months' employment in the said industry;

Thereafter the minimum wage shall be according to the rates set forth in sections 2 or 3 hereof.

#### *Casual Employment*

(c) Male persons 18 years of age and under 21, whose employment is casual (not exceeding five (5) days in any one calendar month), may be employed without permit at not less than thirty cents (30 cents) per hour: Provided, however, that the minimum wage for any such person in any one day shall be not less than the sum of one dollar and twenty cents (\$1.20).

*Rates for Beginners and those recommencing, 21 years of age and under 24.*

5. *Permits must be obtained from the Board for inexperienced or partly experienced employees 21 years of age and under 24 to be employed at the following rates:—*

(a) That the minimum wage for every male employee 21 years of age and under 24, inex-

perienced or partly experienced in the mercantile industry (not included in any other Order of the Board), to whom permits have been issued by the Board under section 6 of the Act, whose week consists of thirty-seven and one-half (37½) hours or more shall be not less than the following rates:—

\$9 per week during the first six months' employment in the said industry;

\$11 per week during the second six months' employment in the said industry;

\$13 per week during the third six months' employment in the said industry.

(b) That the minimum wage for every male employee 21 years of age and under 24, inexperienced or partly experienced in the mercantile industry (not included in any other Order of the Board), to whom permits have been issued by the Board under section 6 of the Act, whose week consists of less than thirty-seven and one-half (37½) hours shall be not less than the following rates:—

24 cents per hour during the first six months' employment in the said industry;

29 cents per hour during the second six months' employment in the said industry;

35 cents per hour during the third six months' employment in the said industry;

Provided, however, that the minimum wage for any such employee in any one day shall be not less than the following:—

95 cents during the first six months' employment in the said industry;

\$1.15 during the second six months' employment in the said industry;

\$1.40 during the third six months' employment in the said industry.

Thereafter the minimum wage shall be according to the rates set forth in sections 2 or 3 hereof.

#### ORDER No. 39.—*establishing a minimum wage for first aid attendants.*

This new order effective from August 1, 1936, is as follows:—

1. That where used in this Order the expression "first-aid attendant" means and includes every employee (being a male person twenty-one (21) years of age or over) and every male person under twenty-one (21) years of age employed in whole or in part as a first-aid attendant under the authority of a certificate of competency in first aid satisfactory to the Workmen's Compensation Board of British Columbia, and designated by his employer as the first-aid attendant in charge, pursuant to the provisions of the "Workmen's Compensation Act" of the said Province.

2. (a) That the minimum wage for every first-aid attendant shall be four dollars (4) per day.

(b) That in cases where the services of an additional first-aid attendant are required for relieving or assisting the first-aid attendant in charge, such additional first-aid attendant shall be paid *pro rata* on a daily basis for such work, according to the rate set out in subsection (a) hereof, and section 4.

3. That when, in addition to his first-aid duties, a first-aid attendant is employed in any other occupation for which a higher minimum wage than that fixed by this Order is established by the Board, such first-aid attendant shall be paid the higher minimum wage so fixed.

4. That every first-aid attendant shall be paid not less than fifty cents (50 cents) per hour for every hour worked in excess of his regular working-day where such excess time is due to first-aid work.

5. That when a first-aid attendant is attending a patient while being conveyed to the office of a medical practitioner or hospital, the actual expenses and transportation costs of said first-aid attendant shall be in addition to the minimum wage herein set forth.

#### Amended Orders

ORDER No. 26A, *establishing minimum wages in the transportation industry* (LABOUR GAZETTE, July, 1935, page 635), was amended by adding to section II, 4, the following:

"This section shall not apply to bicycle riders or foot messengers employed exclusively by establishments operated for the purpose of wholesale and (or) retail trade, whose rates of pay shall be according to Order No. 38 of the Board establishing a minimum wage in the mercantile industry, dated the 26th day of June, 1936."

ORDER No. 18B, *establishing a minimum wage for the occupation of stationary steam engineers* (LABOUR GAZETTE, March, 1935, page 243) was amended by adding to Section 2 the following:

"Provided, however, where such stationary steam engineer is employed as engineer in a plant that does not require a certificate of competency under the provisions of the 'Boiler Inspection Act,' the minimum wage for such engineer shall be according to the rate set forth in section 3 hereof."

#### Saskatchewan

At the last session of the Saskatchewan Legislature, the Minimum Wage Act was amended and consolidated (LABOUR GAZETTE, May, 1936, page 406). In accordance with the provisions of the statute, the orders of the Board—governing females employed in shops and stores, laundries and factories, mail

order houses, hotels and restaurants, and beauty parlours—have been re-issued. The provisions of these orders were given in the LABOUR GAZETTE for February, 1935, page 151.

There are no major changes in their re-issued form.

### Ontario

The *Ontario Gazette* of June 13, 1936, contains an Order in Council setting forth regulations of the Minimum Wage Board, and repealing those issued on January 20, 1921.

The new regulations are as follows:

(1) The Board shall meet at the call of the Chairman.

(2) During the absence of the Chairman from any meeting the Board may choose one of its members as Acting-Chairman, who shall have the full power of Chairman.

(3) When the Chairman is unable or refuses to call a meeting, one member of the Board may do so, by giving the other member twenty-four hours' notice in writing.

(4) The conduct of the meetings shall be governed by Bourinot's Parliamentary Proceedings, except that when any witness is placed on oath, he shall have the right to demand that the legal rules of evidence be applied to his examination before the Board.

(5) The Accountant for the Department of Labour shall act as the Accountant for the Board.

(6) The information and literature in the possession of the Department of Labour shall be available for the use of the Board and any information or literature which the Board may gather shall be available for the use of the Department of Labour in order to avoid duplication on the part of either the Department or the Board.

(7) The Board shall prepare an annual report for the Legislative Assembly covering the work and developments during the fiscal year.

(8) The Board may devise and issue such statistical and record forms for its own use or the use of employers as it may see fit and employers shall be required to complete and return such forms when sent to them by the Board.

(9) Each order issued by the Board shall be printed and distributed to employers in suitable form for posting. Failure to receive such order shall in no way absolve an employer from the penalties, under the Act.

(10) Every employer shall keep a continuous and complete record, available at all times to any representative of the Board, giving the names, residential addresses and dates of beginning and termination of employment of all employees, and where special minimum rates of wages are provided for employees under eighteen years of age, he shall keep a separate record, giving the ages and dates of birth of all such employees.

(11) Every employer shall keep accurate records of the wages paid to each employee

entered separately for each pay day and the actual hours of employment for which such wages were paid entered separately for each working day, whether employees are paid on the timework or piecework basis or otherwise. Such records shall be kept in a manner approved by the Board or a representative of the Board, and shall be available at all times for inspection by any representative of the Board.

(12) Every employer shall keep a separate, continuous and complete record for all home-workers giving the names and home addresses of each worker, the wages paid for all work done by each worker, the date of each payment, and the number of articles made with the piece rate paid for each article, and such record shall be available at all times for inspection by any representative of the Board.

(13) Every employer shall, on request, submit to the Board on a prescribed form, complete wage returns for each employee giving the full amount of the wages paid and the actual number of hours worked during a stipulated period, and such other information regarding classification of employees, hours, wages, and experience, as may be indicated on the form.

(14) Except as may be provided in the order of the Board governing each case, an employee who is considered by the employer to be handicapped shall be entitled to the minimum wage rate prescribed in the order unless and until a lower rate has been approved in writing by the Board.

(15) Applications for lower minimum wage rates for handicapped employees shall, in each case, be made on a form prescribed by the Board and shall be signed by both the employer and employee concerned.

(16) Apprentices indentured and registered under the provisions of The Apprenticeship Act shall be exempt from the provisions of the orders of the Board during the period of apprenticeship.

(17) Wherever a longer learning period or lower wage rate than those prescribed in the orders of the Board are required for apprentices or learners not registered under The Apprenticeship Act, such exemption may be granted provided a contract covering such learning period is reduced to writing and approved by the Board.

(18) Witnesses subpoenaed by the Board in connection with investigations authorized by Section 10 of the Act may be paid the same

fee as a witness subpoenaed to attend any sitting of the County Court, and persons in attendance at conferences directed by the Board in accordance with Section 12, may be paid an allowance of \$3.00 per day, with travelling and living expenses if away from home.

## Quebec

The *Quebec Official Gazette* dated July 4, 1936, contains revised Order No. 19 governing employment in beauty parlours and replacing in part the former Order which has been in effect since August 1, 1935 (*LABOUR GAZETTE*, June, 1935, page 546).

Minimum wages provided in the revised Order are the same as formerly, viz:—

### Zone 1.—City and Island of Montreal

#### Apprentices:

Beginners, not less than. . . .	\$ 7.00
After 6 months' experience. . . .	8.00
After 12 months' experience. . . .	10.00
After 18 months' experience. . . .	11.00

#### Experienced workers:

After 24 months experience, an employee shall be considered an experienced operator and shall be paid not less than \$12.50.

### Zone 2.—Quebec, Three Rivers, Sherbrooke,

#### Hull and cities over 25,000 population

#### Apprentices:

Beginners, not less than. . . .	\$6.00
After 6 months' experience. . . .	7.00
After 12 months' experience. . . .	8.00
After 18 months' experience. . . .	9.00

#### Experienced workers:

After 24 months' experience, an employee shall be considered an experienced operator and shall be paid not less than \$10.

The regulations also provide that extra employees (those working less than 48 hours per week) shall be paid not less than 35 cents per hour in Zone 1 and not less than 30 cents per hour in Zone 2, or else on a 50 per cent commission basis, said commission to be equivalent to not less than 35 cents per hour in Zone 1 and 30 cents per hour in Zone 2. At least three hours' wages shall be paid for each call. Regular employees losing time on their own volition cannot claim this bonus.

Any understanding or agreement passed between employers and employees, as to the renting of chairs, etc., which might decrease the rate of wages, herein above mentioned, shall be illegal.

**Hours of Work.**—The provision respecting hours of work stipulates that the work period for which the above rates are to be paid shall be forty-eight hours per week. The same regulation governing overtime applies in the

(19) The Board may make allowances for meals and lodgings furnished to employees as it may seem fit.

(20) Before issuing an order which shall fix a minimum wage rate for any industry, or group of industries, the Board shall call a public hearing at which the proposed order shall be open for discussion.

revised Order, but section (b) of the former Order, permitting short time employment paid for *pro rata* of the minimum wages, is omitted.

Other features are as follows:—

**Gratuities.**—Tips are the property of the employee and cannot be retained by the employer or be included as part of her salary even with the employee's consent.

**Hairdressing school.**—A hair dressing school cannot be operated jointly with a hairdressing or beauty parlour, if this school is located in the same premises, it must have a separate entrance and under no consideration shall pupils be allowed to work in the parlour. No fees can be charged for service given to models, this service must be absolutely free. Any infraction to this section shall automatically assimilate a school to a hairdressing parlour and it shall then be submitted to all provisions of this Minimum Wage Order.

The usual provisions governing waiting time, uniforms, discharge of employees, exemptions, posting and penalties are included in the new Order.

The revised Order comes into effect on September 5, 1936.

By an order of the Workmen's Compensation Board of Saskatchewan gazetted July 15, 1936, "all janitors employed by any school board in any city of the Province are included as an industry under Schedule 1, Part 1, of the Workmen's Compensation (Accident Fund) Act of the Province of Saskatchewan and the said industry shall be assessed in Group 19-8."

A recent issue of "Time" magazine in a study on consumer co-operatives in the United States declares that these organizations have 3,000,000 members with annual sales totalling \$400,000,000.

The survey showed that one-eighth of all American farm supplies is sold through co-operatives, the sales volume having doubled from \$129,000,000 in 1929 to \$250,000,000 in 1934.

## REPORT OF ONTARIO DEPARTMENT OF PUBLIC WELFARE

A report, covering the fiscal period November 1, 1934, to March 31, 1935, has been issued by the Minister of Public Welfare for Ontario. The report reviews the administrative activities of the Department of Public Welfare included among which are the following: Old Age Pensions, Mothers' Allowances, Children's Aid, Veterans' Welfare, Industrial Schools, Training schools, Houses of Refuge and Orphanages.

*Old Age Pensions.*—The report made by the Old Age Pensions Commission indicates that the peak load of pensioners has not yet been attained, however, during the five months period reviewed, 3,924 applications for pension were received by the Department. At the beginning of the period a number of applications were carried over from the previous period pending verification of age. Out of these two groups of applications, 4,026 were granted and 625 refused. At March 31, 1935, the number of pensioners was 50,771. The report draws attention to the fact that in 1929 when pensions were first granted, the peak load was placed at 23,000. Cancellation of pensions during the period under review totalled 2,366, of which 2,119 were attributed to death and 247 to other causes.

The report points out that "as time goes on and the assets and savings of the pensioners diminish there are frequent requests for increase in pension. There were 1,542 increases granted during the period. On the other hand there were 310 reductions."

The gross amount disbursed during the period amounted to \$4,488,513.90, of which the Province paid \$703,831.30 and the Dominion \$3,360,761.05, the remainder being borne by the counties, towns and cities.

*Mothers' Allowances.*—The report indicates a steady increase in the request for mothers' allowances. During the period under review 232 widows were added to the pay list while 149 widows were reinstated. The net monthly increase for the five months period was 91 and the number of mothers receiving allowance at the end of the period was 7,517. Desertion accounted for 102 applications received by the Mothers' Allowances Commission, however of these only 23 were found eligible as in the majority of cases applicants were ineligible because the whereabouts of the husband had been known within the period of three years required by the Act.

The gross amount disbursed by the Commission during the period amounted to \$1,390,621.

*Child Welfare.*—New regulations, referred to in a previous report, governing the relation of the Government to the local autonomous Society have been issued. These regulations setting up standards for the grading of societies and grants ranging in amount from \$100 to \$2,000, were made in November, 1935, contingent upon the standards of efficiency attained by the Society.

The value of the Children's Aid program may be understood when it is realized that 7,286 wards were under supervision of the various societies during the five months period reviewed. There were 283 children permanently committed to care, 51 temporarily committed, and 101 extensions; while 304 children received the benefit of new permanent adoptive homes. Unmarried parents cases dealt with numbered 798, with over \$30,000 being collected in the five months for the maintenance of children born out of wedlock.

According to the financial report of the Children's Aid Branch for the period under review, receipts amounted to \$367,468.72, and expenditures \$262,339.43.

*Unemployment Relief.*—For the period November 1, 1934 to March 31, 1935, the Province expended for direct relief a total of \$10,823,978.51; for the same period the Dominion Treasury paid \$3,309,319.09 to the Provincial Treasury. The amount contributed by the Dominion towards direct relief is made up mainly from monthly grants-in-aid of \$600,000 per month. The balance was paid from the Dominion Treasury on the basis of special works approved by the Dominion.

Gross expenditure of the Province on direct relief and relief works during the five months amounted to \$11,751,675.68, of which \$274,905.03 was paid for administration. This amount included costs of relief administration in various municipalities where it became necessary for the Province to take direct responsibility for the handling of relief for a period. The cost of administration including that in the municipalities referred to was approximately 2.34 per cent of the gross relief expenditure of the Province.

The report also reviews the activities of various industrial and training schools throughout the province; and the Soldiers' Aid Commission.

## WORKMEN'S COMPENSATION IN ONTARIO, 1935

### Annual Report of Board

THE Annual report of the Workmen's Compensation Board for 1935 indicates a further increase in the number of accidents, there being 58,546 accidents reported during the year compared with 54,730 during 1934. As in previous years, included in the number of accidents reported there are some which were not sufficiently serious to involve the payment of either compensation or medical aid and for which no claim was made, and others for which claims were made but were not allowed by the Board. At the close of the year there were 1,120 claims in assembly, as compared with 1,374 at the end of 1934, notice of the accident having been given but reports necessary to deal with the case not yet having been received.

The number of accidents in which compensation or medical aid was paid during the year was 54,298 as compared with 49,302 during 1934. The 54,298 accidents comprised 231 deaths, 14 permanent total disability cases, and 26,906 medical aid cases. Except for Department of Northern Development (Ontario) cases; Schedule 2 and Crown cases, involving medical aid only, which are a large proportion of the accidents reported, are not included as accidents paid for since the medical aid is furnished directly by the employer.

The total amount of compensation awarded during 1935, was \$4,276,430.01, of which \$3,225,898.54 was in Schedule 1 industries, \$470,089.47 in Schedule 2 industries and \$540,442 in Crown cases. There was also paid for medical aid in Schedule 1 during the year \$1,037,682.86, making the total benefits awarded during the year \$5,314,112.87 compared with total benefits of \$4,499,707.23 during 1934.

Assessments under Schedule 1 are in the form of a percentage of payroll, and the average rate or percentage over all classes actually paid by the employers can be ascertained by relating the total assessments to the total wage expenditure. This, on the provisional figures, gives an average rate of assessment for 1935 of 1.35 on every \$100 of payroll. The average over all years since the commencement of the Act was 1.17.

*Assessments.*—The total assessment in all classes of Schedule 1 for the year 1935 including estimated adjustments amounted to \$5,020,493.14. In assessments are included collections for default in making returns or payments and interest for under or over estimate of payroll. Other income and credits amounted to \$26,979.45, the total income and credit for the year being \$5,047,472.59.

Employers in Schedule 2 are assessed their share of administration amounting, during the year under review, to \$22,800.86 as compared with \$23,074.66 in 1934, and \$25,734.96 in 1933. Proportionate to the amount of compensation awarded, administration expenses in Schedule 2 and Crown cases were 8.07 per cent in 1935, as compared with 8.88 per cent in 1934 and 8.71 per cent in 1933.

*Compensation.*—The compensation for Schedule 1 industries for the year (including estimate for what is still to be awarded for accidents happening during the year and for adjustment of accidents in prior years) amounted to \$4,298,979.53, Medical aid disbursements, including an estimate for what is outstanding amounted to \$1,172,287.91, Administration expenses for Schedule 1, including \$14,664.65 for mine rescue work totalled \$311,518.14; while \$136,143.75 was paid to employers' safety associations. The total expenditures and charges for the year were \$5,918,929.33, while the provisional surplus for the year was \$320,561.33. The balance forward from prior years was a surplus of \$1,621,160.03, which, added to the surplus for the year less the carry-over for prior years' claims which amounted to \$1,192,018.07, makes a net provisional surplus of \$749,703.29 at December 31, 1935.

The total amount of compensation awarded in Schedule 2 industries and Crown cases during 1935 was \$1,050,531.47. Of this amount, \$213,343.54 was for workmen of municipal corporations; \$179,325.23 for steam railroads; \$14,553.56 for electric railways; \$56,324.29 for navigation companies; \$1,934.20 for express and sleeping car companies; \$4,003.92 for telephone and telegraph companies, and \$604.73 for all other industries; \$279,022.44 for Dominion Crown cases and \$301,419.56 for Provincial Crown cases. Of the total amount awarded, \$582,659.90 was for pensions in pension cases, and \$467,871.57 was for compensation in non-pension cases.

*Administration.*—The report reveals an increase in administration expenses during the year under review. This increase is attributed to the cost of an actuarial audit of the Board's affairs and to the increased cost of payroll audits which had fallen into arrears, one half of which are reported as having been caught up with. The gross administration expenses for the year amounted to \$394,375.11 which included special statistical services for which refunds amounting to \$9,481.75 have been re-

ceived making the total administration expenses \$384,893.36 as compared with \$322,458.99 during 1934. The employers pay the whole expense of administration of the Act. The amount is divided according to the accidents handled during Schedule 1 (Accident and Silicosis Funds), Schedule 2, and Dominion and Provincial Crown. The total administration for 1935 less expenses for supervisory work in connection with silicosis and mine rescue stations, and handling claims for silicosis were 7.17 per cent of benefits awarded, being 6.96 per cent of benefits awarded in Schedule 1 and 8.07 per cent in Schedule 2 and Crown cases.

*Safety Associations.*—Total payments to safety or accident prevention associations amounted to \$136,143.75 divided as follows:—Lumberman's Safety Association, \$17,955; Ontario Pulp and Paper Makers' Safety Association, \$12,000; Class 5 Accident Prevention Association, \$11,200; Industrial Accident Prevention Associations, \$89,500; Electrical Employers' Association of Ontario, \$5,488.75; Payments for mine rescue work in 1935 amounted to \$14,644.65 and for rehabilitation clinics it totalled \$8,898.35.

*Funds.*—The Schedule 1 funds are known and referred to in the Act as the "Accident Fund." They comprise, in addition to current funds out of which temporary payments of compensation, medical aid and administration expenses are paid, the Pension Fund, Disaster Reserve, and Compensation Deferred. The standing of the Accident Fund, showing assets and liabilities at December 31, 1935, indicates a balance of assets in excess of liabilities at that date amounting to \$1,031,983.32.

The pension fund representing the outstanding pension liability, comprises the largest part of the funds standing to the credit of Schedule 1. It had a balance at the end of the year of \$20,632,800.27.

The disaster reserve fund set aside to meet any unforeseen disaster or other circumstance which might unduly burden the employers in any class of industry showed a balance at the close of 1935 of \$282,280.03.

The funds included under "Compensation deferred" comprise compensation moneys held at interest for claimants in Schedule 1 payment being deferred to a future time by reason of the claimant being a minor or for other reasons. At the end of the year there was a balance of \$37,496.47 in this fund.

The Alberta Gazette dated July 15, 1936, contains regulations under the Tradesmen's Qualification Act, 1936 (LABOUR GAZETTE, June, 1936, page 499) with respect to the following: Radio-technician; mechanics engaged in the repair and construction of internal combustion

engines; mechanics engaged in the repair and construction of automobile engines. Regulations are also given governing these trades, and the issuing of certificates of proficiency.

According to an Order in Council reported in the Alberta Gazette of July 15, 1936, the administration of the Child Welfare Act and The Mothers' Allowance Act in the Province of Alberta has been transferred from the jurisdiction of the Attorney General's Department to that of the Department of Public Health, the change dating as and from July 1, 1936.

This order became effective on, from and after July 1, 1936.

The sixteenth annual report of the Industrial Health Research Board of Great Britain covering the period from July 1, 1935, to June 30, 1936, has been recently published. "The aim of the research work directed by the Board is to advance knowledge which may be used in the prevention of industrial unfitness." The investigational activities of the Board during the period under review may be divided into five divisions, viz., (a) Environmental conditions, including the study of such topics as lighting and vision, noise and deafness, dust, toxic solvents, and the physiology and psychology of work; (c) sickness absence, labour wastage and occupational sickness; (d) vocational suitability; and (e) accident proneness.

Accidents reported to The Workmen's Compensation Board, Ontario, during the month of July numbered 5,772, as compared with 5,334 during June and 5,480 during July of last year. Benefits awarded amounted to \$509,801.82, \$415,531 of which was for compensation and \$94,270.82 for medical aid. Fatal accidents numbered 32 as compared with 39 in June and 29 in July of 1935.

Manufacturing production in the Prairie Provinces during 1934 was valued at \$217,008,841, a betterment over 1933 of \$34,758,086. This was the highest value since 1931 when it was \$231,173,427. There were 39,274 persons employed receiving salaries and wages amounting to \$39,890,718, or increases of 1,967 persons and \$2,423,957 respectively. Materials used in the process of manufacture were valued at \$119,390,136, an increase of \$26,022,796. Of the three provinces, Manitoba is the most industrialized, turning out products to the value of \$105,358,000, Alberta followed with \$69,389,118, and Saskatchewan \$42,261,723.

## INDUSTRIAL RELATIONS PLANS OF CANADIAN COMPANIES

### Welfare Program of Canadian Industries Limited

One of the most comprehensive programs of employee welfare in Canada is that of Canadian Industries Limited which is reviewed in the current issue of *Industrial Canada*.

Through constant improvement and expansion of the schemes included in the company's program, beneficial results for all concerned are obtained. Some of the plans, with a few changes, have been in existence since 1919, while others have been more recently adopted, and one or two are still in the experimental stage. Employee representation, pensions, co-operative savings and co-operative sickness and accident insurance plans, annual vacations with pay, employees' death benefit, bonuses for outstanding service, stock investment privileges and service awards are all included in the Canadian Industries Limited program.

**Pension Plan.**—The pension plan of the company was inaugurated in 1919 by the Canadian Explosives Limited—forerunner of C-I-L. The purpose of the plan is to permit the retirement on pension of any employee who has had at least fifteen years of continuous service with the Company and who is, either mentally or physically, substantially incapable of performing the normal duties incidental to his continued employment. Pensions are granted through a Board of Benefits and Pensions consisting of three members appointed by the President, and payment is based upon the average monthly pay received by the applicant during the last ten years of his service.

An amendment to the plan in 1925 provided that the maximum pension for service after that date should be \$100.00 a month. This has the effect of limiting the size of pensions for higher salaried employees while maintaining the pensions of employees with lower earnings, and additionally serves to ensure that the pension fund will be adequate for its purpose.

While amounts of pension payments and eligibility are expressly set in the regulations governing the pension plan, the Board of Benefits and Pensions has considerable freedom of action in the judging of individual cases on their merits. For instance, in the case of the death of a pensioner, the Board may, in its discretion, authorize the pension to be continued in whole or in part to his widow, minor children or other dependents in cases where such pension is necessary for their

support. The entire purpose of the plan is to extend to employees a sense of economic security for the future and in this spirit its administration is considered.

**Employees' Benefit Plan.**—This scheme was also inaugurated by Canadian Explosives Limited and continued, with minor changes, until the present time. It provides that in the event of the death of any employee of the Company having six months' service or more, certain sums are to be paid to his beneficiary. These payments, ranging from \$1,000 for those with six months' service to \$1,500 for those with five years' service, or more, are made entirely by the Company at no cost to employees. Pensioners of the Company who retired from Company service subsequent to 1920 are entitled to participate in this plan.

**Vacation Plan.**—For many years staff employees have been granted an annual holiday, and in January, 1935, a similar privilege was extended to payroll employees by the introduction of a vacation plan which provides them with one week's vacation each year with full pay.

**Bonus Plan.**—The bonus plan, further designed to encourage the initiative of the Company personnel, provides for supplementary compensation to those employees who have made exceptional contributions toward the Company's success. Bonuses are paid under these circumstances if and when the earnings exceed six per cent of the manufacturing investment. The amount available for distribution each year under this plan is entirely contingent upon income from company operations. The amount specified is applied to the purchase from the Company of Class "B" non-voting shares to be awarded and distributed over a period of four years to employees named. For the year 1935, 130 employees of the Company were awarded these special bonuses. The bonus plan, in effect for seventeen years subject to modifications from time to time, serves the double purpose of rewarding meritorious services and giving to successful employees the added incentive that results from stock ownership.

Various co-operative plans have been introduced by the company to assist employees in the obtaining of further economic security than that provided through the pension, benefit and vacation allowance which are paid for directly by the company. Two voluntary contributory plans have been installed as follows:—

*Co-operative Savings Plan.*—In 1935 a co-operative savings plan to be in force for one year was designed to encourage thrift among employees and assist those who have had at least one year of continuous service with the company and whose remuneration does not exceed \$3,600 per annum.

All eligible employees have the privilege of authorizing monthly deductions from their salary or wages to be deposited with a trust company in their name. At the end of twelve regular monthly deposits the company contributes twenty-five cents for every dollar personally deposited by the employee. In addition to this twenty-five cent contribution per dollar, the company pays a sufficient amount to ensure that the employee receives interest at the rate of four per cent per annum on his actual savings.

Participants in this co-operative savings plan may authorize deductions from salary of from \$2.00 to \$20.00 per month but not in excess of 10 per cent of their remuneration.

*Co-operative Sickness and Accident Insurance Plan.*—Also conducted jointly by the management and employees is the co-operative sickness and non-occupational accident insurance plan which gives to any employee with at least three months' continuous service with the company the privilege of insuring himself against sickness or accidents for which no compensation is granted under any Workmen's Compensation Act.

This plan, also introduced in 1935, is contributory, the employees and company sharing the cost of premiums and the company furnishing all clerical and administrative labour and making the necessary wage and salary deductions. Participation is entirely voluntary. The percentage borne by the Company varies according to the amount of benefit to be received. In the case of employees with low earnings eighty per cent of the premium is paid by the Company. This percentage is gradually reduced as earnings become larger until in the higher brackets only thirteen per cent of the premium is paid by the Company. The amount of insurance is also on a sliding scale according to earnings, and ranges from \$5.00 to \$25.00 per week during disability.

*Stock Investment Plans.*—In the years 1927, 1929, 1930 and 1933 the Company further encouraged savings on the part of employees earning less than \$3,000 a year, by the operation of stock investment plans. Designed, first, to encourage and assist employees to accumulate income-producing property and, secondly, to enlarge the degree of employee-ownership, which already prevailed in the business, the 1933 plan offered to employees

the right to subscribe to its seven per cent cumulative preferred stock at \$115.00 per share. These shares returned to employee investors the seven per cent dividend and, as a special inducement to invest and hold their shares, employees were offered by the Company an additional payment of three dollars per share for five years.

*Employee Representation Plan.*—In addition to sharing in the pension, benefit and other plans offered by the management to assist the employee in establishing himself economically, payroll employees are enabled through works' councils to participate in regulations governing the general welfare of the workers. Specifically designed to create and maintain a feeling of confidence and trust between employees and management and to enable employees to recommend policies which they believe will improve working conditions, the plan involves the selection in each factory or plant of a parliament of workers. Elected by secret ballot to represent certain definite sections of each plant, employee representatives meet, together with an equal number appointed by the management, on the works' councils. Chairman of the group, and secretary, are appointed by the management but neither of these officials has a vote. Decisions made by the councils must be by a majority vote; should the vote be a tie, the chairman must consider the problem and present his solution to the council. Should this fail to break the deadlock the problem goes to the division manager and finally, should the equal division of votes continue, the matter is sent to the president of the company for final decision. Members of the councils elected by the workers themselves are fully protected against earning Company displeasure by any actions they might be forced to take on behalf of their electors. They enjoy full freedom of speech and thought and are entitled to express their views fully at all meetings, regardless of whether or not they conflict with the views held by the management.

*Service Awards.*—As a mark of appreciation to employees of C-I-L with long service to their credit, service pins and watch awards are distributed. Gold service pins are awarded for each five-year period of service, continuing to twenty-five years, at which time the veteran employee is presented with a gold watch on behalf of the Company.

#### **Retirement and Vacation Plans of General Foods Limited**

It was announced recently that the factory employees of General Foods in thirty-one plants in various parts of Canada and the

United States would be given the opportunity of enjoying one to two weeks' vacation with pay.

Employees who have completed two years but less than five years of continuous service by July 1 of each year and who have a record of regular attendance during the preceding calendar year will be entitled to a week's vacation with pay during the current calendar year. Employees who have completed five years or more of continuous service will receive two weeks' vacation with pay. In announcing the plan, R. K. McIntosh, Vice-President, General Foods, Limited, Toronto, said: "The purpose of this plan is to provide annual vacations with pay for hourly-rated employees. It is a recognition of continuous service and regular attendance and of the value of a period of recreation from routine duties."

Two years ago General Foods Limited also introduced an old age retirement plan for the benefit of their employees. The scheme is on a co-operative basis, employee and employer jointly purchasing the benefits provided and the plan is underwritten by large insurance companies. All regular full-time employees are eligible to join the plan upon completion of 12 months of service during any period subsequent to August 31, 1933, and continue to be eligible so long as they are under the age of 65 if men, and under the age of 60 if women. Seasonal employees are also eligible to join the scheme upon completion of 12 months of active service during any period of 36 consecutive months, subsequent to August 31, 1931, and continue eligible so long as they are under the ages specified. Temporary or casual employees are not eligible to join the plan, the employer reserving the right to determine as to which employees are temporary or casual.

An employee, by signing an application authorizing the required payroll deductions during his participation in the plan may join and name a beneficiary under the scheme. A schedule of contributions set upon the basis of the employees' earnings is provided to be deducted from the employees' wages for transfer to the insurance companies. Retirement Income is computed on the basis of the number of years the employee serves in any one wage bracket or class. Death benefits, elections and special circumstances are also provided for under the scheme.

Besides the Retirement Plan, General Foods Limited also provides free insurance for all employees to which employees make no contribution. On being employed with the company, a person is immediately insured for \$500 which is increased \$100 each year up to \$1,000. In addition to this, the employee is given the privilege of buying additional in-

surance at the group rate, or the cost to the company.

### Pension and Group Insurance Plans of the William Wrigley Jr. Company, Ltd.

The Wm. J. Wrigley Jr. Company, Limited, on July 1, established a plan whereby over two hundred employees are enabled to join with employees of that company in the United States in obtaining retirement pensions.

Participation in the scheme is at the option of the employee, contributions to the fund being upon an approximately equal basis. The employee pays in about four cents on each wage-dollar earned, the amount being deducted by the employer and paid over to a large industrial insurance company, together with a similar contribution from the company.

On retirement at the age of sixty-five the plan provides for a pension payable to the employee by the insurance company every month for the rest of the employee's life. The amount of the pension depends upon the length of service with the Wrigley Company and the average wages of the employee during that period. If an employee who has been participating in the pension scheme dies before reaching the retiring age, the plan provides that the employee's estate or beneficiary named by him, will get back from the insurance company the full amount paid in by way of contribution, plus three per cent compound interest.

In order to take care of employees who have been with the Wrigley Company for many years and who have not contributed during those years to a pension plan because none existed, the company, in appreciation of their years of service, is paying the insurance company a lump sum of over \$90,000, the equivalent of the back payments of such employees.

In order to provide still further security to their employees, the Wrigley Company is instituting a Group Life Insurance Plan, to become effective August 1, 1936. The plan provides that all employees who have completed three months or more of continuous service on or before August 1, 1936, will be given amounts of life insurance varying according to the employee's position with the company. Executives and Department heads will receive \$3,000 of life insurance, foremen and salesmen, \$2,000 and all other employees \$1,000. The entire cost of this insurance is to be paid by the company.

With the inauguration of this life insurance scheme, the Wrigley Company plans to fill in the gap for the employee between the date of his employment and retirement and in this way each employee becomes insured for at least \$1,000 during the time he is building up his pension fund.

## CENSUS OF CONSTRUCTION IN CANADA, 1934

THE Dominion Bureau of Statistics included the construction industry in its annual census of industry for the year 1934 and has recently issued a report as noted in the LABOUR GAZETTE for June, p. 478.

Hitherto the principal figures available as to construction work in Canada have been those as to building permits, collected by the Bureau of Statistics, from fifty-eight cities and towns, and those as to contracts awarded,

TABLE 1.—PRINCIPAL STATISTICS OF THE CONSTRUCTION INDUSTRY IN CANADA, 1934

Groups	Capital Invested	Salaried Employees and Wage-earners	Salaries and Wages paid	Cost of Materials used	Value of Work Performed

collected by MacLean Building Reports, Limited. In 1934 a separate branch was established in the Bureau to secure data as to all classes of construction. A list of contractors as complete as possible was made up from various sources, but it is stated that it was not possible to include all of the thousands of small sub-contractors.

The statistics available indicate that 1934 marked the beginning of the upturn from the low point in construction, the record of contracts awarded referred to above showing a total value of \$125,811,500 as compared with \$97,289,800 in 1933 and \$576,651,800 in 1929 (the high point).

The data compiled included capital invested, numbers of employees, total salaries and

wages paid, cost of materials, value of new construction and of alterations and repairs. The information was classified by provinces and by groups of employers doing construction work, namely contractors and sub-contractors, municipalities, harbour commissions, provincial and Dominion government departments.

Reports were secured from 9,527 such employers, including 7,140 contractors and sub-contractors, 2,333 municipalities and 54 Dominion and Provincial Government Departments and Harbour Commissions. It will be noted from Table 1 that approximately one-half of the construction in 1934 was done directly by public authorities. Other statistics as to construction contracts awarded in 1933 and 1934 (Canada Year Book, 1936, p. 476-477)

\* An average employment of 4,712 wage-earners cannot be segregated by Provinces.

show that about one-third in value were awarded by public authorities. A considerable percentage of these, however, would not be carried out to completion in 1934 so that the figures cannot be related exactly to those for actual construction in 1934 now published, but they indicate the large percentage of construction work undertaken by the various public authorities in recent years.

In Table 2 the classes of construction accounting for the largest items were paved streets and highways (\$16,150,231) and other streets and highways (\$44,112,953); these together amounting to one-third of the total for the year. Dwellings came next with \$12,819,098, followed by factories and ware-

houses \$7,997,286; docks, wharves, etc., \$7,464,124; dredging, \$5,481,041; waterworks, \$6,113,456; Government and municipal buildings, \$8,816,757.

The figures in Table 3 as to employees and amounts of wages paid show that employment in June and July was over twice as great as in January due to the seasonal nature of most construction work and particularly that on highways, which was such a large percentage of the total. The low average figure as to earnings per annum per man, \$536, is also accounted for chiefly by the relatively small number of days during the year on which many wage earners were employed, particularly on road building.

## COLLECTIVE BARGAINING IN EUROPE

### Address of Miss Margaret Mackintosh at Conference of Workers' Educational Association of Canada

At the three-day conference on collective bargaining held by the Workers' Educational Association of Canada at the conclusion of their annual Summer School at Pickering College, Newmarket, from July 25 to August 3, one of the speakers was Miss Margaret Mackintosh, of the Federal Department of Labour. (An account of the proceedings at the Summer School and the conference on collective bargaining will be given in the next issue of the LABOUR GAZETTE.) The address given by Miss Mackintosh was a comprehensive survey of collective bargaining and its regulation in European countries, and was substantially as follows:—

In studying legislation affecting collective agreements in Europe we find that there is one kind of legislation which affects them indirectly and another kind of legislation which regulates them directly.

In Great Britain, except for a recent emergency measure in the cotton industry, there is only indirect regulation. The law merely opens the way for collective bargaining to operate freely. First, trade unions are recognized by the law and the right to strike is conceded. Second, agreements are facilitated by legislative provision for conciliation and arbitration when negotiations between the parties fail and when differences arise as to the application of an agreement. Finally, there is legislation such as that limiting hours of certain classes, notably women and young persons, and laws providing minimum wage-fixing machinery for trades that are unorganized. In these matters the state intervenes to provide some degree of "collective regulation." Such intervention may be and usually is an aid to collective bargaining in

other industries. Nevertheless, there is a fundamental distinction between the method of collective regulation by the state and collective bargaining, though each has its appropriate place when that distinction is recognized.

Collective agreements in the strict sense are voluntary agreements arrived at after negotiation between employers or employers' associations and trade unions. They represent a means of self-government in industry.

Where the method of collective bargaining is widely practised as in Europe, such a system—which brings together employers and workers with the most intimate knowledge of industrial conditions, which enables frequent adjustments to be made in working conditions, and which permits the employer to give his attention to improved methods of organization instead of seeking to compete with his fellows by lowering labour standards,—is considered to be well suited to the needs of modern industry and economic life.

### State Intervention

All methods of collective regulation other than that of collective bargaining involve the intervention of public authorities to a greater or less degree. In many cases, the legislation providing for such intervention stipulates that it relates only to trades that are unorganized. For example, the British Trade Boards Act may be applied to any trade if the Minister of Labour "is of the opinion that no adequate machinery exists for the regulation of wages throughout the trade." A trade board is a representative body with some members appointed by the Minister of Labour. Minimum

wages are fixed by the board for the trade and are made effective by order of the Minister of Labour. Thus, even in the case of wage-fixing in Britain, there is a minimum of government intervention. Britain has adhered to this policy and has no legislation directly regulating collective agreements except the 1934 Act for the cotton industry. But, through a long history of collective bargaining, the employers' and workers' associations have built up a smoothly working system which appears, according to a report of the British Ministry of Labour "best adapted to the needs of industry and to the demands of the national character." The agreements have no legal effect and though only morally binding have, on the whole, been loyally observed.

Australia and New Zealand, on the other hand, went to the extreme of state intervention in labour matters through their compulsory arbitration systems but the tendency in Australasia in recent years has been to strengthen the provision for conciliation rather than to depend on compulsion.

#### Development in Great Britain

Collective bargaining developed first in Great Britain and its history is, of course, the history of trade unionism. Even before the repeal of the Combination Laws in 1824 and trade unions could legally function in Britain, piece-rates were fixed by agreement between groups of employers and workpeople in the cutlery and printing trades. In the following years, the practice developed in the silk trade, cotton spinning, tailoring, boots and shoes, coopering, tinplate making, carpet weaving, shipbuilding, hosiery and lace making. Towards the end of the 19th century, collective agreements were being made in European countries, in Australia and New Zealand and on this continent.

The war gave a great stimulus to collective bargaining and with changes in industrial structure and especially under the stress of intense competition in many industries, agreements which before the war had been merely on a local basis enlarged their geographical scope to become district or national agreements. Similarly, agreements which had formerly related only to skilled workers were extended to cover unskilled workers and labourers. The depression has hindered the development of the movement but within the last year or two there has been increased interest and legislation has been enacted in several countries.

As in other fields of social action, laws promoting or regulating collective agreements have usually been passed only after a considerable experience in voluntary collective

bargaining. To a large extent the success of such legislation is dependent on such experience. Moreover, the effectiveness of voluntary collective agreements is conditioned by the degree of organization among employers and workpeople. It is unnecessary to labour these points.

In the countries of continental Europe, collective agreements entered into voluntarily have been made legally binding either as contracts between the parties, for breach of which damages may be recovered, or as regulations governing the industry for violation of which penalties may be imposed. In general, the legislation merely supplements and co-ordinates the system of collective agreements.

In a few countries, the law provides, for the extension of an agreement by the public authorities to all employers and workers in the industry on certain conditions. Such legislation existed in Austria and Germany and is now in force in Czechoslovakia, Brazil, Mexico, South Africa and in Queensland, Western Australia and in New Zealand.

I will make no attempt to deal with all European countries but outline conditions only in Scandinavia, France, Germany and Great Britain. In Italy and Russia, the political and economic organization has changed so fundamentally the regulation of industry that there is little or no common basis for comparison with the system of collective agreements in other countries.

#### Situation in Scandinavian Countries

In the Scandinavian countries, the practice of collective bargaining is particularly widespread, agreements covering about two-thirds of the workers in Denmark, 40 per cent in Norway and 80 per cent in Sweden. From the outset the employers' associations adopted a constructive policy of collaborating with the trade unions in working out a system of collective agreements.

Developing during the last decades of the 19th century, the trade unions in these countries devoted their energies to the practical aim of bringing about a progressive improvement in the living and working conditions of their members. As happens in the case of most new and undisciplined trade unions, there were frequent disputes over the application of agreements made with individual employers. So the employers formed associations whose main function was to organize the relations between employers and workers. The rules of the Danish employers' federation, for instance, provided for conciliation or arbitration before a stoppage of work and the settlement of differences on the basis of agreed

conditions. The policy followed by the central organization of employers was "the same in all three countries, namely, to accept the principle of the determination of conditions of employment by way of collective agreements and to ensure the application of the agreements by providing the strongest safeguards permitted by the existing legislative and other conditions".

In Denmark, the employers in the wood-working industry declared a lockout in May, 1899, in order to bring pressure on the Confederation of Trade Unions to make itself responsible for ensuring that its constituent unions did not violate their agreements. The lockout which had spread to a large number of industries was settled by an agreement in September, 1899. This agreement laid down the principle that the central organizations must accept responsibility for seeing that agreements between them were respected by all affiliated organizations. The September agreement, as it was called, was concluded without official intervention, and formed the basis for relations between employers' and workers' organizations in Denmark for thirty years.

But there was still difficulty, from the employers' point of view, in the lack of complete control of the Confederation of Trade Unions over its locals and in the delay in judicial procedure where recourse had to be had to the ordinary courts. Finally, in 1908, a joint committee of the employers' and workers' federations agreed that any organization or individual member breaking an agreement should be liable to a fine payable to the injured party. The legislative authorities were then requested to give statutory effect to this agreement and to provide for a special court to settle disputes. Accordingly, an Act setting up the Permanent Arbitration Court was enacted in 1910.

In Norway, also, the employers' associations tried from the beginning to develop the system of collective bargaining. The Employers' Federation in 1904 replied to one of its local associations that "there can be nothing against the conclusion of collective agreements wherever the workers are organized". In 1902, the Norwegian Employers' Federation and the Confederation of Trade Unions, like the Danish organizations, agreed on machinery for conciliation and arbitration. When this agreement expired, similar provision was made in separate agreements between the employers' federation and the various trade unions. The employers took the initiative in pressing for a statutory judicial body to settle disputes arising out of the application of agreements

and in 1915 a law was passed creating a special Court for this purpose.

In Sweden, an Employers' Federation was formed in 1902 in industries in which the collective agreement system had made little headway. In 1905 rules were adopted defining the functions of the Federation with respect to collective agreements but no general agreement was concluded between the central organizations as in Denmark and Norway. The employers' organizations, however, urged that there should be some system of legal guarantees against breach of agreements which could be promptly applied. In 1915 the Courts decided that a collective agreement was legally binding on the contracting parties, but the length of time elapsing before a judicial decision could be expected in the normal course of events made the ordinary court procedure unsatisfactory to the employers. Trade Unions, on the other hand, were opposed to the principle of financial liability of trade associations for breach of an agreement. Finally, after some experience with an arbitration system, two Acts were passed in 1928, one laying down general regulations for collective agreements and the other setting up a Labour Court to hear disputes arising out of the application of agreements. In June of this year, a bill was passed regulating the right of association and dealing with collective bargaining in relation to conciliation machinery and salaried employees.

Thus, in the three Scandinavian countries, the legislation concerning collective agreements has been based on the experience of, and enacted at the request of either or both of the employers and workers' organizations. The employers' organizations are highly centralized and in none of these countries may an affiliated association conclude a collective agreement without the approval of the Federation. In Norway, the collective agreements governing the national employers' associations are negotiated and signed by the Employers' Federation in its own name.

The laws on collective agreements in these three countries stipulate that the agreement shall be in writing and shall contain provisions respecting the date of expiry and the notice required to terminate it. Provisions in an individual contract of employment which are contrary to those of a collective agreement are null and void except in Sweden where such variation from the terms of the agreement is legal if permitted by the agreement itself. A trade union or association is liable for breach of an agreement by its members or for an unlawful stoppage of work unless it proves that it was not itself responsible

for such breach or stoppage or that it endeavoured to prevent the breach or stoppage.

Not every strike or lockout is illegal but a strike or lockout in defiance of the terms of the agreement is unlawful. In Denmark and Norway, a penalty is provided for breach of an agreement; in Sweden damages are recoverable. For an illegal stoppage, damages are payable in Norway and Sweden; in Denmark, a fine may be imposed if the union or association was a party to it. In the main, the above are similar to the provisions laid down in the law on collective agreements in all the countries of continental Europe.

### Labour Courts

An important distinction is found in the system of Labour Courts set up to deal with disputes arising out of agreements in Norway and Sweden. Actions for breach of an agreement may be brought by trade unions or employers' associations on behalf of their members before the Labour Court in each of the Scandinavian countries but actions by individuals are heard by the ordinary Courts, except in Norway, where an individual case may be settled by the Labour Court when dealing with a collective dispute affecting it.

The collective agreement system in these countries is of special interest then, owing to its extent, to the highly centralized character of the employers' associations and trade unions and the control kept by the central bodies over the agreements entered into by their members. Moreover, the industrial development of these countries since the war and the relatively slight effect on them of the economic depression support the view that the system has, at least, not handicapped industry.

### Legislation in France

In France, collective bargaining has not developed so successfully as in other countries according to a recent report approved by the National Economic Council. This comparative failure is ascribed in part to the lack of adequate government machinery for conciliation in disputes.

The first collective agreement in any industry frequently dates from the settlement of a dispute between the employers and workers. Since the parties may be greatly aided in the settlement of disputes by joint boards under government auspices or by a trained conciliator especially conversant with conditions and able to see both sides of the question, such assistance is provided by governmental authorities in most countries and where it fails, arbitration machinery may usually be put in motion. In France, however,

the official conciliation system has been confined to a few local committees.

While definite official procedure for conciliation is an aid to collective bargaining, it is also true that agreements arrived at after collective bargaining usually contain clauses creating joint bodies to deal with disputes arising out of the interpretation or application of the agreements. Thus, collective bargaining has a two-fold connection with conciliation and arbitration: in the negotiating of new agreements official machinery for conciliation is an aid while for disputes as to the application of agreements there may be official or unofficial machinery or both.

There has been statutory regulation of collective agreements in France since the war. During the war period, the French Government, like other Governments, encouraged collective bargaining in order to facilitate production. Moreover, the Courts in some districts were giving to collective agreements contractual force. Accordingly, a 1919 Act laid down regulations for agreements and authorized duly constituted associations which had entered into agreements to institute proceedings in their own names or in favour of their members against persons violating agreements. Further amendments were made to the Act in the next year.

On several occasions Bills were introduced unsuccessfully to empower the authorities to extend the operation of an agreement to non-parties and thus provide a common rule for the industry. In 1935, a Government Bill to this effect was drafted as an emergency measure to apply only to important industries. A few weeks ago the new Government included among its labour measures a Bill based on an agreement between the General Confederation of Labour and employers' associations. This Bill passed both Houses on June 24. It is designed to encourage collective agreements by enabling the Minister of Labour, at the request of one party, to call a joint meeting of representatives of trade unions and employers' associations in any industry. If the representatives are unable to reach an agreement, the Minister, if requested to do so, may endeavour to bring about an agreement after consulting the National Economic Council.

The Act stipulates that an agreement must contain provisions regarding freedom of association, the settlement of differences as regards the application of the agreement or of labour legislation to any undertaking, and concerning minimum wages, notice of dismissal, apprentices, procedure for settlement of disputes arising out of the agreement generally and for its revision or amendment.

Finally, the Act enables an agreement to be made binding by the Minister of Labour on all employers and workers in the industry concerned after he has consulted the appropriate trade section of the National Economic Council and given all persons concerned opportunity to present objections. The Order extending the agreement may be cancelled by the Minister under similar conditions if it appears that the agreement no longer meets the economic requirements of the industry. It ceases to have effect if the parties agree to denounce or revise it.

### Measures in Germany

In Germany, from December, 1918 to 1933 when the trade unions were dissolved, the law on collective agreements was clearly laid down by the legislative and judicial authorities. Germany was the first European country to enable agreements to be extended by public authorities to non-parties but in Australia and New Zealand a similar provision had been in effect for some years. A German Decree of 1918, as amended in 1920 and by an Act of 1923, permitted an agreement to be made by an employer or employers' association with a trade union or group of employees. Individual contracts of employment providing more favourable terms for the workers could be permitted by the collective agreement; any other variation from the collective conditions was null. As in other countries, an agreement applied to the parties to the agreement, to the members and those who later became members of the trade unions or associations making the agreement and to any persons who based a contract of employment on the collective agreement.

The Federal Labour Office might declare a collective agreement generally binding at the request of one of the parties or at the request of an association of employers or workers whose members would be affected. It was stipulated, however, that the scope of an agreement might be extended only if its conditions were of preponderant importance in determining labour conditions for the industry in the district covered by the agreement. Publication of the request for the extension of an agreement was required and a date up to which objections might be made was named in the notice. A register of agreements had to be kept with full particulars. This was open to the public during office hours. Similar procedure had to be followed in case of amendments.

Special interest attaches to certain decisions affecting the German Collective Agreements

Act. In some cases, these were made by the Minister of Labour, in others by the Labour Courts set up in 1926. Under a decision of the Minister, employees organized on the suggestion of their employer were not competent to enter into a collective agreement. The same question was decided by the Federal Labour Court in 1928 and three qualifications on this point were laid down for a generally binding agreement: all members of the organization must be either employers or workers; one of its purposes must be the promotion of the economic interests of its members and, third, it must be independent of financial or other control by the other party to the agreement. Clear thinking on this question aids in drawing the proper distinction between company unions and trade unions in their relation to collective bargaining.

As regards the right to strike when unions are bound by collective agreements. In France, a strike in defiance of an agreement was a breach of contract under the post-war legislation. The parties to an agreement were bound to abstain from action likely to prevent the agreement being carried out but they guaranteed its execution only to the extent laid down in the contract. We have no information as to the position under the new Act.

In Germany, the Supreme Court pointed out that the duty of keeping the peace was bound up with collective agreements. But unless there was a definite provision in the agreement, an organization was not held responsible for the failure of its members to keep the peace if it had tried to persuade them to do so. If the agreement provided expressly for maintaining peace, the association was expected to discipline its members for violation. If the organization authorized or was itself responsible for a strike or lockout against the terms of an agreement it was liable in damages.

In an article in the International Labour Review, an officer of the German Ministry of Labour states that the purpose of the legislation was

to ensure industrial peace by securing uniform labour conditions and to make it easier for the employer to enter into collective agreements by preventing any underbidding on the part of an outside ring of manufacture.

If an agreement is to be declared of general application, it must be shown that it is of outstanding importance within the industry or group of occupations covered by it. It must be an established fact that conditions are in conformity with the terms of the agreement for a majority of the persons employed in the trade; for a declaration of general application is intended to secure a complete acceptance of what has been approved by the majority; it is not intended to impose the wishes of a minority.

### Collective Agreements Not Contracts in England

Turning, now, to Great Britain, I have stated before that, with the exception of agreements on the cotton weaving industry, collective agreements are only morally binding on the parties to them. They are not contracts in the legal sense under English law. In the cotton manufacturing industry, however, a provisional Act applying only to wages was passed in 1934 to remain in effect until the end of 1937. This statute was enacted at the joint request of the employers and trade unions in the industry as a result of the severe competition in recent years. Curtailed demand for cotton goods led some employers to violate agreements and lower wage rates, thus making it difficult for other employers to maintain the agreed rates.

The care that was taken by the British Government and by Parliament to adhere as closely as possible to the policy of non-interference with the voluntary negotiation of working conditions is noteworthy in these days of state intervention. The Act stipulates that when the employers controlling the majority of looms in the industry and the trade unions representing the majority of the workpeople make joint application for an order making the agreed wage rates binding throughout the industry, the Minister must refer the application to a board of three independent

members. Only if the board unanimously recommends that the order be made, may the Minister do so. An employer paying less than the fixed rate is liable to a maximum fine of £10.

While Parliament and the great body of employers and workpeople in Britain appear not to favour the legalizing of collective agreements in general, yet there have been Bills presented to Parliament with this end in view. The Association of Industrial Councils has, since 1924, sponsored several Bills. In 1931, the Trades Union Congress supported a Bill to extend the scope of an agreement on wages to apply compulsorily to all persons in the industry but the Congress appears to have taken no action since that time.

Conditions in Europe in relation to trade unions and collective bargaining are, of course, different from those in Canada. Smaller countries and denser population in Europe make it easier to extend organization over more than one industrial centre or district. The development has been gradual, on the whole, and the movement in one country promoted a similar movement in neighbouring countries. On the other hand, many Canadian and American employers have followed a policy of hostility to trade unions and the method of collective bargaining for the determination of working conditions has not been so generally adopted on this continent.

### REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD APRIL TO JUNE, 1936

**E**MPLOYMENT conditions, as indicated by the work of the Employment Service of Canada during the quarter April to June, 1936, were somewhat less favourable than those reported during the corresponding quarter of 1935, as there was a decline of over two per cent in vacancies offered and in placements effected in regular and casual employment. This was due to the heavy decline in construction and maintenance, under which division relief placements were classified, for, other than a small loss recorded in trade and in transportation, all remaining industrial groups showed gains, the most substantial of which were in farming and services. All provinces, except Saskatchewan and Quebec, registered fewer vacancies and placements than were recorded in the corresponding quarter last year, the largest decline being in Alberta and the highest gain in Saskatchewan. The accompanying table gives the vacancies and placements of the Employment Service of Canada, by industrial groups in the various provinces, during the period April to June, 1936.

From the chart on page 732 which accompanies the article on the work of the Employment Offices for the month of June, it will be seen that the trend of the curves of vacancies and placements in relation to applications followed an upward course from the beginning of April to the middle of May, then showed a downward tendency until the middle of June, when it again pursued an upward trend for the remaining two weeks of the month, when each curve attained a level over three points higher than that recorded at the end of June, 1935. During the period April to June, 1936, there was a ratio of 54.7 vacancies and 50.2 placements for each 100 applications for employment, as compared with 55.0 vacancies and 50.8 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 1,132, of applications registered 2,070 and of placements effected 1,040, in contrast with the daily average of 1,175 vacancies, 2,134 applications and 1,085 placements in regular and

casual employment during the same quarter of 1935.

During the three months April to June, 1936, the Offices reported that they had made 81,612 references of persons to positions and had effected a total of 76,924 placements, of which 45,668 were in regular employment and

31,256 in casual work. Of the placements in regular employment, 32,195 were of men and 13,473 of women, while casual work was found for 19,716 men and 11,540 women. A comparison with the corresponding period of 1935 shows that 79,202 placements were then made, of which 47,581 were in regular employment and

31,621 in casual work. Applications for employment during the period under review were received from 113,741 men and 39,421 women, a total of 153,162, in contrast with the registration of 155,777 during the same period of 1935. Employers notified the Service during the quarter April to June, 1936, of 83,755

vacancies of which 52,491 were for men and 31,264 for women, as compared with 85,751 opportunities for work offered during the corresponding period a year ago. In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of June, 1936.

## EMPLOYMENT CONDITIONS AT THE END OF JULY, 1936

### Reports of Superintendents of the Employment Service

The employment situation at the end of July was reported by the superintendents of the Employment Service to be as follows:

In the Maritimes good progress was made in haying, this being the principal activity of farmers at the present time; all crops were in splendid condition and large returns were expected. Logging operations were about completed and nearly all camps were closed until fall. Fishermen were devoting their energies to sword fishing, the run of salmon, except along the St. John river, being light. Mines in the New Glasgow area operated from one to six days per week, while the majority of those in Cape Breton and vicinity worked five days. Manufacturing showed a slight increase in production, with no idleness reported by the iron and steel industry. Sawmills, at Chatham, were working nine-hour shifts, sawing mostly for British markets. Building construction recorded improvement, particularly at Halifax. Highway construction continued throughout the provinces, with many portions of the roadway laid with permanent pavement. Transportation, by rail and auto, was heavy. Wholesale and retail trade was good and collections fair. Little change was reported in the Women's Division, where placements of domestic workers and charwomen were made.

The demand for farm workers in the Province of Quebec was very satisfactory, but logging operations were about stationary. Placements in the latter industry were somewhat difficult, owing to the fact that the worker was handicapped in making a reasonable wage, when it was necessary to cut thirty to forty logs per cord. Mine operators were not calling for miners, as sufficient workers were applying and being hired at the mines. Manufacturing centres reported as follows: Chicoutimi and Hull: mills working at full capacity; Montreal—shoe industry fairly active, metal trades somewhat less favourable, rubber gain registered, tobacco unchanged; Quebec—leather and clothing busy; Sherbrooke—improvement noted and Three Rivers—slight increase in production in the glove, boot, shoe and shirt industries. Building construction recorded more activity, particularly at Chicoutimi, Quebec and Rouyn. In Montreal, there was no special demand for building tradesmen, although numerous skilled and semi-skilled workers found employment during July. Highway construction also continued in different sections of the province. Transportation was active and trade was good. Many housemaids and domestic workers were placed in domestic service.

Dry weather in certain sections of Ontario somewhat lessened the call for farm help, but where threshing was in progress a number of men had found work by the day. In logging the peeling season was about over, so that the demand for bushmen was small. Forest fires in the Port Arthur district also held up work for about ten days in the sap-peeled wood camps. Experienced pulpcutters continued to be sent out to Northern Ontario, but the requirements were so edged about with certain specifications, that the process of supplying men was necessarily slow. Large sawmills were busy, but smaller ones were gradually closing down. Mining was very active, especially at Timmins and Port Arthur. Few orders were listed for miners, but this was accounted for by the fact that the men seeking work went direct to the mining areas. Manufacturing showed little change. Textile factories were running steadily, and fruit and vegetable canneries were preparing for a busy season. Midsummer slackness was reported in some industries, but this was of a seasonal nature and only temporarily affected the general situation, the principal layoff being in the auto industry. Building construction was somewhat more active, although much of the work consisted of alterations and repairs. Highway and railway construction and maintenance also afforded employment for a number of workers. Orders for domestic help were not so varied, but numerous calls were received for waitresses and hotel employees. In spite of the scarcity of experienced female, general household help, many orders were filled.

The demand for farm help in the Prairie Provinces continued to grow, particularly in Manitoba, but it was lower than at this time last year. Continued drought greatly affected the crops and in many parts of Saskatchewan and Alberta there was little left to be harvested. Logging and mining were quiet and manufacturing registered no change. Drumheller reported building construction more active than for some years past, but, elsewhere, there seemed little new work in progress. Highway construction continued and maintenance gangs were being hired by the railways. Extensive forest fires near Calgary gave employment to over 100 men from that office, while several crews, recruited in the immediate vicinity of the stricken area, brought the total of those employed for that purpose to about 400 men. Trade was only fair, with collections difficult. A slight im-

provement was noted in the placement of female household workers.

The call for farm hands in British Columbia was good and experienced men were difficult to obtain. Few requests, however, were received for bushmen, although logging was still fairly active and sawmills were running steadily. The demand for miners, also, was small, but there was considerable activity in various districts and development work was proceeding gradually. Salmon fishermen con-

tinued to do well. The coho run had started and trollers were making good money. Conditions were better in the building industry and a number of skilled tradesmen had found work. Highway construction also continued. Drydocks and shipyards at Prince Rupert were quiet, and longshore work was good, both there and at Vancouver. There was a fair demand for capable cooks-general in the Women's Section, with a scarcity of good maids reported.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN JUNE, 1936

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on July 1 was 9,744, the employees on their payrolls numbering 987,955 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for July was 1,790, having an aggregate membership of 179,815 persons, 13.9 per cent

of whom were without employment on July 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) The Employment Situation at the Beginning of July, 1936, as Reported by Employers

The general industrial situation showed further marked improvement at the beginning of July, according to information received by the Dominion Bureau of Statistics from 9,744 employers, whose staffs aggregated 987,955 persons, as compared with 963,401 in the preceding month. This increase of 24,554 considerably exceeded that recorded at July 1, 1935, and was also greater than the average gain between June 1 and July 1 in the preceding fifteen years for which statistics are available. Reflecting this advance, the index, based on the 1926 average as 100, rose from 102.0 at June 1, to 104.6 at the latest date; this was higher than at the beginning of July in any other year since 1930. The index, when adjusted for seasonal variation, also increased, standing at 100.9 at July 1, compared with 100.5 at the beginning of June of the present year.

The unadjusted indexes at July 1 in the sixteen years for which data are available are as follows:—1936, 104.6; 1935, 99.5;

1934, 101.0; 1933, 84.5; 1932, 88.7; 1931, 103.8; 1930, 118.9; 1929, 124.7; 1928, 117.7; 1927, 109.7; 1926, 105.0; 1925, 98.0; 1924, 97.1; 1923, 100.7; 1922, 92.2 and 1921, 88.6.

Employment in manufacturing showed continued advances, contrary to the usual seasonal trend at July 1; most of the gain over June 1 occurred in the food, lumber and pulp and paper groups. Mining (except of coal), communications, services, transportation and construction and maintenance also indicated substantial improvement. The increases in all of these except construction considerably exceeded the average gains indicated at July 1 in the years, 1921-1935. On the other hand, there was a small seasonal decline in logging, and within the group of factory employment, there were losses, also seasonal in character, in leather, textile and iron and steel plants. No general change occurred in trade.

The firms furnishing statements for July 1 of last year had numbered 9,323, and their

employees had aggregated 934,262, an increase of approximately 18,500 over their June 1, 1935, staffs. Improvement had then been indicated in nearly all the main industrial groups with the exception of logging, which was seasonally dull.

### Employment by Economic Areas

The trend was decidedly upward in all five economic areas; the largest additions to staffs were in Ontario and the Maritime Provinces. The index number of employment in each of the economic areas was higher than at the same date of last year.

munications, transportation, building and railway construction and maintenance services and trade. On the other hand, animal food and chemical factories and logging were slacker, the losses being partly seasonal in character. The 659 employers whose returns were included in the employment survey for July 1, 1935, had reported 76,030 workers; as already stated, employment was then in lesser volume than at the date under review.

*Quebec.*—Manufacturing, on the whole, showed moderate improvement in Quebec, there being increases in food, lumber, pulp and

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

*Maritime Provinces.*—Statements were tabulated from 685 firms employing 80,055 workers, as against 74,141 in the preceding month. This increase brought the index to 111.7, or five points higher than at the beginning of July in 1935, when the gain over the preceding month had been much smaller. The advance at the latest date was also decidedly greater than the average increase indicated at July 1 in the preceding years since 1920. Highway construction recorded the most pronounced improvement at the date under review, but there were also important additions to staffs in lumber and pulp and paper mills, and in mining, com-

paper, textile, electric light and power, non-ferrous metal, non-metallic mineral and other factories; leather and iron and steel plants, however, showed seasonal curtailment. In the non-manufacturing industries, mining, service and construction reported heightened activity; the gains in the last-named took place in the highway and railway divisions, and were considerable. The general advance during the month was larger than that indicated at July 1 in 1935, also exceeding the average increase recorded at that date in the last fifteen years. The forces of the 2,298 co-operating employers aggregated 281,041 persons, compared with 276,117 at June 1, or an addition of 4,924. The

index at the latest date was nearly seven points higher than at July 1, 1935, when the 2,244 firms making returns had employed 260,923 persons, or some 3,000 more than in the preceding month.

*Ontario.*—There was an increase in activity in Ontario, where the 4,296 firms whose statistics were tabulated reported 409,031 employees, or 6,143 more than at June 1. Employment in previous years has usually, though not invariably, advanced at July 1 as compared with the preceding month, the average change being a moderate increase; the gain noted at the date under review was considerably above the average, and was also larger than that indicated at the same date in 1935, when the index was 3.5 points lower. The improvement at July 1, 1936, was fairly widely distributed, food, lumber, pulp and paper, rubber, electrical apparatus, non-metallic mineral and non-ferrous metal product factories, logging, transportation, services and construction showing considerable gains. The increases in construction were greatest, occurring mainly in the railway

division. On the other hand, leather, textile and iron and steel works were seasonally slack.

The 4,100 employers furnishing statistics for July 1, 1935, had reported 392,961 workers, as compared with 388,753 in the preceding month.

*Prairie Provinces.*—The most important expansion recorded in this area was in construction and maintenance, notably on the railways, but highway construction, services, transportation, communications and manufacturing also showed gains; those in the last-named occurred largely in the food, lumber, electric light and power and non-metallic mineral groups. On the other hand, logging was seasonally slack, and coal-mining, building and retail trade also afforded less employment. In addition to the general improvement shown in industrial activity, there have doubtless been seasonal increases in agricultural work, which, though not recorded in this survey owing to the generally small unit of production, must be an important factor in the general situation. Data were compiled

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS  
(AVERAGE CALENDAR YEAR 1926=100)

Relative Weight of Employment by Economic Areas as at July 1, 1936.....	100.0	8.1	28.4	41.4	13.1	9.0

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

from 1,415 employers with an aggregate staff of 129,134 workers at July 1, as against 123,756 in their last return. This gain of 5,378 workers decidedly exceeded the average increase at July in the last fifteen years. The index, at 101.9 at the date under review, compared favourably with that of 96.3 at July 1, 1935, when the 1,348 co-operating firms reported 121,438 employees, as compared with 116,276 at June 1, 1935.

*British Columbia.*—Continued advances were made in British Columbia; the increase brought the index to 104.8, or more than five points higher than at July 1 of last year. A total working force of 88,694 persons was employed at the date under review by the 1,050 firms whose data were received, and who had 86,499 on their staffs at the beginning of June. Manufacturing, particularly of food products, was seasonally busier at July 1, 1936, and mining, communications, transportation, building and railway construction and services also reported considerable improvement, while curtailment was indicated in logging and highway construction. As already stated, the situa-

tion was better than at the same date in 1935; the 972 establishments then reporting had employed 82,910 workers, an increase of some 2,400 over their June 1, 1935, staffs.

Table 1 gives index numbers by economic areas.

### Employment by Cities

Five of the eight cities for which separate tabulations are made—Toronto, Ottawa, Hamilton, Winnipeg and Vancouver—showed heightened activity, while the tendency was unfavourable in Montreal, Quebec City and Windsor. The largest gains were in Winnipeg and Vancouver.

*Montreal.*—Employment in Montreal showed a small decline from the preceding month, mainly in transportation and manufacturing; within the latter, vegetable food, electrical apparatus, mineral product and musical instrument plants reported heightened activity, but there were larger reductions in textile, leather and iron and steel factories. On the other hand, work on the streets and roads and in building construction showed improvement,

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY PRINCIPAL CITIES

(AVERAGE CALENDAR YEAR 1926=100)

May 1.....	92.7	95.8	100.2	107.7	98.1	136.1	87.3	101.9
June 1.....	93.7	96.8	101.1	108.2	97.6	123.2	90.9	103.8
July 1.....	93.5	94.5	101.4	110.0	99.4	113.0	92.7	106.0
Relative Weight of Employment by Cities as at July 1, 1936.....	14.2	1.3	12.6	1.5	3.2	1.6	4.0	3.4

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

while services, communications and trade reported little general change in Montreal. A combined working force of 140,177 persons was indicated by the 1,327 co-operating employers, who had 140,341 workers at June 1. A decrease had also been noted at July 1, 1935, when the index was several points lower, standing at 86.8 as compared with 93.5 at the latest date.

*Quebec.*—Curtailment was reported in Quebec City, where statements were tabulated from 172 firms with 12,570 employees, compared with 12,918 in the preceding month. Employment in trade, manufacturing and building declined, while there was a gain in services. The index was lower than at the beginning of July, 1935, a general increase having then been shown.

*Toronto.*—There was a further moderate advance in industrial activity in Toronto at July 1, when construction and manufacturing showed improvement that was partly offset by declines in transportation; other industries generally reported only slight changes. The

1,462 employers furnishing data increased their staffs by 457 workers to 124,560 at the beginning of July. A decline had been recorded at the same date of last year, and the July 1, 1935, index was 3.7 points lower than that of 101.4 at the latest date.

*Ottawa.*—Statistics were received from 190 employers with 14,401 persons on their pay-lists, or 230 more than in the preceding month. There were increases in manufacturing, notably in lumber and pulp and paper factories, but transportation and building construction were rather slacker. A larger gain had been indicated at July 1, 1935; however, the index then was several points lower than in the month under review.

*Hamilton.*—There was an advance in Hamilton, where employment was in greater volume than at the same date of last year 549 workers were added to the forces of 284 firms furnishing information, bringing them to 31,972 at the beginning of July, 1936. Manufacturing reported improvement, notably in the iron and steel division, and transportation also

June 1.....	102.0	103.4	94.1	132.1	80.0	85.4	87.0	123.0	127.1
July 1.....	104.6	104.7	93.4	134.1	82.4	87.1	97.4	131.7	127.3
Relative Weight of Em- ployment by Industries as at July 1, 1936.....	100.0	53.6	2.7	6.2	2.2	10.5	11.6	2.9	10.3

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

showed a small gain, but construction was quieter.

**Windsor.**—Reduced activity, mainly in iron and steel plants, caused a decline of 1,394 persons in the staffs of the 170 reporting employers, who had 15,348 in their employ at the date under review. The index was fractionally lower than at July 1, 1935, when a similar contraction had been indicated.

**Winnipeg.**—Communications, transportation and construction registered moderate advances, and the tendency was also upward in manufacturing, while trade and services showed little general change. An aggregate working force of 39,861 employees was reported by the 476 co-operating firms; this was 757 more than at June 1. The improvement noted at the same date of a year ago had involved a larger number of persons, but the index of employment then was lower by 3.6 points than that of 92.7 at July 1, 1936.

**Vancouver.**—The trend of employment in Vancouver continued favourable, according to information from 432 establishments employing 34,042 workers, as against 33,287 in the preceding month. There were increases in practically all groups, those in transportation and construction being most pronounced. Greater expansion had been recorded by the firms making returns for July 1, 1935, but employment was then in smaller volume.

Index numbers by cities are given in Table 2.

### Employment by Manufacturing Industries

Employment in manufacturing at July 1 showed a further substantial increase, this advance, which was contra-seasonal in character, was greater than that indicated at the same date in any other year for which statistics are available, with the exception of 1933. The 5,749 establishments reporting had 592,292 employees at the date under review, as com-

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	July 1, 1936	June 1, 1936	July 1, 1935	July 1, 1934	July 1, 1933	July 1, 1932	July 1, 1931

Miscellaneous.....	.6	132.3	127.9	123.8	116.0	98.7	99.8	107.2

<sup>1</sup> The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

pared with 522,539 at June 1. The index rose from 103.4 in the preceding month to 104.7 at July 1, 1936, while the seasonally-corrected index also showed an advance from 100.6 to 101.9 at the latest date; this was higher than at July 1 in any of the last five years.

An analysis of the data for July 1, 1936, shows pronounced improvement in the animal and vegetable food, lumber and pulp and paper groups, with smaller gains in the musical instrument, rubber, tobacco, beverage, clay, glass and stone, electric current, electrical apparatus, non-ferrous metal, non-metallic mineral product and miscellaneous manufacturing industries. On the other hand, chemical, leather footwear, textile and iron and steel plants were seasonally slacker, the greatest losses being in the last-named group.

At July 1 in the years for which data are available, the unadjusted indexes in manufacturing are as follows: 1936, 104.7; 1935, 98.5; 1934, 93.8; 1933, 83.0; 1932, 85.4; 1931, 97.2; 1930, 111.3; 1929, 120.3; 1928, 113.1; 1927, 106.8; 1926, 103.1; 1925, 96.4; 1924, 94.9; 1923, 101.3; 1922, 91.1 and 1921, 87.6.

The manufacturers furnishing statistics at July 1, 1935, had numbered 5,537, and their employees had aggregated 495,013, which was a slight increase over the preceding month.

*Animal Products, Edible.*—Additions to staffs were recorded in this group, 1,403 persons being taken on by the 323 establishments making returns, which had 25,964 in their employ. Considerable improvement was noted in fish-canning in British Columbia, and there were also gains in dairies and meat-packing plants. The index at July 1, 1936, was several points higher than at the same date in 1935, when a decidedly smaller increase had been indicated.

*Leather and Products.*—Statements were received from 297 manufacturers in this division, employing 21,663 workers, as compared with 22,356 in the preceding month. The bulk of the decrease took place in boot and shoe factories, and occurred mainly in Quebec and Ontario. The general situation was better than that recorded at July 1 of last year; a much greater decline had then been reported.

*Lumber and Products.*—Rough and dressed lumber mills showed substantially heightened activity, and employment in container, furniture, vehicle and other wood-using factories was also brisker. The general increase exceeded that noted at July 1, 1935, when the index stood at 80.8, as against 86.8 at July 1, 1936. A combined working force of 45,926 employees was reported by the 837 firms co-operating at the date under review; this was 2,937 more than at the beginning of June. All provinces except British Columbia shared in the upward movement, but the gains in Ontario were greatest.

*Musical Instruments.*—Employment in musical instrument works increased at July 1; 35 manufacturers employed 1,276 persons, or 230 more than in the preceding month, while the situation was also more favourable than at the beginning of July, 1935.

*Plant Products, Edible.*—The resumption of operations in canneries caused an important advance, which was much larger than that registered at July 1 of a year ago, when the index was over nine points lower. Returns were received from 457 manufacturers of vegetable foods, having 32,632 operatives, as against 31,106 in their last report. The improvement in Ontario and British Columbia was most noteworthy.

*Pulp and Paper Products.*—There was a moderate decline in printing and publishing houses, while pulp and paper mills were busier. The 603 co-operating employers in the Dominion reported 62,361 workers, compared with 61,207 at June 1. Little general change had been indicated in the group as a whole at July 1, 1935; the index of employment was then nearly six points lower.

*Rubber Products.*—A minor increase was registered in rubber factories, in which employment was brisker than in the summer of last year. Statistics were tabulated from 52 firms with 12,402 employees at the date under review, as compared with 12,298 in the preceding month.

*Textile Products.*—A further contraction, mainly in Ontario, was reported by the 1,010 co-operating textile manufacturers, who employed 99,217 workers, or 572 fewer than at the beginning of June. The greatest losses were in headwear and garment and personal furnishing factories, while hosiery and knitting and cotton mills showed improvement. A much larger decline had been indicated at the corresponding date in 1935, when the level of employment was lower than at the date under review. The decrease was seasonal in character, the tendency having been downward at July 1 in eleven of the fifteen preceding years for which statistics are available.

*Tobacco, Distilled and Malt Liquors.*—Employment in this division showed a moderate increase, according to data from 180 establishments, employing 15,132 persons, compared with 15,004 in the preceding month. The increase occurred mainly in Quebec. A greater gain had been noted at the same date last year, and the index was then nearly six points higher.

*Chemicals and Allied Products.*—There was a decline in activity in chemical factories; 201 firms had 11,463 employees, compared with 11,665 at June 1. The Maritime Provinces reported most of the reduction in staffs. An advance had been shown at the beginning of July, 1935, but employment was then in smaller volume.

*Clay, Glass and Stone Products.*—Further improvement was indicated in building material plants, the 203 co-operating establishments enlarging their forces by 198 persons to 9,784 at the date under review. There were moderate but fairly general gains throughout the Dominion. The level of employment was higher than at July 1 of a year ago, when the trend was also upward.

*Electric Light and Power.*—An increase was registered in electric current plants, 99 of which reported a combined working force of 14,942 persons, as against 14,374 at the beginning of June. The index was almost five points higher than at the same date in 1935, when a smaller gain had been indicated.

*Electrical Apparatus.*—There was an increase of 603 in the staffs of the 119 manufacturers furnishing data, who had 14,195 employees at July 1. Firms in Ontario reported heightened activity, while elsewhere the changes, on the whole, were comparatively slight. The number engaged in the production of electrical apparatus was much larger than at July 1 in the preceding year, when a smaller advance had occurred.

*Iron and Steel.*—The trend in iron and steel factories was again downward; the losses, which were seasonal in character, were on a smaller scale than those indicated at July 1 of a year ago, when employment was in much smaller volume. Improvement at the date under review was noted in the general plant machinery, iron pipe, sheet metal and some other groups, while the automobile and other vehicle, agricultural implement, wire and wire products and other divisions showed contractions. Returns were compiled from 854 employers whose forces aggregated 117,930 workers, as against 120,073 in the preceding month.

*Non-Ferrous Metal Products.*—A further increase was registered in non-ferrous metal products, mainly in the base metal groups. The 169 co-operating manufacturers employed 21,552 operatives, or 852 more than in the preceding month. A smaller gain had been reported at the same date of last year, when the index was decidedly lower.

*Mineral Products.*—Continued improvement was shown in this division, in which the index, at 142.2, was several points higher than in July, 1935. Statistics were received from 137 employers whose staffs rose from 13,957 at June 1, 1936, to 14,421 at July 1.

### Logging

There was a slight seasonal reduction in logging, 194 persons being released from the staffs of the 307 reporting firms, who employed 26,422 at July 1. A much greater decline had

been noted at the same date in 1935; the index of employment was then decidedly lower.

### Mining

*Coal.*—There was a small seasonal decrease in employment in coal mines, 100 of which employed 22,633 men, as compared with 22,730 in their last report. There were gains in the Maritime Provinces, while lowered activity was indicated in the Western coal fields. A more pronounced decline had been noted at July 1 of last year, and employment was then in slightly less volume.

*Metallic Ores.*—Another advance was reported in metallic ore mines; statements were tabulated from 192 operators employing 31,200 persons, or 582 more than at June 1. Most of the gain occurred in the Western Provinces. The general index, at 258.0, was nearly 35 points higher than at July 1, 1935.

*Non-Metallic Minerals, other than Coal.*—There was a further increase in the payrolls of the 82 co-operating non-metallic mineral mines, which employed 7,917 workers, or 365 more than in the preceding month. Employment was much brisker than at the beginning of July a year ago, although a larger gain had then been recorded.

### Communications

Continued improvement was indicated in this group, according to the reporting companies and branches, which had 21,798 persons on their payrolls, compared with 21,163 at June 1. Employment on both telephones and telegraphs was more active. A smaller increase had been recorded at July 1, 1935, and the level of employment in this division was then lower.

### Transportation

*Street Railways and Cartage.*—Activity in the local transportation group showed an increase, 226 firms having 26,398 workers in their employ, as against 26,011 in the preceding month. A greater advance had been noted at the same date in 1935, when the index was rather lower.

*Steam Railways.*—Statistics tabulated from 100 companies and divisional superintendents in the steam railway operation group showed that they employed 60,446 workers at the beginning of July, or 1,231 more than in the preceding month. Expansion on a larger scale had taken place at July 1 of last year, but employment was then below its level at the time of writing. Ontario and the Western Provinces reported most of the improvement indicated at the date under review.

*Shipping and Stevedoring.*—There was an increase in employment in water transportation, 108 companies having enlarged their staffs by 545 employees, bringing them to 17,298 at July 1. The index, at 98·7, was practically nine points higher than at the beginning of July, 1935, when a larger gain had been recorded. At the date under review, there were advances in the Maritime Provinces and British Columbia.

### Construction and Maintenance

*Building.*—A reduction in employment was noted in building construction, comparing unfavourably with the increase indicated at July 1, 1935, when activity in this group was at a higher level. The 693 co-operating contractors employed 20,840 workers, as compared with 21,109 in the preceding month. Moderate expansion was noted in the Maritime Provinces, Ontario and British Columbia, but in Quebec and the Prairie Provinces curtailment was indicated.

*Highways.*—The number of men engaged on road construction and maintenance increased at the date under review, when the 359 employers furnishing data had 54,888 employees, or 6,719 more than at the beginning of June. There were considerable advances in all provinces except British Columbia. Employment in this group was not so brisk as at July 1, 1935.

*Railway.*—A combined working force of 38,872 persons was reported by the 33 contractors and divisional superintendents whose statistics were tabulated, and who had 32,986 employees at June 1. All provinces shared in the increase. Much smaller additions to staffs were noted at July 1 a year ago, but

the index then was sixteen points lower than at the date under review, when it stood at 97·5.

### Services

Continued expansion was shown in the service group, according to returns from 470 employers with 28,693 persons on their staffs, as compared with 26,778 in the preceding month. The opening of the summer-hotel season caused most of the gain, which was on a rather larger scale than that reported at July 1, 1935; employment was then in less volume. The tendency was favourable in all provinces; the largest increases being in Quebec and the Prairie Provinces.

### Trade

Wholesale houses showed slightly greater activity, and retail stores reported a moderate reduction in personnel. The result was a very small increase in the staffs reported in the trade group as a whole. Statements were tabulated from 1,241 firms having 101,258 employees, as against 101,162 at the beginning of June, 1936. Employment was in greater volume than at the same date last summer, although more marked improvement had then been indicated by trading establishments.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are shown in the accompanying tables, in which the columns headed "relative weight" show the proportion that the number of employees reported in the indicated areas or industry is of the total number of employees reported in Canada at the date under review.

## (2) Unemployment in Trade Unions at the Close of June, 1936

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The present article on unemployment among local trade unions deals with the situation as at the end of June and is based on the reports furnished by 1,790 labour organizations, with

an aggregate membership of 179,815 persons. For all occupations reporting, 24,970 members, or a percentage of 13·9, were without work at the end of the month, in contrast with 14·8 per cent of inactivity in May. A favourable employment movement was also noted from June of last year when 15·4 per cent of the members reported were unemployed. With the exception of Alberta all provinces showed a tendency toward employment expansion over May, although the changes were not of particular significance in any one province, being more of a general seasonal advance. The curtailment evident in Alberta was also of minor importance and due to some cessation in coal mining activities. Compared with the returns for June of last year Nova Scotia and Manitoba unions reported gains in activ-

ity during the month reviewed of rather noteworthy proportions, the coal mines in the former province accounting largely for the increase, while in the latter, the improvement was chiefly confined to the manufacturing industries. Heightened activity, on a moderate scale, was evident among Quebec, Saskatchewan, Alberta and British Columbia members, and in New Brunswick conditions were but nominally better. Ontario unions showed restricted activity from June a year ago, which was, however, slight.

Reports on unemployment affecting local trade union members in the largest city in each province, with the exception of Prince

Appearing with this article is a chart which illustrates the trend of unemployment by months from January, 1930, to date. The curve showed a slight drop in level throughout June when compared with the previous month, indicative of a greater prevalence of available work. In this downward trend it paralleled the course of the corresponding month last year, though the level attained at the close of the month under review was below that of June a year ago.

The manufacturing industries, with 502 local unions reporting at the close of June a total of 58,544 members, showed that 8,042 were without employment on the last day of the

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Edward Island, are tabulated separately each month. Of these, Saint John, Montreal, Toronto, Winnipeg, Regina and Vancouver unions all reflected increases in employment over May of from one to three per cent, while the losses indicated by Edmonton and Halifax unions were around two per cent. Halifax members were, however, much busier than in June a year ago and in Montreal the improvement recorded was quite pronounced. Noteworthy advancement was also evident among Winnipeg and Edmonton members and lesser gains occurred in Regina and Vancouver. The situation in Toronto, however, was considerably less favourable than in June last year and Saint John unions registered curtailment in activity on a small scale.

month, a percentage of 13.7, as compared with percentages of 15.5 in May and 15.9 in June, 1935. Activity for wood, garment and fur workers showed a noteworthy rise from May and more moderate gains were apparent among hat, cap and glove, brewery, and textile and carpet workers, and bakers and confectioners. Fractional advances only were registered by paper makers, leather, and iron and steel workers, and meat cutters and butchers. On the other hand, metal polishers and glass workers reported large percentage increases in slackness, but as their combined membership was small this did not greatly affect the total in the manufacturing industries. Recessions in employment, of much lesser degree, were recorded among jewellery workers, while

among general labourers, printing tradesmen, and cigar and tobacco workers the tendency was less favourable, though the change from May was quite slight. In contrasting with the returns for June of last year in the manufacturing industries, much better conditions prevailed for general labourers, textile and carpet workers, and meat cutters and butchers during the month surveyed, and noteworthy expansion was reflected by glass workers. Improvement involving the greatest number of members, however, was evident in the iron and steel trades, and employment was also

maintained in greater volume among cigar and tobacco, and fur workers, bakers and confectioners, papermakers and printing tradesmen. On the contrary, hat, cap and glove workers and metal polishers were decidedly less active than in June last year, and a considerable drop in work available was recorded by leather and wood workers. Garment and brewery workers showed curtailment on a more moderate scale, and jewellery workers fractional recessions only.

There was a slight tendency toward retarded employment in the coal mining industry during June when compared with the previous month, as indicated from the reports furnished by 47 local unions embracing a total of 14,657 members. Of these, 2,202, or a percentage of 15.0, were idle at the end of the month, as compared with 14.2 per cent in May. The situation, however, showed some improvement over June last year when 18.8 per cent of unemployment was recorded. Restricted activity in the Alberta coal mines was the determining factor in the less favourable movement noted from the preceding month, though contributing declines on a very small scale were evident in British Columbia. Some slight betterment in conditions was apparent, however, in Nova Scotia mining areas from May. Noteworthy employment expansion was shown in the Nova Scotia mines from June of last year and in Alberta also there was a slight rise in activity. In British Columbia, however, the trend was less favourable but the change from June, 1935, was small. Short time work continued rather prevalent throughout the various mining areas.

In the building and construction trades as a whole, the same percentage of idleness was registered at the close of June as in the preceding month, namely, 40.5 per cent. The percentage for June was based on the reports compiled from 192 associations, with a membership numbering 21,364 persons, 8,643 of whom were out of work on the last day of the month. A more favourable situation was shown from June a year ago when 44.5 per cent of idleness was recorded. Steam shovelmen reported a large percentage increase in activity from May, but their membership was small, and among bridge and structural iron workers also, the percentage gain was rather marked. Employment advances of considerably lesser proportion were apparent among bricklayers, masons and plasterers, plumbers and steamfitters, and electrical workers. Of the counteracting recessions the most pronounced were recorded among tile layers, lathers and roofers, hod carriers and building labourers, and granite and stone cutters, while

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	8.1	2.0	3.4	2.7	2.1	3.2	2.0	7.9	3.4

carpenters and joiners, and painters, decorators and paperhangers showed but a slightly adverse tendency. Compared with the returns for June of last year in the building and construction trades, bridge and structural iron workers, bricklayers, masons and plasterers, and plumbers and steamfitters were all afforded a substantially greater volume of employment during the month reviewed, and noteworthy recovery was indicated by electrical workers. Among steam shovelmen, and painters, decorators and paperhangers also, some employment advancement was shown. A large falling off in activity, however, was apparent among hod carriers and building labourers and tile layers, lathers and roofers from June a year ago, and among carpenters and joiners more moderate recessions occurred. Curtailment of minor importance was recorded by granite and stone cutters.

A more favourable employment trend was noted in the transportation industries during June than in either the preceding month or June of last year, according to the returns compiled from 796 associations, with a total of 58,326 members. Of these, 3,647, or a percentage of 6.3, were without employment at the end of the month, as contrasted with percentages of 7.1 at the end of May and 7.7 in June, 1935. Steam railway employees, whose returns constituted nearly 78 per cent of the entire group membership reported, were in both comparisons somewhat better engaged during June. Among teamsters and chauffeurs the level of activity was slightly higher than in May, though minor employment contractions were evident from June last year. Street and electric railway employees reported an unchanged situation from May, while fractional gains in activity were reflected from June, 1935. Quieter conditions prevailed for navigation workers during June than in either the previous month or June a year ago, the recessions in the latter comparison being more pronounced.

From unions of retail shop clerks 6 reports were received during June, covering a membership of 1,419 persons, 3.5 per cent of whom were without work on the last day of the month, in contrast with 5.1 per cent in May. Noteworthy improvement was indicated from June, 1935, when 10.3 per cent of the members reported were idle.

Civic employees showed little change in the situation in all three months used for comparative purposes, the 80 associations making returns for June, with 8,461 members, showing that 169 were idle on the last day of the

month, a percentage of 2.0, as contrasted with percentages of 2.3 in May and 2.8 in June a year ago.

Retarded activity on a small scale was recorded in the miscellaneous group of trades as a whole, during June from the previous month, as manifest by the returns tabulated from 122 associations including 6,011 members. Of these, 613, or 10.2 per cent, were without employment on the last day of the month, contrasted with a percentage of 9.5 in May. Some improvement, however, was shown from June a year ago when 14.7 per cent of idleness was recorded. Stationary engineers and firemen accounted in entirety for the less favourable situation indicated from May. Among hotel and restaurant, and theatre and stage employees and barbers the tendency was toward increased employment, though the changes were quite slight. Unclassified workers were afforded the same volume of work as in the preceding month. Compared with the reports for June of last year hotel and restaurant employees were much better engaged during the period under survey and among theatre and stage employees, and stationary engineers and firemen more moderate gains occurred. Conditions for barbers and unclassified workers were but nominally better than in June a year ago.

The situation for fishermen during June was less favourable than in either the previous month or June last year, though the variation in each comparison was very small. This was evident from the reports forwarded by 3 associations of these workers, with 595 members, 1.7 per cent of whom were idle at the end of the month, as contrasted with percentages of 0.8 in May and 1.2 in June, 1935.

Improvement was noted among lumber workers and loggers during June from the preceding month according to the reports tabulated from 6 unions, embracing a membership of 1,181 persons. Of these, 45, or 3.8 per cent, were without work at the end of June, contrasted with a percentage of 8.4 in May. More favourable conditions also prevailed than in June a year ago, when 5.1 per cent of inactivity was recorded.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1935, inclusive, and also the percentage of unemployment by provinces for June of each year from 1919 to 1933, inclusive, and for each month from June, 1934, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for June, 1936

The volume of business transacted by the offices of the Employment Service of Canada for the month of June, 1936, as shown by the average daily placements effected, was over 3 per cent lower than that of the previous month and also that of the corresponding period a year ago. Total placements, however, for the month under review were slightly higher than those in June, 1935, due to the fact that there was one more working day in the 1936 period. Industrial divisions showing declines from May, 1936, were services, logging, trade and manufacturing, while gains

tions for work registered at the offices of the Service throughout Canada, computations being made semi-monthly. It will be seen from the graph that the curve of vacancies and of placements in relation to applications showed only small variation during June, being slightly lower during the first two weeks of the month, but at the end of the period under review attaining levels over three points higher than those recorded at the close of June, 1935. The ratio of vacancies to each 100 applications was 53.9 during the first half and 55.1 during the second half of June, 1936,

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o-o-o-o-o-o

were reported in construction and maintenance, farming, transportation and mining. In comparison with June a year ago, substantial additions were reported in farming and services and other increases of lesser volume in logging, manufacturing and mining, but the total expansion was almost entirely offset by a heavy reduction in construction and maintenance, under which group many relief placements were recorded last year. There were also minor declines in trade and transportation.

The accompanying chart shows the trend of employment from January, 1934, as represented by the ratio of vacancies notified and of placements effected for each 100 applica-

in contrast with ratios of 56.6 and 51.7 during the corresponding periods of 1935. The ratios of placements to each 100 applications during the periods under review were 49.2 and 51.4, as compared with 52.9 and 48.2 during the corresponding month of 1935.

The average number of vacancies reported daily by employers to the Offices of the Service throughout Canada during June, 1936, was 1,127 as compared with 1,163 during the preceding month, and with 1,156 in June a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,067 in comparison with 2,027 in May, 1936, and with 2,131 in June last year.

The average number of placements made daily by the Offices of the Service during June, 1936, was 1,039 of which 647 were in regular employment and 392 in work of one week's duration or less, as compared with the total daily average of 1,075 during the preceding month. Placements in June a year ago averaged 1,079 daily, consisting of 654 placements in regular and 425 in casual employment.

During the month of June, 1936, the Offices of the Service referred 27,443 persons to positions and effected a total of 25,958 placements. Of these, the placements in regular employment were 16,154, of which 11,464 were of men and 4,690 of women, while placements in casual work totalled 9,804. The number of vacancies reported by employers was 18,075 for men and 10,089 for women, a total of 28,164, while applications for work numbered 51,674 of which 38,432 were from men and 13,242 from women. Reports for May, 1936, showed 29,070 positions available, 50,652 applications made and 26,864 placements effected, while in June, 1935, there were recorded 27,721 vacancies, 51,129 applications for work and 25,889 placements in regular and casual employment.

The following table gives the placements effected by the Offices of the Employment Service of Canada, each year, from January, 1926, to date:—

Year	Placements		
	Regular	Casual	Totals
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367
1930.....	187,872	180,807	368,679
1931.....	175,632	295,876	471,508
1932.....	153,771	198,443	352,214
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936 (6 months).....	89,352	61,156	150,508

#### NOVA SCOTIA

There was an increase of over 7 per cent in the number of positions offered through Employment Offices in Nova Scotia during June when compared with the preceding month, but a loss of over 7 per cent in comparison with the corresponding month of last year. Placements were over 6 per cent higher than in May, but nearly 9 per cent less than in June, 1935. A large decrease in relief placements on highway construction was responsible for the decline from June of last year, as all other groups, except logging, where a nominal loss only was registered, showed gains. The largest increase was in

services. Placements by industrial divisions included: logging, 36; construction and maintenance, 361; trade, 26; and services, 371, of which 196 were of household workers. During the month 180 men and 81 women were placed in regular employment.

#### NEW BRUNSWICK

Employment opportunities, as indicated by orders received at Employment Offices in New Brunswick during June, were over 7 per cent less favourable than in the preceding month and nearly 23 per cent below the corresponding month of last year. There was a decrease also in placements of over 9 per cent when compared with May, and of nearly 27 per cent in comparison with June, 1935. As in Nova Scotia, a reduction in relief placements on highway construction accounted for the decline from June of last year. Of the changes in other groups, gains in services, logging and manufacturing were the most important. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 56; logging, 32; construction and maintenance, 74; and services, 566, of which 430 were of household workers. Placements in regular employment numbered 128 of men and 66 of women.

#### QUEBEC

Positions offered through Employment Offices in the Province of Quebec during June were over 19 per cent less than in the preceding month, but less than 1 per cent lower than during the corresponding month of last year. There was a decrease in placements of nearly 23 per cent when compared with May and of over 4 per cent in comparison with June, 1935. A substantial decline in placements under construction and maintenance, when compared with June of last year, was largely responsible for the decrease under this comparison, although a reduction was also reported in transportation. The most important gain was in services, but there were moderate increases also in logging, farming and manufacturing. The changes in other groups were unimportant. Placements by industrial divisions included manufacturing, 120; logging, 252; farming, 114; construction and maintenance, 778; trade, 104; and services, 2,352, of which 2,005 were of household workers. During the month 1,329 men and 1,564 women were placed in regular employment.

#### ONTARIO

Positions offered through Employment Offices in Ontario during June were over 3 per cent higher than in the preceding month and over

\* 7 Placements effected by offices since closed.

4 per cent above the corresponding month of last year. There was an increase also in placements of nearly 4 per cent when compared with May and of nearly 3 per cent in comparison with June, 1935. Farm placements were considerably in excess of June of last year and gains were also recorded in services, manufacturing, transportation, logging and mining. The only decrease of importance was in the highway division of construction and maintenance, although a small loss was also reported in trade. Changes in other groups were nominal only. Placements by industrial divisions included: manufacturing, 501; logging, 1,194; construction and maintenance, 3,595; trade, 273; and services, 3,884, of which 2,225 were of household workers. There were 5,280 men and 1,707 women placed in regular employment during the month.

#### MANITOBA

There was a decline of nearly 8 per cent in the number of positions offered through Employment Offices in Manitoba during June when compared with the preceding month, but a gain of nearly 18 per cent in comparison with the corresponding month of last year. Placements were nearly 10 per cent less than in May, but nearly 16 per cent above June, 1935. All industrial divisions participated in the increase in placements over June of last year, the largest gain being in farming. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 45; logging, 39; farming, 411; construction and maintenance, 415; and services, 611, of which 459 were of household workers. Placements in regular employment numbered 799 of men and 298 of women.

#### SASKATCHEWAN

The demand for workers, as indicated by orders received at Employment Offices in Saskatchewan during June, was over 2 per cent less than in the preceding month, but over 50 per cent higher than during the corresponding month of last year. There was an increase in placements of over 2 per cent when compared with May and of over 66 per cent in comparison with June, 1935. Except for a small decrease in trade, all industrial divisions showed increased placements over June of last year, the most important gain being in construction and maintenance and made up largely of placements of extra gang labourers on railway maintenance work. Placements by industrial divisions included: manufacturing, 99; farming, 577; construction and maintenance, 848; and services, 726, of which 483 were of household workers. There

were 1,287 men and 335 women placed in regular employment during the month.

#### ALBERTA

Orders received at Employment Offices in Alberta during June called for over 16 per cent fewer workers than in the preceding month and nearly 13 per cent less than during the corresponding month of last year. There was a decline also in placements of over 21 per cent when compared with May and of nearly 19 per cent in comparison with June, 1935. The decrease in placements from June of last year was due to a reduction in relief work on highway construction. There was a moderate gain in farming, but the changes in all other groups were unimportant. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 62; farming, 596; transportation, 74; construction and maintenance, 564; and services, 511, of which 380 were of household workers. During the month 1,289 men and 306 women were placed in regular employment.

#### BRITISH COLUMBIA

During June, orders received at Employment Offices in British Columbia called for over 17 per cent more workers than in the preceding month, but nearly 14 per cent fewer than during the corresponding month of last year. There was an increase of nearly 17 per cent in placements when compared with May, but a decrease of nearly 14 per cent in comparison with June, 1935. A reduction in relief placements on highway construction was responsible for the decline from June of last year. This decline was, however, partly offset by gains in all other groups, of which the largest were in logging, services and farming. Placements by industrial divisions included: manufacturing, 71; logging, 289; farming, 277; mining, 71; construction and maintenance, 1,284; and services, 771, of which 449 were of household workers. Regular employment was found for 1,172 men and 333 women.

#### Movement of Labour

During the month of June, 1936, the offices of the Employment Service of Canada effected 16,154 placements in regular employment, 9,153 of which were of persons for whom the employment located was outside the immediate vicinity of the offices at which they were registered. Of the latter, 938 were granted the Employment Service reduced transportation rate, 923 going to centres within the same province as the dispatching office and 15 to other provinces. The reduced transportation

rate which is 2.7 cents per mile with a minimum fare of \$4 is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Quebec transfers at the reduced rate during June were of bush workers, 3 in number who secured certificates at the Hull office for transportation to Pembroke. Offices in Ontario granted 635 reduced rate certificates during June, all to points within the province. Of these 546 were issued at Port Arthur to 492 bush workers, 13 mine workers, 12 sawmill workers, 10 labourers, 10 cookees, 4 hotel workers, 3 cooks, one clerk, and one restaurant employee going to centres within its own zone. The Fort William office dispatched 66 bush workers, 2 mine workers, and one mill hand, and the Sudbury office 10 bush workers and 2 miners within their respective zones. From North Bay one painter was carried to Timmins, one mine foreman to Port Arthur and one cook to Sudbury, while from Timmins 3 miners were transported to employment in the Fort William zone, and one mine machinist's helper to a point in the Timmins zone. The one remaining transfer was of a pattern-maker going from Hamilton to Windsor. The labour movement in Manitoba during June originated at Winnipeg, and included the dispatch of 118 workers, 106 within the province, and 12 to points outside. Provincially one farm hand and one farm domestic were bound for Brandon and 97 farm hands, one farm domestic, 4 mine workers, one engineer and one hotel cook for various centres within the Winnipeg zone. Of the workers going to other provinces the Port Arthur zone received 6 mine employees, 2 mill labourers, one

farm hand, and one salesman, and the Estevan and Regina zones each one farm hand. Taking advantage of the Employment Service reduced transportation rate in Saskatchewan during June one farm hand proceeded from Saskatoon to employment within the Yorkton zone. Certificates for reduced transportation were issued in Alberta during June to 171 persons, all of whom were bound for provincial situations. For centres within its own zone the Edmonton office dispatched 48 steamship company employees, 30 building construction workers, 19 highway construction workers, 13 bushmen, 12 fishermen, 10 miners, 5 diamond drill setters, 4 drillers' helpers, 3 sawmill labourers, 3 cooks, 3 housekeepers, 2 foremen, 2 labourers, 2 farm hands, one farm domestic, one diesel engineer, one truck driver, one school teacher, one club steward, one barber, one blacksmith, one engineer, one café waitress, and one maid, while to Drumheller were sent 2 farm hands. Transferred from Calgary one bricklayer was conveyed to Edmonton, and 2 farm hands within the Calgary zone. In British Columbia 10 reduced rate certificates were issued during June, all provincial. Of these the Vancouver office granted 8 to mine workers going to employment within its own zone, and one to a sawyer travelling to Penticton. The Penticton zone was also the destination of one farm hand shipped from Nelson.

Of the 938 persons who benefited by the Employment Service reduced transportation rate during June, 251 were conveyed by the Canadian National Railways, 624 by the Canadian Pacific Railway, 52 by the Northern Alberta Railway, 7 by the Pacific Great Eastern Railway, and 4 by the Temiskaming and Northern Ontario Railway.

#### (4) Building Permits issued in Canada during June, 1936

The value of the building permits issued by 58 cities during June was \$4,580,740; this was an increase of \$414,902 or 10.0 p.c., as compared with the May total of \$4,165,838, but a decrease of \$524,115 or 10.2 per cent in comparison with June, 1935, when the authorizations amounted to \$5,104,855.

The value of the building authorized in the first six months of the present year was \$17,500,420; this was considerably lower than the aggregate of \$24,640,511 reported in the period January-June, 1935, although it was decidedly higher than in the first six months of either 1934 or 1933. The cumulative total for the same period in each of the last five years has been very much lower than in any other year on record; the wholesale prices of building materials have also been decidedly lower

since 1931, than in any preceding year since 1920.

Some 50 cities furnished detailed statistics for June, 1936, showing that they had issued more than 400 permits for dwellings valued at approximately \$2,000,000 and for some 1,800 other buildings, estimated to cost almost \$2,400,000. In May, authority was given for the erection of about 400 dwellings and 2,000 other buildings, valued at approximately \$1,600,000 and \$2,200,000, respectively.

Prince Edward Island, Nova Scotia, Quebec, Ontario, Saskatchewan and Alberta recorded increases in the value of the building permits issued during June as compared with the preceding month, the greatest gain of \$397,123 or 70.3 p.c. taking place in Quebec. In New

Brunswick, the June total was lower by 65·7 per cent than that for May.

As compared with June, 1935, Nova Scotia and Saskatchewan registered increases of \$107,775 or 139·3 per cent and \$70,930 or 181·0 per cent, respectively. Of the declines those of \$403,630 or 27·0 per cent in Quebec and \$120,306 or 38·7 per cent in Alberta were most pronounced.

Of the larger cities, Montreal and Toronto recorded increases in the value of the permits issued as compared with May, 1936, but decreases as compared with June, 1935; Winnipeg and Vancouver showed losses in both comparisons. Of the other centres, Halifax, New Glasgow, Sydney, Quebec, Sherbrooke, Chatham, Fort William, Hamilton, Kingston, Kitchener, London, Owen Sound, Port Arthur, Stratford, St. Thomas, Woodstock, Brandon, St. Boniface, Regina, Saskatoon, Edmonton, Lethbridge, Nanaimo, New Westminster and North Vancouver reported improvement over May, 1936, and June, 1935.

CUMULATIVE RECORD FOR FIRST HALF-YEAR,  
1920-1936

The following table gives the value of the building authorized by 58 cities during June

and in the first six months of each year since 1920 as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first six months of the same years are also given.

Year	Value of permits issued in June	Value of permits issued in first six months	Indexes of value of permits issued in first six months (1926=100)	Average indexes of wholesale prices of building materials in first six months (Average 1926=100)

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

The *British Ministry of Labour Gazette*, July, 1936, summarized the employment situation as follows:—

Employment in June showed little change, on the whole, as compared with the previous month, but was considerably better than in June, 1935. In most of the principal industries there was an improvement between May 25 and June 22, those mainly affected being shipbuilding, engineering, iron and steel manufacture, public works contracting, printing and bookbinding, the food manufacturing industries, the transport and distributive trades, the fishing industry, and hotel and boarding house service. On the other hand, there was a sharp increase in the numbers temporarily stopped in the coal mining industry, partly due to the suspension of work on June 22 at a number of pits in connection with the annual demonstration of the Yorkshire Miners' Association; and there was also a decline in employment in most of the clothing trades, including boot and shoe manufacture, and in the wool textile, linen, and motor vehicle industries.

It is estimated that, at June 22, 1936, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of agricultural workers was approximately 10,832,000. This was 1,000 more than at May 25, 1936, and 441,000 more than at June 24, 1935. Agricultural workers became insured at the beginning of May, but statistics of the number of such workers in employment are not yet available.

Among workpeople, aged 16-64, insured against unemployment (excluding agricultural workers) the percentage unemployed in Great Britain and Northern Ireland, at June 22, 1936 (including those temporarily stopped as well as those wholly unemployed), was 13·1, as compared with 13·0 at May 25, 1936, and with 15·4 at June 24, 1935. In Great Britain the percentage at June 22, was 12·9 compared with 12·8 at May 25, and with 15·2 at June 24, 1935.

At June 22, 1936, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,326,057 wholly unemployed, 301,793 temporarily stopped, and 74,826 normally in casual employment, making a total of 1,702,676. This was 2,366 less than

a month before and 297,434 less than a year before. The total of 1,702,676 included 1,362,190 men, 47,324 boys, 251,616 women and 41,546 girls. There was a fall in unemployment in nearly all parts of the country except the North Eastern Division, but this was largely counterbalanced by a temporary rise in that Division, due principally to a temporary suspension of work at a number of coal mines in connection with the annual demonstration of the Yorkshire Miners' Association referred to above.

The persons on the Registers included 756,827 insured persons with claims for insurance benefit; 645,356 insured persons with applications for unemployment allowances; 190,204 insured persons (including insured juveniles under 16 years of age and insured agricultural workers) not in receipt of insurance benefit or unemployment allowances; and 110,289 uninsured persons.

In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at June 22, 1936, was 1,766,372, as compared with 1,768,246 at May 25, 1936, and 2,068,152 at June 24, 1935.

### United States

June marked the fourth consecutive month in which gains in employment have been shown in the combined manufacturing and non-manufacturing industries surveyed monthly by the U.S. Bureau of Labor Statistics.

The increase in pay rolls in June in these combined industries continues the gains which have been reported consistently each month since January, the report said. Based on reports supplied by approximately 135,000 establishments employing over 7,000,000 workers, it is estimated that 58,000 workers were returned to jobs in these combined industries over the month interval and that aggregate weekly wages were nearly \$1,100,000 greater in June than in the preceding month.

### MANUFACTURING INDUSTRIES

The June, 1936, employment index (86.0) is 7.9 per cent above the level of June, 1935 (79.7), and marks the highest employment level recorded since October, 1930. The payroll index for June, 1936 (79.5), is 19.7 per cent above the June, 1935, level (66.4) and is also higher than the index of any month since October, 1930.

A number of manufacturing industries registered new "highs" in employment in June. The blast furnaces, steel works, and rolling mills industry reported the largest number of workers employed in any month since August

1930; employment in foundry and machine shops exceeded the levels of any month since September, 1930; the engine, turbine and tractor industry reported the highest employment since March, 1930; and electric and steam car building shops reported the maximum employment since April, 1930. Employment in June in the electrical machinery, steam fittings, structural metalwork, aluminum, millwork, brick, and steam-railroad repair shop industries exceeded the levels of any month since the latter part of 1931.

The most pronounced gains in employment over the month interval were seasonal in character: the canning and preserving industry reported a gain of 34.1 per cent; radios and phonographs 12.6 per cent; beet sugar, 10.7 per cent; and ice cream, 5.3 per cent. A number of industries manufacturing building construction materials also reported employment gains, among which were: structural metalwork, 5.0 per cent; millwork, 3.9 per cent; brick, 5.9 per cent; steam and hot-water heating apparatus, 1.2 per cent; and cement, 0.9 per cent. Employment in the blast furnaces, steel works, and rolling mills industry rose 1.3 per cent over the month interval. The increase in this industry was somewhat retarded by labour disturbances which caused decreased plant operation in several localities. Other industries of major importance in which gains in employment were shown were: men's clothing 3.6 per cent; electrical machinery, apparatus, and supplies, 2.6 per cent; furniture, 2.0 per cent; slaughtering and meat packing, 1.7 per cent; silk and rayon goods, 1.6 per cent; chemicals, 1.2 per cent; petroleum refining, 1.2 per cent; foundries and machine shops, 1.0 per cent; steam-railroad repair shops, 0.8 per cent; and cotton goods, 0.4 per cent. Establishments in the machine tool industry continued to absorb workers in June. The increase of 1.9 per cent in employment in this industry continued the unbroken succession of gains which have been shown monthly since October, 1934. The June, 1936, employment index (109.8) is higher than the level recorded in any month since September, 1930.

The largest percentage declines in employment from May to June were also seasonal and were in the fertilizer industry (38.5 per cent), cottonseed oil-cake-meal (14.1 per cent), millinery (12.5 per cent), and women's clothing (9.7 per cent). The decrease of 26.8 per cent in employment in the typewriter industry was due primarily to labour troubles as was the decrease of 6.6 per cent in the cash registers, adding machines, and calculating machines industry. A seasonal decline of 4.2 per cent was reported in the agricultural

implement industry and declines ranging from 2.1 per cent to 2.9 per cent were shown in the boots and shoes, cotton small wares, confectionery, wirework, rubber boots and shoes, dyeing and finishing, pottery, and shipbuilding industries. Employment in the automobile industry declined 1.2 per cent over the month interval.

The indexes of factory employment and pay rolls are computed from returns supplied by representative establishments in 90 manufacturing industries. The base used in computing these indexes is the 3-year average, 1923-25, taken as 100. They have not been adjusted for seasonal variation. In June, 1936, reports were received from 24,823 establishments employing 4,200,590 workers, whose weekly earnings were \$96,142,837.

#### NON-MANUFACTURING INDUSTRIES

Eleven of the 16 non-manufacturing industries surveyed showed increases in number of workers between May and June and increased pay rolls were shown in 10 industries.

*Wholesale and Retail Trade.*—Employment in wholesale trade establishments decreased one-tenth of 1 per cent, according to reports received from 15,949 wholesale trade establishments employing 299,716 workers in June. Gains in employment were shown in a number of the more important lines of wholesale trade, among which were electrical goods, automotive, food products, groceries, hardware, lumber and building materials, machinery, equipment and supplies, and petroleum products. The gains, however, were not sufficient to quite offset the declines reported in wholesale dry goods and apparel, chemicals and drugs, furniture and housefurnishings, general merchandise, and other lines of wholesale trade.

A gain of 0.3 per cent in employment was shown by reports received from 54,060 retail establishments employing 873,292 workers in June. Employment in the general merchandising group, which is composed of department, variety, and general merchandising stores and mail-order houses, increased 0.2 per cent. While this gain is not pronounced, it is significant because employment in this group normally recedes from May to June. Other lines of retail trade in which gains in employment were shown over the month interval were lumber and building materials, automotive, food, and hardware, jewelry, and ice and coal dealers. Apparel stores showed a decrease of 0.7 per cent in employment, and small losses were also shown in retail cigar, drug, farmers' supplies, and furniture stores.

*Public Utilities.*—Each of the 3 public utilities surveyed showed gains in employment over the month interval. The electric light and power and manufactured gas industry showed an increase of 1.6 per cent, and the telephone and telegraph and electric-railroad and motor-bus operation and maintenance industries showed gains of 0.7 per cent and 0.3 per cent, respectively. Employment in the electric light and power and manufactured gas industry has advanced each month since February, the June level reaching the maximum reported in any month since December, 1931.

*Mining Industries.*—A seasonal slackening in employment was shown in the anthracite mining industry, employment decreasing 6.7 per cent from May to June. Bituminous coal mines also reported 0.7 per cent fewer employees in June than in the preceding month. The remaining 3 mining industries reporting showed gains over the month interval. Quarries and non-metallic mines reported an increase of 2.6 per cent in number of workers, and metal mines showed an increase of 1.8 per cent. This latter increase continues the successive gains reported in this industry since July of last year and raised the June employment index (61.9) above the level of any month since May, 1931. Crude petroleum producing firms recorded a gain of 0.6 per cent in employment from May to June.

*Service Industries.*—Increases in employment were shown in 3 of the 5 service industries surveyed. Seasonal increases in employment were reported by laundries (2.0 per cent), and by dyeing and cleaning establishments (0.2 per cent). Insurance companies also reported a small gain in employment (0.4 per cent). Employment in brokerage offices declined 1.9 per cent from May to June, and year-round hotels showed a small decrease in number of workers (0.2 per cent).

*Private Building Construction.*—Further gains in employment were shown in the private building construction industry in June, 1936. Reports received from 9,514 contractors employing 105,567 workers in June showed an increase of 4.4 per cent in employment over the month interval and 5.2 per cent in pay-rolls. Employment in this industry in June, 1936, was 21.5 per cent above the June, 1935, level and pay rolls were 38.4 per cent higher. The information furnished by reporting contractors relates to employees engaged in erecting, altering and repairing private buildings and does not include projects financed by the Public Works Administration, Reconstruction Finance Corporation funds, or regular appro-

priations of the Federal, State, and local governments.

**Public Employment.**—During June, approximately 3,290,000 workers were employed on The Works Program financed from funds provided by the Emergency Relief Appropriation Act of 1935. Compared with the previous month, this is an increase of 176,000 in the number of employees. Of the total number engaged on this program in June, 2,561,000 were working on projects operated by the Works Progress Administration. Pay-roll disbursements for all persons engaged on The Works Program during the month totalled \$164,000,000. Orders were placed in June for construction materials valued at \$55,000,000.

Over 345,000 workers were engaged on the Public Works Administration construction program in June. This includes 170,000 employees working on projects financed from E.R.A.A. 1935 funds, who are also included under The Works Program. Compared with the previous month, employment on the Public Works Administration construction program in June showed an increase of 30,000 workers. Pay-roll disbursements in June totalled in excess

of \$24,000,000. During the month orders were placed for construction materials valued at \$36,500,000.

In emergency conservation work (C.C.C. Camps) a decrease of 23,000 in the number of wage earners was reported for June. Of the 383,000 employees, 332,000 were enrolled workers, 41,000 were supervisory and technical employees, 8,000 were reserve officers and 2,000 were educational advisers. Pay-roll disbursements for June totalled more than \$17,900,000.

More than 102,000 workers were employed in June on construction projects financed by regular governmental appropriations. This is an increase of 25,000 compared with the previous month. Pay rolls for the month totalled \$8,600,000. The value of material orders placed during June for use on these construction projects amounted to more than \$12,300,000.

The number of wage earners engaged in the construction and maintenance of State roads in June was approximately 186,000. Compared with the number reported in the previous month this is an increase of more than 5,000. Pay-roll disbursements for the month were in excess of \$11,488,000.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

**T**HE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable

rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by The Fair Wages and Hours of Labour Act, 1935, which came into force on May 1, 1936. The clause relating to wages and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodeling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodeling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodeling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for

inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contract for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing fair wage conditions have recently been executed by the Government of Canada.

#### DEPARTMENT OF THE INTERIOR

##### *Contract in Group "A" (Construction, Remodelling, etc.)*

Installation of drainage, plumbing and water supply systems at the new Bathhouse and

Swimming Pool, Miette Hot Springs, Jasper National Park, Jasper, Alberta. Name of contractors, Messrs. J. W. Mould & Son, Edmonton, Alta. Date of contract, July 30, 1936. Amount of contract, \$5,355. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Asbestos Insulation Workers.....	\$0 85	8	44
Blacksmiths.....	0 70	8	44
Boilermakers, erection and installation.....	0 80	8	44
Brick and hollow tile layers and masons.....	1 00	8	44
Brick and hollow tile layers and masons' helpers—(continuously employed mixing and tempering mortar).....	0 50	8	44

Sheet metal workers.....	0 65	8	44
Teamster, team and wagon.....	0 65	8	44

Internal painting of Fort Frederick Dormitory, Royal Military College, Kingston, Ont. Name of contractor, Mr. Stanley Campbell, Kingston, Ont. Date of contract, July 24, 1936. Amount of contract, \$1,797. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Painters.....	\$0 70	8	44
Painters' helpers.....	0 40	8	44

Re-covering the flat roofs of the Armoury at Peterborough, Ont. Name of contractor, Mr. Fred. H. Rowan, Peterborough, Ont. Date of contract, July 24, 1936. Amount of contract, \$1,284. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Labourers.....	\$0 40	8	44
Carpenters and joiners.....	0 70	8	44
Roofers.....	0 45	8	44
Sheet Metal workers.....	0 70	8	44

#### Contracts in Group "B" (Manufacture of Supplies, etc.)

The following is a statement of contracts awarded by the Department of National Defence during the month of July, 1936, for

various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Supplies ordered	Contractor
Marquee Tents.....	S. S. Holden, Ltd., Ottawa, Ont.
Circular tents.....	J. J. Turner & Sons, Ltd., Peterboro, Ont.
Field officers' tents.....	Woods Mfg. Co., Ottawa, Ont.
Winter aviation suits.....	S. S. Holden, Ltd., Ottawa, Ont.
Tent poles.....	Mayno Davis Lumber Co., Ottawa, Ont.
Drab serge jackets.....	S. S. Holden, Ltd., Ottawa, Ont.
Portable steel lockers.....	Office Specialty Mfg. Co., Ltd., Ottawa, Ont.
Work benches.....	W. C. Jack, Belleville, Ont.
Folding tables.....	Dowsell Lees & Co., Ltd., Hamilton, Ont.
Overall suits.....	T. M. Vaughan, Halifax, N.S.
Drab frieze.....	Caldwell Woollen Mills, Ltd., Appleton, Ont.
Gun covers.....	S. S. Holden, Ltd., Ottawa, Ont.

#### DEPARTMENT OF PUBLIC WORKS

##### *Contracts in Group "A" (Construction, Remodelling, etc.)*

Supply and installation of stokers in the public building at Kamloops, B.C. Name of contractors, Messrs. Carr & Son, Kamloops, B.C. Date of contract, July 22, 1936. Amount of contract, \$1,640. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Brick and hollow tile layers and masons.....	\$0 90	8	44
Brick and hollow tile layers and masons' helpers (continuously employed mixing and tempering mortar).....	0 45	8	44
Plumbers and steamfitters.....	0 80	8	44
Plumbers and steamfitters' helpers (all men assigned to help tradesmen).....	0 45	8	44
Electricians (inside wiremen).....	0 75	8	44
Labourers.....	0 40	8	44
Driver, horse and cart.....	0 55	8	44
Driver, team and wagon.....	0 75	8	44
Drivers.....	0 40	8	44
Motor truck drivers.....	0 45	8	44
Motor truck driver and truck—1 and 2 tons.....	1 45	8	44
3 tons.....	1 95	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice the working hours of any class of workers are less than 44 per week such lesser hours shall not be exceeded on this work.

Grading and roadways at the Customs and Immigration Building, Pacific Highway, B.C. Name of contractors, Messrs. Baynes & Horie, Vancouver, B.C. Date of contract, July 2, 1936. Amount of contract, \$16,800. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Concrete mixer operator.....	\$0 60	8	44
Cement finishers.....	0 75	8	44
Labourers.....	0 45	8	44
Teamster, team and wagon.....	1 00	8	44
Teamster.....	0 45	8	44
Motor truck driver and truck.....	1 50	8	44
Motor truck driver.....	0 50	8	44

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Reconstruction of a section of the West Pier at Rondeau, Kent County, Ontario. Name of contractors, Continental Construction Co., Ltd., Toronto, Ont. Date of contract, July 11, 1936. Amount of contract, approximately \$21,624.12. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Blacksmith.....	\$0 55	8	44
Carpenter.....	0 60	8	44
Cement finisher.....	0 55	8	44
Concrete and cement mixer operator (gas. or elec.).....	0 45	8	44
Hoist operator—gasoline.....	0 45	8	44
Hoist operator—steam.....	0 65	8	44
Machinist.....	0 60	8	44
Pile driver runner.....	0 65	8	44
Driver, team and wagon.....	0 65	8	44
Drivers.....	0 35	8	44
Labourers.....	0 35	8	44
Motor truck driver and truck—1 and 2 tons.....	1 40	8	44
3 tons.....	1 90	8	44
Motor truck driver.....	0 40	8	44
Timberman or cribmen (using interchangeably such tools as: broad-axe, hammer, x-cut saw, auger, adze).....	0 42	8	44
Watchman.....	0 30	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by Provincial legislation.

Construction of a farm machinery building at the Central Experimental Farm, Ottawa, Ont. Name of contractor, Mr. Alex. I. Garvock, Ottawa, Ont. Date of contract, July 18, 1936. Amount of contract, \$53,747

and unit prices for additional work. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Concrete mixer operator.....	\$0 50	8	44
Cement finishers.....	0 60	8	44
Stonemasons.....	1 00	8	44
Stone cutters.....	0 80	8	44
Brick and hollow tile layers.....	1 00	8	44
Structural steel workers.....	0 80	8	44
Ornamental iron workers.....	0 60	8	44
Carpenters and joiners.....	0 70	8	44
Sheet metal workers.....	0 75	8	44
Roofers, felt and gravel.....	0 45	8	44
Mastic floor layers—			
Finishers, rubbers and spreaders.....	0 75	8	44
Kettlemen.....	0 60	8	44
Lathers, metal.....	0 70	8	44
Plasterers.....	0 80	8	44
Plasterers' helpers.....	0 65	8	44
Painters and glaziers.....	0 85	8	44

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Dredging work at Sarnia, Ont. Name of contractor, Messrs. Alex B. McLean, Roderick A. McLean & John McLean, all of Sarnia, Ont. Date of contract, July 4, 1936. Amount of contract, approximately \$9,576. The General Fair Wages Clause was inserted in the contract.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A summary is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Textiles and Clothing

MONTREAL, QUEBEC.—CERTAIN DRESS MANUFACTURERS (MEMBERS OF THE MONTREAL DRESS MANUFACTURERS' GUILD) AND THE INTERNATIONAL LADIES' GARMENT WORKERS' UNION AND DRESS CUTTERS' UNION, LOCAL No. 205.

Agreement to be in effect from April 27, 1936, to January 15, 1938, and from year to year thereafter unless terminated by either party by notice given 30 days prior to January 15 of any year.

The employers agree to maintain union cutting departments in their establishments. They will employ and retain in their cutting departments none but cutters, choppers and apprentices who are members of the union in good standing. Apprentices are limited to 10 per cent in number of those employed in the cutting department.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. In establishments where the five-day week is in effect hours are to be 9 per day the first four days of the week and 8 on Fridays. No shop which is now or shall hereafter be on the five-day schedule shall revert to the five and one-half day week.

Overtime: Eight hours overtime at regular rates shall be permitted during the first four days of any week. Not more than two hours overtime shall be worked in any one day.

Wage rates: Pending application to the Minister of Labour to render obligatory the provisions of the present collective labour agreement and establishing a minimum scale of wages of \$30 per week for cutters, \$20 per week for choppers and \$15 per week for apprentices, it is agreed that employees being paid less than these rates shall receive an increase of \$3 per week or so much thereof as may be necessary to bring their respective wages up to but not exceeding these minimums. In exceptional cases of underpayment the amount of the increase may be greater than \$3, and if any dispute arises in regard to such increase it is to be referred to an arbitration board set up under the agreement. Employers who may now be paying more than the above minimum rates

are prohibited from reducing their rates during the duration of the agreement.

The union agrees not to enter into agreements with other employers on terms more favourable than those embodied in this agreement.

All disputes are to be referred to an arbitration board made up of one representative of the union and one representative of the employers. If these two members of the board are not able to agree they shall appoint such person as they may agree upon to act as arbitrator and chairman of the board; the decision of such board to be binding on both parties.

### Construction: Buildings and Structures

TORONTO, ONTARIO.—GENERAL CONTRACTORS' SECTION OF THE BUILDERS' EXCHANGE AND CONSTRUCTION ASSOCIATION OF TORONTO AND THE BRICKLAYERS', MASONS' AND PLASTERERS' INTERNATIONAL UNION, LOCALS No. 2 (BRICKLAYERS) AND No. 26 (STONE-MASONS).

The agreement which was summarized in the *LABOUR GAZETTE*, August, 1934, page 787 and July, 1935, page 693, was renewed without change from March 1, 1936, to March 1, 1937.

Hours and wages are unchanged with a 40-hour week and wages 90 cents per hour.

EDMONTON, ALBERTA.—CERTAIN TILE, MARBLE AND TERRAZZO CONTRACTORS AND THE BUILDING LABOURERS' INTERNATIONAL UNION, LOCAL No. 92.

Agreement to be in effect from June 8, 1936, to June 7, 1937, and thereafter from year to year until notice.

Only union members, or those who will join the union, to be employed. A representative from among the men on each job to be appointed as shop steward.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-half to be paid for all work over 8 hours on any one day and also for work on Sundays and six specified holidays.

Wages per hour: machine workers on walls 70 cents, floor machine workers and helpers 60 cents, labourers 50 cents.

For work outside a radius of 15 miles of Edmonton post office, transportation and travelling time to be paid by the employer, and 10 cents per hour extra to be paid. On such work members may work up to 10 hours per day and on Saturday afternoon at the regular rate.

### Transportation and Public Utilities: Street and Electric Railways

HAMILTON, ONTARIO.—HAMILTON STREET RAILWAY COMPANY AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES, DIVISION No. 107.

Agreement to be in effect from April 1, 1936, to April 1, 1937, and thereafter until either party gives thirty days' notice.

The Company will continue to treat with its employees who are members of the above Association.

Any dispute between the Company and the Association to be discussed by union representatives and the Department Superintendent and if they cannot agree, the General Manager may be called into conference.

### *Motormen, Conductors, Bus and One Man Car Operators*

Hours: 44 per week.

Overtime: time and one-half for overtime over all schedule time worked on each day.

Wages for bus and one-man car operators:—48 cents per hour for first year, 52 cents for second year and 58 cents thereafter. Wages for motormen and conductors on two-men cars 5 cents per hour less. Operators working snow ploughs, sweepers and sand cars to be paid 5 cents extra over the one-man car operators. Operators training students to be paid 5 cents per hour extra. Extra motormen and conductors reporting at car house and for relief changes to be paid a guaranteed minimum of \$12 per week.

Seniority to be considered in promotions and in the selection of runs.

All work for extra men to be divided as nearly as practicable equally among them.

The Company to pay half the cost of uniforms for motormen and conductors with one year's service and total cost for those with over two years' service.

In case of any member of the Association being suspended or discharged, the Company to grant an interview to the grievance committee, and if on investigation it is found that the man is not at fault, he will be re-instated and paid for time lost.

### *Car House and Shopmen*

Hours: 48 per week of which 9 hours to be worked on Monday, 8½ on Tuesday, Wednesday, Thursday and Friday and 5 hours on Saturday. In the inspection barn and for trackmen, however, the 48 hours to be divided into 8 hours per day.

Overtime: time and one-half for all work over the schedule hours in any one day, and also for work on eight specified holidays. Work on Sundays, if not overtime, 7 cents per hour extra.

Wages per hour: electricians 59 cents; carpenters and machinists 57½ cents; blacksmiths 56½ cents; painters, pitmen (after one year), storemen, engineers, controller men 52½ cents; blacksmith's helper, car placers (after one year), 49½ cents; pitmen (first year) 48 cents; janitors, car cleaners (second year) 47½ cents; car cleaners (first year) 45 cents; car placers (first year) 44 cents.

Ticket clerks to work 6 days per week and to be paid \$115 per month salary.

### **Transportation and Public Utilities: Water Transportation**

MONTREAL, QUEBEC.—CERTAIN STEAMSHIP COMPANIES AND THE STEAMSHIP CHECKERS AND COOPERS EMPLOYED BY THEM.

The agreement, which covers work in Montreal Harbour, is in effect from June 16, 1936, to December 31, 1936, and thereafter from year to year until notice.

The agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, November, 1934, page 1062, with the following changes:

Preference of work to be given to employees who have been employed by a company during previous successive seasons, if merit and efficiency equal.

Wages per hour: checkers 50 cents for day work, 60 cents for night work; coopers 49 cents for day work, 59 cents for night work. These are increases of 5 cents for day work and 7 cents for night work.

Work on mails is included with express and baggage, for which single time to be paid for work on Sundays and three holidays.

VANCOUVER, B.C.—THE SHIPPING FEDERATION OF BRITISH COLUMBIA LIMITED, AND THE CANADIAN WATERFRONT WORKERS' ASSOCIATION AND THE VANCOUVER LONGSHOREMEN'S ASSOCIATION.

This agreement supersedes arrangements between the Federation and the Canadian Waterfront Workers' Association reached shortly after the beginning of the strike of the members of the Vancouver Waterfront Workers' Association from June 5 to December 9, 1935, which strike terminated an agreement effective from November 1, 1934, (LABOUR GAZETTE, November, 1934, page 1062). These arrangements provided for the same wages and working conditions as before the dispute.

The agreement applies to the loading and discharging of deep sea vessels in Vancouver Harbour and at certain specified outside points.

Agreement to be in effect from May 22, 1936, to May 21, 1941, and from year to year thereafter until either party gives notice to the other, sixty days prior to May 21 of any year. Schedules "A" (covering Rules, Working Conditions and Wage Schedule) and "B" (covering Dispatching Regulations) to be in effect from June 15, 1936. With the exception of the matter of wages, Schedules "A" and "B" may be amended at any time either by mutual agreement of the parties or by reference to the Joint Advisory and Negotiations Committee set up under the agreement. Wages may be adjusted annually; either party may give notice in writing 30 days prior to the end of any 12 months' period from the date of the agreement, that they wish a conference to discuss, adjust and determine wages.

Union members to be employed if available.

The employment and regulation of waterfront labour including the dispatching and distribution of work and earnings shall be controlled by the Shipping Federation and supervised through its labour manager, but the Associations may each appoint a representative to co-operate with and assist the labour manager in the supervision of the dispatching regulations which are contained in schedule "B" of the agreement.

All disputes which cannot be settled by the labour manager and the accredited agents of the associations are to be referred to the Joint Advisory and Negotiations Committee. If this committee cannot reach an agreement the matter will be referred to a joint meeting of the board of directors of the Federation and the executives of the associations. If within 30 days from the date of the first convening of such joint meeting an agreement is not arrived at, the matter may be referred to an arbitration committee.

Hours: straight time is all time between 8 a.m. and 5 p.m. on weekdays, except Saturday after 1 p.m. All other time is overtime.

Wages per hour: The wage rates per hour are shown in the accompanying table:

## HOURLY WAGE RATES, LONGSHOREMEN, OCEAN-GOING VESSELS, VANCOUVER, B.C.

	Straight Time	Overtime	Noon Meal Hour	Any other Meal Hour
	\$ cts.	\$ cts.	\$ cts.	\$ cts.
1. General Cargo:				
All labour (unless otherwise provided for) (ship).....	0 90	1 35	1 35	2 02
Hatch tender (ship).....	1 00	1 45	1 45	2 12
Double winch driver (when used) (ship).....	1 00	1 45	1 45	2 12

2. Special Commodities*:				
Hatch tender.....	1 00	1 45	1 45	2 12
Single winch driver.....	1 00	1 45	1 45	2 12
Hold men and sling men.....	1 00	1 45	1 45	2 12
Double winch driver (when used).....	1 10	1 55	1 55	2 22
Loaders and/or pilers (when used).....	0 96	1 39	1 39	2 04
Dock truckers.....	0 86	1 29	1 29	1 94
3. Creosoted Products:				
Hatch tenders, double-winch drivers (when used) side runners.....	1 10	1 55	1 55	2 22
Hold men, single winch drivers, sling men.....	1 00	1 45	1 45	2 12
Loaders and/or oilers (when used).....	0 96	1 39	1 39	2 04
Dock truckers.....	0 86	1 29	1 29	1 94
4. Lumber, Logs and Piles (when submerged or awash) same as creosoted products.				
5. High explosives and damaged cargo:				
Hatch tender.....	1 45	2 12	.....	.....
Double winch driver (when used).....	1 45	2 12	.....	.....
All other ship labour.....	1 35	2 02	.....	.....
All other dock labour.....	1 29	1 94	.....	.....

\*Caustic soda (in sacks), cement, fertilizer (animal and fish), green hides, lime (when in single sacks), nitrates, salmon eggs, salt (fine in bulk), salt fish, phosphates (in bulk); scrap iron in bulk and bales (excluding rails, plates and drums); bulk cargo as follows: ballast cement, cement-clinker, coal, coke, concentrates, grain, ore and sulphur; commodities in sacks weighing 125 pounds or more (applies only to ship men when loading vessel and to dock loaders and pilots when used).

Provision is made for transportation and travelling time for work at places outside the harbour.

Schedule "B" deals with dispatching regulations including eligibility, registration and classification for employment, procedure followed in ordering men to work, make up of gangs, etc.

### Quebec Collective Labour Agreements Extension Act

The following agreement and amendment to an agreement have recently been made obligatory by Orders in Council and the terms so made obligatory are noted in the next article of this issue:—

Longshoremen (Inland and Coastal Navigation), Montreal.

Building Trades, Hull (Amendment).

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include: the cancellation of the two previous Orders in Council and the extension by a new Order in Council of the agreement affecting longshoremen (inland and coastal navigation) at Montreal, as noted below; the amendment to the Order in Council affecting building trades at Hull, also noted below. In addition, a request for the modification of the agreement governing the fur industry in Montreal was published in the *Quebec Official Gazette*, July 11.

The text of the Collective Labour Agreements Extension Act, Quebec, was printed in the *LABOUR GAZETTE*, May, 1934, page 417, and amendments to the Act were summarized in the issue of June, 1935, page 526, and July, 1936, page 607. Under this Act applications may be made to the provincial Minister of Labour by either party to a collective agree-

ment made between, on the one hand, one or more associations of *bona fide* employees, and on the other hand, employers or one or more associations of employers, to have those terms of such agreement which concern rates of wages, hours of labour and apprenticeship made obligatory on all employees and employers in the same trade, industry or business within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade, industry or business in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* for the duration of the agreement. The provisions of an agreement thus made obligatory govern all

individual labour contracts in the trade, industry or business and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreement have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934. Beginning with the issue of the *LABOUR GAZETTE* for July, 1935, the terms of agreements have been summarized instead of being printed in full.

**LONGSHOREMEN (INLAND AND COASTAL NAVIGATION), MONTREAL.**—An Order in Council, approved July 3, and published in the *Quebec Official Gazette* July 11, declares to be illegal and cancels the Order in Council which was summarized in the *LABOUR GAZETTE*, May, page 46, and the amendment which was summarized in the *LABOUR GAZETTE*, July, page 661, because a delay of 30 days had not elapsed between the publication of a correction to the notice of request and the date of approval of the order. The same agreement is, however, now made obligatory by this new Order in Council.

**BUILDING TRADES, HULL.**—An Order in Council, approved July 3 and published in the *Quebec Official Gazette* July 11, amends the previous Orders in Council for these trades, *LABOUR GAZETTE*, March, 1935, page 240 and October, page 953, by making the following changes:—

The territorial jurisdiction now excludes the County of Wright.

The hourly wage scale applicable to the municipalities of a population of less than 5,000 on general building contracts of less than \$15,000 (previously \$5,000) has been amended to be as follows: bricklayer, mason and plasterer 60 cents, electrician 60 cents, electrician's apprentice from \$1 per day during first six months to \$4 per day during fifth year; carpenter and joiner, stationary enginemen and mechanic 50 cents; painters 50 cents, painter's apprentice from \$1 per day during first six months to \$3.50 during fourth year; mortar maker, celanite mixer, plaster pourer, hod carrier and driller 35 cents; common labourer and helper 30 cents. (These rates are less than in the wage scale previously in effect by the following amounts: 20 cents per hour for bricklayers and masons, 15 cents per hour for painters, 10 cents per hour for carpenters and joiners, electricians, stationary enginemen and mechanics and drillers, 5 cents per hour for plasterers, mortar makers and celanite mixers, plaster pourers, hod carriers and common labourers and helpers.

The apprenticeship rule does not apply on the contracts covered by the preceding paragraph.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, JULY, 1936

### Cost of Living, Prices of Staple Articles and Index Numbers

**T**HE movement in prices during the month was upward, both the cost of the weekly family budget in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices being at higher levels than in June. The advance in the former was due to an increase in the cost of foods and in the latter to higher prices for grains, live stock and non-ferrous metals.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices was \$7.97 at the beginning of July as compared with \$7.78 for June; \$7.53 for July, 1935; \$6.67 for March, 1933 (the low point in recent years); \$10.91 for July, 1930; \$10.96 for July, 1921; \$16.92 for June, 1920 (the post war peak); and \$7.42 for July, 1914. Thirteen items in this list of foods cost more in the month under review than in the previous month, three were lower and thirteen were unchanged. Most of the changes were slight, there were, however, substantial advances in the cost of potatoes and eggs, and a less important one in butter. Fuel and rent were unchanged. Including the cost of these two groups with that of foods the total

cost was \$16.51 at the beginning of July as compared with \$16.33 for June; \$15.94 for July, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.26 for July, 1930; \$21.53 for July, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.17 for July, 1914.

In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 continued the advance which commenced the previous month and at the end of July was nearly four per cent higher than at the end of June. Comparative figures for certain dates are 75.4 for the week ended July 31; 72.6 for the week ended June 26; and 71.8 for the week ended August 2, 1935. On a monthly basis the latest figures available are for June, when the index was 72.3 as compared with 71.5 for July, 1935; 72.0 for July, 1934; 63.5 for February, 1933 (the low point in recent years); 97.2 for July, 1929; 104.8 for July, 1921; 164.3 for May, 1920 (the post war peak); and 64.4 for July, 1914. All of the principal groups of commodities under the chief component material classification, except non-metallic minerals, were higher at the end of July than one

month earlier. Important increases were recorded in the prices of grains, live stock, eggs and copper. Number 1 Manitoba northern cash wheat advanced about 23 cents per bushel during July. Raw cotton and raw rubber advanced to the highest price levels of the year and raw silk recovered the losses of the previous two months. There were slight declines in prices of potatoes, calves, silver and tin.

#### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of July of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western

provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

#### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmens' families in cities since

(Continued on page 760)

#### CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1936\*

(Average prices in 1913 = 100)

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

†For the week ended July 31, 1936; monthly figures not yet available.

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 752)

## Retail Prices

1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Little movement occurred in meat prices during the month, the tendency, however, was upward. The largest advances were recorded in the prices of fresh leg roast of pork and bacon, the former being up from an average price of 21.1 cents per pound in June to 21.9 cents in July and the latter from 29.1 cents per pound to 29.5 cents. There were fractional advances in sirloin steak, round steak, stewing beef and veal. Lard was lower in most localities in Ontario and other eastern provinces, the Dominion average price being 15.3 cents per pound as compared with 15.7 cents in June. Eggs were generally higher, fresh advancing from 24.2 cents per dozen to 27.2 cents and cooking from 20.6 cents per dozen to 23.4 cents. Creamery butter advanced in most localities and the Dominion average price was one cent per pound higher at 26.2 cents. Cheese rose from 20.3 cents per pound in June to 20.7 cents in July.

The price of bread has been unchanged since the beginning of the year at 6·2 cents per pound. Onions continued to advance, the price averaging 6 cents in July as compared with 5·7 cents in June and 3·6 cents in January. Potatoes were substantially higher in eastern cities, while some declines were recorded in the prairie provinces. The Dominion price was \$1.95 per ninety pounds in July and \$1.70 in June. United States anthracite coal was practically unchanged at an average price of \$14.44 per ton. No changes were reported in rent.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$15.50; Windsor, \$16.50; Charlottetown, \$13.40; Moncton, \$16; Saint John, \$13; Quebec, \$13.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$13; Montreal, \$14.25; Ottawa, \$15.50; Kingston, \$14.50; Belleville, \$16; Peterborough, \$16; Oshawa, \$14.25; Toronto, \$14.50; St. Catharines, \$15; Hamilton, \$14.50; Galt, \$16; Sudbury, \$17.50; Cobalt, \$18; Timmins, \$18.75; Sault Ste. Marie, \$14.50; Port Arthur, \$17; Fort William, \$17; Winnipeg, \$19.50.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries appeared in the July issue of the LABOUR GAZETTE.

### Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 92·6 for June, an increase of 0·8 per cent for the month. Both foods and industrial materials contributed to the advance. The greatest change in any one group, however, was a fall of 3·9 per cent in cereal prices.

The *Statist* index number, on the base 1867-1877=100, was 84·4 at the end of June, a decrease of 0·9 per cent for the month. Of the six groups, four showed declines, while the animal food group advanced and sundries were unchanged.

COST OF LIVING.—The Ministry of Labour index number, on the base July, 1914=100, was 146 at July 1, an advance of 1·4 per cent for the month, due entirely to higher food prices, chiefly potatoes, eggs and butter.

### France

WHOLESALE PRICES.—The index number of the General Statistical Office, on the base 1914=100 (gold index), was 76 for June, a decrease of one point for the month. Decreases were recorded in both vegetable and animal foods and in minerals and metals and textiles.

### Germany

WHOLESALE PRICES.—The Federal Statistical Office index number, on the base 1913=100,

was 104·0 for June, an increase of 0·2 per cent for the month. The changes in all groups were small.

COST OF LIVING.—The official index number, on the base 1913-1914=100, was 124·5 for June, an increase of 0·2 per cent for the month due to slight increases in food and clothing prices.

### India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, of wholesale prices in Bombay, on the base July 1914=100, was 94 for May, showing no change from the previous month.

COST OF LIVING.—The official index number of cost of living in Bombay, on the base July 1914=100, was 100 for May, showing no change from the April level in any of the groups.

### United States

WHOLESALE PRICES.—*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated), which is based on the sum total of the prices per pound of 96 commodities of common consumption, was \$9·8538 at July 1, an advance of 1·2 per cent for the month. Advances were recorded in 11 of the 13 groups, while the metals group declined and chemicals and drugs were unchanged.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities was \$178·240 at July 1, a rise of 3·5 per cent for the month. Of the seven groups, six showed advances, while the metals group declined slightly.

COST OF LIVING.—The National Industrial Conference Board index number, on the base 1923=100, was 85·1 for June, an increase of 1·6 per cent for the month, due chiefly to increased food prices.

## FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1936

THE number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the second quarter of 1936 was 235, there being 54 in April, 90 in May and 91 in June.

The report for the first quarter of 1936, showing 205 fatalities, was given in the *LABOUR GAZETTE*, May, 1936, page 472. In the second quarter of 1935, 212 fatal accidents were recorded (*LABOUR GAZETTE*, August, 1935, page 789). The supplementary lists of accidents, not reported in time for inclusion in the reports covering the periods in which they occurred, contains 8 fatalities for the first quarter of 1936, and 8 fatalities for 1935.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the date on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Board, from the Board of Railway Commissioners of Canada, from certain other official sources and from the correspondents of the *LABOUR GAZETTE*. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the second quarter of 1936 were as follows: agriculture, 30; logging, 37; fishing and trapping, 15; mining, non-ferrous smelting and quarrying, 40; manufacturing, 20; construction, 19; electric light and power, 4; transportation and public utilities, 39; trade, 10; service, 21.

Of the mining accidents 29 were in "metalliferous mining," 9 in "coal mining," and 2 in "non-metallic mineral mining and quarrying, n.e.s."

Of the accidents in manufacturing, 1 was in "vegetable foods, drink and tobacco," 1 in "textiles and clothing," 1 in "leather, fur and products," 6 in "saw and planing mill products," 4 in "pulp, paper and paper products," 3 in "iron, steel and products," 1 in "non-ferrous metal products," and 3 in "non-metallic mineral products."

In construction there were 10 fatalities in "buildings and structures," 5 in "highway and bridge," and 4 in "miscellaneous construction."

In transportation and public utilities, there were 11 fatalities in "steam railways," 19 in "water transportation," 5 in "local transporta-

tion," 2 in "air transportation," and 2 in "telegraphs and telephones."

In trade there were 5 fatalities in "wholesale," and 5 in "retail."

Of the fatalities in service, 12 were in "public administration," 1 in "recreational," 1 in "laundering, dyeing and cleaning," 4 in "custom and repair," and 3 in "personal, domestic and business."

There was no serious disaster resulting in a very large number of fatalities during the period under review. Accidents involving the loss of two or more lives were as follows:—

On June 17, six log drivers were drowned in Duparquet Lake, Northern Quebec, when a motor-driven canoe capsized in a storm. There were seven men crossing the lake in the canoe when they were caught in a squall; but one of them managed to swim to an island.

Six fishermen were drowned off Magdalen Islands, Quebec, on April 17, when their motor-boat capsized in a rough sea.

Two farmers were burned in a fire that destroyed their home near Calmar, Alberta, on June 23.

Two log drivers were drowned in Abitibi County, Quebec, on May 21, when a boat upset in rapids while they were releasing jammed logs.

On June 24, three trappers were drowned in Lac Ile à-la-Crosse, Saskatchewan, when a canoe capsized in a storm.

In metalliferous mining, two labourers were drowned in Long Lac, Ontario, on May 19, when a canoe overturned. On May 23, a pilot, a mechanic and two prospectors lost their lives in an aeroplane crash near Lake Chicougamau, Quebec.

Two coal miners were killed by falling rock, on June 29, at Britannia, British Columbia.

While loading logs at Saut-aux-Cochons, Quebec, on April 6, two saw-mill workers were crushed under a pile of logs.

On May 9, two electricians were electrocuted while repairing a power line at Shawinigan Falls, Quebec.

A pilot and a forest ranger were killed in a plane crash at Port Arthur, Ontario, on June 8.

A supplementary list of accidents occurring during the first quarter of 1936 has been compiled which contains 8 fatalities, of which 1 was in logging, 1 in fishing and trapping, 1 in manufacturing, 3 in construction, 1 in transportation and public utilities, and 1 in trade. One of these accidents occurred in February and 7 in March.

## FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1936 BY GROUPS OF INDUSTRIES AND CAUSES

CAUSE	Agriculture	Logging	Fishing and Trapping	Mining, Non-ferrous Smelting and Quarrying	Manufacturing	Construction	Electric Light and Power	Transportation and Public Utilities	Trade	Finance	Service	Unclassified	Total

## Supplementary Lists of Accidents

A further supplementary list of accidents occurring in 1935 has been made. This includes 8 fatalities of which 1 was in agriculture, 1 in fishing and trapping, 3 in mining,

non-ferrous smelting and quarrying, 1 in manufacturing, 1 in construction, and 1 in transportation and public utilities. One of these accidents occurred in May, 1 in August, 3 in October, 1 in November and 2 in December.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

## Validity of Regulation made by Manitoba Minimum Wage Board

IN a magistrate's court, an employer had been convicted of violating a regulation of the Minimum Wage Board, by employing a male person of 18 years or over at a rate less than the minimum rate prescribed by the Minimum Wage Act. The lower court imposed a fine of \$25, and the defendant was ordered to pay the employee \$79.03, being 7 cents an hour for 1,129 hours, the difference between the wage paid and the minimum wage of 25 cents an hour.

This decision was appealed by the plaintiff, contending "*inter alia* that the meeting of the board at which the regulation was passed had no authority to pass it, since it was not constituted in accordance with the Act." The Act provides that the Board shall consist of five persons and from evidence given it was disclosed that the board was not complete because of the resignation of one of its members effective prior to the date of the meeting at

which the regulation referred to was made. ("The female representative of employees, had tendered her resignation to the Lieutenant-Governor in Council two years previously and thereafter did not attend the board's meetings.")

The Court was equally divided in its decision. Two justices "held that the appellant's contention was correct and the conviction should be quashed," and the remaining two "held that the objections to the regulation were ineffective. The Court being equally divided the appeal was dismissed."

*Rex vs. Hatskin*, Manitoba Court of Appeal (1936) 2 *Western Weekly Reports*, p. 321.

## Quebec Collective Agreements Act not in Conflict with Dominion Law concerning Combines

An action in the Superior Court of the district of St. Francois for wages alleged due under the agreement for the shoe industry made binding under the Collective Agreements Extension Act was decided by Mr. Jus-

tice Verret in favour of the plaintiff on April 4. The action was brought by the joint committee appointed to enforce the agreement against the Diva Shoe Company of Richmond, Quebec, for the recovery of \$1,668.50 in wages, being the difference claimed between the wages paid and the amount calculated at the rates fixed in the agreement.

On behalf of the defendant company, it was contended that the Collective Labour Agreements Extension Act and the agreement made under its authority were invalid; that the parties to the agreement were not competent to make a legal contract because the National Catholic Federation of Shoe Workers and the Canadian Association of Shoe Manufacturers (Quebec Division) who made the agreement had no legal existence and that those who signed the collective agreement in the name of these parties were not authorized to do so; that the collective agreement was merely a form of stipulation for a third party which is prohibited by art. 1029 of the Civil Code of Quebec; that the Collective Labour Agreements Extension Act, which is designed to promote collective agreements concerning wages, hours of labour, etc., between employers and employees in the same industries conflicts with section 498 of the Criminal Code of Canada and the Combines Investigation Act and is, therefore, illegal and *ultra vires*.

In view of the claim of the defence as to the validity of the statute, the Attorney-General of Quebec intervened to uphold the right of the Legislature to enact the law.

In the reasons for the judgment, it was pointed out that the shoe manufacturers' associations were legal entities and could enter into an enforceable contract. As regards the National Catholic Federation of Shoe Workers of Canada, while it is not incorporated, it constitutes one of the associations contemplated by the Collective Labour Agreements Extension Act. Moreover, this Federation comprises three groups: the Protective Union of Shoe Workers of Quebec, the National Syndicate of Shoe Workers of Montreal and the National Catholic Union of Shoe Workers of Canada, Ste. Genevieve-de-Batiscan division. These three associations have a legal existence, being registered under the Professional Syndicates Act of Quebec. The two officers of the National Catholic Federation of Shoe Workers of Canada who signed the agreement were the authorized agents of the three unions as appeared from resolutions of each of these unions approving and ratifying the collective agreement. Such ratification is equivalent to a retrospective mandate and makes valid the acts of the mandatories.

As to the argument of the defendant that the Collective Labour Agreements Extension Act conflicts with section 498 of the Criminal Code, the judge quoted an authority to the effect that the purpose of the section was to prohibit cartels or combinations of producers formed with a view to getting control of the market in order to prevent competition and the fall of prices and to assure to their own members greater profits. On the other hand, in the Court's opinion, the Collective Labour Agreements Extension Act was designed to assure to the workers a minimum wage, reasonable and adequate, and, therefore, this humanitarian statute does not violate the provisions of section 498.

The Court held that the action was well founded and ordered the defendant to pay to the plaintiffs the sum of \$1,137.84 which appeared to be the amount due to the employees of the company. Costs were charged to the defendant. The Act was held to be a valid measure, within the legislative powers of the Province of Quebec.

The judgment has been appealed.

*Gagnon et autres v. Diva Shoe Co., Ltd., et Association des Manufacturiers de Chaussures de Quebec et une autre et Procureur General de Quebec, intervenant. (1936) Q.R. 74 C.S. 212.*

#### Interpretation of Order of Minimum Wage Board in Saskatchewan—Wages of Employees in Beauty Parlours

In a case heard before the Saskatchewan Court of Appeal, the appellant had been convicted in magistrates' court for having "on or between October 10, 1935, and January 22, 1936, unlawfully employed the respondent in a 'beauty parlour' in the City of Regina at a rate of wages lower than the minimum wages fixed by the Minimum Wage Board."

The employee in question had taken a probationary course of three months and had worked by and for herself for twelve months before she was employed by the appellant and claimed that this period of independent operation should be taken into consideration in determining the minimum wage she was entitled to.

For his offence the appellant had, in magistrate's court, been fined \$25 and ordered to pay \$51, the balance of wages found to be due the employee. The police magistrate in passing this sentence "held that 12 months independent working following the probationary course was not equivalent to the two periods of six months each as a 'learner' so as to entitle the respondent to a minimum wage of \$10.50." The magistrate, however, seems to have considered that the 12 months of independent operation was equivalent to six months as a

"learner" and consequently held that the respondent was entitled to be paid a minimum wage of \$9 a week. In the opinion of the Appeal Court the provisions of the order fixing a minimum wage apply exclusively to persons who comply with the terms of the order and cannot be added to or varied. The time spent by the respondent in working independently cannot therefore be taken into consideration in determining the minimum wage she was entitled to. She had only completed her probationary course so far as the order is concerned and was only entitled to at least a minimum wage of \$5 a week as a "learner" for the first six months. For the time she was employed by the appellant, that is, 15 weeks, she was actually paid \$84, which slightly exceeded the prescribed minimum wages.

The decision was therefore given that no violation of the provisions of the Order had been made and that the conviction should be

quashed and the order for payment of \$51 should be set aside.

*Rex versus Meyers* (1936) Vol. 2, Western Weekly Reports, 454-456.

Apparently for the first time, workers violating a collective agreement made obligatory under the Collective Labour Agreements Extension Act of Quebec were prosecuted in a recent case. The joint committee for the enforcement of the agreement in the fur industry laid a complaint in Montreal against 12 workers and the four companies employing them for violation of the terms of the agreement concerning hours. These employees had worked after nine o'clock in the evening contrary to the agreement. The accused pleaded guilty and were required to pay the costs of the case. The judge issued a warning that for a second offence of this sort a more severe penalty would be imposed.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

INDUSTRIAL employment in Canada at the beginning of August showed an advance that rather exceeded the average gain recorded at August 1 in the last fifteen years, according to statements tabulated by the Dominion Bureau of Statistics from 9,795 firms in all lines of industry except agriculture, fishing, hunting and highly specialized business. They employed 998,564 workers, compared with 988,838 at July 1. This increase continued the moderately forward movement that has characterized the industrial situation in the last four months. The index, at 105.6 at August 1, compared favourably with that of 104.6 in the preceding month, and 101.1 at August 1, 1935. The experience of the last fifteen years indicates that employment usually, though not invariably, gains at the beginning of August, there being on the average, a fractional increase in the index; after correction for seasonal influences, the August 1 index therefore slightly advanced, standing, when adjusted, at 101.1, as compared with 100.9 in the preceding month.

As already stated, the unadjusted index (based on the average in the calendar year 1926 as 100) stood at 105.6 at August 1, 1936, compared with 104.6 in the preceding month, while at August 1 of the fifteen preceding years, the index was as follows: 1935, 101.1; 1934, 99.9; 1933, 87.1; 1932, 86.3; 1931, 105.2; 1930, 118.8; 1929, 127.8; 1928, 119.3; 1927, 110.5; 1926, 105.5; 1925, 97.5; 1924, 95.8; 1923, 101.4; 1922, 94.2 and 1921, 90.0.

At the beginning of August, 1936, the unemployment percentage reported to the Department of Labour by local trade unions throughout Canada stood at 12.5 as compared with 13.9 per cent at the beginning of July, 1936, and 15.1 per cent at the beginning of August, 1935. The percentage for August was established from the reports forwarded by 1,791 labour organizations with a membership total of 178,583 persons.

Reports received by the Department of Labour from the offices of the Employment Service of Canada showed a gain in the

volume of business transacted in July, 1936, when compared with that of the preceding month, but a decrease from that of July, 1935, this computation being based on the average number of placements recorded daily at the offices of the Employment Service throughout Canada, farming and construction and maintenance showing the largest gains under the first comparison and construction and maintenance the greatest loss under the second. During July, 1936, there were listed 29,851 vacancies, 53,257 applications and 28,271 placements in regular and casual employment.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was \$16.72 at the beginning of August as compared with \$16.51 for July; \$16.15 for August, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.90 for August, 1929; \$21.98 for August, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.41 for August, 1914. The increase in August, 1936 as compared with the previous month was due to an increase in the cost of foods, chiefly potatoes, butter and eggs. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was 75.6 for the week ended August 28th, as compared with 76.2 for that of August 21st; 76.3 for that of August 7th and 75.4 for that of July 31st. On a monthly basis the index number was 74.4 for July, 1936; 71.6 for August, 1935; 72.2 for August, 1934; 63.5 for February, 1933 (the low point in recent years); 98.4 for August, 1929; 106.0 for August, 1921; 164.3 for May, 1920 (the post war peak); and 66.1 for August, 1914.

The table on page 768 gives the most recent statistics available reflecting industrial conditions in Canada. The index of the physical volume of business was practically unchanged in July from the level of the preceding month but was six per cent higher than in July, 1935. Of the principal factors included in the construction of the index, those used to indicate mineral production, manufacturing and imports were somewhat lower in July than in June, while advances were recorded in con-

\*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

†For the week ended August 28, 1936.

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations.

(4) Figures for end of previous month.

(5) Figures for four weeks ending August 29, 1936 and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending August 8, July 11 and June 13, 1936; August 10, July 13 and June 15, 1935.

(7) MacLean's Building Review.

struction, electric power output, trade employment, carloadings and exports. Comparing July, 1936, with July, 1935, all of the above mentioned groups recorded advances, except construction which was slightly lower. Information available for August shows advances in wholesale prices, employment, carloadings and gross earnings of the Canadian National Railways, both as compared with the preceding month and with August, 1935. Contracts awarded and sugar manufactured were lower in both these comparisons.

The number of strikes and lockouts recorded for August was 23, involving 9,681 workers, and causing time loss of 65,658 man working days. Two strikes of coal miners in Nova Scotia, a strike of textile factory workers at Cornwall, Ont., and a strike of taxicab drivers at Montreal, P.Q., accounted for most of the time loss and for most of the workers involved, but there were also important strikes of fur factory workers at Winnipeg, Man., and glass factory workers at Hamilton, Ont. Most of the other disputes involved small numbers of workers and caused relatively little time loss. In July there were only seven disputes, involving 3,776 workers and causing 44,342 days' time loss, most of which was due to a strike of salmon fishermen at Rivers' Inlet, B.C. In August, 1935, there were eighteen disputes, involving 5,684 workers and causing time loss of 29,588 days. Strikes of longshoremen and certain other classes of water transport workers at Vancouver and neighbouring ports, women's clothing factory workers at Montreal and cotton factory workers at Three River, P.Q., were the important disputes during that month. Of the twenty-three disputes recorded for August, fourteen were recorded as terminated, four resulting in favour of the employers, four in favour of the workers, compromise settlements being reached in two cases, the results of three being shown as indefinite, while one was recorded as partially successful. Nine disputes, involving approximately 2,420 workers, were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

#### Canadian delegation to League of Nations

The Canadian delegation to the League of Nations meeting in Geneva which commenced on September 21, consists of the Prime Minister, Rt. Hon. W. L. Mackenzie King; Hon. Raoul Dandurand, government leader in the Senate and a former presi-

dent of the League assembly; Hon. Norman McL. Rogers, Minister of Labour; Dr. O. D. Skelton, Under-Secretary of State for External Affairs; Dr. W. A. Riddell, Canadian Advisory Officer to the League of Nations, and Chairman of the Governing Body, International Labour Organization; Colonel G. P. Vanier, of the Canadian High Commissioner's Office at London, will serve as expert adviser to the Canadian delegation.

#### Registration of Recipients of Direct Relief

During the month of September all persons in receipt of direct relief from the provinces and municipalities throughout Canada are being re-registered at the request of the National Employment Commission. The forms provided for the purpose by the Commission cover information which the Commission regards as essential to its study of the relief problem and the questions of unemployment and employment relating to people who are receiving relief. It is expected that the actual registration, being carried out by the provinces and municipalities, will be completed by the end of September, while tabulations of the results, to be made by the Registration Branch of the Commission, should be available in the course of the next three months.

The statistical and other data which will be provided by the registration will form the basis of the work of the National Employment Commission to quite a considerable extent and will provide for the first time in Canada an exhaustive factual analysis of the entire relief situation, whether as it affects unemployed persons in urban municipalities or distressed farmers in rural districts.

#### Appointment of Youth Employment Committee

In accordance with the provisions of the National Employment Commission Act (LABOUR GAZETTE, March, page 230, and July, page 601) a Youth Employment Committee has been established "to give special attention to the youth aspect of unemployment and relief." The statement issued by the Hon. Norman McL. Rogers, Minister of Labour, adds that "It will be asked to assist the National Employment Commission in the formulation of measures to utilize unemployed youth on work and training projects and to improve existing facilities for vocational guidance and placement. A quorum of the Youth Employment Committee has been actively at work during the past month."

In announcing the personnel of the Committee, the Minister observed:

"The members of the Committee have been closely identified with youth organizations in

various parts of the Dominion. I feel sure that the National Employment Commission and the Government will profit from the service which will be rendered by this Committee. It will provide in Canada an organization with a purpose corresponding largely to that of the National Youth Administration of the United States and similar agencies in many other countries."

Biographical summaries of the members of the Committee are given in the following paragraphs:

Mr. Allan Chambers, of Victoria, B.C., Chairman of the Committee, is 27 years old. He was educated in England, Germany and Denmark, and is well known in B.C. for his active interest in the problem of unemployed youth. Mr. Chambers started the first school in a relief camp in B.C. in 1931, during which time he was in active contact with the camps. He was responsible for a survey of conditions in sixty relief camps in B.C. in 1935. He is associated with an export firm in Victoria.

Mr. Robert F. Thompson, B.A., B.D., M.C., of Toronto, Chaplain of the Fourth Brigade, Canadian Field Artillery, overseas 1914-1918, was formerly secretary of T. C. H. for Eastern Canada, and is well known for his active interest in the problem of unemployed youth. For eleven years in charge of industrial relations and placement for a manufacturing concern, he has studied the English methods of placement from occupational centres in Great Britain.

Mr. Joseph McCulley, B.A., (Toronto and Oxford) of Newmarket, Ont., is Headmaster of Pickering College at Newmarket, and is actively interested in various aspects of progressive education. He is chairman of the Committee of Young Men's work of the National Council of the Y.M.C.A., in which capacity he has been associated with the work of the Canadian Youth Council during the past year.

Mr. W. Clifford Nickerson, of Halifax, is a member of the board of several organizations particularly interested for many years in the welfare of boys. He has served as President of Boy Scout organizations in the Province of Nova Scotia for the past ten years.

Mr. André Montpetit is a young lawyer from Montreal, junior partner in the firm of Beaulieu, Gouin, Mercier and Tellier. He is a son of Dr. Edouard Montpetit, Secretary-General of the University of Montreal and a member of the Royal Academy of Belgium.

Mr. P. M. Draper, president of the Trades and Labour Congress of Canada, dealt with this phase of the situation in part as follows:

"As the Trades and Labour Congress of Canada has insisted for six years, there has been more complacency regarding unemployment than was good for our welfare. As a people, we were too much inclined to think that things would right themselves and that there was nothing that we could do to aid in recovery except to carry on some public works and pay relief. Latterly, we have experienced some change of feeling in the matter. We have begun to see that we must aid recovery, and not be merely would-be on-lookers. The setting up of the National Employment Commission by the Dominion government, even if it only serves as evidence of a change in attitude in our approach to depression problems, is a fitting start. The human ingenuity which has given us machines to throw men out of jobs must give us means to have our people put in the way of being able to earn their bread. With this change of public attitude, one must feel more hopeful of the immediate future."

The place of the workers in the economic life of the country was emphasized by Mr. A. R. Mosher, president of the All-Canadian Congress of Labour, in part as follows:

"The right to work at decent wages ought to be considered as an elementary right; in an equitable social order the work still requiring human effort would be shared between all able-bodied workers, and the product, represented in wages, would be similarly shared. But the workers, and more particularly the unemployed, feel helpless, and there is neither any disposition on the part of governments to adopt new policies to meet the problem nor any mass pressure on the part of the public to induce governments to break fresh ground.

"In the circumstances, the workers of Canada must make the effort to spread among the public a more thorough understanding of the problem of unemployment and the possibilities of abolishing it, and they must increase their own economic and political power to the stage at which they will be able to improve their wages and working conditions by collective bargaining, and protect and promote their interests by obtaining adequate representation on all governmental bodies and in every parliament and legislature."

Mr. Alfred Charpentier, General President of the Confederation of Catholic Workers of Canada, Inc., drew attention to the greater measure of aid given by the State in bringing together employers and workers. He considered that co-ordinated action on the part of State, employers and workers would "allay the unwarranted hardships now crushing so

large a number of industrial workers, and would bring about the gradual replacement of such an unsatisfactory condition with a minimum standard of welfare for all." In conclusion, Mr. Charpentier pointed out the Catholic Labour Movement has enlisted the active co-operation of the Government of the Province in the promotion of collective labour agreements.

### **Increased rates for Canadian Government Annuities**

An increase of 15 per cent in the rates charged for Canadian Government Annuities (effective from September 5 and continuing until a new table of rates is adopted) has been announced by the Hon. Norman McL. Rogers, Minister of Labour. The official statement, containing notice of the increase, was as follows:

"The Government has considered a recommendation from a Committee of the Senate in regard to the rates charged for annuities by the Annuities Branch. In view of the opinions expressed by A. D. Watson of the Department of Insurance and by other actuaries who appeared before this Committee of the Senate, it is understood that the present annuity rates are too low. It has been decided that an investigation is to be made into the mortality experience of all Government annuitants. As soon as possible a new table of rates is to be prepared in accordance with this experience and based upon a rate of interest not in excess of 3½ per cent.

"From this date and until new tables are adopted, an increase of 15 per cent in the rates for all Government annuities has been decided upon.

"Of course, no change that is now made or that may subsequently be made as the result of this or any subsequent investigation will have any effect upon contracts now in force. All contracts accepted by the Annuities Branch prior to September 5 remain unchanged.

"The Government has engaged Dr. M. A. Mackenzie of the University of Toronto to make the investigation above referred to. Dr. Mackenzie and his colleague, Mr. N. E. Sheppard are both Fellows of the Institute of Actuaries of Great Britain."

### **Health Insurance plans of Ontario Medical Association**

According to a press report, the Ontario Medical Association will sponsor a health insurance plan, to commence October 1, in four test areas of Simcoe county, London, Hamilton and Windsor. A special committee of the association has been working on the proposal, and although details of the cost and method of

local administration have not yet been divulged, it is understood that sufficient detail has been correlated to warrant a start three months previous to January 1, 1937, the time first planned.

In sponsoring this movement it was stated the association considers that any health insurance scheme would attain greater success if physicians were voluntarily behind it.

The Association's health insurance plan proposes to budget the \$1,800-a-year and under, wage group, in order to provide them with medical treatment and hospitalization for a very small fraction of the annual income of the insured. The plan will necessarily be restricted at first, and only certain specific classes of workers will be covered, gradually expanding to include others as experience is gained from preliminary operation.

### **Special Session of Alberta Legislature**

Legislation providing for the inauguration of Social Credit in the Province was enacted at a special session of the Alberta Legislature, held from August 25 to

September 1. Complementary to this legislation were three debt adjustment measures—Reduction and Settlement of Debts Act; the Municipalities' Interest Act; and an amendment to the Debt Adjustment Act of 1933.

In addition, the Hours of Labour Act was also enacted, setting the maximum working week at 54 hours for males and 48 hours for females. The "Licensing of Trades and Businesses Act" was amended to provide that penalties such as cancellation of licences might be imposed on firms convicted of violating the Hours of Labour Act.

An amendment to the Trade and Industry Act provides for the formation of a price spreads board of not more than five members, which would have power to fix prices and make investigations of price spreads.

### **Provisions of Employment of Women and Young Persons Act (Great Britain)**

Reference has been made in the LABOUR GAZETTE (August, 1935, page 714) to the report of the Home Office Departmental Committee (Great Britain) which enquired into the employment of women and young persons on the two-shift system. Certain recommendations of this Committee have now been embodied in the Employment of Women and Young Persons Act, 1936, which received Royal Assent on July 14, and which (exclusive of Northern Ireland) comes into effect on January 1, 1937.

A review of the Act in the British *Ministry of Labour Gazette* for August indicates that

Home Secretary is empowered to authorize the employment of women and young persons, aged 16 and upwards, on a system of shifts at any times between 6 a.m. and 10 p.m. (6 a.m. and 2 p.m. on Saturday). The length of each shift is not to exceed, on the average, eight hours a day; when a five-day week is worked, however, the limit is to be not eight hours a day but ten in any day, 48 in any week, and 88 hours in any two consecutive weeks.

The Home Secretary is required to make provision for the consultation of the workpeople concerned, and must be satisfied, before granting an application for the introduction of the two-shift system, that the consent of the majority of the workpeople has been obtained. It is, however, provided that, when the application relates to a factory or workshop which is about to be, or has recently been, newly established, and when the two-shift system for women and young persons is intended to be permanently adopted therein, the application may be granted without the prior consultation or consent of the workpeople concerned.

If the application is intended to meet a temporary emergency or temporary pressure of work (not being of a seasonal and recurring character), the authorization is to be for a limited period only, subject, however, to extension if the emergency or the pressure of work continues. The Home Secretary may delegate his powers of authorizing a two-shift system in the case of such applications for temporary authorizations, to the Chief Inspector of Factories or to a Superintending Inspector.

The Home Secretary, in granting an application, is to impose such conditions as he considers necessary for safeguarding the welfare and interests of the persons employed, particularly as regards the provision of suitable accommodation for clothing, the provision of facilities for meals and of transport facilities for workers residing at a distance, and (in the case of young persons) the provision of reasonable facilities for attendance at continuation schools. By section 3 of the Act the Home Secretary further receives a general power to make Orders as to welfare and interests in respect of any young persons, employed on day-shifts, who may lawfully be so employed under the Factory and Workshop Acts, 1901 to 1929.

#### **Wages in the British Railway Service**

is the Railway Staff National Tribunal, estab-

The machinery of negotiation for railway staffs in Great Britain was reviewed in the LABOUR GAZETTE for May, 1935, page 395. Forming a part of this machinery

lished in 1935 by agreement between the four main line railway companies and the Union of Railwaymen, the Associated Society of Locomotive Engineers and Firemen, and the Railway Clerks Association.

This tribunal has recently rendered its first decision in the claim of the National Union of Railwaymen and the Railway Clerks Association for the termination of the percentage deduction from earnings operating under the agreement of August 10, 1934. The former Union also sought the restoration of the standard rates of payment for overtime, night duty, and Sunday duty.

The classes of employees comprised: (a) the "conciliation grades, including the locomotive department (comprising drivers, firemen, cleaners, and certain locomotive shed grades), all the traffic grades, dock porters and crane-men and certain staff afloat, permanent way men, signalmen and telegraph staff, and staff employed on canals; and (b) the salaried grades, including station masters, agents, yard masters, controllers and inspectors, and clerical staff.

The award of the tribunal, in general, substituted 1½ per cent for the former 2½ per cent reduction in railway wages. Earnings under 40s. 6d. in a full week are not subject to deduction, and in no case is any deduction to exceed the sum of 3s. in respect of a week. Overtime, in the "conciliation grades," is to be paid at the rate of quarter time extra in addition to the present night rate of time-and-one-eighth, making time-and-three-eighths in all.

The award is in effect from the first full pay following August 16, 1936, to the first full pay following August 15, 1937.

Some Rules for the Safeguarding of Hazardous Machinery have been recently issued by the Division of Labour Standards of the United States Department of Labour in the form of drawings showing the application of the required guards and safety devices. An explanatory pamphlet of some 15 pages states that these rules or similar ones are in use in some of the States.

According to "Business Week" Pontiac Motor Company of United States has instituted a layoff-tideover scheme for its skilled employes. During the stock-taking and re-tooling period this month, workers will be permitted to draw on the company for \$7.50 a week up to a maximum of \$60. The Company considers that this allowance will buy groceries and at the same time insure against driftaways. The money "borrowed" will be deducted in small instalments from pay checks when production is resumed in September.

## STRIKES AND LOCK-OUTS IN CANADA DURING AUGUST, 1936

THE following table shows the number of disputes, workers involved and time loss for August, 1936, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*Aug., 1936.....	23	9,681	65,658
*July, 1936.....	7	3,776	44,342
Aug., 1935.....	18	5,684	29,588

\* Preliminary figures.

The record of the Department includes lock-outs as well as strikes, but a lock-out, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lock-outs are recorded together. A strike or lock-out, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lock-outs which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

A considerable increase appears not only in the number of strikes and lock-outs but in the number of workers involved and in the time loss for August as compared with July. Over 7,000 of the workers and nearly 50,000 days in time loss were due to four strikes, namely, two involving coal miners in the Glace Bay area in Nova Scotia, textile factory workers at Cornwall, Ont., and taxicab drivers at Montreal, P.Q. Strikes of fur workers at Winnipeg, Man., and glass factory workers at Hamilton, Ont., also included considerable numbers of employees and caused considerable time loss. In July most of the time loss was due to a strike of salmon fishermen in British Columbia which involved 2,500 workers, causing about 40,000 days' time loss, and a strike of men's clothing factory workers at Winnipeg, Man., involving 950 workers with a time loss of 2,500 days. In August, 1935, four strikes accounted for about seventy-five per cent of the time loss and workers involved during the month. These strikes were those of longshoremen at Vancouver, B.C., certain other classes of water transport workers (sympathetic) at Vancouver and other British Columbia ports, women's clothing factory workers at Montreal, P.Q., and cotton factory workers at Three Rivers, P.Q.

Five disputes, involving 423 workers, were carried over from July and eighteen disputes commenced during the month. Of these twenty-three disputes, fourteen terminated during the month, four resulting in favour of the employers, four in favour of the workers, compromise settlements being reached in two cases, while the results of three were recorded as indefinite and that of one as partially successful. At the end of August, therefore, there were on record nine disputes recorded as strikes or lock-outs, namely: bakery workers, Winnipeg, Man.; fur factory workers, Winnipeg, Man.; textile factory workers, Cornwall, Ont.; pottery factory workers, St. Johns, P.Q.; building wreckers, Toronto, Ont.; taxi drivers, Winnipeg, Man.; two strikes of restaurant workers, Toronto, Ont.; and restaurant workers, Vancouver, B.C.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information had been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to three such disputes, namely: photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; and moulders, Peterborough, Ont., February 27, 1934, one employer. The dispute involving laundry workers employed by one firm in Toronto, Ont., commencing May 18, 1936, and carried in the above list since June, 1936, appears to have lapsed by the end of August and has consequently been removed from the list.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

Particulars as to a strike of gold miners at Atlin, B.C. (referred to in the August issue of the LABOUR GAZETTE) were received too late for inclusion in the table. Fifty miners ceased work on July 17, demanding increases in wages for certain men sinking a new shaft. The rate for board at \$2 per day, as compared with \$1.50 and \$1.75 elsewhere in the district, was also in dispute. The miners demanded \$5.50 per day for all shaftmen instead of \$5 for some and \$5.50 for others, with board. Officials of the provincial Department of Mines conferred with the parties, but a settle-

ment was not reached. A resumption of work on August 10 on the employer's terms has been reported.

A minor dispute involving twenty-five waitresses in one restaurant at Vancouver, B.C., for a few minutes on August 1, has been reported. An increase in wages of \$2.00 per week was secured and an agreement was signed with the hotel and restaurant employees' union.

A minor dispute involving fifteen employees of a company demolishing buildings occurred at Mimico, in the vicinity of Toronto, Ont., on August 4, lasting one hour. Wages were increased from 25 cents and 30 cents per hour to 35 cents and 40 cents and hours were reduced from ten per day to eight. An agreement was signed with the Toronto Wreckers' Local of the International Hod Carriers', Building and Common Labourers' Union of America. It is outlined elsewhere in this issue.

A minor dispute occurred at St. Joseph, Beauce County, P.Q., on August 6 when four labourers on a road construction job ceased work for half an hour demanding the minimum rate of 25 cents per hour provided for in the contract. They were being paid 10 cents per yard for loading material and as earnings averaged 30 cents per hour no change was made and work was resumed.

A minor dispute at Sydney Mines, N.S., involved about fifteen truck drivers for about three hours on August 18 when they ceased work on a highway construction job, claiming that trucks from points outside of the district were getting an unfair share of the work, and demanding preference in employment. This being adjusted, work was resumed.

A cessation of work in an artificial silk manufacturing establishment at Cornwall for forty-five minutes on July 31 was reported too late for inclusion in the LABOUR GAZETTE for August. It appears that 191 girls in one department ceased work when four girls were dismissed for leaving work and complaining to the union when one of their number was required to attend twenty-five reels instead of twenty-two. Work was resumed when it was arranged that the dismissed girls would be suspended for one week only.

A minor dispute involved eight employees in a leather factory at New Toronto, Ont., on August 4 when their demand for an increase in wages was refused. In a short time five of them resumed work and the others were replaced.

A minor dispute involving five or six restaurant employees at Hamilton, Ont., on August 10 has been reported. It appears that the employees demanded one day off each week and ceased work for a time. The restaurant workers' union took the matter up

with the municipal authorities and the chief of police circularized all restaurant proprietors, drawing their attention to the provincial One Day's Rest in Seven Act, 1922, applicable to hotels and restaurants in cities and towns with a population of 10,000 or more.

A dispute as to wages for farm labourers for the harvest early in August at Craik, Sask., was reported. It appears that about two hundred men had gathered from other points and refused to work for less than \$2.50 per day and board instead of \$2, the rate prevailing in the district. The number of men was reported to be much in excess of that required in the district and most of them left, the remainder being hired at \$2 per day.

A cessation of work from August 10 to August 14 in one men's clothing factory in Toronto, Ont., has been reported. It appears that work was suspended during negotiations as to an increase in wages for certain employees, operations being resumed when the management conceded increased rates for the workers concerned.

During August at Toronto, Ont., members of the painters' union picketed a number of buildings where work was being performed by non-union workmen or at rates of wages below the union rates. In some cases the workmen were replaced by union members at union rates.

When the strike of loggers, sawmill and shingle mill workers in Vancouver Island and on the coast of the mainland, for union recognition and a wage increase, was called off on May 26 by the union, the United Brotherhood of Carpenters and Joiners of America, the dispute continued at one shingle mill employing about one hundred men at Vancouver. On July 30 a resumption of work was reported by the union, the strikers returning on the understanding that there would be no discrimination.

A lockout of seventeen workers in a scrap iron establishment in Toronto on July 25 was noted in the August issue of the LABOUR GAZETTE. It appears that these employees and those in other establishments had attempted to form a union with a view to securing a scale of wages higher than the rates paid. It was stated that earnings for a forty-four hour week were from \$7 to \$14, most of the employees receiving only \$8 or \$9. It was reported later that they were not successful in forming a union and the dispute appears to have lapsed by the end of July.

A dispute involving employees in one men's furnishing manufacturing establishment in Winnipeg, Man., for one-half day on August 19 has been reported but particulars have not yet been received.

Disputes involving compositors, pressmen and stereotypers in one job printing estab-

lishment in Toronto on August 25 and again on August 27 have been reported in the press. Particulars have not been received but it appears that the employees demanded wage increases and changes in working conditions; also that the employer attempted to replace those on strike.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**MEN'S WORK CLOTHING FACTORY EMPLOYEES, WINNIPEG, MAN.**—The strike of employes in sixteen establishments manufacturing overalls, work shirts, etc., on July 21 was terminated on August 8 when the last of the firms involved signed the agreement with the United Garment Workers of America. Two other firms had signed on August 7 and the others had signed the agreement in July. The agreement provides for the conditions in effect since 1934 in a small number of establishments, and is outlined elsewhere in this issue.

**MEN'S WORK CLOTHING FACTORY EMPLOYEES, TORONTO, ONT.**—This dispute, involving one establishment with ten employees, commenced on July 27 but was not reported in time for inclusion in the August issue of the *LABOUR GAZETTE*. The employees had requested increases in wages and reductions in hours. This being refused, they ceased work, joined the United Garment Workers of America, and demanded the agreement in effect in other establishments. On August 8 this was conceded by the employer, wages being increased by five per cent and hours reduced to forty-four per week, and work was resumed.

**TRUCK DRIVERS, LABOURERS, MACHINE OPERATORS, ETC., JAMES RIVER (ANTIGONISH), N.S.**—This strike, beginning on July 27 when an increase in wages was refused, was recorded as unterminated at the end of July in the August issue of the *LABOUR GAZETTE*. Later information is that the strikers were paid off at the end of July and replaced early in August.

**AUTOMOBILE MECHANICS, TORONTO, ONT.**—The strike of mechanics in two garages on July 28 and in five on July 31 was extended to two other garages on August 1 and to other garages later in the month, bringing the number on strike up to about 150. The strikers were demanding an agreement with the International Association of Machinists, but the employers refused to negotiate. By the end of the month the dispute appears to have lapsed.

**COAL MINERS, NEW ABERDEEN, N.S.**—Long-wall miners, thirty-two in number, ceased work on August 7 demanding an increase in the rate per ton, alleging that as a result of changes

in conditions their earnings per day were substantially reduced. Negotiations as to the rate had been carried on, but it was stated that the miners ceased work before they had been completed as required by the agreement with the United Mine Workers of America, and the president of the union declared it was an "outlaw" strike. On August 11 the other employees in the colliery did not work and the mine was closed. Work was resumed on August 18, the union members having voted to resume work for two weeks while the union officers and company officials investigated the points in dispute and negotiated for a settlement. In the meantime miners in a number of other collieries in the district ceased work in sympathy.

**COAL MINERS, GLACE BAY DISTRICT, N.S.**—In sympathy with miners on strike at New Aberdeen, the miners in four collieries in the district at Glace Bay and Caledonia ceased work on August 12 and August 13, resuming work on August 17, as the result of a vote to return to work pending a settlement of the dispute.

**COAL MINERS, VULCAN, ALTA.**—Coal miners in two small collieries ceased work on August 24 demanding an increase in piece rates of 30 cents per ton. On August 28 work was resumed when an increase of ten cents per ton was given.

**BAKERY EMPLOYEES (BAKERS & DRIVERS), WINNIPEG, MAN.**—Employees in thirteen bakeries in the northern part of the city ceased work on August 31 alleging violation of an agreement with the Bakery and Confectionery Workers' International Union reached in July. The drivers were reported to be members of the teamsters' international union. The agreement is outlined elsewhere in this issue.

**BAKERY EMPLOYEES, TORONTO, ONT.**—Employees in twenty-two establishments ceased work for one day, August 22, to secure a wage increase of \$2 per week, stated to have been previously arranged for between the employers and the Bakery and Confectionery Workers' International Union, Local 181. The price of bread had been increased and the wage increase was conceded.

**FUR FACTORY WORKERS, WINNIPEG, MAN.**—Employees in about thirty-five establishments ceased work on August 11, the employers' association having refused to sign an agreement with the International Fur Workers' Union providing for wage increases and the forty hour week. Officials of the provincial Department of Labour and the Mayor of Winnipeg attempted to bring about negotiations but the members of the employers' association refused. On August 13 and August

14 six firms signed agreements with the union and by the end of the month sixteen firms were reported to have signed agreements with the union. The officers of the association stated that by August 25 numbers of the strikers had resumed work; that some had not ceased work; and that others were prevented from working by the pickets.

**LEATHER FACTORY WORKERS (HANDBAGS, POCKETBOOKS, ETC.), MONTREAL, P.Q.**—Employees in ten establishments ceased work on August 20 to secure a wage increase of fifteen per cent and a reduction in hours to forty-four per week. On August 29 negotiations between four of the employers and the International Pocketbook Workers' Union of the United States and Canada resulted in an agreement providing for certain temporary increases in wages, the forty-four hour week, time and one-quarter rates for overtime work and equal division of work. It was arranged that the wage scale should be determined by arbitration and application made for the extension of the agreement to all employers and workers in the industry in Montreal under the Quebec Collective Labour Agreements Extension Act.

**TEXTILE FACTORY WORKERS (ARTIFICIAL SILK), CORNWALL, ONT.**—Employees in one establishment ceased work on August 11, their demand for recognition of the Rayon Workers' Industrial Union with a closed shop agreement, increases in wages, the forty-hour week and other changes in working conditions having been refused. A brief strike in one department against the dismissal of four girls had occurred on July 31, the girls being reinstated. In negotiations with the union committee on August 6 the management had proposed that there should be a works council but this was refused. The union, which reported a membership of 1,400 out of 1,753 employees involved in the dispute, later became affiliated with the United Textile Workers of America. The approaches to the establishment were picketed and until August 14 no persons were allowed to enter the premises or take in supplies while officials and a staff of maintenance men did not leave the building. At the request of the Mayor of Cornwall for assistance, two officials were sent by the Minister of Labour for Ontario, and these secured an arrangement that the office staff and maintenance men should have access to the building, also that coal would be admitted and loads of rayon taken out, no production work to be carried on. Negotiations between the parties for a settlement were carried on with the assistance of the Deputy Minister of Labour for Ontario from August 16 to August 21 when it was agreed to suspend negotiations

until the arrival of the president of the company from London, England, the Deputy Minister returning to Toronto. The Chief Conciliation Officer of the Department of Labour was sent from Ottawa by the Minister at the request of the member of Parliament for the county. He interviewed the strikers' committee and the management, proposing that work be resumed and the dispute referred to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act if not settled by negotiations. It was agreed to postpone further consideration until the arrival of the president. In the meantime, as a result of a clash between pickets and police, sixteen pickets were arrested on August 18 on charges of intimidation, obstruction, etc., the movement of trucks having been interfered with. These were released on bail (except one) but all were given suspended sentence later. The police were reinforced by detachments of provincial police and the movement of truck loads of rayon continued. Following the arrival of the president of the company on August 25, negotiations between the management and the strike committee were resumed, the Chief Conciliation Officer of the Department of Labour being in Cornwall to render any assistance desired. The question as to the recognition of the union was left in abeyance until other matters had been dealt with. On August 31 negotiations were broken off when the management objected to the presence of the international organizer of the United Textile Workers' Union from Toronto, not being one of the employees, while the strike committee insisted on union recognition. The Chief Conciliation Officer of the Department then interviewed the parties with a view to the resumption of negotiations. On August 31 and September 1 several pickets were arrested on charges of obstruction, assault, etc., being released on bail.

On September 1, through the mediation of the Chief Conciliation Officer of the Department of Labour, arrangements were begun for the resumption of negotiations between the management and a reorganized committee appointed by the union, the demand for union recognition being dropped. Certain employees on strike who were not members of the union made preparations for the formation of a works council to negotiate with the management for a settlement. On September 3 a settlement was reached between the union committee and the management in consultation with the Chief Conciliation Officer, providing for wage increases of about five per cent and improvements in working conditions. The complaints were chiefly as to reductions in the number of workers in some processes and increase in

the number of machines attended by each worker, insufficient ventilation and the effect of acid fumes at times. The management agreed to remedy such conditions. The management would not agree to the reinstatement of all on strike, but it was understood that all but a small number would be taken back and that there would be no discrimination between union members and other employees. Preparations having been made on September 4, work was resumed by some employees on September 5 and it was expected that most of the departments would be in operation in from one to three weeks.

**FURNITURE FACTORY WORKERS, STRATHROY, ONT.**—Employees in one establishment ceased work on August 26 demanding the reinstatement of certain workers alleged to have been discharged for union activity, following changes in working conditions. About twenty-five foremen, etc., were reported to be indirectly affected. As a result of a conference between the management and representatives of the strikers a settlement was reached providing for the reinstatement of several of those laid off, also for a nine-hour day, no overtime in excess of six hours per week and for the establishment of a shop committee to deal with any future differences. Work was resumed on August 29.

**POTTERY WORKERS (SANITARY WARE), ST. JOHNS, P.Q.**—A number of the employees in one establishment ceased work on August 17 against the dismissal of certain employees, alleged to be for union activity, and demanding recognition of a newly formed local of an international union, the National Union of Operative Potters, also increases in wages and reductions in hours from fifty per week to forty. At the request of the President of the Trades and Labour Council of Montreal, a Conciliation Officer of the Department of Labour interviewed the management and strikers' representatives. As a result of this the management met the strike committee and offered to discuss certain of the demands if work were resumed, but refused union recognition. The committee would not agree to these terms and the dispute was untermined at the end of the month.

**GLASS FACTORY WORKERS, HAMILTON, ONT.**—A number of the employees in one establishment ceased work on August 19 demanding recognition of newly formed locals of the Glass Bottle Blowers' Association of the United States and Canada and of the American Flint Glass Workers of America, also increases in wages. The management had offered to hold regular conferences with a committee of employees but refused union recognition. The establishment was picketed but there was

no interference with the entrance of the employees who did not participate in the strike, nor with new employees, although crowds of sympathizers at times demonstrated. No serious disturbances were reported. Two strikers were convicted of assault and fined. On August 26 a settlement with a number of employees but not with either union was reported. Work was resumed in all shops except that of the machinists making glass moulds, where it was stated that twenty out of thirty-six had been replaced. Increases in wages of 2½ cents to four cents per hour were reported to have been given to some of the lower paid classes. The unions claimed there were still three hundred employees on strike at the end of the month. A sympathetic strike in the Wallaceburg plant of the company was declared on August 20.

**GLASS FACTORY WORKERS, WALLACEBURG, ONT.**—A number of employees in one establishment ceased work on August 20 in sympathy with a strike in the Hamilton plant of the same company, but it was reported that nearly all of the employees continued to work and that the strikers had been replaced. The establishment was reported to have been picketed from August 20 to August 26. On August 29 two pickets were arrested on charges of "watching and besetting" and were released on bail.

**BUILDING WRECKERS (LABOURERS), TORONTO, ONT.**—Employees of one firm engaged on the demolition of one building ceased work on August 14 when their demand for recognition of the International Hod Carriers', Building and Comon Labourers' Union of America was refused. The employer stated that he had offered to pay union wage rates, namely 35 cents and 40 cents per hour but refused to sign an agreement providing for the "closed shop." At the end of the month a settlement had not been reported.

**TAXICAB DRIVERS, MONTREAL, P.Q.**—On August 7 over 500 drivers, including owners and chauffeurs, ceased work on the refusal of their demand for a reduction in fees to an association through which they secured calls, cab licences, etc., and made various arrangements in connection with their employment. On August 8, independent operators of cabs also ceased work in sympathy so that nearly all of some 873 licensed cabs were withdrawn from service. Drivers, estimated as between 1,200 and 1,600, were involved in the strike. It was arranged that service for hospitals, funerals, etc., would be given. On August 11 there was a conference of the representatives of the association and the drivers with a committee of the City Council, presided over by the Mayor and attended by a representa-

tive of the Department of Labour as an observer at the request of the drivers. The drivers had demanded a reduction in the monthly fee, payable to the association, from \$38.75 to \$25, this covering insurance, telephone service, maintenance of stands, credit accounts, payment for concessions at hotels, railway stations, etc. At the conference they suggested changes in the city by-laws as to permits, fares, etc. It was agreed to resume operations for thirty days during which a committee would investigate the situation and recommend a settlement. Work was resumed immediately. The committee as proposed was to consist of seven members, one each named by the Association, the cab-owners who are members of the Association, the chauffeurs, the independent taxi men, the city and the Federal Department of Labour, with a Chairman appointed by the other six.

**GRAIN SHOVELLERS, TORONTO, ONT.**—Labourers employed at an elevator to shovel grain in the hold of a boat, in connection with unloading, ceased work on August 9 when their demand for union recognition was refused. Other workers were engaged to take their places and they resumed work on the next day.

**BEVERAGE DISPENSERS, TORONTO, ONT.**—Employees in ten or more hotels ceased work on August 1 and later dates demanding agreements with Local 280, Bartenders' International Alliance of America, similar to those which had been signed in previous months by a number of hotel proprietors without cessation of work. The agreements provided for \$18 per week for waiters and \$21 per week for tapmen, fifty-four hours per week. The strikes were called at individual hotels beginning on August 1 and several were involved about the

#### STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1936\*

Industry, occupation and locality	Number of workers involved	Time lost in working days	Remarks
--------------------------------------	-------------------------------------	------------------------------------	---------

##### (a) Strikes and Lockouts in progress prior to August, 1936.

<b>MANUFACTURING—</b>			
<i>Textiles, Clothing, Etc.—</i>			
Men's work clothing factory employees, Winnipeg, Man..	200	1,200	Commenced July 21, 1936; for union recognition and agreement; terminated Aug. 8, 1936; in favour of workers.
Men's work clothing factory employees, Toronto, Ont....	10	70	Commenced July 27, 1936; for union wages and working conditions; terminated Aug. 8, 1936; in favour of workers.
<b>CONSTRUCTION—</b>			
<i>Highway—</i>			
Truck drivers, labourers, machine operators, etc., James River, (Antigonish), N.S....			Commenced July 27, 1936; for increased wages; terminated by July 31, 1936; in favour of employer
<b>TRANSPORTATION—</b>			
<i>Local—</i>			
Taxi drivers, Winnipeg, Man...	13	300	Alleged lockout, May 4, 1936; re employment of union members; unternminated.
<b>SERVICE—</b>			
<i>Business, etc.—</i>			
Restaurant employees, Toronto, Ont.....	50	1,250	Commenced May 1, 1936; for reinstatement of workers allegedly discharged for union activity; unternminated.
Automobile mechanics, Toronto, Ont.....	150	1,000	Commenced July 28, 1936; for union agreement with increased wages and reduced hours; lapsed by Aug. 31, 1936; in favour of employer.

##### (b) Strikes and Lockouts commencing during August, 1936.

<b>MINING, ETC.—</b>			
Coal miners, New Aberdeen, N.S.....	1,432	8,000	Commenced Aug. 7, 1936; for increase in piece rates; terminated Aug. 17, 1936; indefinite.
Coal miners, Glace Bay District, N.S.....	2,950	7,000	Commenced Aug. 12, 1936; in sympathy with miners on strike at New Aberdeen from Aug. 7; terminated Aug. 15, 1936; indefinite.
Coal miners, Vulcan, Alta.....	20	80	Commenced Aug. 24, 1936; for increase in wages (piece rates); terminated Aug. 27, 1936; compromise.

\*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1936\*—*Concluded*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>MANUFACTURING—</b>			
<i>Vegetable Foods—</i>			
Bakery workers, Toronto, Ont.....	60	60	Commenced Aug. 22, 1936; for increase in wages; terminated Aug. 22, 1936; in favour of workers.
Bakery workers, Winnipeg, Man.....	125	125	Commenced Aug. 31, 1936; alleged violation of agreement; untermiated.
<i>Fur, Leather, etc.—</i>			
Fur factory workers, Winnipeg, Man.....	350	3,500	Commenced Aug. 11, 1936; for union agreement, increased wages and 40-hr. week; untermiated.
Leather factory workers, pocket books, handbags, etc., Montreal, P.Q.....	450	4,000	Commenced Aug. 20, 1936; for increased wages, reduced hours and recognition of union; terminated Aug. 29, 1936; partially successful.
<i>Textiles, Clothing, etc.—</i>			
Textile factory workers (arti- ficial silk), Cornwall, Ont...	1,753	30,000	Commenced Aug. 11, 1936; for recognition of union and increased wages; untermiated.
<i>Other Wood Products—</i>			
Furniture factory workers, Strathroy, Ont.....	125	300	Commenced Aug. 26, 1936; against discharge o workers alleged to be for union activity; termin ated Aug. 28, 1936; compromise.
<i>Non-Metallic Mineral Products—</i>			
Pottery (sanitary ware) fac- tory workers, St. Johns, P.Q.....	80	960	Commenced Aug. 17, 1936; against dismissal of workers allegedly for union activity, for recog- nition of union, increased wages and reduced hours; untermiated.
Glass factory workers, Ham- ilton, Ont.....	535	3,000	Commenced Aug. 19, 1936; for recognition of union and increased wages; terminated Aug. 26, 1936; in favour of employer.
Glass factory workers, Wal- laceburg, Ont.....	56	150	Commenced Aug. 20, 1936; in sympathy with glass factory workers on strike at Hamilton from Aug. 19; terminated Aug. 26, 1936; in favour of employer.
<b>CONSTRUCTION—</b>			
<i>Buildings and Structures—</i>			
Building wreckers (labourers), Toronto, Ont.....	28	300	Commenced Aug. 14, 1936; for closed shop union agreement; untermiated.
<b>TRANSPORTATION AND PUBLIC UTILITIES—</b>			
<i>Local—</i>			
Taxicab drivers, Montreal, P.Q.....	1,200	4,000	Commenced Aug. 7, 1936; to secure reduction in fees; terminated Aug. 11, 1936; indefinite.
<i>Storage—</i>			
Grain shovellers, Toronto, Ont.....	22	22	Commenced Aug. 9, 1936; for union recognition; terminated Aug. 9, 1936; in favour of employer.
<b>SERVICE—</b>			
<i>Business, etc.—</i>			
Beverage dispensers, Toronto, Ont.....	50	300	Commenced Aug. 1, 1936, and later dates; for union wages and working conditions; terminated Aug. 26, 1936; in favour of workers.
Restaurant employees, Tor- onto, Ont.....	8	20	Commenced Aug. 29, 1936; for union recognition, increased wages and reduced hours; untermiated.
Restaurant employees, Van- couver, B.C.....	14	21	Commenced Aug. 29, 1936; for increased wages and reduced hours; untermiated.

middle of the month. In some cases an agreement was signed in a few hours and in other cases in a day or two. By August 26 it was reported that twenty-two hotels had signed during August and on that day the Association of Hotel Proprietors at a meeting with the union officials decided to accept the agreement. The union agreed to a lower wage scale for ten of the small hotels with wages at \$16 for waiters and \$19 for tapmen. It was stated that the Association represented eighty per cent of the hotels in the city but that eighteen of the larger hotels belonged to the Toronto Hotelmen's Association and had refused to negotiate with the union.

RESTAURANT EMPLOYEES, TORONTO, ONT.—Employees in one restaurant ceased work on

August 29, their demand for recognition of the Hotel and Restaurant Employees' International Alliance, Local 168, and for increases in wages, reduced hours and changes in working conditions being refused. At the end of the month a settlement had not been reported.

RESTAURANT EMPLOYEES, VANCOUVER, B.C.—A number of the employees in one restaurant ceased work on August 29 demanding increases in wages. The employees were members of the Hotel and Restaurant Employees' International Alliance, Local 28 (Cooks and Waiters), and thirty-four other employees were reported to be indirectly involved. At the end of the month a settlement had not been reached.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

The latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, 1936, in the review of Strikes and Lockouts in Canada and Other Countries, 1935. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in July was 53 and 18 were still in progress from the previous month, making a total of 71 disputes in progress during the month, involving 21,500 workers with a time loss of 83,000 working days for the month.

Of the 53 disputes beginning in July, 13 were over demands for wage increases, 18 over other wage questions, 11 over questions respecting the employment of particular classes or persons, 7 were over other questions of working arrangements and 3 over questions of trade union principle. One other dispute was due to sympathetic action.

Settlements were reached in 50 disputes, of which 12 were settled in favour of workers, 22 in favour of employers and 16 ended in a

compromise. In the case of 4 other disputes, work was resumed pending negotiations.

### Belgium

For the year 1935, the number of disputes beginning in the year was 150 involving 645 establishments and directly involving 98,543 workers, with a time loss of 623,002 working days for the year. Of the 98,543 workers involved, 73,420 were in the mining industry. About two thirds of the number of disputes and over three quarters of the workers involved were in disputes over wages questions. Of the 98,543 workers involved, 58,993 were involved in strikes which ended in favour of workers, 19,819 in strikes which ended in favour of employers and 10,761 in strikes which ended in a compromise. The remainder of the strikers were involved in strikes of protest or sympathetic stoppages.

### Bulgaria

The number of disputes occurring in the year 1934 was 50, involving 69 establishments and 5,942 workers.

### India

The number of disputes reported for the year 1935 was 145, involving 114,217 workers with a time loss of 973,457 working days for the year. This is the smallest number of workers involved and the smallest time loss recorded for any year during the fifteen years for which statistics have been maintained by the Government of India. More than half of the total time loss for the year was lost in cotton and woollen mills. Of the 145 disputes beginning in the year, 91 were caused by wages questions, 21 by personnel questions, 10 by

questions of leave and hours and the others by various other causes. Of the 141 disputes which terminated during the year, the workers were successful in 25, partially successful in 29 and unsuccessful in 87.

### United States

The number of disputes beginning in June was 180, and 123 were still in effect from the previous month, making a total of 303 disputes in progress during the month, involving 133,000

workers with a time loss of 1,225,000 working days.

A strike of 12,000 painters in New York City began August 27, and was settled September 4, when an agreement was reached by which master painters are to hire 25 per cent of their men from the union. Other terms provide for the election of job stewards, extra pay for night work, and that during January, February and March, no men to be permitted to work more than 21 hours per week, in order to spread employment.

## Workmen's Compensation in Quebec, 1935

The eighth annual report of the Quebec Workmen's Compensation Commission which reviews the administrative activities of that organization during the calendar year 1935 has just been received. The Commission operates under the provisions of the Workmen's Compensation Act, 1931 (LABOUR GAZETTE, May, 1931, page 525).

*Accidents.*—The number of accidents reported to the Commission in 1935 was 39,007 as compared with 35,436 reported in the preceding year. Final figures for 1934 indicate a total of 31,557 claims allowed for accidents of which 142 were for fatalities, 15,642 for compensation and 15,773 for medical aid only. Employers reporting to the Commission as at December 31, 1935, numbered 9,489 as compared with 9,498 reporting at the end of the year 1934.

*Benefits.*—Total benefits awarded by the Commission in 1935 amounted to \$3,143,469.23; of which \$2,061,485.68 was for Schedule 1, compensation; \$619,222.21 for Schedule 2, compensation. These figures, the report points out, refer to benefits awarded during the year 1935, irrespective of the year in which the accident occurred.

*Administration Expenses.*—Administration expenses of the Commission for the year under review totalled \$243,921.60 of which \$20,337.14 is payable by the employers of Schedule 2. Administration expenses represent 7.75 per cent of the benefits awarded during 1935 as compared with 9.84 per cent for 1934.

The total assessments in the 24 classes of Schedule 1 for the year 1935 amounted to \$2,955,639.87. To this must be added \$27,562.21 for interest, penalties and other amounts to be collected resulting in a total provisional revenue for the year of \$2,983,202.08.

As in other years, Schedule 2 employers continued to make their own payments to injured workmen and their dependents, such employers reporting to the Commission the amounts paid in each case. During 1935, Schedule 2 employers paid out \$462,761.34 in

compensations. Compared with \$386,326.12 disbursed in 1934.

*Safety Associations and First Aid.*—During 1935, the Commission paid \$7,000 to the Quebec Lumbermen's Accident Prevention Association; \$11,000 to the Quebec Pulp and Paper Safety Association; \$2,000 to the Quebec Public Utilities Safety Association; and \$55,650 to the Quebec Association for the Prevention of Industrial Accidents. First Aid stations continued to provide efficient service during the year to workmen.

*Finances.*—The financial statement indicates that the total expenses for 1935 actual and estimated amounted to \$3,350,386.12 and the total revenue actual and estimated amounted to \$2,983,202.08 resulting in a deficit of \$367,184.04 on the year's operations. As usual, the report contains complete statistical information for the year 1934, dealing with accidents, etc.

Finally revised figures as issued by the Dominion Bureau of Statistics, show that shipments from Canadian cement plants during 1935 totalled 3,648,086 barrels valued at \$5,580,043 as compared with 3,783,226 worth \$5,667,946 in 1934 and 3,007,432 at \$4,536,935 in 1933. The 1935 production, compared with 1934 represents a decrease of 3.6 per cent in quantity and 1.6 in value.

During 1935 cement was produced in the provinces of Quebec, Ontario, Manitoba, Alberta and British Columbia and of the total Canadian shipments the mills of Quebec contributed 1,751,012 barrels or 48 per cent, and those of Ontario 1,243,836 or 34 per cent. Employment within the industry showed a slight improvement, the number of employees increasing to 924 from a total of 860 in 1934. Salaries and wages paid amounted to \$1,027,416 as against \$1,009,686 for 1934. These cement mills consumed 818,443 tons of limestone, 21,611 tons of gypsum, 78,477 tons of Canadian coal and 53,338 tons of imported coal.

## TRADE UNIONISM IN CANADA

### Summary of the Twenty-fifth Annual Report on Labour Organization

THE annual report on Labour Organization in Canada, recently published by the Labour Intelligence Branch of the Department of Labour, is the twenty-fifth in the series issued since 1911. In addition to outlining the composition and development of the major organizations of wage earners in the Dominion, the report gives statistical and other information respecting membership, benefits, registration of trade unions, etc. The report also contains particulars concerning organizations of wage earners not identified with the trade union movement.

Labour organizations in Canada are grouped into two classes: (1) international bodies having membership in Canada and the United States; (2) organizations whose membership is wholly in Canada. The report also indicates the two principal types of labour organization, viz: craft unions, which include workmen in a single craft or a number of closely related crafts or trades, such as bricklayers and stone masons; and industrial unions, or those having members in the various occupations in a particular industry, as for instance, in coal mining.

*Trade Union Membership.*—According to returns received from the officers of the various central labour bodies, and from departmental records, the membership of the international craft union group, which consists of the Canadian members of 81 organizations (2 more than recorded in 1934) was 139,370—a gain of 5,701—comprised in 1,782 local branches—an increase of 32. The Industrial Workers of the World, an international industrial body, reported 12 local unions in Canada (a gain of 1), while its membership total of 4,200 indicated an increase of 45. The group of Canadian central organizations, which numbered 23 (a loss of 1), had 734 branches, with a combined membership of 80,078. This is an increase of 72 branches and 24,592 in membership, and is largely accounted for by the transference of the One Big Union from the international to the Canadian section, this organization having lost its only local in the United States. The National Catholic comprised 140 unions (an increase of 18) with a membership of 38,000 (a gain of 7,654). There were 49 independent units, 7 more than in 1934, with a reported membership of 16,859, an increase of 6,407. Eleven unions of two affiliates of the Workers' Unity League made returns to the Department, and these showed a membership of 2,197.

The above figures indicate that there were in Canada, at the close of 1935, a total of 2,728 trade union branches, a loss of 12, with a combined reported membership of 280,704, a decrease of 1,070.

*Percentage of Trade Unionists and Organized Wage-Earners to Population.*—According to a census estimate, as at June 1, 1935, trade unionists represented about 2.6 per cent of the population. Adding the number of members comprised in non-trade union associations (113,915) the organized wage-earners in the Dominion at the close of 1935 represented 3.6 per cent of the population.

*Division by Classes.*—The accompanying table shows the number of branches and the membership reported (or obtained from other reliable sources) of the various classes of labour organizations operating in Canada at the close of 1935, with the number of members of each group affiliated.

*Twenty-five Years of Trade Unionism in Canada.*—The accompanying chart indicates the fluctuations which have occurred in the standing of organized labour in the Dominion for the past twenty-five years.

*Union Membership by Industrial and Trade Groups.*—The division of membership among the various industries and trade groups is shown in the following table. The membership of each central body is included in the trade group in which most of its members are employed:

Groups of Industries	Membership	Per centage
Mining and Quarrying.....	21,662	7.72
Building.....	24,716	8.81
Metal.....	15,417	5.49
Printing and Paper Making.....	13,982	4.98
Clothing, Boot and Shoes.....	16,509	5.88
Railroad Employees.....	68,692	24.47
Other Transportation and Navigation.....	19,834	7.07
Public Employees, Personal Service and Amusement.....	29,607	10.55
All other trades and general labour.....	70,285	25.03

*Trade Union Branches by Provinces.*—The division by provinces of the 2,728 local branch unions of all classes is as follows: Ontario, 1,026; Quebec, 514; Alberta, 266; British Columbia, 264; Saskatchewan, 195; Manitoba, 186; Nova Scotia, 147; New Brunswick, 117; and Prince Edward Island, 13.

*Trade Union Membership in Canadian Cities.*—Canadian cities having not less than 20 trade union branches each numbered twenty-eight, the same as recorded in 1934. The 1,561 branches in these 28 localities represent 57 per cent of the local unions operating in Canada. The 1,312 reporting branches in these cities represent 57 per cent of all reporting branches, and they also contain 68 per cent of the total reported membership and 50 per cent of the entire trade union membership in the Dominion.

Classes of Labour Organizations	Number of Main Organizations	Local Branches	Memberships
Trades and Labour Congress of Canada—			
International craft organizations.....	60	1,389	114,804
Canadian central bodies.....	3	82	3,460
Directly chartered unions.....		81	7,515
	63	1,552	125,779
All-Canadian Congress of Labour—			
Canadian central bodies.....	8	359	49,173
Directly chartered unions.....		53	4,852
	8	412	54,025
National Catholic Unions.....	1	140	38,000
Other Canadian central bodies.....	11	170	17,275
Independent local units.....		49	16,859
Unaffiliated international unions—			
Railway organizations.....	5	353	21,377
(a) Other international organizations.....	16	40	3,189
Industrial Workers of the World.....	1	12	4,200
	22	405	28,766
All Canadian organizations.....	23	934	137,134
All international organizations (comprising international craft organizations affiliated with the Trades and Labour Congress of Canada, and unaffiliated international unions).....	82	1,794	143,570
Grand totals.....	105	2,728	280,704

(a) Affiliated directly with the American Federation of Labor but not with the Trades and Labour Congress of Canada.

*Unions Having Large Memberships in Canada.*—Of the 105 central organizations with branches or members in Canada, there are 12 with 5,000 or more members, 6 of which are composed of employees who are identified with railway operation. Nine of the organizations referred to above are international bodies while 3 are in the Canadian group. The combined membership of these 12 organizations is 99,777 (comprised in 871 local branch unions), and represents approximately 35.5 per cent of the total membership and 31.9 per cent of the total trade union branches.

*Trade Union Benefits.*—In a chapter dealing with the beneficiary features of labour organizations, it is indicated that of the 23 Canadian central bodies five had made payments for benefits, the total amount expended being \$27,371.24, a decrease of \$56,722.76 as compared with 1934. Of the 82 international organizations operating in the Dominion 54 reported having expended in Canada and the United States a total of \$18,131,478 in benefits, an increase of \$221,793. The disbursements in 1935 for the various classes of benefits were:—

Death benefits.....	\$10,175,647
Unemployed and travelling benefits.....	322,211
Strike benefits.....	539,299
Sick and accident benefits.....	3,622,073
Old age pensions and other benefits.....	3,472,248

In addition to the expenditure made by the central organizations, benefit disbursements by local branch unions to their own members

are included. The aggregate amount of such expenditure by 711 local branch unions was \$384,098, a decrease of \$96,977 as compared with the disbursements made by 744 local branch unions in 1934. The outlay for 1935 by the local branches for the classes of benefits named was:—

Death benefits.....	\$ 46,857
Unemployment benefits.....	133,625
Strike benefits.....	30,771
Sick and accident benefits.....	114,321
Other benefits.....	58,524

*Non-Trade Union Associations.*—Besides information respecting organizations connected with the Trade Union movement, the report contains a chapter dealing with associations which, though not identified with the trade union movement, are for the most part composed of wage-earners. These include 121 bodies, chief of which are the associations of school teachers, government employees and commercial travellers, with a combined membership of 113,915.

*Complete Labour Directory.*—As in previous issues, the twenty-fifth Annual Report on Labour Organization includes a complete labour directory, containing not only the names and addresses of the chief officers of local branch unions and delegate bodies in the Dominion, but also those of the central organizations with which the Canadian trade unionists are identified.

Copies of this report may be obtained from the Department of Labour at a nominal charge of 50 cents per copy.

TWENTY-FIVE YEARS OF TRADE UNIONISM IN CANADA

## RE-EMPLOYMENT AND RELIEF MEASURES IN CANADA

### Stimulation of Construction in Housing Program—Plan to Absorb Single Homeless Adults in Primary Industries—Rehabilitation of Western Drought Areas

MAJOR developments during the past month in the "drive" against unemployment included: (1) Stimulation of construction by a \$50,000,000 program of renovation and repairs to urban and rural dwellings, building for low rental housing (associated in some cases with slum clearance), and building of new houses for those unable to finance them; (2) Absorption of single homeless men into primary industries; (3) Rehabilitation of western drought areas.

The first two of these programs were given special study by the National Employment

Commission and the recommendations of this body were approved by the Dominion Government. Accordingly, on September 8, the Prime Minister, Rt. Hon. W. L. Mackenzie King, announced the details of the Housing program and the plan for single homeless adults. The action required for drought relief in the Western Provinces was considered on an emergency basis, and rehabilitation measures were inaugurated by the Dominion in co-operation with the Prairie Provinces.

### Housing Program Including Renovation and Repair of Urban and Rural Dwellings

The details with respect to the housing program are described in the following official statement:

The National Employment Commission has examined carefully various ways and means of stimulating the construction of new houses and the repair and renovation of existing dwellings.

Realizing that a large group, if not indeed by far the largest individual group, of the employable unemployed is connected with the construction industry, the Dominion Government, acting in accord with the recommendation of the National Employment Commission, has adopted a broad policy for the purpose of stimulating construction activity in the housing field. The problem is being attacked on three main fronts:

- (1) The renovation and modernization of existing dwelling units both in urban and rural districts.
- (2) The construction of new houses and dwelling units in urban areas which can be made available at sufficiently low rentals to serve the lesser income groups—associated in some cases with slum clearance.
- (3) The construction of new houses for those whose incomes are adequate only when convenient financial arrangements for purchase are made available to them.

Bearing in mind that repair and modernization of existing houses will absorb more workers than any but very large projects under the other two groups, and moreover that, while in some communities there is little demand for new houses, there are no communities in Canada where there are not heavy arrears of maintenance and improvements on existings dwellings, a detailed plan has already been worked out to take care of the first of the three fields. In special instances, with the help of community effort, it will be possible to proceed with the scheme forthwith. In its nation-wide scale of application the plan will require, in its financial aspects, parliamentary sanction to new legislation. This sanction will be asked for at the beginning of the forthcoming session. A resume of essential features may now be indicated. While only financial aspects involve legislative sanction, the following co-ordinated lines of action will be essential in order to achieve the maximum success in stimulating employment:

- (a) Local efforts effectively to ensure that municipal taxation obstacles such as increased assessments on house improvement by repair or modernization shall be removed or minimized;
- (b) A publicity program to enlist the broadest community support;
- (c) Financial facilities for those who are unable to undertake needed improvements out of past savings;

The experience of the United States with renovation and rehabilitation, over a period, has demonstrated the soundness of this policy to the satisfaction of all parties to the arrangement. It has disclosed also its employment possibilities, not only by putting loan money to work, but in stimulating those who have available funds themselves to effect improvements to their properties.

### Low Cost Housing

In the second field of low cost housing, specific plans are being worked out in the light of experience available in Canada and elsewhere. These also will involve legislative action at the next parliamentary session, but in the meantime it can be stated that they will be based on the following broad principles:

- (a) Participation by the Dominion, Provinces, and/or Municipalities in any aid or form of aid that may be given;
- (b) Encouragement of participation by private capital;
- (c) Avoidance of the setting up of administrative burdens which the various governing authorities are not equipped to assume;
- (d) Avoidance of undue competition where the private investor can fill the field and with existing housing where adequate or adaptable;
- (e) Requirement of a system of selected tenants so that government-aided low-cost houses will not be occupied by those able to pay full economic rents.

Before Dominion aid towards actual low-cost housing projects can be granted, it will be regarded as essential that urban municipalities shall be enabled by the Provincial Governments to provide, and shall in fact provide, for adequate zoning and city planning, and shall set up housing authorities competent in the Dominion viewpoint to deal with a housing program.

In the third field, namely, that of the construction of the class of house which only requires the stimulation of easier financing, the Government has been making a determined effort to see whether the Dominion Housing Act of 1935 would fill the need of this section of housing activity. It is now apparent that many difficulties have been met in its operation, particularly in making it applicable to smaller communities where it has not yet applied effectively. At the forthcoming session of Parliament it will be necessary either to make substantial changes in the existing Act or to introduce a more comprehensive measure.

### Method of Financing

The detailed recommendations on the Housing, Renovation and Modernization Plan as submitted by the National Employment Commission are as follows:

- (a) The Dominion to guarantee chartered Banks and other responsible approved lending institutions against losses up to 15 per cent of the aggregate value of loans made by each such institution for the financing of repairs and improvements of all kinds on dwellings;
- (b) The limit of the aggregate loans to be \$50,000,000 and the limit of the Government risk \$7,500,000;
- (c) The Government to retain the right to announce at any time that no further loans will be guaranteed for all lending institutions or for a particular one;
- (d) The Government administrative action to be limited to accepting and recording loans for guarantee; receiving claims and paying them;
- (e) The conditions which the lending institutions will have to meet to obtain the government guarantee to be;
  - (1) Maximum loans on one property, \$2,000.
  - (2) Loans to bear not more than 5 per cent discount rate re-payable in equal monthly instalments over one year or a pro rata discount rate for other periods. No service or insurance charges nor any additional charges of any kind except as provided for arrears.
  - (3) Duration of loans: 1 to 5 years.
  - (4) Loans to be used solely for rehabilitating and improving existing real property owned by the borrower. Not for building on vacant land. Fixtures but not removable attachments or appliances to be considered as improvements.
  - (5) No endorsements to be required.
  - (6) Loans only to be made to owners.
  - (7) Stipulated penalties for arrears.
  - (8) Taxes, mortgage payment, etc., to be in standing acceptable to lending institution.

## Absorption of Single Homeless Adults into Primary Industries

The program having as its objective the absorbing into the primary product industries all the physically fit single homeless adults, was outlined as follows:

While the Dominion Government through its Public Works Program and Grants-in-Aid policy is now contributing to a greater extent to the Provinces in connection with their relief problems than was done in the previous year, nevertheless it does recognize the special difficulties involved for the Provincial authorities in the problem of the large number of homeless adults, who, under present conditions, move from city to city in search of employment. Therefore, in accordance with the recommendation of the National Employment Commission the Dominion Government has decided to adopt a broad policy for this winter of offering to share on an equal basis with individual Provinces in the cost of such plans as can be worked out in conjunction with the Provinces for the purpose of absorbing in primary product industries all physically fit single homeless adults. Conditions attached to this policy will require that it be applied in such manner as will result in giving the maximum of employment at the minimum expense and that the Provinces make a determined effort to abolish direct relief for this class of relief recipient for the period of such assistance. Wages under the plans will be related to the prevailing normal rate for corresponding work in the area in question.

For some weeks prior to the adoption of this broad policy by the Dominion Govern-

ment, individual plans have been under discussion with Provincial authorities. The Dominion Government has now invited further suggestions from the Provincial Governments for such additional plans of a similar nature which those Provinces feel will assist them.

### Advantages of Employment Plan

Particular progress has been made in the agricultural field where a Farm Improvement and Employment Plan has been agreed upon with various Provinces along lines which it is felt will provide the following advantages:

1. Employment in homes for single homeless adults at or near normal wages for similar winter work in the area in question.
2. The probable permanent placement of an appreciable proportion of those who take positions under it.
3. The elimination from the relief rolls of a number of those who really do not wish to work, with a monetary saving as a corollary.
4. The improvement of dilapidated farm properties through the work of the helpers who will be taken on to the farms.
5. A measure of relief to those drought areas which have been especially affected.
6. The creation of a situation gradually leading up to the abolishing of relief for physically fit single adults in the provinces in which it is applicable.

## Drought Relief in Western Canada

The Dominion Government, in co-operation with the Prairie Provinces, has inaugurated emergency relief schemes which will provide assistance to those in need in the drought areas of the western provinces. It is estimated that this relief will affect approximately 200,000 persons.

The object in view is to permanently rehabilitate certain districts which periodically suffer lack of rain resulting in ruined crops and soil drifting. The Dominion authorities plan to remove cattle from areas where a shortage of feed exists to other districts where fodder is available.

However, in order that it shall not be necessary to remove all cattle from the areas affected by drought, feed and fodder will be shipped into certain areas to maintain herds in these districts; in some instances cattle will be slaughtered.

The Red Cross will be asked to assist in providing household furniture in cases where it has been impossible to keep up depreciation on the same, due to a succession of dry years with little or no income.

To deal permanently with the drought-stricken areas, a commission was appointed in 1935 under the prairie farm rehabilitation Act to ameliorate droughts in the future. With moneys granted from the federal treasury it plans rehabilitation measures along the following lines:

Several large irrigation dams are planned in order to create extensive storage basins. These will be private enterprises with assistance supplied by the federal government.

Storage basins are to be provided in which the Dominion assists by engineering advice and some direct help.

Dug-outs are to be constructed by the farmers themselves to whom the rehabilitation

officers provide engineering advice as to location, where water can be stored most successfully and inexpensively.

Applications to the commission for small dams and dug-outs last year totalled 1,832 and some 500 more have been added this year. Many of the applications have been endorsed and the work completed.

A general campaign for tree planting has been inaugurated. The Dominion has two nursery stations in the West, one at Indian Head and the other at Sutherland, both in Saskatchewan, from which small trees are provided to the settlers. Last year 6,439,000 trees were planted. This year the nurseries have made provision to supply 9,000,000.

An extensive program of tree planting is also planned as a protection against soil drifting and to retain moisture. A system

of "farm shelter belts" is to be established. Under this scheme an area of about one square mile is taken and surrounded by a hedge of caragana, a type of tree which grows very rapidly sometimes reaching a height of 25 feet. Similar hedges will cut the section into four squares and in each quarter another hedge cuts it in two. Should this prove a remedy for soil drifting, agriculture department officials expect that it may be adopted extensively. Another preventive measure employed against soil drifting is the seeding of land in strips with each alternate strip summer-fallowed. In this way the land under crop tends to protect the summer-fallow from becoming a menace through soil drifting. Other measures are also employed in an effort to combat this western farm problem of soil drifting and drought.

## LOANS APPROVED UNDER DOMINION HOUSING ACT

**S**UBSTANTIAL improvement in residential building throughout Canada and evidence of steadily increasing activity under the Dominion Housing Act are reported in a statement issued recently by Honourable Chas. A. Dunning, Minister of Finance. (Under the provisions of the Dominion Housing Act—LABOUR GAZETTE, May, 1935, page 412 and July, page 624—it is made possible for a person wishing to build a residence to obtain 80 per cent of the cost through a lending company at a maximum interest rate of 5 per cent with 20 years to pay off the amortization and interest costs).

"Since the first of June," said Mr. Dunning, "the number and value of loans approved under the Dominion Housing Act have more than doubled. From the time operations under the Act began in the late summer of 1935 until June of this year, 212 loans had been approved for a total amount of \$1,513,916. As at August 15, 464 loans had been approved, and the amount of these loans aggregated \$3,331,336. A number of duplexes and apartment houses have been financed under the Act and the 464 loans have provided housing accommodation for 667 families.

"In addition to its direct effects, the Dominion Housing Act has had an important influence in stimulating the volume of residential building financed on the ordinary basis by private lending institutions. The publicity which has been given to this legislation and to the report of the Special Parliamentary Committee on Housing has tended to make the Canadian public more 'house-conscious.' The manager of one company, not on the approved list of lending institutions, reports that in a period of three weeks he made 86 straight

loans as a result of Housing Act advertising done by one of the approved lending institutions in his community.

"Confirmation of this is to be found in the figures of building permits and contracts awarded during the year to date. In the first seven months of 1936, the number of contracts awarded for residential buildings totalled 7,118 as compared with 6,816 during the corresponding period of last year. The value of such contracts aggregated \$22,285,400 as compared with \$20,640,300, an increase of approximately 8 per cent. In July, the increase in residential contracts awarded over July 1935 was 10.7 per cent. Having in mind the extent to which our unemployment is so heavily concentrated in the building trades, this substantial improvement in private construction is especially gratifying. We are all familiar with the important role which residential building has played in the British recovery movement during the past few years. Revival in our durable goods industries, particularly in the greatest of them, the construction industry, is essential to the restoration of more normal conditions in business and employment. The willingness to make long-term commitments—the revival of investment—is an evidence of the gradual disappearance of depression psychology. We have now an opportunity to accelerate this movement which calls for the whole-hearted co-operation of the construction interests, the private lending institutions and the public generally."

In analyzing the loans which have been made under the Act, Mr. Dunning pointed out that while the average loan per family unit was only slightly less than \$5,000, nevertheless, loans had been made for amounts running

down to \$2,000 and even as low as \$1,400. On a \$2,000 loan the carrying charges for interest and principal amortization (but excluding taxes) would be only a little over \$13 per month. The recent Dominion architectural competition has stimulated interest in the low-cost housing field and there has been a widespread public demand for the booklet issued by the Department of Finance giving 65 of the plans submitted in the competition. This

booklet is being distributed at a nominal cost of 25 cents per copy.

Mr. Dunning also announced that he was about to confer with a group of representatives from the larger lending institutions to consider ways and means of promoting more extensive operations under the Act, and of securing more effective co-operation between the Department of Finance and the lending companies.

## OLD AGE PENSIONS IN CANADA

### Financial Summary as at June 30, 1936

The accompanying table gives a statistical summary to June 30, 1936, of the chief factors—numbers of pensioners and amount of Dominion disbursements—in the operation of old age pensions in Canada under the Old Age Pensions Act (Revised Statutes of Canada, 1927, chapter 156, amended by Statutes of 1931, chapter 42), and under concurrent Acts by the provinces\* participating in the scheme.

In order to avoid the duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

The present summary was prepared in the Department of Finance.

FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT JUNE 30, 1936

Province	Number of Pensioners	Average Monthly Pension	Dominion Gov't. Contributions April 1 to June 30, 1936	Dominion Gov't. Contributions from Inception of Act
		\$	\$	\$
Alberta.....	8,383	17 82	330,742 93	5,416,252 99
British Columbia.....	10,181	19 21	439,815 15	8,573,622 25

	109,696	.....	3,989,348 46	77,714,294 08

Fatal accidents among railway employees in Great Britain in 1935 represented a rate of 3.50 per 10,000 employed, as compared with 4.18 in 1934, and 3.49 in 1933. This, however, was the general rate for all classes of railway servants taken together; for some classes it was much higher, for example, for signal fitters and telegraph wiremen (17.7 per 10,000); shunters, yardsmen, etc. (12.8); guards (goods and mineral) and brakemen (10.3); and permanent-way men (10.2). The average rate for all accidents (fatal and non-fatal) was 265 for 10,000 railway servants employed in 1935, as compared with 255 per 10,000 in 1934 and with 266 per 10,000 in 1933. Here again, some classes had a much higher rate, notably

goods porters (996); and loaders and sheeters (972).

There was a decided improvement indicated in Canadian asbestos production during 1935. The output of all grades of the mineral totalled 210,467 short tons valued at \$7,054,614 as compared with 155,980 tons worth \$4,936,326 in the preceding year. Increases in both quantity and value were recorded for all grades including crudes, fibres and shorts; the tonnage of rock mined totalled 2,852,118 as compared with 2,320,750 in 1934 while rock milled amounted to 2,256,994 tons as against 1,935,129 tons in 1934. The asbestos mines and mills in 1935 provided employment for 2,072 persons and distributed \$1,904,053 in salaries and wages as compared with a distribution of \$1,608,812 to 1,855 employees in 1934.

\* The Act became effective in New Brunswick on July 1, 1936, and in Quebec on August 1, 1936.

## LABOUR AND INDUSTRY IN BRITISH COLUMBIA IN 1935

### Annual Report of Provincial Department of Labour

THE eighteenth annual report of the British Columbia Department of Labour reviewing the administrative activities of that department during the year 1935, records a pronounced improvement in industrial, business and labour conditions throughout that Province. The report indicates improvement in industrial payrolls an increase of \$12,245,000 being recorded for the year 1935 over the year 1934. An upward trend in wage rates is reported, the average weekly industrial wage having increased from \$23.57 to \$24.09 while more people have found gainful employment as indicated by an increase of 9,804 in December over January of the same year.

During the year under review, the Department has continued its conciliation activities in the settlement of disputes between employers and employees, and brought into operation, the "Apprenticeship Act" (LABOUR GAZETTE, June 1935, page 522), which aims at building up an apprenticeship system in many of the skilled trades.

The report gives a summary of the main provisions of the "Health Insurance Act, 1936" which provides protection for the great majority of wage earners of the Province and their families. This Act was passed by the Provincial Legislature on March 31, 1936 (LABOUR GAZETTE, May, 1936, page 422).

*Industrial Statistics, payrolls, etc.*—As usual, the annual report contains statistical data, indicating the industrial situation as reflected through payrolls, employment, hours of labour, etc. The payroll of the 4,153 firms making returns to the Provincial Department of Labour amounted to \$92,068,867.90, an increase of \$10,304,486.90, or 11.19 per cent over 1934. This figure should be supplemented by the following other figures: \$928,295.70 in returns too late for classification; \$1,250,000.00 as an estimate for firms failing to report; \$11,414, 976.55 in transcontinental railway payrolls; \$5,200,000, for Dominion and Provincial Government workers; \$2,750,000, for wholesale and retail firms; \$3,400,000 for cartage, warehousing, auto transportation, etc.; \$7,500,000 for steamship and express services and \$1,300,000 classified as miscellaneous—making in all a total Provincial industrial payroll of \$125,812, 140.15. During 1932 the total for the above was \$99,126,653.28 which, compared with the standing for 1935, indicates a recovery, in an increase of \$26,696,000 in the two year period.

Of the total payroll, wage earners received 76.29 per cent, clerks, stenographers and salesmen, 12.65 per cent and officers, superintendents and managers, 11.06 per cent. An analysis of the payroll statistics reveals that of the twenty-five tables, twenty-two show an

increased payroll, while only three indicate a decrease. These were coal-mining with a decrease of \$134,512, smelting with a loss of \$12,939, followed by cigar and tobacco manufacturing with a decrease of \$6,105. The industries reporting increases were headed by the lumber industry with an increase of \$3,125,852, followed by metal trades with \$1,314,997; contracting, though still far below its usual place increased \$1,014,207; coast shipping increased by \$803,510; public utilities with an addition of \$800,000; followed by miscellaneous trades with \$720,606; the printing and publishing industry added \$448,853 to its payroll; pulp and paper with \$383,551; wood (N.E.S.) \$372,969; builders' materials, \$158,624; explosives and chemicals \$181,220; laundries, etc. \$166,905; oil-refining, \$182,890; ship-building, \$186,399; leather and fur goods, \$148,622; house-furnishings, \$118,857; breweries, \$94,203; garment-manufacturing, \$84,913; metal mining, \$61,970; food products, \$45,743; paint manufacture, \$24,843; jewellery manufacture, \$18,273.

*Weekly Wage Rates.*—In the accompanying table the average weekly wage is shown for 1929, 1934 and the year reviewed by the report. It is pointed out in the report that "no opportunity of ascertaining from the report whether the several employees worked the full week" and "upon study of the various tables we would assume this is not the case. There are always such causes as broken time, weather conditions and other circumstances, which enter into the making-up of an employee's time, and affect his earning power, through no fault of his own."

AVERAGE WEEKLY WAGES OF MALE EMPLOYEES  
IN BRITISH COLUMBIA IN 1929, 1934, and 1935

Industry	1929	1934	1935
Breweries.....	\$ 27 70	\$ 25 62	\$ 25 79

Manufacturing of wood (N.E.S.)...	25 49	18 97	18 69

As indicated in the accompanying table of average weekly rates, seventeen of the twenty-five industrial groups registered increases, ranging from .17 cents in breweries to \$2.71 in explosives and chemicals. Of the eight industries reporting decreases, printing and publishing with a .20 cent reduction in average weekly wage rates was the smallest, and coast shipping with \$2.54 was the largest decrease.

The report gives tabular statistics indicating the number of wage earners in each industry. The following table is a summary of all such tables and indicates the number of employees by weekly wage groups in 1935.

CLASSIFIED WEEKLY WAGE RATES (WAGE EARNERS ONLY) BRITISH COLUMBIA, 1935

Totals. ....	75,172	3,723	8,955	586	925

**Apprenticeship.**—The number of apprentices reported for 1935 was 925 compared with 784 for 1934. The proclamation of the "Apprenticeship Act" may affect very materially future figures under this heading and the report points out that it must not be assumed that the total for 1935 is covered or comes within the scope of the new legislation. Under the Male and Female Minimum Wage Acts, apprentice permits are granted by the Board of Industrial Relations to employees in industries to which Minimum Wage Orders apply, and some of which do not come within the present scope of the "Apprenticeship Act." The following industries which do not come within

the ambit of the Act recorded increases in the number of apprentices employed. Food products, 34; printing and publishing, 21; smelting, 13; laundries, etc., 51; other increases were shipbuilding, 23; metal trades, 10; lumber industries and miscellaneous trades and industries, 7 each; house-furnishing and street railways, etc., 6 each; builders' materials, 4; explosives and chemicals, jewellery manufacture, oil refining, pulp and paper manufacturing, 2 each; and breweries, etc., an increase of 1.

Decreases are headed by cigar and tobacco manufacture with a loss of 12, followed by garment manufacture, 9; contracting, 8; wood (N.E.S.), 3; leather and fur goods, 2; and coast shipping and paint manufacture, 1 each; coal mining and metal mining had the same numbers, being 7 and 10 respectively.

**Employment Service.**—The report reveals that the general improvement in employment "in all basic industries as indicated during 1934 continued during the year under review, with the exception of coal mining. . . ." During the year 118,040 applications and 39,817 employers orders were received, 39,692 placements being made and 184 transfers effected within the province. There were no transfers made outside of the province.

Reviewing the work of the Handicap Section of the Employment Service the report indicates that the problems affecting handicapped workers continue to increase and were intensified by the steady influx of such cases into British Columbia from other parts of Canada. Figures show that in January, 1925, there were 5,410 former members of the Canadian Expeditionary Forces in receipt of pensions, residing in British Columbia. This number increased to 7,550 at December, 1930. The number is now 9,724, an increase during the last five years of 2,174. The number of men in receipt of war veterans' allowances is now 1,801, a decrease for the year of 135.

**Unemployment Relief.**—The report indicates that since 1933 there has been a drop of 16.5 per cent in the average monthly number of relief recipients in the province. In March, 1933, 128,858 received assistance, this being the peak while the lowest number was in September, 1935, when 76,827 received relief.

Up to November 30, 1935, the province paid 60 per cent of the cost of relief given to municipal residents, the municipalities paying 40 per cent. In addition to this, the province paid for the whole cost of transient and provincial cases residing within municipalities. On December 1, 1935, the Federal Government increased their grant in aid, and most of this increase was passed on to the municipalities through the decision of the Provincial Government to assume 80 per cent of

the cost of municipal relief and to continue full responsibility for transients and provincials.

During the year, the province continued its policy of requiring relief recipients to perform work in return for assistance given with the result that approximately 80 per cent of the money expended in unorganized territory for relief purposes was paid in cash for work performed.

The report indicates that since the re-registration of all relief recipients, effected August 1, 1934, 66,809 applications have been received. During the year 809 individuals received grubstakes to enable them to follow placer mining, this number including lode prospectors who were also assisted.

"An experiment was undertaken in one of the districts where difficulty was experienced in providing road work for relief cases, whereby farmers were permitted to work out their relief by clearing their own land conditional on the individual devoting an equivalent amount of his own time. This work involved fairly heavy clearing, but nevertheless each individual averaged about 1 acre and most of the land cleared was placed under cultivation during the same year.

"In order to give young men between the ages of 21 and 25, inclusive, an opportunity to receive training in forestry work, the Provincial Minister of Labour authorized the Forestry Branch to carry out a training scheme during the summer months. A total of 509 men were enrolled. Of this number, 111 secured employment through Government or their own endeavours, fifteen left of their own accord, and only seven were discharged, the balance being laid off on completion of the projects. A total of 930 applications was received, and of this number 237 did not accept the offer of enrolment due to various causes, while 184 could not qualify under our regulations."

A placer-mining training plan was also carried out by the province, sixty-nine individuals being given training in placer-mining camps on completion of which they were fully equipped and grub-staked and given the opportunity of going out prospecting on their own.

In the month of October, 1935, a complete census was taken of all relief recipients and the information obtained was tabulated according to districts, municipalities and cities. All those subsequently applying for relief assistance have been required to complete the questionnaire and reports are received monthly from all districts of those going off relief, and in this manner a complete up-to-date record month by month is obtained.

*Factory Inspection.*—The report of the factory inspection branch reviews the activities of the year in accident prevention, prosecutions, sanitation and ventilation, investigations into complaints and inspections of passenger and freight elevators. During 1935, 1,510 inspections and re-inspections of factories were made, while certain other special inspections were also carried out.

*Labour Disputes and Conciliation.*—In all, twenty-three strikes took place during 1935, involving 7,321 men with a total loss of 140,706 working-days. Of the twenty-three strikes, nine terminated in favour of the employees, nine in favour of the employers, three were partially successful, and two lapsed.

### Board of Industrial Relations

During the year under review the Board of Industrial Relations continued its program commenced in 1934, administering the Female Minimum Wage Act, the Male Minimum Wage Act and the Hours of Work Act.

"Gradual but steady progress has been made, and many more branches of industry and business have been brought within regulations respecting wages and hours of work. In formulating these regulations the Board has followed the same policy as heretofore in consulting employees and employers, so that their views might be obtained in assisting the Board to reach its decisions." . . . .

"As legislation under the Board's administration was originally designed to apply to purely industrial concerns, its application and enforcement is comparatively easy when confined to the industrial field. When, however, it is extended to occupations not of a strictly industrial character, the wide variety of working conditions creates greater difficulties in framing suitable regulations.

"Another point frequently lost sight of is that a number of occupations within the Province are not within Provincial jurisdiction with respect to hours and wages, but are, by virtue of Dominion law, within the exclusive legislative jurisdiction of the Parliament of Canada.

"The experience of the previous year has been of great value, tending to show where regulations could be strengthened and improved. This experience has been of assistance not only from the standpoint of regulations, but also with regard to the Statutes as well, and these have been amended by the Legislature on several important points. One of the most significant amendments was that which enabled the Board to apply minimum-wage Orders to all male persons irrespective of age, instead of to male persons over 18 years of age only, as formerly.

"In carrying out this new responsibility, minimum wages in industries affording opportunities for employment of youth have been arranged on scales gradually increasing in due proportion to age and experience, in an endeavour to assess service at its appropriate value and remove the incentive to replace older boys with younger and cheaper help.

"The principle of higher rates for part-time employees has also been applied in a number of cases where this was thought practicable, with a view to giving all possible encouragement to full-time work and discouraging the practice of broken time and split shifts, which was becoming all too prevalent."

An outstanding feature of this section of the report is statistical data demonstrating that the legal minimum wage has not become the standard wage and it is further pointed out that wages which have remained very close to the legal minimum in the past have risen appreciably beyond that point.

*Female Minimum Wage Act.*—During the year 3,272 employers (an increase of 80) reported 19,934 women and girls gainfully employed compared with 19,379 so employed in 1934. The percentage of younger workers increased from 5.68 per cent in 1934 to 6.01 per cent in 1935. The average weekly wage of all experienced female workers was \$14.96 compared with \$14.78 in 1934; while a more appreciable gain is recorded in the \$9.07 weekly average, which is 62 cents ahead of the \$8.45 which those under 18 or the inexperienced workers averaged during the preceding year. In the light of the improvement recorded, the report expresses the hope that pre-depression figures will be surpassed during 1936.

The report indicates that out of the 19,934 women and girls gainfully employed, only 3,796 or 19.04 per cent received pay-cheques that coincided with the rates set by the various orders. There were, however, 9,724 or 48.78 per cent whose earnings were more than the legal requirements which reveals an advance of 1.51 per cent over the 1934 figure.

Taking all industries, the report shows that, as a whole, only 32.18 per cent of the employees were in receipt of wages less than those fixed for experienced workers, being 2.55 less than in 1934. The report reveals, through this and other statistical wage data, that there is a general upward tendency in wage-rates, with restoration of cuts which were made during the depression years.

"A vigorous policy of enforcement of regulations was maintained throughout the year, and with an augmented inspection staff it was found possible to make 4,527 actual inspections at employers' establishments. These investiga-

tions were made in all parts of the Province, some entailing visits to quite out-of-the-way points.

"Working conditions for men, women, and minors were carefully checked, and one tangible and beneficial result of the Inspectors' work was the collection of arrears of wages in the sum of \$15,660.47 for women and girls and \$27,022.65 for male employees, making the imposing total of \$42,683.12.

"In addition to the aforementioned sum turned over to employees through the efforts and co-operation of the officials of the Department, employees in some instances availed themselves of the right of recovery of arrears by direct individual action through the Civil Courts. The Board has no record of the sums collected in this manner."

*Male Minimum Wage Act.*—Summaries of the Orders issued under the Male Minimum Wage Act have been published from time to time in issues of the LABOUR GAZETTE.

*Hours of Work Act.*—The report states that "the enforcement of the above Act has been more effective during 1935 and the average working hours in the industries which are included in the Schedule have been reduced." During 1935, 4,153 reporting on the hours worked by 81,329 employees stated that 88.78 per cent worked 48 hours or less per week as compared with 85.18 per cent in this classification for 1934; 5.26 per cent were engaged between 48 and 54 hours per week as compared with 5.76 per cent in 1934; while only 5.96 per cent were working in excess of 54 hours.

The average weekly working hours for all employees during 1935 was 47.17 as compared with 47.32 in 1934; 47.35 in 1933; 47.69 in 1932; 47.37 in 1931; and 48.62 in 1930. The report also contains a tabular summary of the average weekly hours by industries, showing an average working week ranging from 42.60 hours in garment-making to 52.46 hours in logging-railways.

The granting of overtime permits shows an increase over last year, the total being 459, of which 202 were for firms for the purpose of stock-taking; 150 were granted to firms where seasonal rushes in business required an additional hour per day for one or two days.

The increased number of applications does not mean that more overtime is being worked, but that the enforcement of the legislation is becoming more strict. This, combined with the requirement of time and one-quarter of the regular rate of pay, has been of great benefit to employees who hitherto had, in many cases, been requested to work the additional hours for a fixed weekly rate. .

## UNEMPLOYMENT ASSISTANCE IN GREAT BRITAIN

### First Annual Report of Unemployment Assistance Board

The measures adopted in Great Britain to cope with the problem of unemployment and relief have been reviewed at intervals in the *LABOUR GAZETTE*. Most recent of these legislative enactments was the Unemployment Assistance Act of 1934 (*LABOUR GAZETTE*, August, 1934, page 744; and January, 1935, page 21) under which an Unemployment Assistance Board was appointed for the purpose of "creating a new social service for the assistance of able-bodied unemployed persons who nominally are wage-earners, not only for the relief of their material needs, but also for the promotion of their welfare."

This Unemployment Assistance Board has recently issued its first report, covering the period from its appointment to the end of the year 1935. In an introductory note, the chairman, Lord Rushcliffe, deals with the background of the problem and the causes that necessitated the liquidation of the anomaly of the co-existence of two separate relief systems. In view of the salient factors emerging from the British experience and the importance of the problem in the social economic sphere, the following paragraphs from the chairman's introduction are of particular interest and value:—

"For several years prior to 1931 the Unemployment Insurance scheme of 1920 had found increasing difficulty in meeting the claims upon it. In 1931 the rapid extension of unemployment and the general financial position of the country made it clear that continuous borrowing by the insurance scheme was unsound and that the Insurance Fund must be put on a self-supporting basis. Unemployment benefit may be regarded as a personal contract; a man receives what he has contracted for and he receives it without any reference to his own resources or those of his household. But after he has received all that is due to him, he may still require assistance because of his unemployment. Upon what basis should this be granted? As the Royal Commission pointed out in 1932 it was difficult to see upon what principle other than that of "need" such assistance could be given.

"The number of persons in 1931 who had run out of benefit was very large. Behind the insurance scheme had always stood the Poor Law, but for financial and other reasons it was out of the question to expect the Local Authorities to add this number to their burdens already heavy. On the other hand, the Local Authorities had in their Public Assistance system, machinery capable of administering a service according to need. Therefore in the emergency of 1931 tempor-

ary arrangements were made under the Unemployment Insurance (National Economy) (No. 2) Order, 1931, by which the Public Assistance Authorities undertook to co-operate in the administration of a scheme of assistance for the unemployed no longer entitled to benefit, and to assess their needs on the same basis as they gave relief to their own able-bodied poor. The cost of this assistance, now known as Transitional Payments, was borne by the Exchequer up to the limit of the amount of unemployment benefit that would have been payable.

"This arrangement had two unavoidable weaknesses. A system by which locally elected Authorities controlled the disbursement to several hundred thousand applicants of large sums of money for which they had not themselves to shoulder financial responsibility could not endure. Moreover, the anomalies which grew up under the system were incompatible with a scheme financed from central funds.

"The Unemployment Act, 1934, brought these temporary arrangements to an end. It provided for the creation of one central authority, the Unemployment Assistance Board, responsible for the grant of assistance to all able-bodied unemployed persons who normally work for wages, according to their need.

Continuing the analysis of the Chairman's preface, the British *Ministry of Labour Gazette* reviews the essential features as follows:

*Numbers Involved.*—The Board was to take over its task in two stages. On the First Appointed Day it assumed responsibility for the "transitional payments" class (numbering about 800,000 persons, or, with dependants, about 2½ millions), whose needs had previously been assessed by the Local Authorities; on the Second Appointed Day it was to take over the remaining able-bodied unemployed persons (numbering about 200,000) who normally work for wages. Owing to the postponement of the Second Appointed Day, however, under the Temporary Provisions Act, this second group of unemployed persons has not yet come under the care of the Board. The organization of the Board's service involved the setting up of over 300 Area and District Offices, the appointment and instruction of a staff of over 6,000 persons, of whom the greater number were temporary officers employed by the Local Authorities in dealing with transitional payments, and the appointment of 130 Appeal Tribunals. This had to be done within six months, as 7th January, 1935, was the First Appointed Day.

The Act did not itself prescribe any standard of assistance, but it laid down certain requirements, including, in particular, (i) that the needs of an applicant include the needs of the members of his household who are dependent on or ordinarily supported by him, and (ii) that the resources taken into account when assessing the need of an applicant shall include the resources of all members of the household of which he is a member, subject to special treatment of certain specified resources. There is no definition in the Act, however, of the term "members of the household," which does not necessarily correspond with family relationship.

The Regulations which were submitted by the Board, and approved by Parliament on 20th December, 1934, were based upon a standard scale and rules for the whole country, with power for modification in individual cases. The Board have encouraged their officers to exercise these discretionary powers of modification. In reply to the criticism that administration by officers of a central board must be mechanical, or that the interest of an officer in a household under his charge would be limited to an arithmetical calculation of the allowance to be paid, the Chairman observes that "a crude and uniform mathematical method has not been applied. In not less than 20 per cent of the cases, the officers of the Board have used their authority to grant allowances above the normal provided for in the Regulations; and many instances have come to the knowledge of the Board of personal service given by officers, or secured by them, for households with which they are in touch."

*Relation between Wages and Assistance.—*

The Chairman draws special attention to the relation between wages and assistance. He points out that the allowances made to applicants may, in some cases, be so little below an applicant's normal net earnings as to diminish both his eagerness to obtain work and his reluctance to relinquish it. There are disquieting signs, it is stated, that this is already occurring in certain cases: opportunities of training are refused by younger men, many of whom have never had a regular job since leaving school; young women without prospect of employment in their home areas have been unwilling to take work elsewhere; married men with families, whose allowances are practically the same as the earnings they would normally earn, show little disposition to take work or to hold it when it is given to them. Such cases are only a small proportion of the total number of applicants but they are a significant problem.

*Relations with other Social Services.—*Discussing the relationship of the Board with other social services, the chairman observes:

"From the beginning the Board has regarded

as one of its important duties a progressive attempt to bring to bear upon a household in need through unemployment all the help that the social services, both statutory and voluntary, can supply. The problems of need in a household are not simple; often they cannot be fully met by a grant of money. Sickness is found in many households. Often this can be met by the grant of an additional allowance for extra nourishment; in other cases specialized treatment by the medical services is required, and here the Board's officer makes it his duty to bring the need to the notice of the appropriate medical authority. The Board has also come across frequent instances of bad housing; in some cases the house is unsanitary, in others there is obvious overcrowding. Wherever practicable, arrangements have been made for applicants to obtain better accommodation, and the flexibility of allowances which the 'rent rule' provides has enabled the Board to put households in a position to meet the higher rent that the move to a better house has usually involved. Chapter VI describes the general principles of the co-operation, with Local Authorities on these points, and the District Officers' Reports in Chapter VIII contain numerous illustrations of its effectiveness in practice."

In conclusion the Chairman points out that the men and women with whom the Board is concerned are not a segregated class. They are workpeople or potential workers of the same type as those still in employment and those eligible for insurance benefit. They are to be regarded as forming part of the ordinary supply of labour, and are therefore required to register at an Employment Exchange; and they receive their cash allowances at the Employment Exchanges in the same manner and on the same day as claimants for insurance benefit. They are eligible for training, in the same way as applicants for insurance benefit; and in fact one of the Board's chief objects is to give the unemployed such help and training as will most speedily secure their return to work. Two-thirds of all the trainees at the Government Training Centres, and 80 per cent of those at Instructional Centres, are men in receipt of allowances from the Board.

Following the Chairman's introductory note, the Report contains seven chapters dealing respectively with organization; the Regulations; "discretion" in the application of the Regulations; the Appeal Tribunals; training and industrial transference; relations with the social services of the Local Authorities; and the number and distribution of the applicants to the Board. Chapter VIII consists of the reports of the District Officers (nineteen for England, five for Scotland and four for Wales); and there are ten appendices.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Visit of United States Secretary of Labour to International Labour Office

On the occasion of her recent visit to the International Labour Office at Geneva, Miss Frances Perkins, United States Secretary of Labour, declared that she had been "tremendously impressed by the integrity and far-sightedness of those directing the International Labour Office as well as by the way its activities for the promotion of human welfare had been developed."

Miss Perkins was received by the acting director, Mr. E. J. Phelan, and the higher officials of the office. Subsequently Miss Perkins was the guest of the office at a luncheon attended by the Chairman of the Governing Body, Dr. W. A. Riddell, and a number of the representatives of Governments accredited to the International Labour Office.

Expressing her thanks at the warmth of the reception tendered her, Miss Perkins said in part:

"I want to tell you that we, in the United States, are trying to put into effect some of the program which you have worked out here, and upon which you are working continuously; that we are trying to build up that same sense of co-operation between the Government and the people, between the Governments of the States and the Federal Government, that your organization here has so well worked on, and for which it furnishes so adequate a pattern. I cannot tell you what respect I have for the work of this Organization, nor how grateful I have been for so many years for the results of its work which have been embodied in reports, which, after all, are the basic understanding of these problems in modern times." . . . .

The Secretary of Labour, was impressed with the method of operation of the International Labour Office, adding that "the representative character of this body and of its Governing Body is something which Americans generally understand and are able to co-operate with.

"And then, of course, we are impressed and highly sympathetic toward the feeling of co-operation among peoples rather than co-operation among Governments, and this is effectively represented in the organization of this institution here, that is a real co-operation among peoples where the Governments have only a one-third vote in the deliberations."

Miss Perkins also expressed appreciation of the assistance of the Organization concerning social assistance measures in the United States.

### Statistical Survey of Non-Manual Workers

The August issue of the *International Labour Review* contains a statistical survey of non-manual workers in various countries.

The article is the first attempt to collect information available in different countries regarding the number of "non-manual workers" and the changes in their numbers in recent times. The writer contends that "the classical concept of master and servant or employer-owner and worker, no longer corresponds to reality. Modern industry has progressively given growth to new social stratifications, and in fact labour legislation is frequently enacted specially for categories such as 'salaried employees,' wage earners and so on." The survey indicates that in many countries; separate social insurance legislation exists for non-manual workers while in other countries where separate laws are not enacted, special provisions regarding this class are frequently inserted in such laws, as conditions of employment are generally dissimilar from those of manual workers.

For the purpose of the survey, statistics from 21 important countries were obtained, population censuses affording the most complete figures, were used as the main source.

Among other tabular statistics of interest is a table indicating the number and percentage of non-manual workers and other categories in manufacturing and mining industries in different countries according to censuses of establishments and production. According to this table 18.3 per cent of those employed in such industries in Canada are non-manual, or administration and clerical staff workers. (LABOUR GAZETTE, April 1936, page 334.) Compared with other countries Canada has the highest percentage of non-manual workers in this group, United States coming next with 11.7 per cent followed by the Irish Free State with 11.1, and Great Britain with 10.1, while the lowest percentage of non-manual workers is that of Bulgaria with 2.7 per cent.

Other interesting tabular statistics are contained in the survey and include figures reflecting the development of the non-manual class before and since the war; number of non-manual workers per 100 wage earners in different branches of economic activity; distribution of non-manual workers by sex.

The findings of the survey are as follows:

(1) In modern industrial countries non-manual workers constitute generally between 20 and 30 per cent of all gainfully employed.

The proportion is higher in more industrialized than in industrially less advanced countries.

(2) The proportion of non-manual workers to wage earners has increased very considerably since before the war; this development still continues, but at a somewhat reduced rate since 1920.

(3) The proportion of non-manual workers is relatively low in agriculture and similar

occupations; it increases in a very marked fashion in manufactures; the highest proportions are found in commerce and, to a less degree, in transport.

(4) The proportion of females among non-manual workers has increased very much since before the war; in some countries, however, the proportion has decreased since 1920 and in other cases the rate of increase has slowed down since that time.

### Training Course for State Factory Inspectors

A report has been issued by the United States Department of Labour, detailing the proceedings of a training course for factory inspectors. The course was conducted for ten days during February, 1936, by the Division of Labour Standards of the United States Department of Labour in co-operation with the School of Hygiene and Public Health of the Johns Hopkins University, in Baltimore, Maryland. The report intimates that arrangements are being made to conduct similar courses in other parts of the country where there is a demand for them.

In the introduction to the report emphasis is placed on "the growing realization of the value of state-factory-inspection-services and the extreme importance of a high standard of training and ability for inspectors." It was with this object in view that the course reported on was conducted, the basic idea being "to call together the inspectors from a group of States and, in collaboration with an educational institution already active in kindred fields, carry them through a period of intensive and specialized training with such follow-up work as might appear to be necessary and helpful."

A fundamental part of the course consisted of "field-demonstrations and inspections." This was supplemented with technical advice, followed by discussions of the hazards observed and the methods of correcting them. In all, 19 plants were inspected, these being chosen to provide a wide variety of industries exemplifying both satisfactory and unsatisfactory conditions. Means of overcoming hazards were studied and in places where uncorrected hazards were found recommendations as to the manner of control or elimination were described.

Some of the subjects studied included the following: Responsibility of State agencies in the Prevention of Industrial Accidents; The Factory Inspector—His qualifications, Conduct and Approach; The Control of Indus-

trial Health Hazards; Looking for Health Hazards; Industrial Ventilation; Housekeeping as a Factor in Accident Prevention, etc.

### Building Permits in Principal Cities of the United States

Building activity in July, as measured by building permits issued, fell slightly below the June level, according to a report made to the Secretary of Labour Frances Perkins recently by Commissioner Lubin of the Bureau of Labour Statistics. "The value of residential construction, however, increased 14 per cent and the value of additions, alterations, and repairs advanced slightly more than 1 per cent" the report stated. The gain in residential buildings is regarded especially significant as ordinarily building activity declines at this season of the year.

The decrease in the value of all permits issued (residential and non-residential) amounted to less than 2 per cent. Although reports for the country as a whole showed a small decrease, seven of the nine geographic divisions recorded increases.

Compared with the corresponding month of 1935, building activity in 759 cities in July shows a decided increase. Residential building as measured by the value of permits issued shows a gain of 182 per cent. Indicated expenditures for new non-residential buildings increased more than 38 per cent, and the permit valuation of additions, alterations, and repairs to existing structures increased more than 30 per cent. The increase in the value of all building construction over the year exceeded 89 per cent.

During the first seven months of 1936 permits were issued for buildings valued at \$751,527,000. This is a gain of 78 per cent over the corresponding period of the preceding year. Over the same period the value of new residential buildings for which permits were issued amounted to \$335,039,000, an increase of \$191,069,000 or 133 per cent. The value of new non-residential buildings advanced 64 per cent, and the value of additions, alterations, and repairs to existing structures, 33 per cent.

## EMPLOYMENT CONDITIONS IN CANADA AT END OF AUGUST, 1936

### Reports of the Superintendents of the Employment Service of Canada

The employment situation at the end of August, 1936, was reported by Superintendents of the Employment Service to be as follows:—

Haying in the Maritime Provinces was practically completed and harvesting was well under way. The demand for pulp cutters was good and a number of men were placed in this kind of work. Fish were plentiful and large catches of cod, haddock and lobsters were reported. Coal mines in the New Glasgow area operated from three to five and three-quarter days per week, while those in Cape Breton and vicinity worked from two to five days, with one mine idle all week. Manufacturing showed little change. All industries were busy and recorded a normal output. Building construction showed some improvement, although no big projects were under way. Provincial and city road work still afforded employment to a large number of local men, who were taken off the relief roll. Passenger traffic by rail, water and auto, was heavy and freight departments were busy. Numerous requests were received for housemaids and char workers and placements were made.

There was a slight decline in the placement of farm help in the province of Quebec. Hiring of lumber workers had begun in the Hull district and more activity in this line was recorded at Quebec, elsewhere, the situation was quiet. Mining, aside from prospecting being carried on at Rouyn, afforded few opportunities for employment. Manufacturing, as reported by various centres, was as follows:—Hull:—satisfactory; Montreal:—metallurgy, tobacco and shoes—quiet, clothing and rubber—improvement noted; Quebec:—leather and clothing groups—active; Sherbrooke:—knitting factory busy; Three Rivers:—more activity shown in glove, shoe, and paper industries. Building construction, except at Quebec and Three Rivers, was somewhat better. Although the demand for men had not been very heavy in Montreal, a certain number of brick-layers, carpenters, joiners and labourers, had been placed and street improvement carried on by the city continued to give employment to many. A few railway labourers were also placed in Montreal. Trade was better. Vacancies for those in domestic service were plentiful and many placements were made.

Harvesting was well under way in the Province of Ontario and a number of men found work by the day picking tomatoes and suckering tobacco, but the call for general farm

labour was considerably less than previously noted. At North Bay, indications were that a much earlier start than for several years past, would be made in logging and that the output would be greater. At Sudbury, also, there was a slight increase in the demand for bushmen. Mining continued to be fairly active. Very little change was recorded in industrial conditions. Some plants were operating on part time due to seasonal conditions, while others were busier than usual, this being, in particular, the case with fruit and vegetable canneries. Few new large building projects were under way, but there was quite an amount of alteration work being carried on, and highway construction continued. Transportation was fairly heavy. Placements in domestic service were numerous, though wages offered in some instances were very low.

The demand for farm labour in Manitoba had been reduced to men for post harvest work, as wheat threshing was practically finished. Unfavourable weather delayed harvesting operations in Saskatchewan and Alberta, but transients, who were applying for work directly to the farmers, solved any problem which might arise as to lack of help. Mining was quiet, except at Estevan, where activity was recorded and miners hired. Building construction was rather slack and highway construction was somewhat retarded by wet weather. Winnipeg recorded that the feature of city building in that locality was the varied construction work and alterations taking place. Some railway construction was also under way in various sections of Saskatchewan, particularly at Saskatoon. Trade was quiet. Fewer calls were also received for women domestics and at Winnipeg an increased demand was recorded for female help in groups other than that of household service.

Fruit harvesting was giving seasonal work to a number of persons in British Columbia. There was also a good demand for general farm hands. All sawmills and camps were working to capacity; a fair amount of tie-cutting was also taking place along the line of the Canadian National Railway at Prince Rupert. Mining was active. Little building construction was in progress, but highway and railway construction continued. Drydocks and shipyards at Prince Rupert and Victoria were busy, and shipping and longshore work was heavy at Prince Rupert. Trade was good, with collections fair. Domestic work was also available for women, both as household help and hotel and restaurant employees.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN JULY, 1936

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on August 1 was 9,795, the employees on their payrolls numbering 998,564 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for August was 1,791, having an aggregate membership of 178,583 persons, 12.5 per cent of whom were without employment on August

1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) The Employment Situation at the Beginning of August, 1936, as reported by Employers

Employment at the beginning of August showed further improvement, continuing the moderately forward movement that has characterized the industrial situation in the last four months. Statements were tabulated by the Dominion Bureau of Statistics from 9,795 firms, whose payrolls aggregated 998,564 persons, as compared with 988,838 at July 1. The index number, based on the 1926 average as 100, rose from 104.6 in the preceding month to 105.6 at August 1, when it was 4.5 points higher than at the same date in 1935.

The experience of the years, 1921-1935, shows that employment usually though not invariably gains at the beginning of August, there being, on the average, a fractional increase in the index. The advance at the latest date rather exceeded this average increase so that the August 1 index, after correction for seasonal influences, very slightly advanced, standing when adjusted at 101.1, as compared with 100.9 in the preceding month.

As already stated, the unadjusted employment index, calculated on the 1926 average as 100, stood at 105.6 at the beginning of August, 1936, compared with 104.6 at July 1, while at August 1 in the fifteen preceding years, the crude index was as follows: 1935, 101.1; 1934, 99.9; 1933, 87.1; 1932, 86.3; 1931, 105.2; 1930, 118.8; 1929, 127.8; 1928, 119.3; 1927, 110.5; 1926, 105.5; 1925, 97.5; 1924, 95.8; 1923, 101.4; 1922, 94.2 and 1921, 90.0.

The improvement noted at the date under review was quite widely distributed, geographically and industrially. There were gains

in each of the five economic areas except Quebec, where a slight decline was indicated; the trend was also upward in all the main industrial groups except logging and retail trade, both of which reported seasonal losses. Manufacturing, mining, transportation and construction recorded the largest additions to payrolls, while the gains in communications, services and wholesale trade were also considerable.

For August 1, 1935, 9,387 firms had reported an aggregate payroll of 949,940 persons, while in the preceding month they had had 934,633 employees. The gain then had occurred mainly in manufacturing, construction and maintenance and transportation.

### Employment by Economic Areas

Activity increased in the Maritime Provinces, Ontario, the Prairie Provinces and British Columbia, while there were moderate reductions in personnel in Quebec. Employment in all five economic areas was in greater volume than at the same date in any of the last four years.

*Maritime Provinces.*—Statements were tabulated from 691 firms in the Maritime Provinces employing 81,675 persons, or 1,597 more than in the preceding month. Building, highway and railway construction, coal-mining and services recorded heightened activity at the beginning of August, 1936; within the manufacturing group, iron and steel works showed moderate increases, but fish-preserving and textile factories were slackier, the losses being

mainly seasonal in character. Logging also reported a decided contraction, resulting from between-seasonal dullness. The general index, at 113.9, was over seven points higher than at the same date in 1935, when little general change had been indicated; it was also higher than at the beginning of August in any other year since 1930. The 676 employers reporting for August 1, 1935, had 76,197 persons on their payrolls.

*Quebec.*—A moderate decline was shown in Quebec, according to returns from 2,312 establishments with 280,344 workers, as against

For August 1 of last year, 2,233 employers had reported 267,275 workers, as compared with 260,442 at July 1. The manufacturing and non-manufacturing industries had shared in the improvement then indicated.

*Ontario.*—Industrial employment in this province showed a further betterment, the 4,317 firms co-operating at August 1 having 413,724 employees, or 3,530 more than at July 1. The gain compared favourably with the loss recorded, on the average, in the years since 1920. Most of the advance occurred in mining, transportation and construction, while

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

280,973 at July 1. The level of employment was higher than at August, 1935, when an advance had been made; the index at the latest date, standing at 101.3, was rather more than four points above that for the same month of last summer. Mining, local transportation, building and railway construction and hotels and restaurants reported increased employment at the date under review, while there were reductions in manufacturing as a whole, in logging, shipping and retail trade; within the manufacturing division, there were considerable gains in leather, vegetable food, pulp and paper and electric current plants, but lumber, textile and some other divisions were slacker.

services were also somewhat busier. On the other hand, manufacturing, as a whole, logging and retail trade were slacker; within the group of factory employment, iron and steel showed pronounced seasonal curtailment, but food, lumber, pulp and paper, rubber, tobacco and beverage, electric current, non-ferrous metal and some other divisions afforded greater employment. Employment at August 1, 1935, had shown a decline as compared with the preceding month, and the index number then was several points lower, standing at 102.4, as compared with 107.1 at the latest date. Returns had been tabulated for the beginning of August of last year from 4,119 employers with 392,517 persons on their payrolls, a

number slightly smaller than in the preceding month.

*Prairie Provinces.*—The situation in the Prairie Provinces continued to improve; the 1,428 establishments furnishing data had 131,706 workers, as compared with 129,260 at the beginning of July. There were general gains, heightened activity being indicated in manufacturing, mining, communications, highway construction, transportation, services and trade, while employment in logging showed little change on the whole. The level of employment was higher than at August 1 of last year, the index standing at 103.9 compared with 98.7 at the same date in 1935, when a total of 1,361 firms had reported an aggregate staff of 124,672 persons, or 3,014 more than at July 1, 1935.

*British Columbia.*—Further marked expansion was registered in British Columbia, mainly in manufacturing, while transportation also showed considerably heightened activity, and there were moderate gains in trade, services, mining and communications. Logging and

highway construction, however, were slacker. Within the manufacturing division, the greatest gains occurred in fish and fruit and vegetable canneries. Returns were compiled from 1,047 firms employing 91,115 persons, or 2,782 more than in the preceding month. A much larger increase had been indicated at the beginning of August of last year, but the index was then slightly lower than at the latest date, when it was also higher than at August 1 in any of the preceding four years. The 998 employers co-operating at that date in 1935 had reported 89,279 on their payrolls, as against 83,116 in the preceding month.

### Employment by Cities

Employment increased in five of the eight cities for which separate tabulations are made; Quebec City, Hamilton, Windsor, Winnipeg and Vancouver showed improvement, while in Montreal, Ottawa and Toronto curtailment was indicated.

*Montreal.*—There was a decline in Montreal at the date under review, for which the 1,340

Relative weight of Employment by Economic Areas as at Aug. 1, 1936.....	100.0	8.2	28.1	41.4	13.2	9.1

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

co-operating firms reported a combined payroll of 138,226 employees, or 1,838 fewer than at July 1. Manufacturing, road construction, shipping and retail trade showed contractions, while local and steam railway operation afforded greater employment. Within the manufacturing group, textiles were seasonally quiet and there were also losses in food and iron and steel plants, while leather and some other factories reported improvement. Activity was greater than at August 1, 1935, although an increase had then been indicated.

*Quebec.*—Improvement was reported in Quebec City, mainly in manufacturing and services. Statements were received from 168 employers whose staffs aggregated 12,844 workers, compared with 12,539 in the preceding month. A rather smaller gain had taken place at August 1 of a year ago, but the index was then a few points higher.

*Toronto.*—There was a slight falling off in activity in Toronto, according to data from 1,466 firms employing 125,094 persons, or 263 fewer than at the beginning of July. The

decline was largely seasonal, employment having been reduced at August 1 in twelve of the fifteen years for which statistics are available; the contraction this year was decidedly smaller than at the same date in 1935, being also less than the average loss recorded at August 1 in the period, 1922-1935. The index was higher than at the beginning of August in any of the years since 1931. Manufacturing showed a small decline as compared with July 1, there being reductions in textile, iron and steel and some other factories, but increases in non-ferrous metal, printing and publishing, food and other works. Trade was affected by mid-summer dullness, and the service division also released help, while transportation and construction showed improvement.

*Ottawa.*—Employment in Ottawa declined, 335 persons being released from the forces of the 191 co-operating employers, who had 14,099 workers at August 1. There was a gain in transportation, but trade, construction and manufacturing were slacker. Employment at

Relative Weight of Employment by Cities as at Aug. 1, 1936.....	13.8	1.3	12.5	1.4	3.2	1.6	4.0	3.5

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

the beginning of August, 1935, had also decreased, but the index then was rather lower.

*Hamilton.*—There were further moderate additions to staffs in Hamilton, 281 establishments reporting 32,065 persons on their pay lists, as against 31,957 in their last return. Manufacturing showed a minor increase, mainly in food production, while other industries reported little general change. Employment was more active than at the same date of last year, although a larger advance had then been noted.

*Windsor.*—The trend of employment in Windsor was upward; statistics were received from 172 firms employing 15,684 workers, or 318 more than at July 1. Automobile and other iron and steel works reduced their staffs, but food and other manufacturing establishments and trade afforded more employment. A large decline had been shown at August 1, 1935, as compared with the preceding month, and the index then was between eight and nine points lower than at the date under review.

*Winnipeg.*—A further increase was indicated in Winnipeg, according to 476 firms who had 40,256 employees, as compared with 39,808 at the beginning of July. Little general change took place in manufacturing as a whole, while trade and some other divisions showed moderate improvement. A favourable trend had also been in evidence at the same date of last year, but employment was then at a rather lower level.

*Vancouver.*—In Vancouver, manufacturing, transportation and trade afforded greater employment. Returns were compiled from 433 employers with 35,048 persons on their staffs, as compared with 34,034 in the preceding month. A smaller gain had been indicated at August 1, 1935, and the index number was then between seven and eight points lower than at the latest date, when it stood at 109.2.

Index numbers of employment by cities are given in Table 2.

### Employment by Industries

*Manufacturing.*—Further improvement took place at August 1 in manufacturing establish-

Relative Weight of Em- ployment by Industries as at Aug. 1, 1936.....	100.0	53.2	2.4	6.4	2.2	10.6	12.1	3.0	10.1

**NOTE.**—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

ments, 5,758 of which reported 531,089 operatives on their payrolls, as compared with 529,726 at July 1. Employment in this group has, on the average, shown a very slight advance at August 1 in the experience of the years since 1920; the increase this year approximated the average, but was smaller than that noted at the beginning of August in 1935. The crude index stood at 104.9 (the highest since October 1, 1930), while in the preceding month it was 104.7, and at August 1 in other years of the record was as follows: 1935, 99.8; 1934, 94.2; 1933, 85.2; 1932, 82.6; 1931, 94.7; 1930, 110.2; 1929, 121.6; 1928, 115.2; 1927, 107.0; 1926, 103.6; 1925, 95.8; 1924, 93.3; 1923, 101.2; 1922, 92.9 and 1921, 88.0. After correction for seasonal variation, the index at 101.9, was unchanged from the preceding month.

The firms reporting for August 1, 1936, showed the seventh consecutive gain recorded in as many months; during this period, the

co-operating manufacturers have enlarged their staffs by over 42,000 persons, while the index has risen by rather better than eight points since the opening of the year. It is also noteworthy that the index at the beginning of August was 5.1 per cent higher than at August, 1, 1935, while it was nearly 41 per cent higher than the January 1, 1933, index of 74.4, the low point in manufacturing employment in this record of nearly sixteen years.

Increased activity was indicated at the date under review in the leather, lumber, musical instrument, animal and vegetable food, pulp and paper, rubber, tobacco and beverage, electric current, non-ferrous metal and mineral product industries; the seasonal gains in fish and fruit and vegetable canning were most extensive. On the other hand, declines took place in textile and iron and steel plants, where they were seasonal in character. For August 1, 1935, returns had been compiled from 5,569 manufacturers with 501,930

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	Aug. 1, 1936	July 1, 1936	Aug. 1, 1935	Aug. 1, 1934	Aug. 1, 1933	Aug. 1, 1932	Aug. 1, 1931
<b>Manufacturing</b> .....	53.2	104.9	104.7	99.8	94.2	85.2	82.6	94.7
Animal products—edible.....	2.8	142.5	134.4	142.3	132.6	129.6	113.3	112.2
Fur and products.....	.2	94.0	97.1	100.3	83.6	104.1	82.0	94.0
Leather and products.....	2.2	108.2	106.0	107.4	99.3	98.9	88.8	90.6
Boots and shoes.....	1.5	110.8	106.3	111.2	105.3	106.9	97.3	99.7
Lumber and products.....	4.6	87.4	86.8	82.6	74.9	67.3	59.8	81.2
Rough and dressed lumber.....	2.8	83.8	81.3	78.6	69.9	60.7	51.8	74.4
Furniture.....	.7	83.1	81.8	76.6	70.1	67.2	62.4	91.2
Other lumber products.....	1.1	102.2	108.2	99.7	94.5	88.2	82.2	93.9
Musical instruments.....	.1	49.6	44.7	41.1	41.9	24.5	34.9	56.2
Plant products—edible.....	3.5	120.3	112.7	114.3	115.6	104.4	103.6	108.9
Pulp and paper products.....	6.3	104.3	102.4	98.3	95.8	88.4	86.6	97.4
Pulp and paper.....	2.9	98.3	95.0	90.3	89.1	77.3	73.1	87.3
Paper products.....	1.0	121.4	120.6	110.4	104.6	100.1	94.0	100.1
Printing and publishing.....	2.4	106.4	105.8	104.8	101.5	99.2	102.2	110.0
Rubber products.....	1.3	98.7	97.3	88.2	94.1	81.0	80.7	95.8
Textile products.....	9.8	113.7	115.9	109.9	106.0	97.7	91.8	92.3
Thread, yarn and cloth.....	3.8	129.1	131.1	128.0	123.3	109.9	101.2	93.9
Cotton yarn and cloth.....	1.8	91.1	94.5	90.6	90.8	79.9	76.0	77.0
Woolen yarn and cloth.....	.8	140.5	135.4	131.1	120.8	119.0	101.5	103.1
Silk and silk goods.....	.9	496.8	507.8	506.1	478.3	384.4	358.0	319.3
Hosiery and knit goods.....	2.0	120.2	122.3	117.1	114.8	109.9	103.5	100.7
Garments and personal furnishings	3.0	101.6	104.4	94.3	90.8	85.6	81.8	90.0
Other textile products.....	1.0	93.2	95.7	92.7	86.8	78.1	75.2	80.9
Plant products (n.e.s.).....	1.6	118.3	111.6	117.9	111.2	109.6	110.4	115.7
Tobacco.....	.8	100.9	93.6	103.3	101.2	105.1	106.3	102.0
Distilled and malt liquors.....	.7	143.8	137.9	135.4	124.3	115.9	115.2	135.2
Wood distillates and extracts.....	.1	131.6	129.6	101.2	116.1	95.9	67.1	97.6
Chemicals and allied products.....	1.1	138.3	139.5	128.7	117.6	111.6	105.9	110.3
Clay, glass and stone products.....	1.0	88.4	87.9	83.6	76.6	63.8	71.2	109.1
Electric light and power.....	1.5	122.3	118.3	115.4	113.9	111.7	116.9	131.4
Electrical apparatus.....	1.7	120.8	128.4	118.6	103.7	87.4	105.7	131.3
Iron and steel products.....	11.1	85.5	89.3	81.0	73.7	63.0	64.3	80.7
Crude, rolled and forged products.....	1.3	107.3	104.6	100.6	88.3	66.9	54.2	87.9
Machinery (other than vehicles).....	1.1	109.9	105.6	92.6	81.0	65.4	72.5	95.1
Agricultural implements.....	.4	51.6	63.1	59.1	39.4	35.2	23.4	34.7
Land vehicles.....	4.8	78.8	86.4	77.6	74.0	66.4	69.1	76.6
Automobiles and parts.....	1.4	99.5	124.2	109.2	99.2	73.3	72.5	52.9
Steel shipbuilding and repairing.....	.2	67.4	64.1	62.5	47.5	43.2	69.8	80.5
Heating appliances.....	.5	112.8	108.2	99.6	89.2	71.0	64.3	96.1
Iron and steel fabrication (n.e.s.).....	.6	90.1	87.5	76.3	65.5	49.3	61.6	115.3
Foundry and machine shop products.....	.5	93.2	92.2	87.2	80.1	62.3	71.0	80.2
Other iron and steel products.....	1.7	89.8	90.3	80.9	76.8	67.8	67.7	86.6
Non-ferrous metal products.....	2.2	137.3	135.1	122.3	110.2	89.5	78.3	111.2
Non-metallic mineral products.....	1.5	143.6	142.2	140.3	137.6	125.7	120.6	129.2
Miscellaneous.....	.6	133.1	132.3	119.3	114.8	96.3	97.2	108.1

<sup>1</sup> The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

employees, while in the preceding month they had 495,125 persons on their payroll.

*Animal Products.*—Fish-canning, dairy and meat-preserving factories registered gains, those in the first-named being considerable and resulting in a large increase over July 1 in the animal food group as a whole. Statistics were received from 318 firms employing 27,640 workers at August 1, as compared with 25,958 in the preceding month. The trend at August 1 in other years of the record has frequently been downward; the index at the date under review, at 142.5, was practically the same as at the beginning of August in 1935, but was higher than at the same date in any other year of the record.

*Leather and Products.*—Expansion was shown in employment in the leather group, 455 persons being added to the staffs of the 295 co-operating manufacturers, who employed 22,118 at August 1. Most of the improvement occurred in shoe factories in Quebec. A larger gain had been reported by the firms making returns for the same date a year ago, when the index of employment was fractionally lower.

*Lumber and Products.*—Rough and dressed lumber mills were decidedly busier, and there was also an increase in furniture factories, while other divisions reported moderate curtailment. The lumber industry as a whole registered an advance, the payrolls of the 831 firms furnishing data aggregating 46,237 operatives, as against 45,827 in their last report. There were increases in Ontario and British Columbia. Activity in the group as a whole was greater than at August 1, 1935, although a larger gain had then been recorded.

*Musical Instruments.*—Employment in musical instrument factories was better than in the preceding month, being also at a higher level than in the corresponding month of last year. Statements were received from 35 manufacturers who had enlarged their payrolls by 141 persons to 1,417 at August 1, 1936.

*Plant Products, Edible.*—Important additions to staffs were registered in fruit and vegetable canneries, while flour, bakery, confectionery and some other classes in the vegetable food group were also busier; 459 employers reported 34,709 workers, or 2,225 more than at the beginning of July. The increase took place largely in Ontario and British Columbia, although all provinces but the Maritimes showed improvement. Employment was in greater volume than at August 1, 1935, when a larger advance had been indicated.

*Pulp and Paper Products.*—Pulp and paper mills reported considerably heightened activity, and there was also improvement in paper

products and printing and publishing. Statistics were received from 600 manufacturers whose payrolls were increased by 1,168 persons to 63,448 at August 1. Most of the advance was in Quebec and Ontario. A rather smaller gain had been noted in the corresponding month last summer, when the index was lower, standing at 98.3, as compared with 104.3 at August 1, 1936.

*Rubber Products.*—There was an increase in rubber works, 52 of which had 12,577 persons on their payrolls, compared with 12,402 at July 1. The advance (which took place chiefly in Ontario), compared favourably with the loss noted at the beginning of August of a year ago, when the level of employment was decidedly lower.

*Textile Products.*—Most divisions of the textile group showed seasonal curtailment, that in the garment, hosiery and knitting, cotton and silk groups being most marked; on the other hand, woollen mills reported greater activity. The 1,023 co-operating textile manufacturers employed 97,598 persons, as compared with 99,321 at July 1. Most of the reduction was in the Maritime Provinces and Quebec. Smaller decreases had been noted at the beginning of August, 1935, but the index then stood at 109.9, compared with 113.7 at the date under review.

*Tobacco, Distilled and Malt Liquors.*—Data were received from 180 establishments in these industries, whose payrolls aggregating 16,027 at August 1, showed an increase of 893 over July 1. There were gains in beverage and tobacco factories. The index at the same date last year was fractionally lower than at the date under review.

*Chemicals and Allied Products.*—A small contraction was reported in chemical plants at the beginning of August, 95 persons having been released since the preceding month from the payrolls of the 202 co-operating manufacturers, who employed 11,372 workers. The index was higher by nearly ten points than at August 1, 1935, when a rather larger reduction had been indicated.

*Clay, Glass and Stone Products.*—Little general change was reported in the building material industries, according to 205 employers with 9,799 workers, or practically the same number as in their last report. Employment was in rather greater volume than at the same date last summer, when additions to staffs had been made.

*Electric Light and Power.*—Considerable improvement was noted in electric current works, 97 of which reported 15,460 employees, compared with 14,941 at July 1. The index number at the date under review was several

points higher than at August 1, 1935, when a smaller gain had been recorded.

**Electrical Apparatus.**—Employment in 127 electrical apparatus plants showed a minor decrease at the beginning of August; they employed 16,603 operatives, or 117 fewer than in the preceding month. The situation was better than at August 1 of last year, although an advance had then been indicated.

**Iron and Steel Products.**—Crude, rolled and forged, steel shipbuilding, heating appliance, iron and steel fabrication and some other factories reported improvement, while land vehicle, agricultural implement and foundry and machine shops showed declines, those in automobile factories being pronounced. A combined labour force of 111,305 persons was indicated by the 850 co-operating manufacturers, who had 116,148 at July 1. Firms in Ontario recorded the largest losses, while the trend was upward in the Maritime Provinces and British Columbia. A smaller decline had been noted at the beginning of August in 1935; the index then, however, was between four and five points lower than at the date under review.

**Non-ferrous Metal Products.**—Further improvement was recorded in this group at August 1, according to the 169 firms furnishing data, who employed 21,851 workers, compared with 21,512 in the preceding month. Most of the gain occurred in the smelting and refining division. Employment was in much greater volume than at August 1 of a year ago, when little general change had been indicated as compared with the preceding month.

**Mineral Products.**—Statistics tabulated from 141 manufacturers of mineral products showed that they employed 14,497 workers, or 128 more than in their last report. The index was rather higher than at the same date in 1935, when an increase had also been indicated.

### Logging

Seasonal dullness affected employment in logging camps in all provinces. Statements were tabulated from 309 firms throughout the Dominion, employing 24,059 persons, or 2,373 fewer than in the preceding month. Smaller losses had been reported at August 1, 1935, but the index then stood at 79.0, as compared with 85.0 at the date under review; the latter index is higher than at the beginning of August in other years for which data are available.

### Mining

**Coal.**—There was an increase of 499 employees in the staffs of the 100 operators furnishing returns, bringing them to 23,132

at August 1, 1936. Improvement was indicated in both Eastern and Western coal fields. A similar gain on the whole had been registered at the same date of last year, when the index was slightly lower.

**Metallic Ores.**—An important advance was recorded in metallic ore mines, in which employment was decidedly more active than at the beginning of August of last year. Returns were received from 198 firms with 32,279 workers, as compared with 31,147 in their last report. An upward trend was shown in Quebec, Ontario and British Columbia.

**Non-Metallic Minerals (Other than Coal).**—A further advance was noted in this division, in which 85 employers enlarged their payrolls by 253 persons to 8,190 at the beginning of August. Employment was at a higher level than in the same month last summer, or indeed, than in August of any other year since 1930.

### Communications

There was an increase in the personnel of telephone and telegraph companies at August 1; the communication firms co-operating with the Dominion Bureau of Statistics had 22,280 employees, as against 21,815 in the preceding month. The number engaged in this group was greater than at August 1 of a year ago, when a smaller gain had been noted.

### Transportation

**Street Railway and Cartage.**—An advance was registered in this division, according to data received from 227 employers with 26,887 workers, as against 26,376 at July 1. A rather larger increase had been recorded at August 1, 1935, when the index of employment was a little lower.

**Steam Railway Operation.**—The trend of employment in steam railway operation was favourable in Ontario and the Western provinces; the 101 companies and divisional superintendents furnishing data throughout the Dominion reported 61,849 employees, compared with 60,426 in their last report. A more extensive increase had occurred at the same date in 1935, but the index was then some three points lower.

**Shipping and Stevedoring.**—Statements were tabulated from 109 companies in this group, employing 17,181 workers, or 120 fewer than at July 1, 1936. There were gains in Ontario and British Columbia, but the tendency was downward in the Maritime Provinces and Quebec. A general advance had been noted at the beginning of August a year ago, but employment in shipping was then not quite so active.

### Construction and Maintenance

*Building.*—Considerable increases were again reported in building construction, 698 contractors adding 2,418 persons to their staffs, bringing them to 23,335 at the beginning of August. There were advances in all but the Prairie Provinces. Employment was rather slacker than in the same month of 1935, although the improvement then indicated was on a smaller scale.

*Highway.*—The number engaged on highway construction and maintenance showed an increase in all provinces except British Columbia. Data were received from 366 employers with 56,402 workers on their pay-rolls, as compared with 54,891 at the beginning of July. A gain had also been noted at August 1, 1935; employment on road work was then in much greater volume.

*Railway.*—Continued gains were recorded in this group at August 1, 1936, when 32 companies and divisional superintendents reported that they had 41,253 men on their staffs, compared with 38,872 in the preceding month. There were increases in all provinces except British Columbia. The index number was many points higher than at the beginning of August of a year ago, when a falling-off had been noted.

## (2) Unemployment in Trade Unions at the Close of July, 1936

The term unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle owing to illness are not considered as unemployed. Unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The upward movement of employment among local trade union members indicated during both May and June continued throughout July according to the reports tabulated from 1,791 labour organizations, with a total of 178,583 members. Of these, 22,305 were without work on the last day of the month, a percentage of 12.5 as contrasted with 13.9 per cent in June. Heightened activity was also noted from July of last year when 15.1 per cent of idleness was recorded. Ontario and Alberta unions registered gains in available work from June of around 3 per cent, the garment trades in the former province ac-

### Services

Continued gains occurred in the service group, mainly in hotels and restaurants; 469 firms employed 29,576 persons, compared with 28,691 at the beginning of July. Rather more pronounced improvement had been recorded at August 1, 1935; the level of employment was then lower.

### Trade

There was a seasonal falling-off in employment in retail trade, but wholesale houses were more active, according to 1,258 trading establishments, which employed 101,052 workers, as compared with 101,674 at July 1. Ontario reported most of the decline in the trade group as a whole. Greater seasonal losses had occurred at the beginning of August last year, and the index then was several points lower.

### Tables

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables, in which the columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

counting chiefly for the change, while in the latter the coal mines were the determining factor in the better situation apparent. The tendency in Nova Scotia, New Brunswick, Manitoba and British Columbia was also toward increased employment though the variations from June were but nominal. On the contrary, employment for Saskatchewan and Quebec members eased off very slightly. As in the previous comparison responsibility for the decidedly better conditions reflected in Alberta from July of last year rested with the coal mines which afforded a much better volume of work during the month under review. In Ontario, Manitoba and British Columbia improvement of more moderate proportions was recorded, the garment trades in the first two provinces named contributing largely to the increase, while in British Columbia the building trades particularly provided a greater volume of work. In Nova Scotia, New Brunswick and Saskatchewan only slight gains in available employment were manifest. Quebec unions reported an almost unchanged situation from July a year ago though the trend was toward lessened activity.

Each month the records of unemployment among local trade unions in the largest city

in each province, with the exception of Prince Edward Island, are tabulated separately. Toronto unions reported a noteworthy increase in employment during July from the previous month, and in Saint John gains of lesser degree were indicated. Conditions in Winnipeg and Vancouver were but nominally better than in the preceding month. On the contrary, Regina unions showed a moderate slowing up in industrial activity, and in Edmonton, Montreal and Halifax employment was somewhat retarded. A considerably greater volume of work was afforded Edmonton members than in July of last year, and in Toronto and Halifax also, marked gains were

the previous month or July of last year as shown by the reports forwarded by 496 local unions, with an aggregate of 58,295 members. Of these 6,531 or a percentage of 11.2 were out of work on the last day of the month compared with percentages of 13.7 at the close of June and 15.6 in July, 1935. Garment and hat, cap and glove workers, and metal polishers were much busier during the month reviewed than in June, and among fur workers and cigar makers more moderate expansion was noted. Employment for jewellery, leather and brewery workers, printing tradesmen, and bakers and confectioners also tended upward though the changes were very slight. On the

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

indicated. Winnipeg and Vancouver unions recorded improvement of somewhat smaller proportions, and in Saint John and Montreal the increases in activity noted were rather small. A favourable trend of employment was also reflected by Regina members though the change from July last year was fractional.

From the chart which accompanies this article and traces the course of unemployment by months from January, 1930, to date, it will be noticed that the curve again projected downward during July, continuing the favourable movement of the previous two months. At the close of the month the curve rested at a point below that of July last year, denoting a greater employment prevalence during the month under survey.

Activity in the manufacturing industries was better maintained during July than in either

other hand, glass workers, whose membership was small, showed a pronounced percentage drop in employment from June. Retarded activity, of considerably lesser degree, was reflected by butchers and meat cutters, and textile and carpet workers, while the situation for iron and steel, and wood workers, and general labourers declined by less than one per cent. Employment for papermakers remained at the same level as in June. Marked improvement over July of last year was evident among textile and carpet, hat, cap and glove, and fur workers, and meat cutters and butchers during the month under review, and conditions were considerably better for garment, and cigar and tobacco workers. Advances, of more moderate proportions, were indicated by iron and steel workers, and bakers and confectioners. Gains, on a small scale,

occurred among printing tradesmen, paper-makers and jewellery workers. Glass workers and metal polishers, however, showed a large increase in slackness from July, 1935, and among leather and wood workers noteworthy recessions were apparent. Activity for brewery workers and general labourers, however, declined very slightly.

The 46 unions of coal miners making returns for July, with a membership total of 14,113 persons showed that 1,748 or a percentage of 12.4 were out of work on the last day of the month contrasted with 15.0 per

cent in June. The Alberta and Nova Scotia coal fields afforded a better volume of work than in June, the improvement in Alberta being the more pronounced. In British Columbia the situation remained much the same with a slight tendency toward retarded activity in July. Considerably better conditions prevailed in the coal mining industry than in July of last year when 19.1 per cent of the members reported were out of work, Nova Scotia, Alberta and British Columbia members all participating in this better movement though Alberta unions, as in the previous comparison, showed the greatest expansion.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	3.1	2.0	3.4	2.7	2.1	3.2	2.0	7.9	3.4
Average 1920.....	1.8	2.0	7.2	3.4	3.1	3.2	2.8	11.2	4.9
Average 1921.....	11.3	8.5	16.9	9.7	8.5	7.8	7.8	23.5	12.7

July, 1936.....	6.2	6.8	19.2	9.9	8.3	7.4	14.4	9.7	12.5

A somewhat higher level of activity was manifest in the building and construction trades during July than in the previous month, and improvement of substantial proportions was evident from July last year. This was apparent from the returns tabulated from 196 local unions including 21,287 members, 7,963 of whom were reported out of work on the last day of the month, a percentage of 37.4 contrasted with percentages of 40.5 in June and 46.3 in July a year ago. The majority of trades shared in the advancement shown from June, bridge and structural iron workers, tile layers, lathers and roofers, and steam shovelmen showing extensive percentage gains, but as their combined membership was small they did not materially affect the percentage in the building trades as a whole. Appreciable betterment in the situation was also reflected by painters, decorators and paperhangers, plumbers and steamfitters, and hod carriers and building labourers. Among carpenters and joiners the expansion indicated was on a more moderate scale, while electrical workers and granite and stonecutters registered but slight gains. Bricklayers, masons and plasterers alone, showed some falling off in available work. When making a comparison with the returns for July of last year decided employment revival was indicated among electrical workers, painters, decorators and paperhangers, plumbers and steamfitters, steam shovelmen, and bridge and structural iron workers during the period surveyed, and noteworthy improvement was apparent among carpenters and joiners, and hod carriers and building labourers. Increases in activity of minor importance were recorded by bricklayers, masons and plasterers. Granite and stonecutters and tile layers, lathers and roofers, however, suffered severe employment losses from July a year ago.

The situation in the transportation industries, as a whole, during July remained identical with that of the previous month, the 808 associations from which reports were received with a membership numbering 58,643 persons, showing an unemployment percentage of 6.3,

the same as was indicated in June. Fluctuations occurred, however, in the various groups, the steam railway division which constituted nearly 78 per cent of the entire membership reported in the transportation industries, showing a fractional rise in activity, which was offset by the recessions apparent in the navigation division, and among street and electric railway employees, and teamsters and chauffeurs. Very slight variation was indicated in the volume of work accorded in the transportation industries from July of last year when unemployment stood at 6.7 per cent, steam railway employees accounting entirely for this more favourable tendency. Conditions were considerably slacker, however, among navigation workers than in July last year, while teamsters and chauffeurs, and street and electric railway employees showed curtailment of activity on a small scale.

Retail shop clerks indicated a slight falling off in employment during July from the previous month, though the situation was better than in July a year ago. This was evident from the reports furnished by 4 associations, including a total of 1,368 members, 64 or 4.7 per cent of whom were idle on the last day of the month as compared with 3.5 per cent in June and 9.1 per cent in July, 1935.

Among civic employees the tendency was toward greater activity during July than in the preceding month, though the change was but nominal, and advancement of slightly greater proportions was shown from July last year. Reports were tabulated from 78 associations of these workers, with a total of 8,537 members, 155 of whom were idle at the end of the month, a percentage of 1.8 in contrast with 2.0 per cent in June and 3.1 per cent in July a year ago.

The 122 associations in the miscellaneous group of trades from which reports were received during July, combining a membership

of 5,762 persons, showed that 587 or a percentage of 10.2 were out of work on the last day of the month, the same percentage as was recorded in June. Hotel and restaurant, and theatre and stage employees indicated an upward trend of activity, which was counteracted by the less favourable movement noted among barbers, stationary engineers and firemen, and unclassified workers. The changes throughout, however, were very slight. Compared with the situation in the miscellaneous groups of trades, as a whole, for July of last year when 12.8 per cent of idleness was recorded, hotel and restaurant, and theatre and stage employees reported a considerable increase in work afforded during the month under review, and slight gains were apparent among barbers. Stationary engineers and firemen and unclassified workers, however, registered minor recessions in activity.

Fishermen with 3 unions reporting a membership of 608 persons during July showed an unemployment percentage of 0.8, contrasted with 1.7 per cent of idleness at the end of June, and 0.9 per cent in July, 1935.

Lumber workers and loggers indicated a slightly better situation during July than in the previous month, and improvement on a larger scale was reflected from July last year. For the month reviewed reports were tabulated from 4 unions of these workers with 999 members, 2.0 per cent of whom were idle at the end of the month in comparison with percentages of 3.8 in June and 7.3 in July a year ago.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1935 inclusive, and also the percentages of unemployment by provinces for July of each year from 1919 to 1933 inclusive, and for each month from July, 1934, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for July, 1936

The volume of business transacted by the offices of the Employment Service of Canada during the month of July, 1936, as indicated by the average daily placements effected, showed a gain of nearly 5 per cent over that of the previous period, but a decrease of over 14 per cent from that of the corresponding month last year. All industrial divisions, except logging, transportation, services and trade, showed gains over June, the highest being in farming and construction and maintenance, while the heaviest declines were recorded in services and trade, the changes in other groups being nominal only. In comparison with

July, 1935, a very heavy loss was registered in construction and maintenance, under which division nearly all relief placements were made, and a marked reduction was likewise reported in farming, but the decrease in trade was very small. These losses were partially offset, however, by moderate gains in services, logging, manufacturing and mining.

The accompanying chart shows the trend of employment since January, 1934, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations

Service of Canada, each year, from January, 1926, to date:—

Year	Placements		
	Regular	Casual	Totals
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367
1930.....	187,872	180,807	368,679
1931.....	175,632	295,876	471,508
1932.....	153,771	198,443	352,214
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936 (7 months).....	108,297	70,482	178,779

#### NOVA SCOTIA

Employment opportunities, as indicated by orders received at Employment Offices in Nova Scotia during July, were nearly 8 per cent less favourable than in the preceding month and nearly 25 per cent below the corresponding month of last year. Placements also were over 6 per cent less than in June and nearly 24 per cent below July, 1935. The reduction in placements from July of last year was due to declines in construction and maintenance, logging, services and transportation, offset in part by a small gain in farm placements. The changes in other groups were unimportant. Placements under construction and maintenance numbered 467 and in services 237. Of the latter, 180 were household workers. During the month 304 men and 94 women were placed in regular employment.

#### NEW BRUNSWICK

During July, positions offered through Employment Offices in New Brunswick were 21 per cent higher than in the preceding month and nearly 4 per cent above the corresponding month of last year. There was a gain also in placements of over 27 per cent when compared with June and of nearly 5 per cent in comparison with July 1935. There were no changes of importance when comparing placements by industrial groups during the month under review with July of last year, although gains were in excess of losses. Construction and maintenance showed the largest increase. Industrial divisions in which most of the placements were effected during the month were: manufacturing 49, logging, 42, construction and maintenance, 318, and services, 521, of which 407 were household workers. Placements in regular employment numbered 378 of men and 85 of women.

#### QUEBEC

There was a decrease of nearly 16 per cent in the number of positions offered through Employment Offices in the Province of Quebec during July, when compared with the preceding month and of over 20 per cent in comparison with the corresponding month of last year. There was a decrease also in placements of nearly 11 per cent when compared with June and of nearly 21 per cent in comparison with July, 1935. A substantial decline under construction and maintenance, due to a reduction in relief placements, accounted for the decrease from July of last year. This loss was partly offset by gains in nearly all other industrial groups, the largest increases being in services, logging and manufacturing. Placements by industrial divisions included manufacturing, 217, logging, 303, farming, 187, construction and maintenance, 252, trade, 76 and services, 2,249, of which 1,853 were household workers. During the month 1,090 men and 1,473 women were placed in regular employment.

#### ONTARIO

Orders received at Employment Offices in Ontario during July called for nearly 3 per cent more workers than in the preceding month, but nearly 19 per cent less than during the corresponding month of last year. There was an increase in placements of over 5 per cent when compared with June, but a decline of nearly 19 per cent in comparison with July, 1935. A large decrease in placements under construction and maintenance, when compared with July of last year, was mainly responsible for the decline under this comparison, although farm placements were considerably less and a moderate loss was reported in services. The only increase of importance was in logging. Placements by industrial divisions included: manufacturing, 494, logging, 1,183, farming, 2,271, mining, 75, transportation, 96, construction and maintenance, 5,058, trade, 198 and services, 3,325, of which 2,029 were of household workers. During the month, 6,623 men and 1,519 women were placed in regular employment.

#### MANITOBA

The demand for workers, as indicated by orders received at Employment Offices in Manitoba during July, was nearly 73 per cent higher than in the preceding month and nearly 3 per cent above the corresponding month of last year. Placements also were nearly 75 per cent higher than in June and showed a gain of nearly 1 per cent over July of 1935. Place-

ments under construction and maintenance during the month under review were considerably higher than in July, 1935, but this increase was almost entirely offset by declines in farming and services. The changes in other groups were unimportant. Industrial divisions in which most of the placements were effected during the month were: farming, 1,280, construction and maintenance, 737, and services, 615, of which 466 were of household workers. There were 1,977 men and 303 women placed in regular employment.

#### SASKATCHEWAN

During July, orders received at Employment Offices in the Province of Saskatchewan called for over 16 per cent more workers than in the preceding month and nearly 6 per cent above the corresponding month of last year. There was an increase also in placements of 12 per cent when compared with June and of nearly 26 per cent in comparison with July of 1935. The increase in placements over July of last year was mainly due to a gain under construction and maintenance, although, with the exception of a nominal decline in services, all groups showed more improvement, that in farming being the largest. Placements by industrial divisions included: farming, 988, construction and maintenance, 625, and services, 874, of which 537 were of household workers. Placements in regular employment numbered 1,496 of men and 456 of women.

#### ALBERTA

There was an increase of nearly 11 per cent in the number of positions offered through the Employment Offices in Alberta during July, when compared with the preceding month, but a loss of nearly 20 per cent in comparison with the corresponding month of last year. Placements were 15 per cent higher than in June, but nearly 22 per cent below July, 1935. With the exception of a large decrease under construction and maintenance and a nominal decline in farming, all industrial divisions showed increases in placements over July of last year, the largest being in logging and services. These gains, however, were more than offset by the loss in construction and maintenance, under which group a large number of relief placements were made in July, 1935. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 67, logging, 180, farming, 756, construction and maintenance, 488, and services, 592, of which 449 were household workers. During the month 1,426 men and 327 women were placed in regular employment.

#### BRITISH COLUMBIA

Opportunities for employment, as indicated by orders received at Employment Offices in British Columbia during July, were over 7 per cent better than in the preceding month, but nearly 18 per cent less favourable than during the corresponding month of last year. There was a gain of nearly 8 per cent in placements when compared with June, but a loss of over 18 per cent in comparison with July, 1935. As in Alberta, a large reduction in relief placements under construction and maintenance accounted for the decline from July of last year, as all other groups, except logging, showed improvement. The most important gains were in services, farming and manufacturing. Placements by industrial divisions included: manufacturing, 95, logging, 120, farming, 331, mining, 161, construction and maintenance, 1,268, and services, 991, of which 505 were of household workers. There were 1,057 men and 337 women placed in regular employment during the month.

#### Movement of Labour

During the month of July, 1936, the offices of the Employment Service of Canada made 18,945 placements in regular employment, 11,749 of which were of persons for whom the employment found was outside the immediate territory of the offices at which they were registered. Of the latter, 903 were granted the Employment Service reduced transportation rate, 883 going to centres within the same province as the despatching office and 20 to other provinces. The reduced transportation rate, which is 2·7 cents per mile with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at the Offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Taking advantage of the Employment Service reduced transportation rate in Ontario during July, 493 persons proceeded to employment within the province. Of these, 348 secured their certificates at the Port Arthur office for centres within the same zone, included among whom were 306 bush workers, 18 mine workers, 9 tractor men, 4 sawmill labourers, 7 hotel workers, 2 painters and 2 restaurant cooks. From Fort William, 102 bush workers, 2 plasterers, 2 hotel workers and one bricklayer, and from Sudbury, 2 bushmen and 2 cookees were carried at the reduced rate to points within their respective zones. Travelling from North Bay, 27 pulp cutters went to Timmins and 2 log peelers within the North Bay zone. From Timmins the Fort William zone received 3 mine workers and

\* 18 Placements effected by offices since closed.

the Port Arthur zone one mining engineer. Destined to the Sudbury zone one electric welder was shipped from Kingston. In Manitoba, during July, 291 persons were transferred at the reduced rate, 271 within the province and 20 to points outside. All of these were granted their certificates for transportation at the Winnipeg office. Within the province one farm general was despatched to Brandon and 178 farm hands, 88 highway construction workers, one construction cook, one time-keeper, one marine engineer and one hotel waitress to various sections of the Winnipeg zone. The workers going outside the province were bound for the Port Arthur zone and included 16 mine employees, 2 farm hands, one bushman and one restaurant worker. Saskatchewan offices granted 4 certificates at the reduced rate during July, to teachers going to provincial points, 3 of whom were transported from Regina and one from Saskatoon to situations within their respective zones. Business transacted by Alberta offices during July involved the issue of 104 reduced rate certificates to centres within the province.

From Edmonton transfers were effected of 40 fire fighters, 21 bushmen, 10 miners, 6 carpenters, 4 labourers, 3 cooks, 3 sawmill workers, 3 farm hands, one farm domestic, 2 deck hands, 2 clerks, one fisherman, one millwright, one highway construction teamster, one engineer and one cookee to employment at points within the Edmonton zone. Travelling from Calgary within the territory covered by that city office were 4 farm hands. The Vancouver office was entirely responsible for the labour movement in British Columbia during July, which included the transfer of 11 workers. Of these 5 were miners and 2 hotel cooks conveyed to Kamloops, while one farm hand journeyed to Penticton and 2 mine cooks and one hotel cook within the Vancouver zone.

Of the 903 persons who secured Employment Service reduced transportation rate certificates during July, 338 travelled by the Canadian National Railways, 528 by the Canadian Pacific Railway, 33 by the Temiskaming & Northern Ontario Railway, 2 by the Northern Alberta Railway and 2 by the Pacific Great Eastern Railway.

#### (4) Building Permits Issued in Canada During July, 1936

The value of the building represented by the permits taken out in 58 cities during July stood at \$4,602,897, a slight increase of \$22,157 or 0.5 per cent as compared with the June, 1936, total of \$4,580,740; there was also an increase of \$206,495 or 4.7 per cent in the more significant comparison with the July, 1935, aggregate of \$4,396,402.

The value of the building authorized in the first seven months of the present year was \$22,103,317; this was considerably lower than the aggregate of \$29,036,913 reported in the period January-July, 1935, although it was decidedly higher than in the first seven months of either 1934 or 1933. The cumulative total for the same period in each of the last five years has been very much lower than in any other year on record; the wholesale prices of building materials since 1931 have also been decidedly lower than in any preceding year since 1920.

Some 50 cities furnished detailed statistics, showing that they had issued over 400 permits for dwellings valued at nearly \$1,700,000, and some 1,500 permits for other buildings estimated at over \$2,300,000. In addition, engineering projects valued at \$9,925 were undertaken by Port Arthur. In June, authority was given for the erection of some 400 dwellings and 1,800 other buildings, esti-

mated to cost approximately \$2,000,000 and \$2,400,000, respectively.

Increases over June, 1936, were reported in New Brunswick, Quebec and Manitoba, that of \$230,903 or 21.1 per cent in Quebec being greatest. The remaining provinces recorded declines, of which that of \$74,706 or 67.8 per cent in Saskatchewan was most pronounced.

In comparison with July, 1935, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba and Alberta showed increases. The gain of \$608,786 or 85.1 per cent in Quebec was most noteworthy. In Prince Edward Island, Saskatchewan and British Columbia, the authorized building had a lower valuation than in the same month of last year; the greatest decline was in British Columbia, amounting to \$1,034,933 or 68.5 per cent.

Of the larger cities—Montreal, Toronto, Winnipeg and Vancouver—Montreal and Winnipeg showed increases over June, 1936, and also as compared with July, 1935. In Toronto, the total was lower than in the preceding month, but higher than in the same month of last year, while in Vancouver, the July, 1936, authorizations were lower in value than in either June, 1936, or July, 1935.

Of the other centres, Fredericton, Moncton, Sherbrooke, Three Rivers, Westmount, Kingston, Peterborough, St. Catharines, Sarnia, York and East York Townships, Welland, Windsor, Woodstock, Edmonton and New Westminster showed gains as compared with June, 1936, and also as compared with July, 1935.

#### CUMULATIVE RECORD FOR FIRST SEVEN MONTHS, 1920-1936

The following table gives the value of the building authorized by 58 cities during July, and in the first seven months of each year since 1920, as well as index numbers for the latter, based upon the January-July total in 1926 as 100. The average index numbers of wholesale prices of building materials in the first seven months of the years since 1920 are also given, (1926 average=100).

Year	Value of permits issued in July	Value of permits issued in first seven months	Indexes of value of permits issued in first seven months (1926=100)	Average indexes of wholesale prices of building materials in first seven months (Average 1926=100)

1920.....	13,743,045	75,497,755	77.5	144.2

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, August, 1936, summarized the employment situation as follows:—

There was an improvement in the state of employment, on the whole, between June 22 and July 20. The industries mainly affected were the cotton industry, tinplate manufacture, the electric cable, apparatus, etc, industry, printing and bookbinding, the transport and distributive trades, food preparation and hotel and boarding house service. There was also a substantial reduction in the numbers unemployed in the coal mining industry, following the increase in those numbers for temporary reasons in the previous month. On the other hand, employment declined in building and public works contracting and the clothing trades, including boot and shoe manufacture.

It is estimated that, at July 20, 1936, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of agricultural workers, was approximately 10,895,000. This was 63,000 more than at June 22, 1936, and 481,000 more than at July 22, 1935. Agricultural workers became insurable at the beginning of May, but statistics of the number of such workers in employment are not yet available.

Among workpeople, aged 16-64, insured against unemployment (excluding agricultural

workers) the percentage unemployed in Great Britain and Northern Ireland, at July 20, 1936 (including those temporarily stopped as well as those wholly unemployed), was 12.7, as compared with 13.1 at June 22, 1936, and with 15.3 at July 22, 1935. In Great Britain the percentage at July 20, was 12.5, compared with 12.9 at June 22, and with 15.0 at July 22, 1935.

At July 20, 1936, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,285,805 wholly unemployed, 296,007 temporarily stopped, and 70,260 normally in casual employment, making a total of 1,652,072. This was 50,604 less than a month before and 320,869 less than a year before. The total of 1,652,072 included 1,312,527 men, 49,193 boys, 246,145 women, and 44,207 girls.

The persons on the Registers included 728,496 insured persons with claims for insurance benefit; 630,113 insured persons with applications for unemployment allowances; 181,022 insured persons (including insured juveniles under 16 years of age and insured agricultural workers) not in receipt of insurance benefit or unemployment allowances, and 112,441 uninsured persons.

In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at July 20, 1936, was 1,717,062, as compared with 1,766,372 at June 22, 1936, and 2,045,383 at July 22, 1935.

### United States

*Manufacturing Industries.*—A slight increase in employment between June and July was shown in the combined manufacturing and nonmanufacturing industries regularly surveyed by the United States Bureau of Labor Statistics, according to a recent report by Commissioner Lubin to Secretary of Labor, Frances Perkins.

The gain of approximately 2,000 workers, while small, continues the expansion which has been shown each month since March and is particularly significant when contrasted with the usual sharp recessions which characterize employment in July, the report said. Available records for the industries covered by the Bureau show that during the past 17 years increases have been shown for July in only 3 instances, namely, 1919, 1929, and 1933.

A comparison of employment and pay rolls with July 1935 in the combined industries surveyed shows a gain of nearly 1 million workers over the year interval and an increase of almost \$42,000,000 in the amount paid out in weekly wages.

Weekly pay rolls in July 1936 were approximately \$2,200,000 less than in the preceding month, due largely to inventory-taking and repairs and in some instances, vacations.

The contra-seasonal employment gain in July was fairly widespread. A rise was shown in the index of the manufacturing industries as well as in 9 of the 16 non-manufacturing industries surveyed. A seasonal increase was reported in the laundry industry. Each of the 3 utilities industries reported increases in employment and wholesale trade establishments, crude petroleum producing firms, quarries and non-metallic mines, insurance companies, and private building contractors also reported gains. An expected curtailment was shown in retail trade, year-round hotels, anthracite mining and dyeing and cleaning establishments and declines were also reported by metal and bituminous coal mines and brokerage firms.

The 0.9 per cent gain in factory employment continues the succession of increases in factory employment which have been shown each month since January of this year. The July index of employment (86.8) is higher than that for any month since October 1930. Factory pay rolls normally recede in July, due to temporary shutdowns for inventory and repairs, vacations, and to some extent, by the observance of the July 4th holiday. The decline of 1.1 per cent in factory pay rolls in July however was the smallest percentage decline for July in any of the preceding 17 years in which decreases have been reported.

The decrease this year was retarded somewhat by the policy recently adopted by some firms of extending vacations with pay. With the exception of the two immediately preceding months, the July index of factory pay rolls (77.8) stands above the level recorded in any month since October 1930.

Employment in the nondurable goods group increased 1.9 per cent. Employment in the durable goods industries declined 0.3 per cent over the month interval. The July durable goods employment index (79.7), with the exception of June 1936, is above the level of all preceding months since September 1930. The July employment index for the non-durable goods (94.4) indicates that for every thousand workers employed in the index base period (1923-25=100) 944 were employed in July 1936, while in the durable goods group a similar comparison shows that for every thousand workers employed in 1923-1925, 797 were employed in July 1936.

*Non-manufacturing Industries.*—There were nearly 61,000 fewer workers employed in July in the combined non-manufacturing industries surveyed than in the preceding month. Approximately 13,000 more workers were employed in wholesale trade establishments than in June. A net gain in employment of more than 11,000 workers was shown in the public utilities group, which is composed of telephone and telegraph, power and light and manufactured gas, and electric-railroad and motor-bus companies and laundries added over 7,500 workers to their pay rolls over the month interval. These gains combined with smaller gains in quarrying, crude petroleum producing, insurance, and private building construction industries were not sufficiently large to offset the declines in the remaining non-manufacturing industries, the largest of which was in retail trade (90,000 workers). The declines in the remaining non-manufacturing industries aggregated less than 10,000 workers, the most pronounced decline appearing in anthracite mining in which the estimated loss was 4,000 workers.

The gross value of production in the pulp and paper industry in 1935 was \$162,651,282, an increase of 6.6 per cent over 1934 and 32 per cent over 1933 when production reached its lowest level. Despite this increase, the value of the 1935 production formed only two-thirds of the peak production of 1929 when it was \$243,970,761. There were 27,836 employees and the total payroll was \$35,893,313 as compared with 26,993 in 1934 with salaries and wages amounting to \$33,307,043. Total capital invested amounted to \$545,572,938, a decrease of 1.6 per cent from the previous year.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the *LABOUR GAZETTE* for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight-Hour Day Act, 1930." This Act, however, has now in turn been superseded by The Fair Wages and Hours of Labour Act, 1935, which came into force on May 1, 1936. The clause relating to wages

and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed.

The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contract for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing fair wage conditions have recently been executed by the Government of Canada.

#### DEPARTMENT OF FISHERIES

##### *Contract in Group "A" (Construction, Repair, Demolition, etc.)*

Removal of engines and installation of new Diesel engines in Fisheries Patrol Boats *Thresher* and *Capelin*, at Meteghan, N.S. Name of contractors, Canadian Fairbanks-Morse Co., Montreal, P.Q.
